Second email Regarding Opposition to Maple Valley Park Annexation

Pamela Rose <[redacted] Fri, Jan 29, 2021 at 2:32 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "nford@arvada.org" <nford@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>

January 29, 2021 - Dear Arvada City Councilmembers,

As a concerned neighbor of the proposed development Project Indiana (Application #DA2020-01117) Maple Valley Park Annexation (Application #DA2020-0118), and Amazon Project Indiana Plan (DA#2020-0132), I am opposed to the proposed development. I respectfully ask for no heavy industrial development use on this parcel, not because I am anti-growth, but because I am an enthusiastic supporter of smart, planned urban development. My most compelling reasons include:

- **The Proposed property development is inconsistent with Arvada's Master Plan or Vision.**
- **The proposed property detention pond is annexing Jefferson County Open Space – AKA Maple Valley Park as a buffer. The developer is the only one to benefit from this allocation, it should be required to build a berm. This detention pond will filter the run-off of road chemicals used to de-ice roads, gasoline residue, rubber residue from vehicle tires, diesel, and oil residue, all from the 1500 parking space parking lot and equipment used there, which will end up in Ralston Creek. This is detrimental to wildlife and should be reconsidered as it is not the correct use for a buffer. The developer is using this land inappropriately, and this is in a 100 year FEMA Flood Plain.**
- **This development is not compatible with the surrounding residential properties. Article 1 General Provisions: 1.3. - PURPOSE AND INTENT; 1.3.4. Preserve and protect existing trees and vegetation, agricultural lands, floodplains, stream corridors, wildlife corridors, wetlands, lakes and other water bodies, significant ridgelines, and other sensitive environmental areas from adverse impacts of urban and suburban development.**
- **The proposed building height of 44 feet is not within the current building code of 35 feet and is inappropriate.**
- **For the foregoing reasons, I urge you to vote against this proposed development.**

Respectfully submitted,

Pamela Rose

January 29, 2021 - Dear Arvada City Councilmembers,

As a concerned neighbor of the proposed development Project Indiana (Application #DA2020-01117) Maple Valley Park Annexation (Application #DA2020-0118), and Amazon Project Indiana Plan (DA#2020-0132), I am opposed to the proposed development. I respectfully ask for no heavy industrial development use on this parcel, not because I am anti-growth, but because I am an enthusiastic supporter of smart, planned urban development. My most compelling reasons include:

- **The Proposed property development is inconsistent with Arvada's Master Plan or Vision.**
- **If this is approved and the planned development completed, the residential neighborhoods, open space of Maple Valley Park, Shadow Mountain and the surrounding properties will witness a dramatic increase in traffic in an already heavily congested area, which will lead to more accidents, injuries, and fatalities. This will directly impact air quality, vehicle and equipment noise, and light pollution in a primarily residential neighborhood.**
- **Insufficient road infrastructure – Nearby intersections simply cannot handle the dramatic increase in traffic that will occur if the rezoning is permitted. Indiana Street does not have traffic lights that would allow safe turning from this proposed development. The residential areas surrounding this proposed development do not allow for heavy through traffic. Additionally, the surrounding streets are narrow and do not allow for turn lanes, notably limiting traffic flow.**
- **For the foregoing reasons, I urge you to vote against this proposed development.**

Respectfully submitted,

Pamela Rose

April 20, 2021 Planning Commission Meeting - Comments on Annexation and Rezoning for Maple Valley Park

1 message

Amy C <[redacted]> Mon, Apr 19, 2021 at 11:45 PM
To: cedboardsandcommission@arvada.org

I am submitting comments regarding the Annexation and Rezoning for Maple Valley Park, (agenda items 9a/b). I am concerned about the impact of this project on wildlife in the immediate area. Arvada has done a nice job of maintaining a wildlife corridor along Ralston Creek and this development would threaten both resident and migratory animals using it. In addition to destroying the land and possible creek pollution, the negative effects of the increase in sound (https://www.nps.gov/subjects/sound/effects_wildlife.htm) and light (https://search.proquest.com/openview/f2decb732d52abd6837baa7f13bc5868/1?pq-origsite=gscholar&cbl=1536338 and https://phys.org/news/2015-03-pollution-shown-affect-growth-food.html?utm_source=TrendMD&utm_medium=cpc&utm_campaign=Phys.org_TrendMD_1) pose significant threats to wildlife.

It is likely that raptors nest in the immediate area and would be negatively impacted by this project. The eBird hotspot checklist for Maple Valley Park lists a total of 97 species observed on 206 checklists including rarities such as Winter Wren and Red-headed Woodpecker and several species of raptors including: Red-tailed Hawk, Ferruginous Hawk, Cooper's Hawk, Sharp-shinned Hawk, Swainson's Hawk, Great Horned Owl, and Eastern Screech-Owl (https://ebird.org/hotspot/L1365529). With the loss of 3 billion birds since 1970, (https://www.sciencemag.org/news/2019/09/three-billion-north-american-birds-have-vanished-1970-surveys-show) any project that has the potential to disrupt or destroy good bird habitat should be scrutinized carefully.

I believe that the risks of this project outweigh the benefits and am opposed to any development in the area until a proper wildlife census, recommended by Colorado Parks and Wildlife, has been conducted.

Thank you,

Amy Cervene
Arvada

Exhibit B- Public Comment to PC

April 20, 2021

Dear Planning Commission,

I am writing in opposition to annexing Maple Valley Park (item 9A).

As a trail user, park neighbor, open space proponent, supporter of increasing the protection of shrinking wildlife habitats, and a 25-year Jefferson County and Arvada resident, I do NOT support the annexation of Maple Valley Park. While the City of Arvada may maintain the park, I do not believe Arvada is acting with the best interest of Maple Valley Park in mind. I have included the Deed.

The park is not meant to be a buffer for a Heavy Industrial operation, which I believe this project is, nor a buffer for a Light Industrial operation. Nor is it meant to be a repository for water coming from the applicant's asphalt and concreted-over proposed site.

The Deed clearly states ". . . the only proper use, benefit and behoof of Arvada. . .Shall use said property for any purpose other than public open space, park and recreational purposes, said property shall revert to the County and this deed shall be null and void."

I also ask that you consider the letter from the Colorado Department of Wildlife that is posted on the City of Arvada Project Indiana webpage and specifically the paragraph

> *If there are any active raptor nests found within the project area or in the vicinity of the project area, CPW recommends that the developer adhere to the appropriate seasonal closures and minimize human encroachment of the active nests. Disturbance of active nests can result in nest failure. Some raptor species require larger buffer zones to minimize human encroachment than other raptor species. Seasonal closures also vary by raptor species. If the developer is unable to adhere to the appropriate seasonal closures or the development will unavoidable encroach on any active raptor nests, CPW recommends that the developer consult with the United States Fish and Wildlife Service to obtain the appropriate permit prior to beginning construction. USFWS can be reached at https://fwsepermits. servicenowservices.com/fws?id=fws_index or at (303) 236-8171.*

On Sunday night I enjoyed a late-night walk on a portion of the trail to listen to owls and could already see lights from other developments on the southside of the fence. It was depressing to think light would get even closer and more depressing, and angering, to think of the noise a 24/7 Amazon operation would bring. Arvada has already lost so much open space (agricultural and vacant land without buildings) and needs more Open Space and Parks as called for in the Parks Master Plan, don't annex this park and ruin it. Save those of who value the park from having to spend funds and energy, which could be spent in more constructive ways, on making sure Arvada enforces and patrols Amazon and perhaps even working towards having the Deed revoked.

Vote no on Arvada annexing the park.

1-3

COMMISSIONER'S DEED

THIS INDENTURE is made this 28th day of December, 1992, between the County of Jefferson, State of Colorado, a body politic and corporate, (the "County"), whose legal address is 1700 Arapahoe Street, Golden, Colorado 80419, acting by and through its duly constituted and appointed Commissioner, Marjorie E. Clement, to convey and to execute this deed, and the City of Arvada, State of Colorado, a municipal corporation ("Arvada"), whose legal address is 8101 Ralston Road, Arvada, CO 80002.

WITNESSETH

THAT WHEREAS, the Board of County Commissioners of the County of Jefferson, State of Colorado, did at a regular meeting of said Board held at the Courthouse in said County on the 14th day of December, 1992, duly adopt and pass Resolution No. CC92-1011 authorizing the conveyance of the hereinafter described real property to Arvada and did by said Resolution appoint and constitute the undersigned as Commissioner to convey and execute deed for said real property to Arvada for and on behalf of the said County of Jefferson, State of Colorado, a body politic and corporate, and did further authorize the undersigned to execute this deed and to affix the seal of said County hereto.

STATE DOCUMENTARY FEE
Exempt
JAN 11 1993

NOW, THEREFORE, FOR AND IN CONSIDERATION of the sum of Ten Dollars ($10.00) and other good and valuable consideration, in hand paid by Arvada to the County of Jefferson, State of Colorado, a body politic and corporate, receipt of which is hereby confessed and acknowledged, the undersigned, acting as Commissioner aforesaid, does by these presents remise, release, sell, convey, and quit claim unto Arvada its successors and assigns for so long as the following described property is used exclusively for public open space, park and recreational purposes and no longer, all the right, title, interest, claim and demand which said Jefferson County, State of Colorado, a body politic and corporate, has in and to the following described real property situate, lying and being in the County of Jefferson, State of Colorado:

A PARCEL OF LAND LOCATED IN THE NORTHWEST QUARTER OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST OF THE 6TH PRINCIPAL MERIDIAN, COUNTY OF JEFFERSON, STATE OF COLORADO, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT THE WEST QUARTER CORNER OF SAID SECTION 6; THENCE NORTH 01 DEGREES 10 MINUTES 00 SECONDS EAST ALONG THE WEST LINE OF THE NORTHWEST QUARTER OF SAID SECTION 6, 252.20 FEET TO THE NORTHWEST CORNER OF THAT PARCEL OF LAND RECORDED IN BOOK 2168 AT PAGE 633 OF THE JEFFERSON COUNTY RECORDS; THENCE SOUTH 88 DEGREES 48 MINUTES 00 SECONDS EAST ALONG THE NORTH LINE OF SAID PARCEL, 60.00 FEET TO THE POINT OF BEGINNING, SAID POINT BEING

ON THE EAST LINE OF THAT PARCEL OF LAND RECORDED AT RECEPTION NO. 84033382 OF THE JEFFERSON COUNTY RECORDS; THENCE NORTH 01 DEGREES 10 MINUTES 00 SECONDS EAST ALONG SAID LINE, 216.52 FEET TO THE WESTERLY EXTENSION OF THE SOUTH LINE OF MAPLE VALLEY SUBDIVISION FILING NO. 1, AMENDED; THENCE ALONG SAID WESTERLY EXTENSION AND ALONG THE SOUTHERLY LINE OF SAID MAPLE VALLEY SUBDIVISION FILING NO. 1, AMENDED THE FOLLOWING 4 COURSES:

1. THENCE SOUTH 86 DEGREES 01 MINUTES 12 SECONDS EAST, 586.75 FEET;
2. THENCE NORTH 17 DEGREES 16 MINUTES 07 SECONDS EAST, 138.57 FEET;
3. THENCE NORTH 49 DEGREES 14 MINUTES 51 SECONDS EAST, 219.93 FEET;
4. THENCE NORTH 65 DEGREES 16 MINUTES 59 SECONDS EAST, 225.23 FEET TO THE SOUTHERLY LINE OF MAPLE VALLEY SUBDIVISION FILING NO. 1 AMENDMENT NO. 3;

THENCE ALONG SAID SOUTHERLY LINE THE FOLLOWING 3 COURSES:

1. THENCE NORTH 81 DEGREES 03 MINUTES 53 SECONDS EAST, 384.59 FEET;
2. THENCE SOUTH 87 DEGREES 15 MINUTES 19 SECONDS EAST, 298.02 FEET;
3. THENCE SOUTH 86 DEGREES 43 MINUTES 19 SECONDS EAST, 0.44 FEET TO THE WEST LINE OF PARKWAY CENTER SUBDIVISION;

THENCE SOUTH 06 DEGREES 56 MINUTES 58 SECONDS EAST ALONG SAID WEST LINE, 248.59 FEET;
THENCE SOUTH 73 DEGREES 25 MINUTES 17 SECONDS WEST, 610.00 FEET;
THENCE SOUTH 68 DEGREES 42 MINUTES 57 SECONDS WEST, 590.00 FEET;
THENCE NORTH 77 DEGREES 30 MINUTES 04 SECONDS WEST, 161.57 FEET TO THE NORTHEAST CORNER OF SAID PARCEL OF LAND RECORDED IN BOOK 2168 AT PAGE 633 OF THE JEFFERSON COUNTY RECORDS; THENCE NORTH 88 DEGREES 48 MINUTES 00 SECONDS WEST ALONG THE NORTH LINE OF SAID PARCEL, 418.15 FEET TO THE POINT OF BEGINNING.

TOGETHER with all water and water rights, ditches and ditch rights, reservoirs and reservoir rights, wells and well rights, and tributary, nontributary and not nontributary groundwater on, under and appurtenant to or used on the land described herein.

TO HAVE AND TO HOLD the same, together with all and singular appurtenances and privileges thereunto belonging or in any way

thereunto appertaining, and all the estate, right, title, interest and claim whatsoever of said Jefferson County, State of Colorado, either in law or equity, to the only proper use, benefit and behoof of Arvada, its successors and assigns but if Arvada, its successors or assigns, shall use said property for any purpose other than public open space, park and recreational purposes, said property shall revert to the County and this deed shall be null and void.

Annexation of Maple Valley Park

1 message

kristen danzig <[redacted]> Mon, Apr 19, 2021 at 9:05 PM
To: cedboardsandcommission@arvada.org

Dear City of Arvada,

I feel strongly and disagree with the annexation of the park due to the impact it will have on wildlife and the ecosystem.

I read the suggestions that the letter dated 1/5/21 stated regarding the buffering and seasonal work restrictions in regards to raptor nests. The CPW also suggest the developer contact the US FIsh and Wildlife services regarding permitting.

Have the reviewed the raptor buffers and are they planning to be compliant with the seasonal restrictions in regards to construction and even truck traffic?

Have they contacted the US Fish and Wildlife department?

A buffer wall does not comply with these restrictions.

Thank you! Kristen Danzig [redacted]

We, the undersigned, are in **SUPPORT of a "Town Square Village Concept"** for future development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street. We support a development that would expand the Maple Valley Park open space as described in the Arvada Parks, Open Space and Trails 2016 Master Plan and create a 2nd cultural arts district as described in the Arvada Arts and Cultural 2018 Master Plan. We encourage the City of Arvada to follow their master plans and act responsibly when planning future development adjacent to the Maple Valley Park and Ralston Creek Trail. Arvada's 2017 Comp Plan Goal R-1 states: "Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife." We envision a community-minded development that reflects the character of the area, protects the adjacent open space, encourages a mixed use of green space, smaller businesses and retail, supports arts and culture and is a walkable village with an environment-friendly design.

Michelle Krasovich	6453 Isabell Ct. Unit B Arvada, CO 80007		As a native of Arvada, this is what we need.	
Cyrena Leniger	7124 Howell Ct Arvada, CO 80004		this would be wonderful for our community	

We, the undersigned, are in **SUPPORT of a "Town Square Village Concept"** for future development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street. We support a development that would expand the Maple Valley Park open space as described in the Arvada Parks, Open Space and Trails 2016 Master Plan and create a 2nd cultural arts district as described in the Arvada Arts and Cultural 2018 Master Plan. We encourage the City of Arvada to follow their master plans and act responsibly when planning future development adjacent to the Maple Valley Park and Ralston Creek Trail. Arvada's 2017 Comp Plan Goal R-1 states: "Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife." We envision a community-minded development that reflects the character of the area, protects the adjacent open space, encourages a mixed use of green space, smaller businesses and retail, supports arts and culture and is a walkable village with an environment-friendly design.

Submitted by Protect Maple Valley Park
Exhibit A

PROTECT MAPLE VALLEY PARK

Petition Status (As of 4/11/21)

PROJECT OPPOSITION

- Online Petition = 1173 Household Responses Representing:
  - 2271 Adults (18+)
  - 857 Children
- Hard Copy Petition (Wet signatures)
  - 2251 Adults
- Petitions will be active and ongoing until the City Council Public Hearing
  - Updates planned monthly

As of 4/11/21, A Total of 4,522* Adult Residents Oppose Project Indiana 24/7 Amazon Distribution Center

*Overlap for those who signed both hard copy and online were subtracted from this total number of adults

PROTECT MAPLE VALLEY PARK

Additional Survey Data (As of 4/11/21)

ALTERNATE VISION RESPONSES

- Petitioners support a less invasive, mixed use development with **town square/village concept**
  - Online Petition Responses = 917 Households Representing:
    - 1837 Adults
    - 716 Children
  - Hard Copy Petition Signatures
    - 670 Adults
- Petitioners support **expanding Maple Valley Park** into the proposed area*
  - Online Petition Responses = 1099 Households Representing:
    - 2292 Adults
    - 838 Children

Citizens Support Other Land Uses Including Alternative Development

*This question was only posed in the online survey, not on the hard copy petition

We, the undersigned, are in **OPPOSITION** of the proposed minor adjustment, minor variance, annexation, rezoning and development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street known as the Scannell Properties, aka Project Indiana (#DA2020-01117 and Amazon Project Indiana #DA2020-0132), Maple Valley Park Annexation (#DA2020-0118), Jeffco Annexation (#20-130002AX), Minor Adjustment (#20-123867MAA), Minor Variance (#20-129804MVR), **aka AMAZON Distribution Center with 24/7 operations.**

We, the undersigned, are in **SUPPORT of a "Town Square Village Concept"** for future development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street. We support a development that would expand the Maple Valley Park open space as described in the Arvada Parks, Open Space and Trails 2016 Master Plan and create a 2nd cultural arts district as described in the Arvada Arts and Cultural 2018 Master Plan. We encourage the City of Arvada to follow their master plans and act responsibly when planning future development adjacent to the Maple Valley Park and Ralston Creek Trail. Arvada's 2017 Comp Plan Goal R-1 states: "Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife." We envision a community-minded development that reflects the character of the area, protects the adjacent open space, encourages a mixed use of green space, smaller businesses and retail, supports arts and culture and is a walkable village with an environment-friendly design.

We, the undersigned, are in **SUPPORT of a "Town Square Village Concept"** for future development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street. We support a development that would expand the Maple Valley Park open space as described in the Arvada Parks, Open Space and Trails 2016 Master Plan and create a 2nd cultural arts district as described in the Arvada Arts and Cultural 2018 Master Plan. We encourage the City of Arvada to follow their master plans and act responsibly when planning future development adjacent to the Maple Valley Park and Ralston Creek Trail. Arvada's 2017 Comp Plan Goal R-1 states: "Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife." We envision a community-minded development that reflects the character of the area, protects the adjacent open space, encourages a mixed use of green space, smaller businesses and retail, supports arts and culture and is a walkable village with an environment-friendly design.

Synopsis of meeting minutes from April 20, 2021 Planning Commission

Maple Valley Park Annexation Approximately Located At 6900 Indiana St.

Mr. Owens entered into the record the Staff Report dated April 20, 2021, affidavit of mailing, posting log and public comment that was received via email.

Mr. Bebo stated a correction to the staff report on page 7, 1st paragraph under Parks, Wildlife and Open Space. It should read Maple Valley Park is linked to the west, not to the east.
Stated the City has received 7 public comments, an ecological report for the park with supporting documents and received a PowerPoint presentation submitted by the applicant. He introduced the Maple Valley Park Annexation and Rezoning. Currently it is zoned Jefferson County A1 and the requested zoning is OS. Staff recommends approval.

Jill Marcotte, representative of the applicant, with Scannell Properties, gave a presentation. She explained the proposed project and how the annexation and rezoning of Maple Valley Park is consistent with the Comprehensive Plan and meets the LDC. She stated there will not be any development on the park. The park was previously deeded from Jefferson County to the City and reserved a reverted on the property. She explained how changing the zoning to OS would help to protect the park. Additionally, she stated that the park is owned and maintained by the City of Arvada. Jefferson County maintains the zoning and the controls.

Mr. Owens opened the hearing for comments from the public.

PUBLIC COMMENT

IN FAVOR

None

IN OPPOSITION

Mr. Owens reminded the public attendees to keep their comments focused on the topic at hand, which is the proposed annexation and rezoning of Maple Valley Park.

25 individuals spoke in opposition

There was no further public comment and Mr. Owens asked if the applicant wanted to provide a rebuttal.

APPLICANT REBUTTAL

Ms. Marcotte, restated that the application is to annex Maple Valley Park from Jefferson County to the City of Arvada and to rezone it OS, where it is currently zoned A-2 under the county. The City owns and manages the park. The use would remain unchanged and the rezoning to OS would add additional protections for preservation.

Mr. Bebo stated the City of Arvada owns Maple Valley Park and maintains the park. He stated if approved for the annexation and rezoning it would allow the City of Arvada to have full jurisdictional control with the OS zoning. He stated the OS designation is consistent with the other parks and open space in Arvada. It is the most restrictive zoning district. He commented that a Jefferson County reverter does exist on the park, which adds additional security to prevent any development on the park. He stated the annexation and rezoning are completely separate and is not dependent on the proposed project coming up.

Mr. Owens closed the public input portion of the meeting and allowed comments from the Commission.

QUESTIONS FROM THE COMMISSION

Mr. Owens and Mr. Magee commented there is no downside to the annexation of Maple Valley Park. The current zoning allows for a broader use and less control for the City. The City owns and maintains the park. The proposed OS zoning is the most protective zoning for this park.

Mr. Gay referenced the last sentence of the second paragraph on page 1 of the staff report and asked if it would still be in affect after annexation and rezoning.

Mr. Bebo responded and said that it runs in perpetuity with the land. He stated it's a mechanism to insure the property could never be developed for anything other than parks and open space in addition to the proposed zoning designation.

Mr. Owens asked if there were any further comments, no more comments were made. Mr. Owens asked for a motion.

MOTION:

It was moved by Mr. Magee, that Maple Valley Park Annexation, approximately located at 6900 Indiana St., be recommended to City Council for approval.

This motion is based on the findings of fact and approval criteria on Page(s) 8 & 9 of the Staff Report.

Mr. Owens acknowledged the hand that was raised from the public and explained at this point they are unable to reopen public comment.

DISCUSSION OF MOTION:

None

The following votes were cast on the motion:
Those voting Yes: Owens, McCarron, Gay, Connell, Magee, Hannan
Those voting No: None
Those absent: Griffith
The motion carried 6-0.

Mr. Owens explained that the motion carried.

Maple Valley Park Rezoning from Jefferson County A-1 to City of Arvada OS, approximately located at 6900 Indiana St.

Mr. Owens asked if there were any further comments, no more comments were made. Mr. Owens asked for a motion.

MOTION:

It was moved by Mr. Magee, that Maple Valley Park Rezoning from Jefferson County A-1 to City of Arvada OS, approximately located at 6900 Indiana St, be recommended to City Council for approval.

This motion is based on the findings of fact and approval criteria on Page(s) 8 & 9 of the Staff Report.

DISCUSSION OF MOTION:

Mr. Hannan, Mr. McCarron and Mr. Owens stated their support of the rezoning to OS and gives the most protection.

The following votes were cast on the motion:
Those voting Yes: Owens, McCarron, Gay, Connell, Magee, Hannan
Those voting No: None
Those absent: Griffith
The motion carried 6-0.

Mr. Owens explained that the motion carried.

After the final public hearing of the meeting, staff noticed that the original motion for the rezoning was incorrect. Mr. Owens confirmed the procedure with Ms. Grogg and the commission made motion to strike the original motion made. Mr. Owens clarified the process and reasons to strike the motion.

MOTION:

Mr. Owens moved to strike the original motion that was made for the rezoning of Maple Valley Park.

DISCUSSION OF MOTION:

None

The following votes were cast on the motion:
Those voting Yes: Owens, McCarron, Gay, Connell, Magee, Hannan
Those voting No: None
Those absent: Griffith
The motion carried 6-0.

MOTION:

It was moved by Mr. Magee, that Maple Valley Park Rezoning from Jefferson County A-2 to City of Arvada OS, approximately located at 6900 Indiana St, be recommended to City Council for approval.

This motion is based on the findings of fact and approval criteria on Page(s) 8 & 9 of the Staff Report.

DISCUSSION OF MOTION:

The following votes were cast on the motion:
Those voting Yes: Owens, McCarron, Connell, Magee, Hannan
Those voting No: Gay
Those absent: Griffith
The motion carried 5-1.

Mr. Owens explained that the motion carried.

PROPOSED ANNEXATION

Annexation Criteria

Annexation: Approval Criteria

1. Consistent with Comprehensive Plan and best interests of the City;
2. Capable of being integrated into the City and developed in compliance with applicable Code;
3. Capacity to adequately serve residents of such area with utilities, facilities, and public services.

Thank you!

PROTECT MAPLE VALLEY PARK

Petition Status (As of 6/9/21)

PROJECT OPPOSITION

- Online Petition = 2252 Household Responses Representing:
  - 4505 Adults (18+)
  - 1697 Children
- Hard Copy Petition (Wet signatures)
  - 4337 Adults
- Petitions will be active and ongoing until the City Council Public Hearing

As of 6/9/21, A Total of 8,842* Adult Residents Oppose Project Indiana 24/7 Amazon Distribution Center

*Overlap for those who signed both hard copy and online were subtracted from this total number of adults

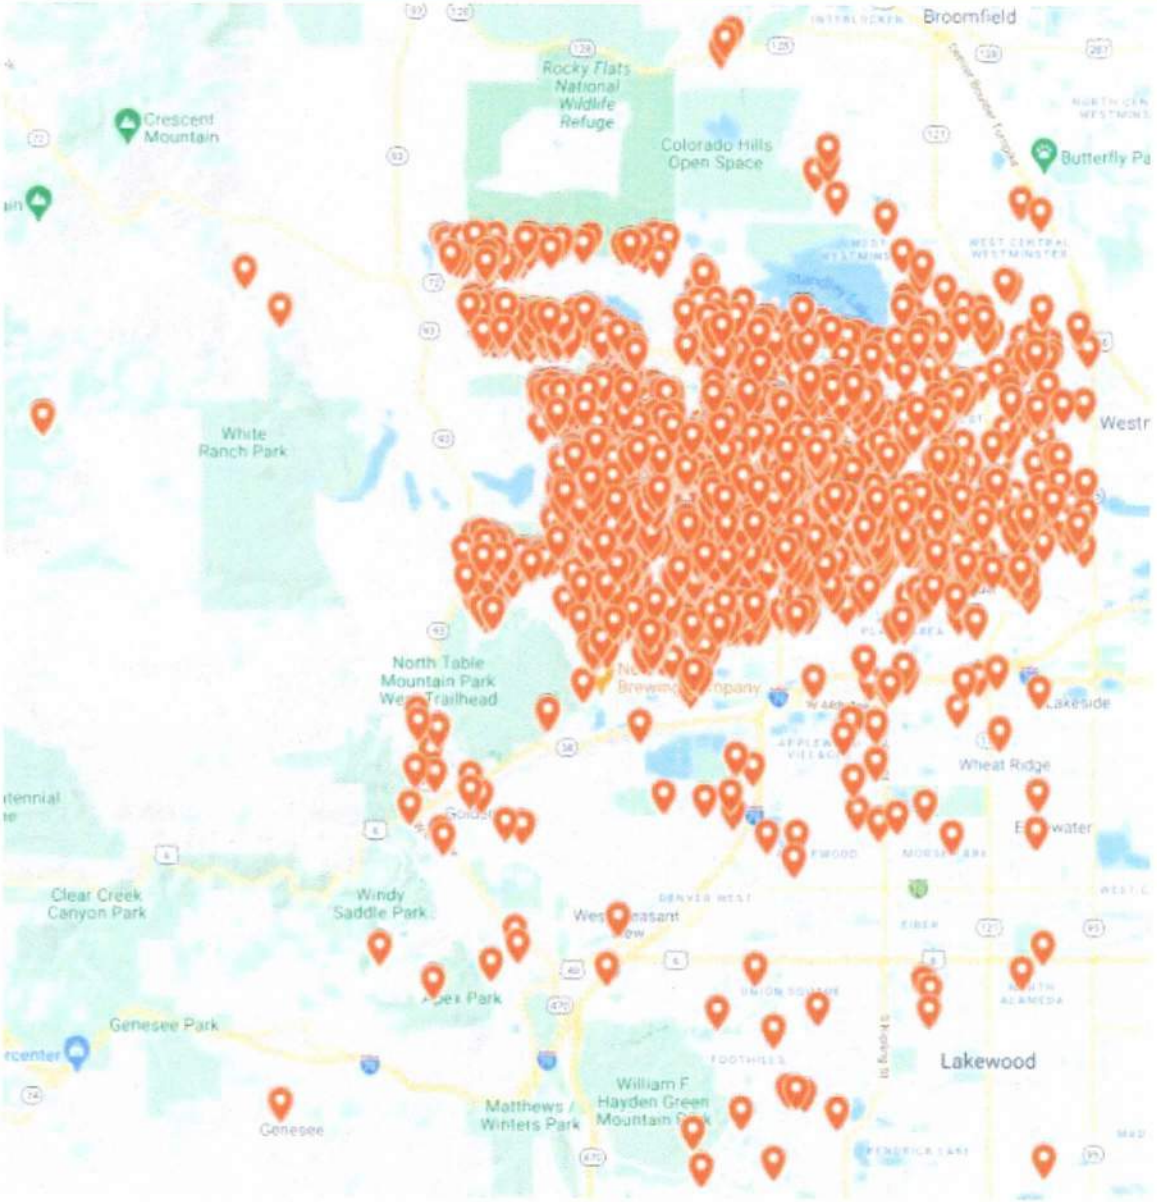
PROTECT MAPLE VALLEY PARK

Additional Survey Data (As of 6/9/21)

ALTERNATE VISION RESPONSES

- Petitioners support a less invasive, mixed use development with **town square/village concept**
  - Online Petition Responses = 1785 Household/Individual Responses Representing:
    - 3770 Adults
    - 1394 Children
  - Hard Copy Petition Signatures
    - 828 Adults
- Petitioners support **expanding Maple Valley Park** into the proposed area*
  - Online Petition Responses = 2184 Households Representing:
    - 4612 Adults
    - 1647 Children

Citizens Support Other Land Uses Including Alternative Development



*This question was only posed in the online survey, not on the hard copy petition

Survey Data

PROTECT
MAPLE VALLEY PARK

Overview/Caveats

- In the interest of saving space, the survey questions have been provided in their entirety in the following slides and summarized in the spreadsheet data for all online responses.
- In question 10, some responders entered a phone number rather than the number of adults in their household. For these entries, we only counted one adult to be conservative. Those entries are yellow in the attached spreadsheet.

PLEASE COMPLETE ONE SURVEY PER HOUSEHOLD. *(Petition counts for multiple family members)*

Survey results will be delivered to the Arvada City Council prior to the public hearing regarding the proposed Project Indiana Development.

Project Indiana Summary:

•Proposed Location: Collective 25 acres +/- of A-2 zoned properties at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and a portion of 6720 Indiana Street in unicorporated Jefferson County.
•7.96 acres of light industrial in Arvada
•Proposed site is app. 36 total acres adjacent to Ralston Creek and Maple Valley Park Open Space
•Distribution Center will be 112,000+ sf (approximately 552' N/S elevation x 203' E/W elevation x 44' in height)
•Over 1500 total vehicle / van / semi-truck parking spaces
•402 associate parking spaces accessed for 2-3 shifts daily
•983 van parking spaces accessed several times daily for two shifts
•60 van loading spaces, 60 van staging spaces
•12-15 semi-truck parking spaces
•21 truck docks with up to 42 semi-truck trips every night of the week
•Semi trucks load on east and vans load on north facing park and homes
•Access is expected to come directly off Indiana St, West 67th Ave, Fig Street, West 66th Place, and Holman Street
•Estimated traffic expected to be 3,000-5,000 vehicles in and out daily

Community Concerns:

•Excessive light and noise pollution 24 hours a day, 7 days a week
•Drastic increase in traffic on Indiana St and surrounding neighborhoods
•Negative impact on quality of life, homes and property values
•Insufficient buffer between the industrial use and open space/homes
•Removal of hundreds of large, old growth trees
•Negative impacts on wildlife in open space and riparian life in creek
•Negative impact to Ralston Creek from development storm drainage
•Does not reflect the character and culture of the surrounding community
•Future proposed drone operations will negatively affect wildlife and residents in the area

Detailed info located here: www.protectmaplevalleypark.com or on the City of Arvada or Jeffco websites using Case Numbers below.

For Reference: City of Arvada annexation, rezoning and development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street known as Scannell Properties, aka Project Indiana (#DA2020-01117), Maple Valley Park Annexation (#DA2020-0118), Project Indiana Full Amazon Plan (#DA2020-0132).

For Reference: Jeffco Annexation (Case No. 20-130002AX), Minor Adjustment (#20-123867MAA) and Minor Variance (#20-129804MVR) of 6720 Indiana St.

Do you w

YES, I OPPOSE the Project Indiana 24/7 Amazon Distribution Center Development in the proposed location

NO, I DO NOT OPPOSE the Project Indiana 24/7 Amazon Distribution Center Development in the proposed location

PROTECT
MAPLE VALLEY PARK

Q2

Of all of the potential impacts of the Amazon development, which concerns you the MOST? (You'll have a chance in the next question to select others)

- Traffic on Indiana and surrounding neighborhoods
- Environmental degradation
- Noise pollution (24/7 vans and trucks)
- Lights at night
- Visibility of the Amazon center from the trail and open space
- Decrease in home values
- Safety of neighborhood streets with playing children given an increase in Amazon van traffic
- Decrease in air quality due to 24/7 van and truck emissions

NOTE: This question was added to the survey later;
therefore, not all responders had the option to answer

PROTECT
MAPLE VALLEY PARK

Q3

What additional/secondary concerns do you have related to the Amazon development? (Select as many as apply and use the text box for additional feedback) w

- Traffic on Indiana and surrounding neighborhoods
- Environmental degradation
- Noise pollution (24/7 vans and trucks)
- Lights at night
- Visibility of the Amazon center from the trail and open space
- Decrease in home values
- Safety of neighborhood streets with playing children given an increase in Amazon van traffic
- Decrease in air quality due to 24/7 van and truck emissions

NOTE: This question was added to the survey later; therefore, not all responders had the option to answer

PROTECT
MAPLE VALLEY PARK

Q4

- **Would you support a less invasive, transitional, mixed use development in the proposed location with a town square/village concept and an arts and culture emphasis? (This question is independent of your opinion on the Amazon development in question 1)**
  It may include some or all of the following:
  Open air marketplace
- Arts and Cultural Hub
- Farmers market, art shows, art studios and galleries
- Walkable, bike-friendly village
- Farm-to-table restaurant, locally owned shops (i.e. bakery, butcher, deli and coffee shop)
- Small retail businesses, professional offices
- Possibly 2nd story condos above businesses
- Large green space to buffer the mixed use from the open space which can be used for community events
- Amphitheatre for community concerts or movie nights
- Environmentally-friendly design that is compatible with surrounding community

YES, I SUPPORT a mixed use "Town Square/Village" concept in the proposed location
NO, I DO NOT SUPPORT a mixed use "Town Square/Village" concept in the proposed location

PROTECT
MAPLE VALLEY PARK

Q5

Would you support an expansion of the Maple Valley Park to the south onto the proposed location to keep that area designated as park, trails and open space use and in keeping the historical significance intact? (This question is independent of your opinion in questions 1 and 2)

It may include some or all of the following: Keep historical buildings (1940's farmhouse, barns, etc)

- Working farm or community garden
- Walkable, bike-friendly
- Playground
- Pavilion with picnic tables
- Amphitheatre for community concerts or movie nights
- Large green space for community use or as the potential new location for the Arvada Harvest Festival
- Environmentally-friendly design that is compatible with surrounding community

PROTECT
MAPLE VALLEY PARK

Q6

- **Have you already signed the hard copy of the Project Indiana OPPOSITION PETITION that is currently circulating?**

YES, I have provided a wet signature on a hard copy petition OPPOSING the Project Indiana development but I am completing this Petition Survey on behalf of my household.

NO, I have not signed any other petition or survey regarding the Project Indiana development.

(Used to determine any overlap and account for it in calculating signatures)

PROTECT
MAPLE VALLEY PARK

Q7

I (we), the undersigned, desire to protect these natural resources and **STRONGLY OPPOSE ANY INCOMPATIBLE DEVELOPMENT** adjacent to the Maple Valley Park and Ralston Creek open space.

Personal information will not be shared or sold and will only be provided to the City in the form of a printed petition as needed. If you opted in to receive updates, your email will be added to the Protect Maple Valley Park list.

We, the undersigned, are in **SUPPORT of a "Town Square Village Concept"** for future development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street. We support a development that would expand the Maple Valley Park open space as described in the Arvada Parks, Open Space and Trails 2016 Master Plan and create a 2nd cultural arts district as described in the Arvada Arts and Cultural 2018 Master Plan. We encourage the City of Arvada to follow their master plans and act responsibly when planning future development adjacent to the Maple Valley Park and Ralston Creek Trail. Arvada's 2017 Comp Plan Goal R-1 states: "Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife." We envision a community-minded development that reflects the character of the area, protects the adjacent open space, encourages a mixed use of green space, smaller businesses and retail, supports arts and culture and is a walkable village with an environment-friendly design.

We, the undersigned, are in **SUPPORT of a "Town Square Village Concept"** for future development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street. We support a development that would expand the Maple Valley Park open space as described in the Arvada Parks, Open Space and Trails 2016 Master Plan and create a 2nd cultural arts district as described in the Arvada Arts and Cultural 2018 Master Plan. We encourage the City of Arvada to follow their master plans and act responsibly when planning future development adjacent to the Maple Valley Park and Ralston Creek Trail. Arvada's 2017 Comp Plan Goal R-1 states: "Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife." We envision a community-minded development that reflects the character of the area, protects the adjacent open space, encourages a mixed use of green space, smaller businesses and retail, supports arts and culture and is a walkable village with an environment-friendly design.

We, the undersigned, are in **SUPPORT of a "Town Square Village Concept"** for future development of the collective properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street and 6720 Indiana Street. We support a development that would expand the Maple Valley Park open space as described in the Arvada Parks, Open Space and Trails 2016 Master Plan and create a 2nd cultural arts district as described in the Arvada Arts and Cultural 2018 Master Plan. We encourage the City of Arvada to follow their master plans and act responsibly when planning future development adjacent to the Maple Valley Park and Ralston Creek Trail. Arvada's 2017 Comp Plan Goal R-1 states: "Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife." We envision a community-minded development that reflects the character of the area, protects the adjacent open space, encourages a mixed use of green space, smaller businesses and retail, supports arts and culture and is a walkable village with an environment-friendly design.

PROTECT MAPLE VALLEY PARK

Petition Status (As of 6/14/21 AM)

PROJECT OPPOSITION

- Online Petition = 2548 Household Responses Representing:
  - 5115 Adults (18+)
  - 1917 Children

- Hard Copy Petition (Wet signatures)
  - 4652 Adults

- Petitions will be active and ongoing until the City Council Public Hearing

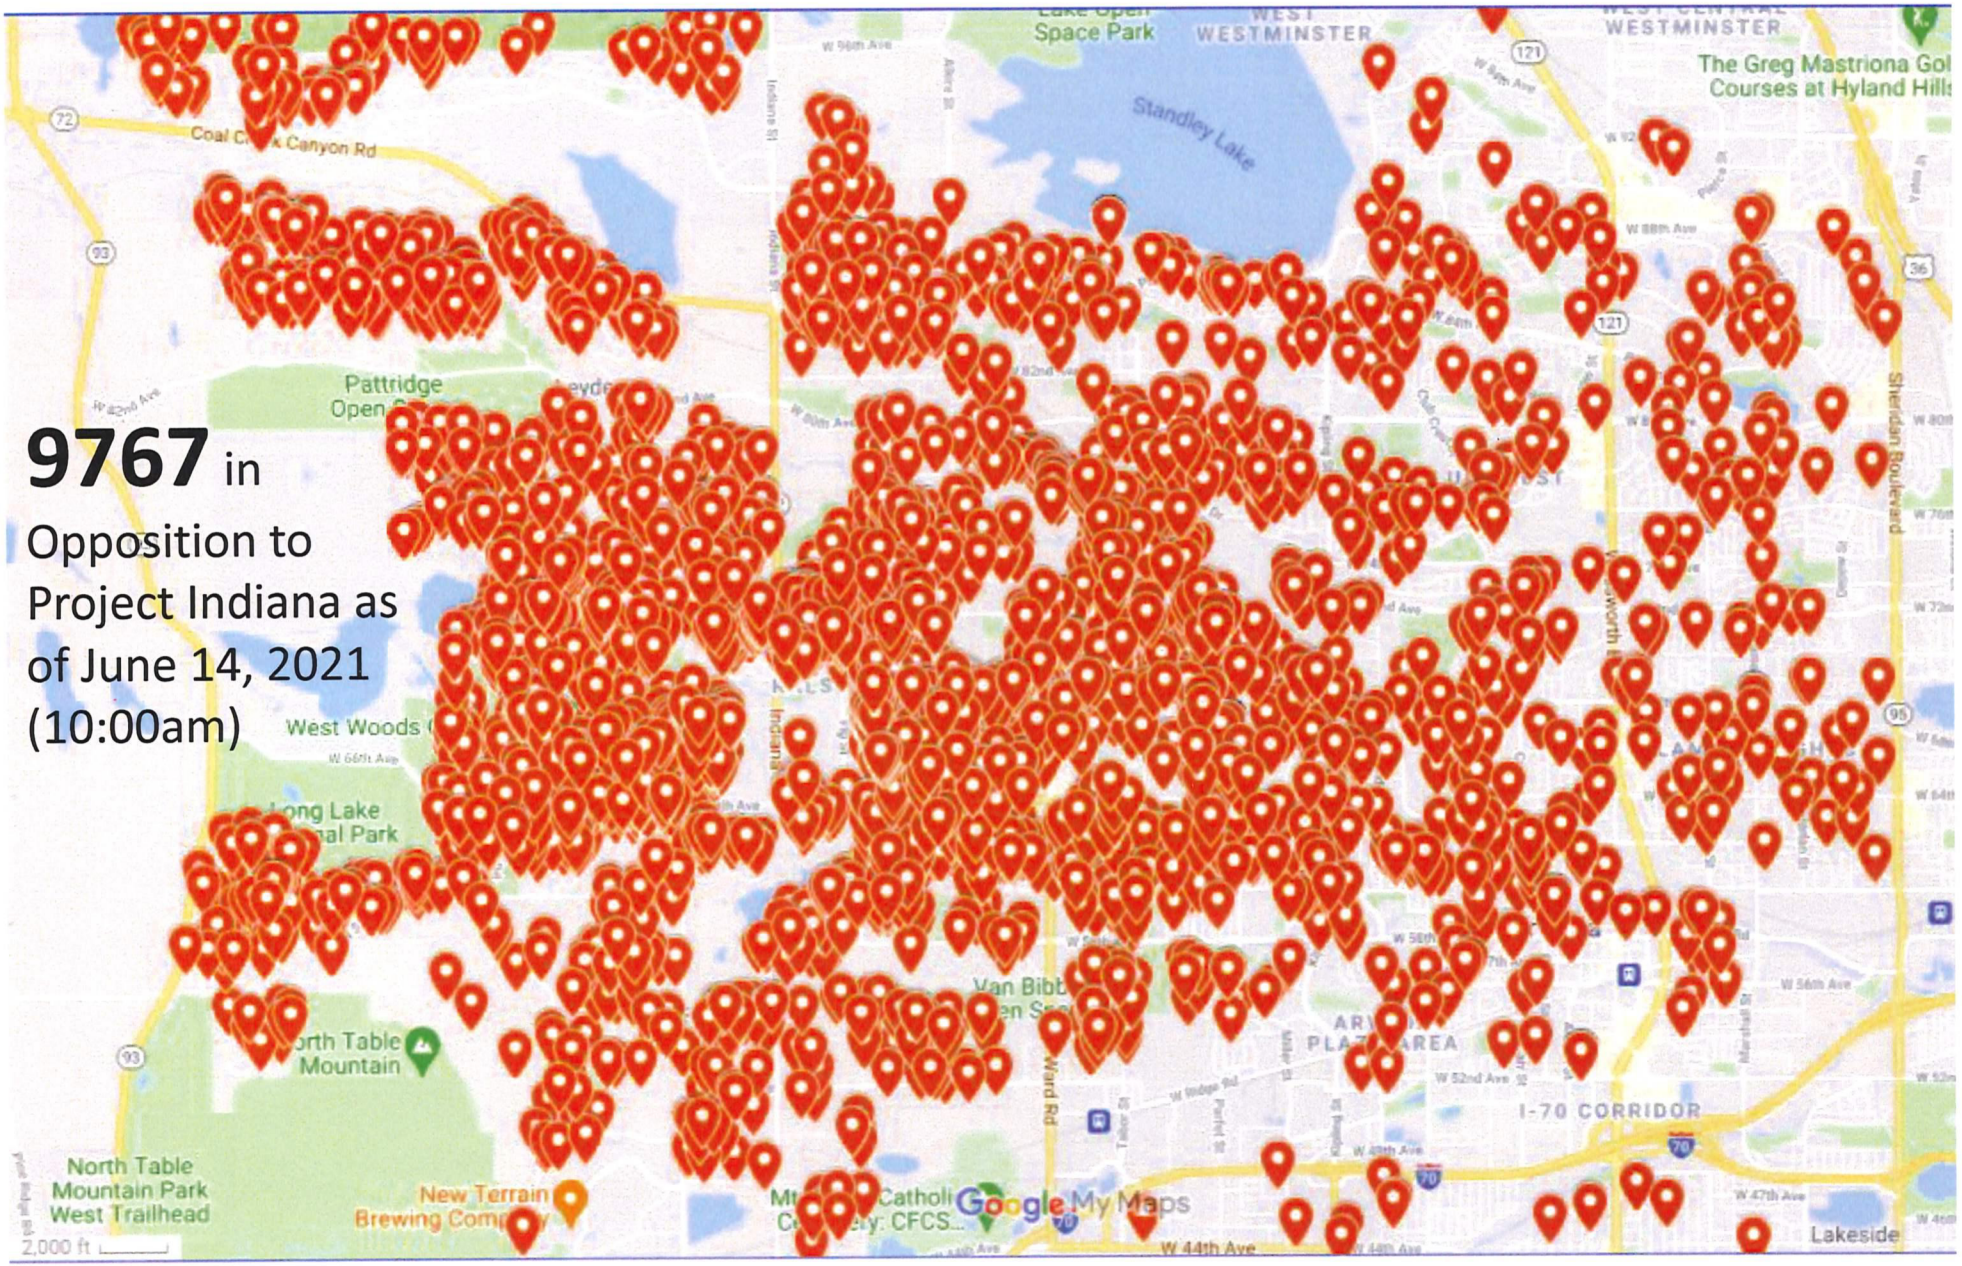
As of 6/14/21 AM, A Total of 9767* Adult Residents Oppose Project Indiana 24/7 Amazon Distribution Center

*Overlap for those who signed both hard copy and online were subtracted from this total number of adults

PROTECT MAPLE VALLEY PARK

Additional Survey Data (As of 6/14/21 AM)

ALTERNATE VISION RESPONSES



- Petitioners support a less invasive, mixed use development with **town square/village concept**
  - Online Petition Responses = 2016 Household/Individual Responses Representing:
    - 4256 Adults
    - 1572 Children
  - Hard Copy Petition Signatures
    - 670 Adults (still ongoing)
- Petitioners support **expanding Maple Valley Park** into the proposed area*
  - Online Petition Responses = 2472 Households Representing:
    - 5226 Adults
    - 1858 Children

Citizens Support Other Land Uses Including Alternative Development

*This question was only posed in the online survey, not on the hard copy petition

PROTECT MAPLE VALLEY PARK

Of all of the potential impacts of the Amazon development, which concerns you the MOST?

Updated as of 6/14/21 AM:

Traffic on Indiana and surrounding neighborhoods	47.46% 889
-Environmental degradation	30.75% 576
-Noise pollution (24/7 vans and trucks)	6.03% 113
-Decrease in home values	4.22% 79
-Decrease in air quality due to 24/7 van and truck emissions	4.00% 75
-Safety of neighborhood streets with playing children given an increase in Amazon van traffic	3.79% 71
-Visibility of the Amazon center from the trail and open space	3.31% 62
-Lights at night	0.43% 8
TOTAL	1,873

NOTE: Following overwhelming support, this question was added to the survey later, therefore not all responders had the option to answer

PROTECT MAPLE VALLEY PARK

What additional/secondary concerns do you have related to the Amazon development?

Updated as of 6/14/21 AM:

Noise pollution (24/7 vans and trucks)	58.73% 1,087
-Decrease in air quality due to 24/7 van and truck emissions	52.24% 967
-Environmental degradation	47.06% 871
-Traffic on Indiana and surrounding neighborhoods	46.41% 859
-Safety of neighborhood streets with playing children given an increase in Amazon van traffic	46.35% 858
-Decrease in home values	42.90% 794
-Visibility of the Amazon center from the trail and open space	42.57% 788
-Lights at night	37.33% 691
Total Respondents: 1,851	

NOTE: Following overwhelming support, this question was added to the survey later, therefore not all responders had the option to answer

For the purposes of space and printing, the survey petition questions have been summarized below, but can be seen in their entirety in previous package submission

Do you oppose the Indiana 24/7 Distribution Center?	Would you support a less invasive, mixed use town square/village?	Would you support an expansion of the Maple Valley Park?	Name	Address	# of Adults in household	#of children in household

Subject: Opposition to Maple Valley Park re-zoning

Hi Kristen,

I am writing to confirm and reaffirm my opposition to the rezoning of Maple Valley Park The following are my comments:

Dear representatives (Jefferson County Commissioners and Arvada Council Members),

Your vote matters now more than ever in the potential re-zoning/annexation of the area known as Maptek Valley Park to allow the construction of a facility that will result in the destruction of animal habitat and further damage our suburban lifestyle. Arvada is the farm within the city and our residents (myself included) appreciate this fact. With the annexation/rezoning we are losing not only what Arvada represents to its residents but you are also sending a message that you don't represent the people. I am reminded that a bit ago you single handedly passed a trash service modification that was done to reduce traffic and by consequence, wear and tear on the roads in our neighborhoods - voting yes to this annexation/rezoning would be contrary to that view as you are not reducing traffic/noise pollution/wear and tear - you are just going to make it worse! I have to wonder who will end up paying for repairs to these highly traffic areas?

I hope your vote represents my input and you vote NO to such annexation/rezoning to ensure that we keep our city as we have all grown to love it. I would like my statement read into record at tonight's meeting.

Thank you for your time and deep consideration.

Cesar

ado 80004
[redacted]

Hello. My name is Jan Edwards Aston, and I live in the Maple Valley neighborhood. My home is approximately 600 feet from the proposed Amazon's High I
When I first heard about the opportunity to speak at this meeting, I planned on giving you data about the effect this project will have on wildlife, traffic, and p
figures we have presented are important and true, however, there is a human side to this proposal.
When I was looking to buy a house, I looked at a lot of neighborhoods in and out of Arvada. There were nicer houses. However, once I saw my home -- the
that this was indeed where I wanted to live.
In the summertime I leave my windows open. I hear the children playing outside. Shooting baskets, riding bikes and scooters. The happy sounds of childre
by the sound of Amazon's Army if you approve this proposal.
I enjoy sitting on my back porch listening to the birds sing and watching the squirrels perform magnificent feats to reach my birdfeeders. Watching the old gr
magnificent canopy. All of this will be taken away from me if you approve Amazon's High Industrial Use Project.
It is a lot of power the voters have entrusted you with. Your decision will forever affect me. It is my home. My peace of mind. My emotional wellbeing. There
9,000 according to the signatures on the petition. Please make the right decision. Be responsible and respectful to the citizens who have voted and trusted

Thank you.
Sincerely,

Janice Edwards Aston

Arvada is the farm within the city and our residents (myself included) appreciate this fact. With the annexation/rezoning we are losing not only what Arvada represents to its residents but you are also sending a message that you don't represent the people. I am reminded that a bit ago you single handedly passed a trash service modification that was done to reduce traffic and by consequence, wear and tear on the roads in our neighborhoods - voting yes to this annexation/rezoning would be contrary to that view as you are not reducing traffic/noise pollution/wear and tear - you are just going to make it worse! I have to wonder who will end up paying for repairs to these highly traffic areas?

I hope your vote represents my input and you vote NO to such annexation/rezoning to ensure that we keep our city as we have all grown to love it. I would like my statement read into record at tonight's meeting.

Thank you for your time and deep consideration.

Cesar

CITY OF ARVADA

REPORT TO CITY COUNCIL PUBLIC HEARING

AGENDA ITEM 10.C.

TO: THE HONORABLE CITY COUNCIL DATE: June 14, 2021

SUBJECT: CB21-017 An Ordinance Rezoning Certain Land Within the City of Arvada, Maple Valley Park, from Jefferson County A-2 (Agricultural) to City of Arvada OS (Open Space) and Amending the Official Zoning Maps of the City of Arvada, Colorado, Approximately Located at 6900 Indiana Street (Ordinance No. 4764)

Report in Brief

Scannell Properties for the City of Arvada is requesting approval of an annexation and rezoning application for Maple Valley Park. The annexation consists of approximately 12.33 acres of which 12 acres is Maple Valley Park and the remaining .39 acres is right-of-way for Indiana Street. The property is zoned Jefferson County A-2 (Agricultural) and the requested rezoning is OS (Open Space).

The Arvada team recommends that the City Council approve the Ordinance Rezoning Certain Land Within the City of Arvada, Maple Valley Park, from Jefferson County A-2 (Agricultural) to City of Arvada OS (Open Space) and amending the Official Zoning Maps of the City of Arvada, Colorado approximately located at 6900 Indiana Street.

Please see item 10.B for documentation on this project.

Financial Impact

There will be no financial impact.

Background

The subject property is located at approximately 6900 Indiana Street and is currently utilized and operating as a City owned park and serves as part of the Ralston Creek Trail. The subject property is located just north of the Indiana Street and W. 68th Avenue intersection. This property was deeded from Jefferson County to the City of Arvada to be used exclusively for public open space, park and recreational purposes. If the City of Arvada, it successors or assigns, should use the property for any purpose other than public open space, park and recreational purposes, the property shall revert to Jefferson County and the deed shall be null and void.

Discussion

Scannell Properties for the City of Arvada is requesting approval of an annexation and rezoning application for Maple Valley Park. The annexation consists of approximately 12.33 acres of which 12 acres is Maple Valley Park and the remaining .39 acres is right-of-way for Indiana Street. The property is zoned Jefferson County A-2 (Agricultural) and the requested rezoning is OS (Open Space). The following information summarizes the Community and Economic Development team's analysis of the proposed annexation:

Div. 8-3-3 Annexation and Disconnection Approval Criteria	Finding	Rationale

1. The annexation is in accord with the Comprehensive Plan and the best interests of the City would be served by annexation of such property.	Complies	The property is included within the Arvada Comprehensive Plan and the City has the ability to service it. The City currently owns the property and it is in the best interest of the City to have it within the jurisdictional boundary of Arvada.
2. The property is capable of being integrated into the City and developed in compliance with all applicable provisions of this Code and the Arvada City Code.	Complies	The property is a City-owned and maintained park and is used by Arvada residents and visitors.
3. At the time any development of the area proposed to be annexed is completed, there will be capacity to adequately serve residents of such area with all necessary utilities, facilities and public services.	Complies	The City has capacity to serve these two lots. No development is proposed.

Div. 8-3-4 Zoning and Rezoning Approval Criteria	**Finding**	**Rationale**
1. The rezoning is consistent with the Arvada Comprehensive Plan, or an adopted sub-area plan, corridor plan, or urban renewal plan, or reflects conditions that have changed since the adoption of the Comprehensive Plan.	Complies	The rezoning request to OS is consistent with the Comprehensive Plan and intent of the Open Space and Parks designation in the Land Use Plan.
2. The intended land use is consistent with the stated intent of the proposed zoning district.	Complies	The use of the property as park and open space is consistent with the OS zoning district.
3. Facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire protection, and roads and transportation, as applicable) will, prior to development, be available to serve the subject property while maintaining adequate levels of service to existing development.	Complies	Facilities and services necessary to serve the property are available.
4. The intended land use for which the rezoning is sought will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, or such impacts will be substantially mitigated.	Complies	The intended land use (park and open space) will not have any significant adverse impacts.
5. The rezoning is consistent with the character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts.	Complies	The rezoning request is consistent with the character of the existing neighborhood and surrounding area.

Public Contact

The required neighborhood meeting for this project took place on November 18, 2020. Due to the COVID-19 pandemic, a virtual neighborhood meeting was held. The applicant and Arvada team members were in attendance as well as 35 neighbors.

A second virtual neighborhood meeting was held on March 11, 2021. Approximately 300 residents were in attendance at the meeting.

Written notice was sent 15 days prior to the meeting, a published notice was posted in the newspaper 15 days prior to the meeting, and a public hearing sign was posted 15 days prior to the meeting.

Commission Recommendation

The Planning Commission voted 5 to 1 (1 absent) to recommend approval to the City Council.

Strategic Alignment

This project aligns with the Community and Economic Development and Vibrant Community and Neighborhood Priority Areas of the City Council Strategic Plan.

Alternative Courses of Action

NA

Recommendation for Action

The Arvada team recommends that the City Council approve the Ordinance Rezoning Certain Land Within the City of Arvada, Maple Valley Park, from Jefferson County A-2 (Agricultural) to City of Arvada OS (Open Space) and amending the Official Zoning Maps of the City of Arvada, Colorado approximately located at 6900 Indiana Street.

Suggested Motion:

I move that CB21-017, An Ordinance Rezoning Certain Land Within the City of Arvada, Maple Valley Park, from Jefferson County A-2 (Agricultural) to City of Arvada OS (Open Space) and Amending the Official Zoning Maps of the City of Arvada, Colorado, Approximately Located at 6900 Indiana Street, be (approved on final reading, numbered 4764 and ordered published by title only) (rejected).

CITY OF ARVADA

REPORT TO CITY COUNCIL RESOLUTION

AGENDA ITEM 10.D.

TO: THE HONORABLE CITY COUNCIL DATE: June 14, 2021

SUBJECT: R21-087 A Resolution Setting Forth Certain Findings of Fact and Conclusions as to the Annexation of Certain Land Into the City of Arvada, Colorado, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street

Report in Brief

This resolution is in the nature of a technical, housekeeping measure, intended to insure compliance with the "Municipal Annexation Act," Section 31-12-101 et seq. Section 31-12-110 of the Act states that "upon completion of the hearing , the governing body of the annexing municipality, by resolution, shall set forth its findings of fact and its conclusions based thereon with reference to the following matters: ." Section 31-12-111 goes on to state that, after the resolution (assuming the resolution determines that the requirements of Section 31-12-104 and 31-12-105 have been met, no election is required, etc.), the governing body may thereupon annex the area by ordinance. The requirements of Sections 31-12-104 and 31-12-105, as referenced in the resolution (and as asserted in the Petition for Annexation), are technical requirements of eligibility for annexation (e.g., 1/6 contiguity, etc.). Meeting those requirements does not mandate annexation of a given property, thus, in annexation proceedings, Council has the prerogative to adopt such a resolution (finding compliance with the technical requirements of Sections 31-12-104 and 31-12-105) and then reject the companion annexation ordinance (if, for example, it finds that such annexation is not in the best interests of the City).

The Arvada team recommends that the City Council approve R21-087, A Resolution Setting Forth Certain Findings of Fact and Conclusions as to the Annexation of Certain Land Into the City of Arvada, Colorado, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street.

Financial Impact

There is no financial impact associated with the proposed action.

Background

The property proposed to be annexed into the City is comprised of three parcels located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a portion of 6720 Indiana Street. Each of these properties currently contain a single-family home and associated accessory buildings, outbuildings, barns, and other structures generally used for agricultural purposes.

Discussion

The property, if annexed, is intended to be developed by Scannell Properties for for Project Indiana, an Amazon last mile distribution center. The annexation consists of approximately 24.93 acres. The property is zoned Jefferson County A-2 (Agricultural) and the requested rezoning is IL (Industrial, Light).

Public Contact

Enclosure, exhibits & attachments required to support the report

RESOLUTION NO. R21-087

A RESOLUTION SETTING FORTH CERTAIN FINDINGS OF FACT AND CONCLUSIONS AS TO THE ANNEXATION OF CERTAIN LAND INTO THE CITY OF ARVADA, COLORADO, 6700 INDIANA STREET, 6702 INDIANA STREET, 6710 INDIANA STREET, AND A PORTION OF 6720 INDIANA STREET

WHEREAS, the City Council of Arvada, Colorado has found a petition for the annexation of the hereinafter described parcel of land to be in substantial compliance with the requirements of §31-12-107(1) C.R.S.; and

WHEREAS, the City Clerk has provided notice of public hearing on the proposed annexation by publication once per week for four successive weeks and by registered mail to the Clerk of the Board of County Commissioners, the county Attorney, the school district, and to any special district having territory in the area to be annexed; and

WHEREAS, the City Council has completed a public hearing to determine if the proposed annexation complies with Article II, Section 30 of the Colorado Constitution and §§31-12-104 and 31-12-105 C.R.S., to establish eligibility for annexation.

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ARVADA, COLORADO:

Section 1. The City Council of the City of Arvada, State of Colorado, having examined the filings and the Petition for Annexation for certain real property, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a portion of 6720 Indiana Street, Arvada, Colorado, more fully described in said Petition and having held a public hearing thereon, make the following findings pursuant to Colorado State law:

1. That not less than one-sixth of the perimeter of the area proposed to be annexed is contiguous with the existing boundaries of the City; and therefore, because of such contiguity, a community interest exists between the territory proposed to be annexed and the City.

2. That the area proposed to be annexed is urban or will be urbanized in the near future.

3. That the area proposed to be annexed is integrated or is capable of being integrated in the City.

4. That no land held in identical ownership has been divided or included without written consent of the owner thereof.

5. That no annexation proceedings have been commenced by another municipality.

6. That the annexation will not result in the detachment of area from a school district.

7. That the annexation will not result in the extension of a municipal boundary more than

three miles.

8. That the City has in place a plan for said three mile area.

9. That in establishing the boundaries of the area to be annexed the entire width of any street or alley is included within the area annexed.

10. That an election is not required under §31-12-107(2) C.R.S.

11. That no additional terms or conditions are imposed which require an election under §31-12-107(2) C.R.S.

Section 2. The City Council of the City of Arvada, State of Colorado, having examined the filings and the Petition for Annexation for certain real property, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a portion of 6720 Indiana Street, Arvada, Colorado, more fully described in said Petition and having held a public hearing thereon, make the additional following findings pursuant to Arvada's Land Development Code:

1. That the annexation is in accord with the Comprehensive Plan and the best interest of the City would be served by annexation of the subject property.
2. That the subject property is capable of being integrated into the City and developed in compliance with all applicable provisions of this Code, the Arvada City Code, and the terms of an annexation agreement.
3. That at the time any development of the subject property is completed, there will be capacity to adequately serve residents of such area with all necessary utilities, facilities, and public services.

Section 3. This resolution shall be effective upon its approval by the City Council.

APPROVED AND ADOPTED this 14th day of June, 2021.

CITY OF ARVADA

REPORT TO CITY COUNCIL PUBLIC HEARING

AGENDA ITEM 10.E.

TO: THE HONORABLE CITY COUNCIL DATE: June 14, 2021

SUBJECT: CB21-018 An Ordinance Annexing Certain Land Into the City of Arvada, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street in the County of Jefferson and State of Colorado, (Ordinance No. 4765)

Report in Brief

Scannell Properties, LLC is requesting approval of an annexation and rezoning application of approximately 24.93 acres of land and a rezoning of approximately 5.36 acres of land already within the limits of the City in order to develop an approximately 112,000 square-foot warehouse fulfillment and distribution center to be leased and operated by Amazon, Inc. The overall project involves the assembly of twelve parcels of land and a portion of land from the property located at 6720 Indiana. Four lots (Lot 1A-4A of the Parkway Center Filing No.6 subdivision) are located along W. 67th Avenue west of Fig Street, are zoned IL (Industrial, Light) and are not part of the annexation and rezoning request.

All of the land proposed to be annexed is currently zoned Jefferson County A-2 (Agricultural), is proposed to be rezoned to City of Arvada IL (Industrial, Light) and has a Comprehensive Plan Future Land Use map designation of Industrial/Office/Retail. Five parcels within the City are proposed to be rezoned from CG (Commercial, General) to IL, and have a Comprehensive Plan Future Land Use map designation of Neighborhood/Community Commercial.

The applicant proposes to construct the building and lease it as a warehouse fulfillment and distribution center for packages and deliveries ordered by customers and delivered via a van-fleet. The center would operate 24 hours per day, seven days per week, and would employ up to 460 workers annually and up to 1,000 seasonally. The operation of the site would include up to 42 semi-truck deliveries per day. A portion of the western footprint of the building would be used for office uses and for customer package drop offs and pick-ups and customer service. The rest of the building would be used by workers who would facilitate the organization and packaging of products. On the north side of the building where a canopy and drive is located, packages would then be loaded into various delivery vans and the vans would egress from the site delivering packages to the customers.

The Planning Commission voted 5 to 1 (1 absent) in favor to recommend approval to City Council during the public hearing on April 20, 2021.

The Arvada team recommends that the City Council approve CB21-018, An Ordinance Annexing Certain Land Into the City of Arvada, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street in the County of Jefferson and the State of Colorado.

Financial Impact

There will be no financial impact.

Background

The property proposed to be annexed into the City is comprised of three parcels located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a portion of 6720 Indiana Street. Each of these properties currently contain a single-family home and associated accessory buildings, outbuildings, barns, and other structures generally used for agricultural purposes.

Two properties located at 14785 W. 66th Place and 14725 W. 66th Place are within the jurisdictional boundary of the City of Arvada and are currently zoned CG (Commercial, General). These properties (Lots 9 and 10 of the Indiana Business Center subdivision) were annexed into the City in 1980 with the Roske Rose Alderfer Annexation and platted in 1983. These two lots are currently undeveloped. One property containing three parcels located at 6730 Indiana Street was annexed into the City in 1979 with the Binder Annexation and has not been platted. This property is also zoned CG. Currently this property contains one single-family home and associated accessory buildings.

Discussion

Scannell Properties for the City of Arvada is requesting approval of an annexation and rezoning application for Project Indiana. The annexation consists of approximately 24.93 acres. The property is zoned Jefferson County A-2 (Agricultural) and the requested rezoning is IL (Industrial, Light). The following information summarizes the Community and Economic Development team's analysis of the approval criteria:

Div. 8-3-3 Annexation and Disconnection Approval Criteria	**Finding**	**Rationale**
1. The annexation is in accord with the Comprehensive Plan and the best interests of the City would be served by annexation of such property.	Complies	The annexation is in accord with the Comprehensive Plan. The Comprehensive Plan Future Land Use map designation for the area proposed to be annexed is Industrial/Office/Retail. The proposal aligns with that designation.
2. The property is capable of being integrated into the City and developed in compliance with all applicable provisions of this Code and the Arvada City Code.	Complies	The property is an enclave surrounded by the City and can be integrated into the City and developed in compliance with all provisions of the LDC and other City codes.
3. At the time any development of the area proposed to be annexed is completed, there will be capacity to adequately serve residents of such area with all necessary utilities, facilities and public services.	Complies	Existing utilities are available in and around the site and the City has capacity to service it.

Div. 8-3-4 Zoning and Rezoning Approval Criteria	**Finding**	**Rationale**
1. The rezoning is consistent with the Arvada Comprehensive Plan, or an adopted sub-area plan, corridor plan, or urban renewal plan, or reflects conditions that have changed since the adoption of the Comprehensive Plan.	Complies	The Comprehensive Plan Future Land Use map designation for the area proposed to be annexed is Industrial/Office/Retail. The proposed rezoning to IL (Industrial, Light) aligns with that designation and is intended to implement this designation in the Comprehensive Plan. The five parcels proposed to be rezoned from CG (Commercial General) to IL is also consistent.
2. The intended land use is consistent with the stated intent of the proposed zoning district.	Complies	The proposed warehouse and distribution center, use which is defined in the LDC as Light Industry, is consistent with the intent of the IL zone district.
3. Facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire	Complies	Facilities and services are available to service the development and will be

protection, and roads and transportation, as applicable) will, prior to development, be available to serve the subject property while maintaining adequate levels of service to existing development.		built out with the construction of the site.
4. The intended land use for which the rezoning is sought will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, or such impacts will be substantially mitigated.	Complies	The intended land use will not result in significant adverse impacts. Efforts to mitigate negative traffic, lighting, noise, and visual impacts will be reviewed with the Site Plan application. A buffer will be required along the northern boundary which will add a wall and large trees to reduce noise and lighting impacts. Additional mitigation efforts will be dealt with in the Site Plan application.
5. The rezoning is consistent with the character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts.	Complies	The rezoning is consistent with the character of the existing neighborhood to the west, east, and south which are zoned as either IL or IG (Industrial, General) and contain industrial uses. The northern boundary will be buffered in order mitigate negative impacts to the park.

Public Contact

The required neighborhood meeting for this project took place on November 18, 2020 and in conjunction with the Maple Valley Park annexation case. Due to the COVID-19 pandemic, a virtual neighborhood meeting was held. The applicant and staff were in attendance as well as 35 neighbors.

A second virtual neighborhood meeting was held on March 11, 2021 also in conjunction with Maple Valley Park annexation. Approximately 300 residents were in attendance at the meeting.

Written notice was sent 15 days prior to the meeting, a published notice was posted in the newspaper 15 days prior to the meeting, and a public hearing sign was posted 15 days prior to the meeting.

Commission Recommendation

The Planning Commission voted 5 to 1 (1 absent) to recommend approval to the City Council.

Strategic Alignment

This project aligns with the Community and Economic Development Priority Area of the City Council Strategic Plan. Specifically, the recommended action supports the following Principle:

Uses the Comprehensive Plan to guide planning, land use code decisions, development management, and informational and resource services that are delivered to residents, businesses, the development community, decision-making bodies, and neighborhood partners to achieve a well planned, aligned, sustainable, and livable community for current and future generations.

Alternative Courses of Action

NA

Recommendation for Action

The Arvada team recommends that the City Council approve CB21-018, An Ordinance Annexing Certain Land Into the City of Arvada, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street in the County of Jefferson and the State of Colorado.

Suggested Motion:

I move that CB21-018, An Ordinance Annexing Certain Land Into the City of Arvada, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street in the County of Jefferson and State of Colorado, be (approved on final reading, numbered 4765 and ordered published by title only)(rejected).

COUNCIL BILL NO. 21-018
ORDINANCE NO. 4765

AN ORDINANCE ANNEXING CERTAIN LAND INTO THE CITY OF ARVADA, 6700 INDIANA STREET, 6702 INDIANA STREET, 6710 INDIANA STREET, AND A PORTION OF 6720 INDIANA STREET IN THE COUNTY OF JEFFERSON AND STATE OF COLORADO

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ARVADA, COLORADO:

Section 1. The City Council of the City of Arvada, State of Colorado, having examined the filings and the annexation map for certain real property more fully described in said map finds as follows:

1. That a petition for annexation, together with four copies of the annexation map as required by law, was filed with the City by the owners of over fifty percent of the area of the territory hereinafter described, exclusive of public streets and alleys, and comprising more than fifty percent of the landowners of the property to be annexed.

2. That the City, by resolution at a properly noticed meeting accepted said petition and found and determined that the applicable parts of the Municipal Annexation Act of 1965, as amended, and Section 30 of Article II of the Colorado Constitution have been met and further determined that an election was not required under the Act and that no additional terms and conditions were imposed upon said annexation.

3. That the area proposed to be annexed meets the applicable requirements of Sections 31-12-104 and 31-12-105, C.R.S., and is therefore eligible for annexation to the City of Arvada.

Section 2. The following described real property, situated in the County of Jefferson, State of Colorado, be and the same hereby is annexed to the City of Arvada, to wit:

A PARCEL OF LAND LOCATED IN:

THE WEST ONE-HALF OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST, OF THE 6TH/ PRINCIPAL MERIDIAN, COUNTY OF JEFFERSON, STATE OF COLORADO

More particularly described in attached Exhibit A.

Section 3. The Mayor is hereby authorized to execute, the City Clerk to attest, in form approved by the City Attorney, an Annexation Agreement pertaining to the property

owned by the Petitioners.

Section 4. The Clerk of the City shall perform all statutory duties to complete said annexation.

Section 5. This Ordinance shall be effective five days after publication following final passage.

INTRODUCED, READ, AND ORDERED PUBLISHED this 17th day of May. 2021.

PASSED, ADOPTED, AND APPROVED this 14th day of June, 2021.

RE: PETITION FOR ANNEXATION

DATE: December 11, 2020

The undersigned landowners (collectively, the "**Petitioner**"), in accordance with the Municipal Annexation Act of 1965 as set forth in Article 12, Title 31, Colorado Revised Statutes (the "**Act**"), as amended and as in effect on the submission date set forth below, hereby petitions the City Council of the City of Arvada for annexation to the City of Arvada (the "**City**") of the following unincorporated properties located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a portion of 6720 Indiana Street in the County of Jefferson and State of Colorado (collectively, the "**Property**"), the Property being more particularly described by their legal description in "Exhibit A," which is attached hereto and incorporated herein by reference.

In support of this petition for annexation (the "**Petition**"), Petitioner further alleges to the City Council of the City that:

1. It is desirable and necessary that the areas described above be annexed to the City.

2. The requirements of C.R.S. §§ 31-12-104 and 31-12-105, as amended, exist or have been met in that:

   a) Not less than one-sixth of the perimeter of the areas proposed to be annexed are contiguous with the City or will be contiguous with the City within such time as required by C.R.S. § 31-12-104.

   b) A community of interest exists between the areas proposed to be annexed and the City.

   c) The areas proposed to be annexed are urban or will be urbanized in the near future.

   d) The areas proposed to be annexed are integrated with or are capable of being integrated with the City.

   e) No land within the boundary of the areas proposed to be annexed which is held in identical ownership, whether consisting of one (1) tract or parcel of real estate or two (2) or more contiguous tracts or parcels of real estate, has been divided into separate parts or parcels without the written consent of the landowner or landowners thereof, unless such tracts or parcels were separated by a dedicated street, road or other public way.

   f) No land within the boundary of the areas proposed to be annexed which is held in identical ownership, comprises twenty (20) acres or more, and which, together with the buildings and improvements situated thereon has an assessed value in excess of two hundred thousand dollars and 00/100 ($200,000.00) for ad valorem tax purposes for the year next preceding the annexation, has been included within the area proposed to be annexed without the written consent of the landowner or landowners.

g) The Property are not presently a part of any incorporated city, city and county, or the City; nor have any proceedings been commenced for incorporation or annexation in an area that is part or all of the Property; nor has any election for annexation of the Property or substantially the same areas to the City been held within the twelve (12) months immediately preceding the filing of this Petition.

h) The annexation of the areas proposed to be annexed will not result in the detachment of area from any school district or attachment of same to another school district.

i) Except to the extent necessary to avoid dividing parcels within the Property held in identical ownership, at least fifty percent (50%) of which are within the three (3)-mile limit, the proposed annexation will not extend the municipal boundary of the City more than three (3) miles in any direction from any point of the current municipal boundary in any one (1) year.

j) Prior to completion of the annexation of the areas proposed to be annexed, the City will have in place a plan for those areas, which generally describes the proposed: location, character, and extent of streets, subways, bridges, waterways, waterfronts, parkways, playgrounds, squares, parks, aviation fields, other public ways, grounds, open spaces, public utilities, and terminals for water, light, sanitation, transportation, and power to be provided by the City; and the proposed land uses for the areas; such plan to be updated at least once annually.

k) In establishing the boundary of the areas proposed to be annexed, if a portion of a platted street or alley is to be annexed, the entire width of the street or alley has been included within the areas to be annexed.

l) The City will not deny reasonable access to any landowners, owners of any easement, or the owners of any franchise adjoining any platted street or alley which is to be annexed to the City but is not bounded on both sides by the City.

3. Petitioner comprises more than fifty percent (50%) of the landowners in the Property owning more than fifty percent (50%) of the Property, excluding public streets, alleys and any land owned by the annexing municipality, and the Petitioner hereby consents to the establishment of the boundaries of the Property as shown in the annexation maps submitted herewith. The legal description of the lands owned by the Petitioner is set forth in "Exhibit A" attached hereto and incorporated herein by reference.

4. Accompanying this Petition are four (4) copies of an annexation map containing the following information:

a) A written legal description of the boundaries of the areas proposed to be annexed;

b) A map showing the boundary or the areas proposed to be annexed, said

map prepared and containing the seal of a registered engineer;

c) Within the annexation boundary maps, a showing of the location of each ownership tract in unplatted land and, if part or all of the areas are platted, the boundaries and the plat numbers of plots or of lots and blocks;

d) Next to the boundary of the areas proposed to be annexed, a drawing of the contiguous boundary of the City and the contiguous boundary of any other municipality abutting the areas proposed to be annexed, and a showing of the dimensions of such contiguous boundaries.

5. The affidavit of the circulator of this Petition certifying that the signature on this Petition is the signature of each person whose name it purports to be certifying the accuracy of the date of such signatures is attached hereto as "Exhibit B" and is incorporated herein by this reference.

6. The proposed annexation of the Property complies with § 30(1)(b) of Article II of the Colorado Constitution.

7. Upon the annexation ordinance becoming effective, the Property proposed to be annexed will become subject to all ordinances, rules and regulations of the City, except for general property taxes of the City which shall become effective as the January 1 next ensuing following the adoption of the annexation ordinance.

8. This Petition is conditioned upon the approval of Light Industrial zoning classification for the entire Property and approval by the Petitioner of one or more annexation agreements for the Property that are acceptable to the Petitioner and the City.

WHEREFORE, the following Petitioner respectfully requests that the City, acting through its City Council, approve the annexation of the Property pursuant to the provisions of the Act.

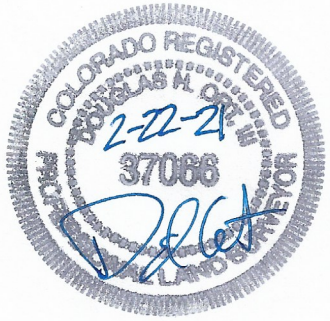
A TRACT OR PARCEL OF LAND LOCATED IN THE WEST ONE-HALF OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST, OF THE 6TH/ PRINCIPAL MERIDIAN, COUNTY OF JEFFERSON, STATE OF COLORADO, BEING ALL OF THOSE PARCELS OF LAND DESCRIBED BY DEED RECORDED WITH THE JEFFERSON COUNTY CLERK AND RECORDER UNDER RECEPTION NO. 2017111129, 20147016997, AND 2015126759 AND A PORTION OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017119140, AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHEASTERLY MOST CORNER OF A PARCEL OF LAND DESCRIBED IN RECEPTION NUMBER 2017111129, AS RECORDED WITH THE CLERK AND RECORDER OF JEFFERSON COUNTY, COLORADO, WHENCE THE CENTER OF SAID SECTION 6 BEARS S46°18'37"E, 852.84 FEET;

THENCE S08°06'50"E, 368.50 FEET TO THE NORTHEASTERLY CORNER OF LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF A PORTION OF COBE LABORATORIES ARVADA BUILDING SITE, RECEPTION NUMBER 81024687;

THENCE S85°17'41"W, 349.19 FEET TO THE NORTHWESTERLY CORNER OF LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF A PORTION OF COBE LABORATORIES ARVADA BUILDING SITE, RECEPTION NUMBER 81024687;

THENCE S00°01'19"E, 217.46 FEET TO THE SOUTHWESTERLY CORNER OF LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF A PORTION OF COBE LABORATORIES ARVADA BUILDING SITE, RECEPTION NUMBER 81024687;



THENCE S88°36'14"W, 549.78 FEET TO THE NORTHWESTERLY CORNER OF LOT 1A, PARKWAY CENTER SUBDIVISION FILING NO. 6, MINOR SUBDIVISION, RECEPTION NUMBER 2019043406;

THENCE S00°01'35"E, 724.00 FEET TO THE NORTHEASTERLY CORNER OF LOT 1, INDIANA BUSINESS CENTER, MINOR SUBDIVISION, RECEPTION NUMBER 83023441;

THENCE N89°35'58"W, 167.53 FEET TO A CORNER OF LOT 1, INDIANA BUSINESS CENTER, RECEPTION NUMBER 83023441;

THENCE S00°03'05"E, 95.39 FEET TO A CORNER OF LOT 1, INDIANA BUSINESS CENTER, RECEPTION NUMBER 83023441;

THENCE N89°36'05"W, 196.75 FEET TO A POINT ON THE WESTERLY RIGHT-OF-WAY LINE OF HOLMAN STREET;

THENCE S00°07'46"E, 123.85 FEET TO THE NORTHEASTERLY CORNER OF LOT 10 INDIANA BUSINESS CENTER, RECEPTION NUMBER 83023441;

THENCE N89°35'35"W, 522.06 FEET TO THE SOUTHWESTERLY CORNER OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2015126759;

THENCE N00°02'58"W, 291.32 FEET TO A POINT ON THE SOUTHERLY LINE OF THAT PARCEL DESCRIBED UNDER RECEPTION NO. 90066231;

THENCE ALONG THE EXTERIOR OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231, N89°57'02"E, 181.00 FEET TO A NON-TANGENT CURVE TO THE LEFT HAVING A RADIUS OF 20.00 FEET, AND A LONG CHORD OF N44°54'24"E, 28.28 FEET;

THENCE NORTHEASTERLY ALONG THE EXTERIOR OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231, A DISTANCE OF 31.42 FEET ALONG SAID NON-TANGENT CURVE TO THE LEFT THROUGH A CENTRAL ANGLE OF 90°00'00";

THENCE ALONG THE EXTERIOR OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231, N00°05'36"W, 517.89 FEET TO A NORTHWESTERLY CORNER OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129;

THENCE CONTINUE NORTHERLY ALONG THE EXTERIOR OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231, A DISTANCE OF 99.54 FEET TO THE NORTHEASTERLY CORNER OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231;

THENCE N89°57'02"W, 230.51 FEET TO THE SOUTHWESTERLY CORNER OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017119140;

THENCE ALONG THE WESTERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017119140, N00°02'36"W, 56.64 FEET;

THENCE S89°07'58"E, 124.28 FEET TO A CURVE TO THE RIGHT HAVING A RADIUS OF 135.50 FEET AND A LONG CHORD OF S55°37'16"E, 149.62 FEET;

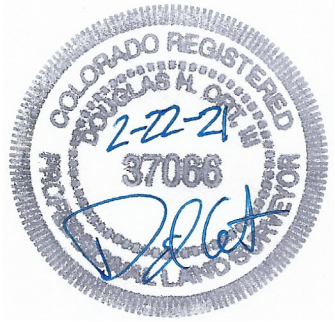
THENCE SOUTHEASTERLY, A DISTANCE OF 158.51 FEET ALONG SAID CURVE TO THE RIGHT THROUGH A CENTRAL ANGLE OF 67°01'24";

THENCE S22°06'34"E, 74.99 FEET TO A POINT ON THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129;

THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, N89°49'10"E, 201.76 FEET;

THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, N00°00'55"E, 351.26 FEET;

THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, S78°41'24"E, 161.57 FEET;



THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, N67°31'37"E, 590.00 FEET;

THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, N72°13'57"E, 609.63 FEET TO THE POINT OF BEGINNING.

CONTAINING 1,085,635 SQUARE FEET OR 24.923 ACRES, MORE OR LESS.

BASIS OF BEARINGS: BEARINGS USED HEREIN ARE BASED ON THE EAST-WEST CENTER LINE OF THE WEST HALF OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST, OF THE 6TH P.M., BEING N88°58'53"E USING THE COLORADO STATE PLANE COORDINATES - CENTRAL ZONE, AS MONUMENTED AT THE WEST 1/4 CORNER OF SECTION 6, FOUND ILLEGIBLE 2.0" ALUMINUM CAP, PER MONUMENT RECORD BY PLS 12405 DATED 8/16/00, AND AS MONUMENTED AT THE CENTER 1/4 CORNER OF SECTION 6, BY A FOUND 2.5" ALUMINUM CAP PLS 5112, PER MONUMENT RECORD BY PLS 5112, DATED 6/11/97.

GENERAL NOTES

1. NOTICE: ACCORDING TO COLORADO LAW YOU MUST COMMENCE ANY LEGAL ACTION BASED UPON ANY DEFECT IN THIS SURVEY WITHIN THREE YEARS AFTER YOU DISCOVER SUCH DEFECT. IN NO EVENT MAY LEGAL ACTION BASED UPON ANY DEFECT IN THIS SURVEY BE COMMENCED MORE THAN TEN YEARS FROM THE DATE CERTIFICATION SHOWN HEREON.

2. THIS SURVEY DOES NOT CONSTITUTE A TITLE SEARCH BY WILSON AND COMPANY TO DETERMINE TITLE OR EASEMENTS OF RECORD. RESEARCH FOR THIS SURVEY WAS PERFORMED IN ACCORDANCE WITH CRS 38-51-106 AND THE RULES OF PROCEDURE AND BOARD POLICY STATEMENTS OF THE STATE BOARD OF LICENSURE FOR PROFESSIONAL ENGINEERS AND PROFESSIONAL LAND SURVEYORS, SPECIFICALLY THOSE BOARD RULES AND POLICY STATEMENTS RELATING TO THE DEPICTION OF EASEMENTS AND RIGHTS OF WAY ON SUBDIVISION PLATS. THE FOLLOWING TITLE COMMITMENTS WERE PREPARED BY FIRST AMERICAN TITLE INSURANCE COMPANY AND WERE RELIED UPON FOR ALL INFORMATION REGARDING EASEMENTS OF RECORD, RIGHTS OF WAY, TITLE OF RECORD AND CIVIL COURT ACTIONS OF RECORD.

COMMITMENT NO. NCS-1005589-5-CHI2, DATED 11-30-2020 (DYMOND PROPERTY - 6702 INDIANA STREET)
COMMITMENT NO. NCS-1005589-1-CHI2, DATED 11-30-2020 (NEWSOME PROPERTY - 6710 INDIANA STREET)
COMMITMENT NO. NCS-1005589-3-CHI2, DATED 11-30-2020 (FOSTER PROPERTY - 6700 INDIANA STREET)

3. BASIS OF BEARINGS: BEARINGS USED HEREIN ARE BASED ON THE EAST-WEST CENTERLINE OF THE WEST HALF OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST, OF THE 6TH P.M., BEING N88°58'53"E USING THE COLORADO STATE PLANE COORDINATES - CENTRAL ZONE, AS MONUMENTED ON THE WEST BY A FOUND ILLEGIBLE 2.0" ALUMINUM CAP, ACCEPTED AS THE WEST 1/4 CORNER OF SECTION 6,PER MONUMENT RECORD BY PLS 12405 DATED 8/16/00, AND AS MONUMENTED ON THE EAST BY A FOUND 2.5" ALUMINUM CAP PLS 5112, ACCEPTED AS THE CENTER CORNER OF SECTION 6, PER MONUMENT RECORD BY PLS 5112, DATED 6/11/97.

SURVEYOR'S CERTIFICATE:

I, DOUGLAS H. ORT III, A PROFESSIONAL LAND SURVEYOR IN THE STATE OF COLORADO, ON THE BASIS OF MY KNOWLEDGE, INFORMATION AND BELIEF, DO HEREBY CERTIFY THAT IN JUNE 2020, A ANNEXATION MAP WAS MADE UNDER MY SUPERVISION, IN ACCORDANCE WITH THE STANDARD OF CARE FOR THE STATE OF COLORADO, AND THAT THIS ANNEXATION MAP AND ALL NOTES SHOWN HEREON IS AN ACCURATE REPRESENTATION OF THE PROPERTY AS DETERMINED BY THIS SURVEY. ENCROACHMENTS, EASEMENTS, RIGHTS OF WAY OR PASSAGEWAYS ACROSS SAID PROPERTY THAT ARE IN EVIDENCE OR KNOWN TO ME, ARE AS SHOWN TO THE BEST OF MY KNOWLEDGE, INFORMATION AND BELIEF. THIS SURVEY, AND THE INFORMATION SHOWN HEREON ARE NOT A GUARANTY OR WARRANTY, EITHER EXPRESSED OR IMPLIED.

THE ABOVE DESCRIBED LAND IS CONTIGUOUS TO THE CITY OF ARVADA AND MEETS THE REQUIREMENTS SET FORTH IN COLORADO REVISED STATUTES 1973, 31-12-104-(1)(A) THAT ONE-SIXTH OR MORE OF THE PERIMETER TO BE ANNEXED IS CONTIGUOUS WITH THE ANNEXING MUNICIPALITY.

CONTIGUITY STATEMENT:

- TOTAL PERIMETER OF AREA CONSIDERED FOR ANNEXATION=6994.83'
- ONE-SIXTH OF TOTAL PERIMETER OF AREA=1165.81'
- PERIMETER OF THE AREA CONTIGUOUS WITH EXISTING CITY LIMITS=4722.83'
- THE TOTAL CONTIGUOUS PERIMETER IS 67.5%, WHICH EXCEEDS THE 1/6 AREA REQUIRED

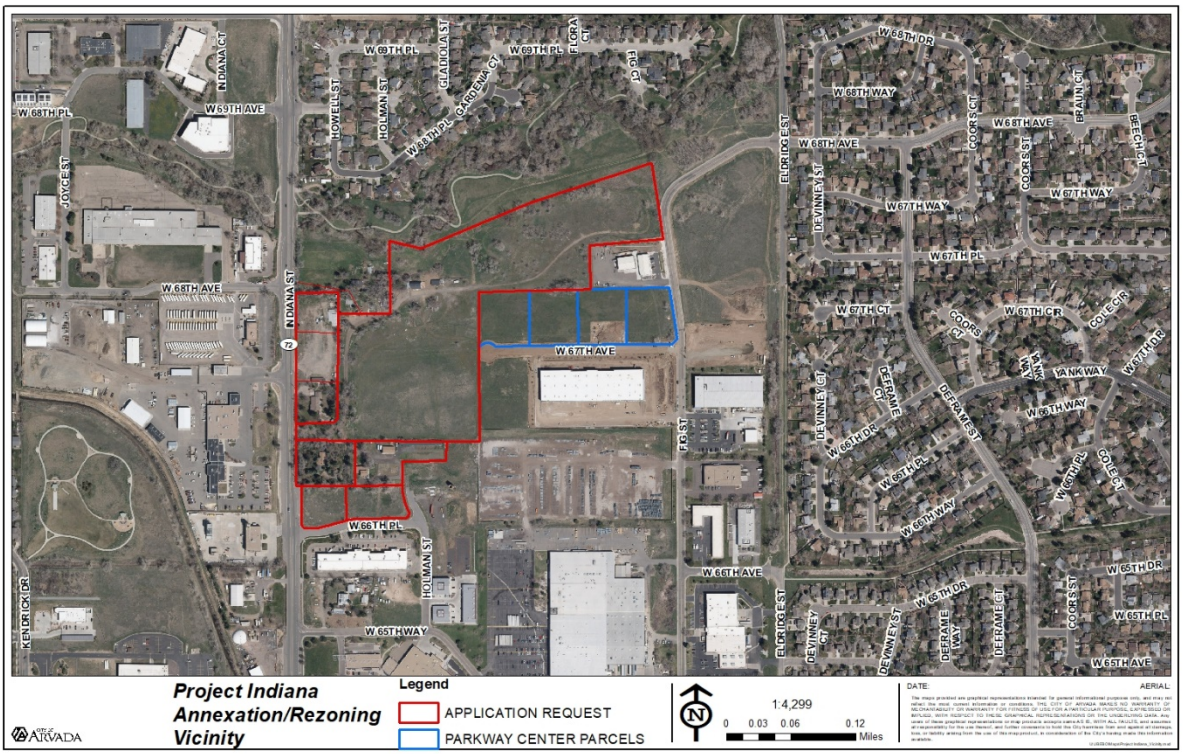
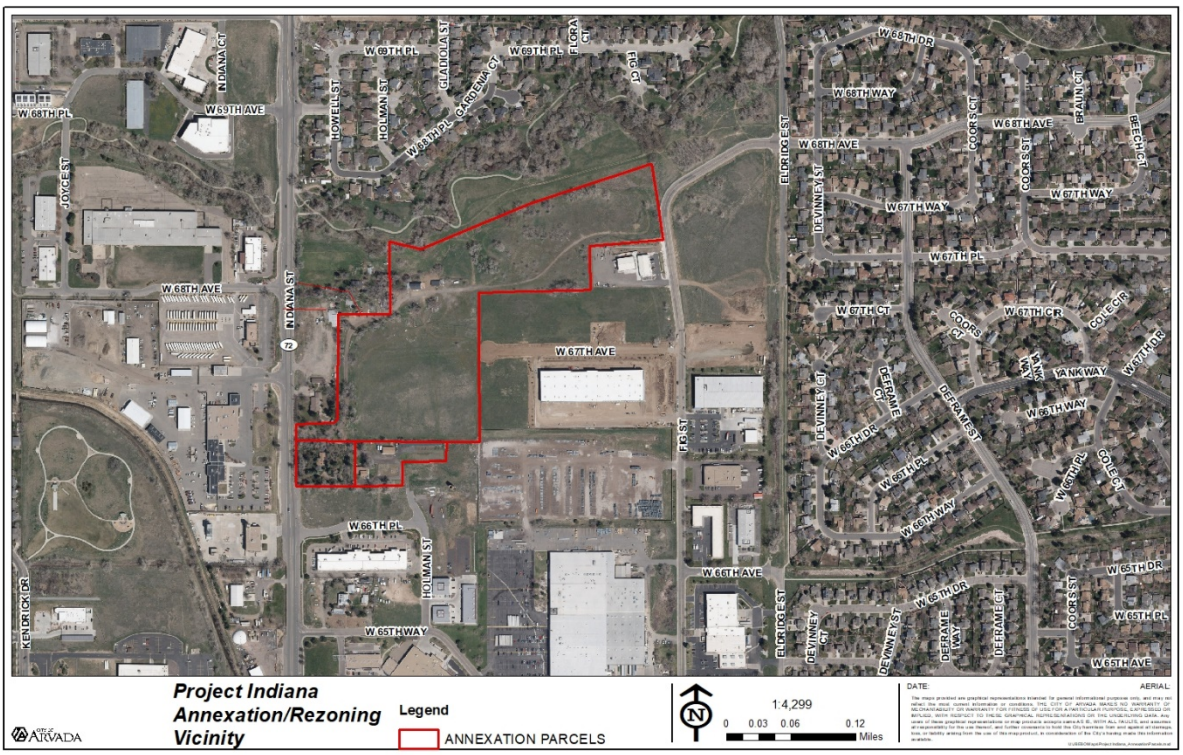
City of Arvada
Community and Economic Development Department
PUBLIC HEARING STAFF REPORT



Project Indiana
Annexation/Rezoning
DA2020-0117

NATURE OF REQUEST

Scannell Properties, LLC., is requesting approval of an annexation and rezoning application of approximately 24.93 acres of land and a rezoning of approximately 5.36 acres of land already within the limits of the city in order to develop an approximately 112,000 square-foot warehouse fulfillment and distribution center to be leased and operated by Amazon, Inc. The overall project involves the assembly of twelve parcels of land and a portion of land from the property located at 6720 Indiana. Four lots (Lot 1A-4A of the Parkway Center Filing No.6 subdivision) are located along W. 67th Avenue west of Fig Street, are zoned IL (Industrial, Light) and are not part of the annexation and rezoning request.



All of the land proposed to be annexed is currently zoned Jefferson County A-2 (Agricultural), is proposed to be rezoned to City of Arvada IL (Industrial, Light) and has a Comprehensive Plan Future Land Use map designation of Industrial/Office/Retail. Five parcels within the city are proposed to be rezoned from CG (Commercial, General) to IL, and have a Comprehensive Plan Future Land Use map designation of Neighborhood/Community Commercial.

The applicant proposes to construct the building and lease it lease it as a warehouse fulfillment and distribution center for packages and deliveries ordered by customers and delivered via a van-fleet. The center would operate 24 hours per day, seven days per week, and would employ up to 460 workers annually and up to 1,000 seasonally. The operation of the site would include up to 42 semi-truck deliveries per day. A portion of the western footprint of the building would be used for office uses and for customer package drop offs and pick-ups and customer service. The rest of the building would be used by workers who would facilitate the organization and packaging of products. On the north side of the building where a canopy and drive is located, packages would then be loaded into various delivery vans and the vans would egress from the site delivering packages to the customers.

LOCATION AND HISTORY

The property proposed to be annexed into the city is comprised of three parcels located at 6700 Indiana St., 6702 Indiana St., 6710 Indiana St., and a portion of 6720 Indiana St. Each of these properties currently contain a single-family home and associated accessory buildings, outbuildings, barns, and other structures generally used for agricultural purposes.

Two properties located at 14785 W. 66th Pl., and 14725 W. 66th Pl. are within the jurisdictional boundary of the City of Arvada and are currently zoned CG (Commercial, General). These properties (Lots 9 and 10 of the Indiana Business Center subdivision) were annexed into the city in 1980 with the Roske Rose Alderfer Annexation and platted in 1983. These two lots are currently undeveloped. One property containing three parcels located at 6730 Indiana St. was annexed into the city in 1979 with the Binder Annexation and has not been platted. This property is also zoned CG. Currently this property contains one single-family home and associated accessory buildings.

NEIGHBORHOOD MEETING

Division 8-2-2 of the Land Development Code requires that at least one neighborhood meeting be held for projects that require public hearings before the Planning Commission and City Council.

The required neighborhood meeting for this project took place on November 18th, 2020 and in conjunction with the Maple Valley Park annexation case (DA2020-0118). Due to the COVID-19 pandemic, a virtual neighborhood meeting was held. The applicant and staff were in attendance as well as 35 neighbors. Issues regarding plans for the park and ensuring that the park would not be developed on were discussed in addition to the various concerns for the Project Indiana Site. Concerns around traffic, lighting, noise, and potential impacts to wildlife habitat and the floodplain were also discussed. The applicant thoroughly explained the operations of the center in relation to time-of-day and off-peak hours and how all of their large truck trips occur at night.

A second virtual neighborhood meeting was held on March 11th, 2021 also in conjunction with Project Indiana to address additional neighbor concerns that arose during the review cycle.

Approximately 300 residents were in attendance at the meeting. The applicant, Scannell Properties, along with the eventual end user, Amazon, gave a presentation regarding the project. Representatives from Amazon provided information about overall delivery logistics between various building types in the region, and their operations of this specific site. Amazon explained the three different types of distribution centers they build and operate based on the

scale of the site, building size, and employment, and explained that this site would be their smallest type. The developer then gave a presentation on the annexation and rezoning process and an overview of the construction of the site including details related to the building, access and parking, lighting, landscaping, drainage and stormwater, and other various site development details.

Several representatives from the Protect Maple Valley Park Committee were then allowed to present their concerns. Various issues related to compatibility with the existing neighborhoods, traffic, noise, lighting, drainage, and property values were discussed. Additionally, the Committee brought up concerns about potential negative impacts to the adjacent Maple Valley Park including noise and a desire to protect the wildlife that may live there.

Attendees submitted questions and expressed concerns related to the planned land-use of the site, the Comprehensive Plan, zoning, and the development review process.

Many questions and concerns were then raised regarding traffic. The applicant's traffic engineer was present to discuss the trip generation model used to estimate the trip counts for this project and showed various graphs to demonstrate that Amazon delivery vans would be making their trips to and from the site during off-peak hours. Additionally he showed attendees a comparison of the number of daily trips for this use compared to other uses such as other existing industrial uses, retail uses, grocery store, and community recreation center to show that their counts were lower. Various other questions were asked and answered regarding public improvements to Indiana Street, the proposed traffic signal at Indiana and W. 68th Avenue that the developer would construct, site circulation, Fig Street access, and semi-truck traffic.

Questions and concerns related to drainage, stormwater, and the Ralston Creek floodplain were discussed. The applicant's civil engineer discussed how a stormwater detention pond has been designed and sized to accommodate the impervious area of the site and capture other historic flows, treat the water according to State and local guidelines and eventually outfall to the City storm system in Fig Street. Additionally, himself and staff were able to respond to the floodplain concerns by stating that the City, Jefferson County, and the Mile High Flood District were in coordination with each other to prevent any negative impacts to the floodplain. Additionally, any area of the site that lies within the 100-year floodplain area would be dedicated to the City and made part of Maple Valley Park.

Issues and discussions around trees and landscaping on the site were brought up. The developer stated that over 700 new trees would be planted on-site. Included in that count would be a wide landscaped buffer along the northern boundary which would include deciduous and evergreen trees along with a masonry wall. The wall would be built to help mitigate negative impacts of noise and lighting.

This neighborhood meeting also included a discussion regarding the annexation and rezoning for Maple Valley Park, a City of Arvada park. The park is currently zoned Jefferson County A-2 and would be rezoned to Arvada OS (Open Space). The park is adjacent to the Project Indiana site described above but would not be part of the development.

The applicant prepared a summary of the meetings, which is attached.

PUBLIC NOTIFICATION

Division 8-2-4 of the Land Development Code requires public notification for all public hearings as follows:

Written Notice: At least 15 days prior to all public hearings, written notice must be mailed to all property owners within 500 feet of the subject property and to all homeowners associations and neighborhood associations with a known interest in the subject property. The applicant will provide an affidavit of mailing verifying this requirement has been met prior to the public hearing.

Posted Notice: At least 15 days prior to all public hearings, signs notifying the public of the hearing must be posted on the subject property. The applicant will provide a posting log verifying that this requirement has been met prior to the public hearing.

Published Notice: At least 15 days prior to all public hearings, notice of the hearing must be published in a newspaper of general circulation in the City. The required notice has been published.

SEVERED MINERAL RIGHTS

At least 30 days prior to the public hearing, written notice of the application must be mailed to any owner of mineral rights associated with the subject property. The applicant has provided the required Certification of Notice pursuant to Colorado Revised Statute 24-65.5-103.

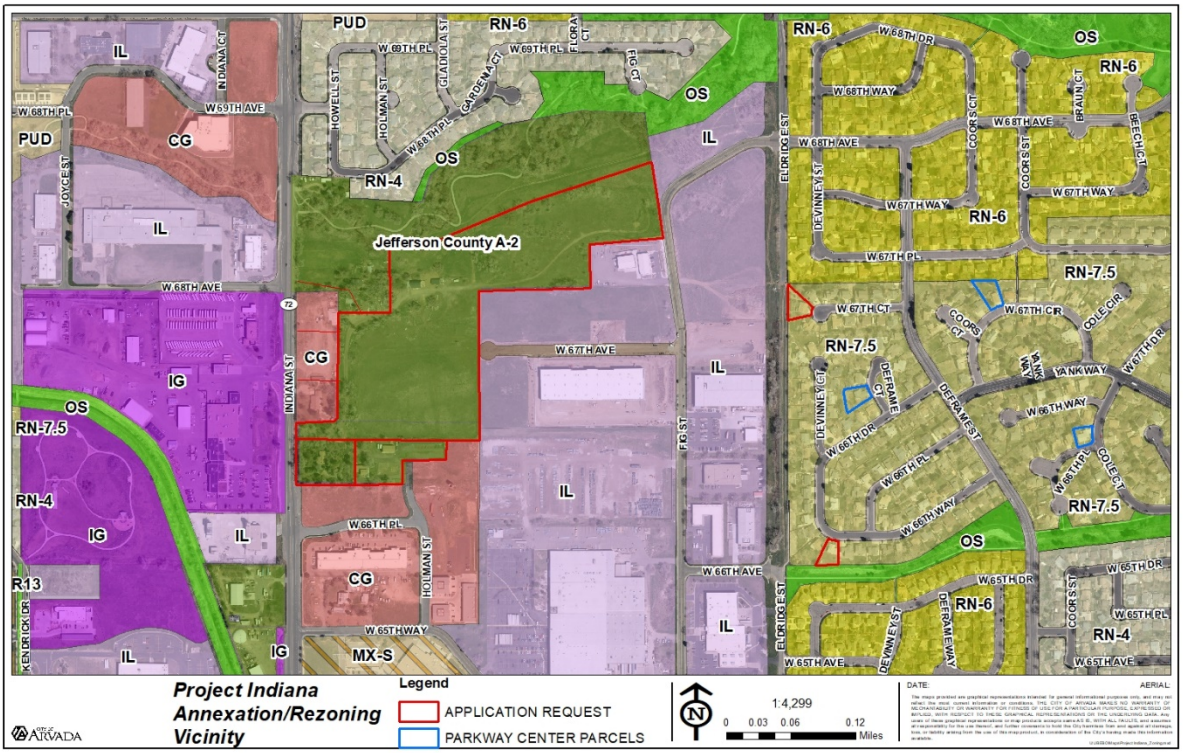
DEVELOPMENT REVIEW TIMELINE

The application was accepted by the City for review on October 26, 2020. The standard review timeline allows for three reviews within a 20 week timeframe to reach a Planning Commission public hearing. This application required three reviews. Because an optional second neighborhood meeting was held prior to the Planning Commission hearing, the case is being heard over 25 weeks from the acceptance of the application.

ALIGNMENT WITH CITY COUNCIL STRATEGIC PLAN

This project aligns with the Community and Economic Development strategic goals.

ZONING AND LAND USE



A portion of the subject property is currently zoned Jefferson County A-2. The properties located within the City are zoned CG. The total site area is approximately 30.29 acres in size.

Surrounding properties are zoned and utilized as follows:

Direction	Zoning	Actual Use
North	Jefferson County A-2	Maple Valley Park Single-Family Home
South (across W. 66th Pl.)	CG	Inline Retail/Commercial Center
East (across Hollman St.) East Property Line	CG IL	Undeveloped Lots (future Phase II Microspaces) Undeveloped Lots Warehouse/Storage Facility
West (across Indiana St.)	IL IG (Industrial, General)	Manufacturing/Warehouse/Distribution Jefferson County School Bus Fleet City of Arvada Indiana Shops

The applicant is proposing to rezone the land to be annexed into the city from Jefferson County A-2 to City of Arvada IL. The intent of the IL district is to provide areas for light manufacturing, assembly, and fabrication uses, office, research, food and beverage processing, packaging or bottling, and compatible recreational activities. The IL zone district is intended to implement the Industrial/Office/Retail designation in the Comprehensive Plan. Light industrial uses are allowed in the IL district and are restricted to a maximum number of semi-truck trips of up to 50 per day.

The applicant is also proposing to rezone the five parcels of land currently within the City boundaries from CG (Commercial General) to IL. The rezoning of these parcels is consistent with the Comprehensive Plan as the uses that are being proposed on those parcels (office and parking) are uses that are allowed in both Industrial/Office/Retail and Neighborhood/Community Commercial designations. Additionally, if the applicant completes the consolidation of all of the properties into one, it is in the best interest of the City to have the entire property zoned as one district and not split-zoned.

PROJECT ANALYSIS

Annexation

The applicant desires to annex approximately 24.93 acres of land into the City in order to access City water and sanitary sewer service.

Annexation into the City requires conformance with the contiguity requirements in Colorado Revised Statues §31-12-101 which requires at least one-sixth of the property perimeter to be contiguous with the City of Arvada. The property is effectively an enclave with continuity achieved in all directions. The south, west, and east property lines share a boundary with the City of Arvada and meets this requirement.

Compliance with the Comprehensive Plan

The project site is designated as Industrial/Office/Retail on the 2014 Comprehensive Plan Future Land Use map. The proposed annexation and rezoning is consistent with the following Comprehensive Plan Goals & Policies:

Goal L-2**:** Plan for a balanced mix of commercial and residential land uses in Arvada.

> Policy L-2.1: Complete Community
> The City will provide for a balanced mix of land uses by promoting redevelopment and continuing to reserve lands for future commercial and industrial development as well as a variety of housing choices.

Policy L-2.2: Allow Appropriate Expansion of City Boundaries
The City will consider the annexation of land that includes land uses that are consistent with the Comprehensive Plan goals, the long-term needs of the community and the City's service capacity.

Goal ED-1: Expand and diversify the City's economic base to create primary jobs to increase the City's fiscal capacity to meet the needs of its citizens.

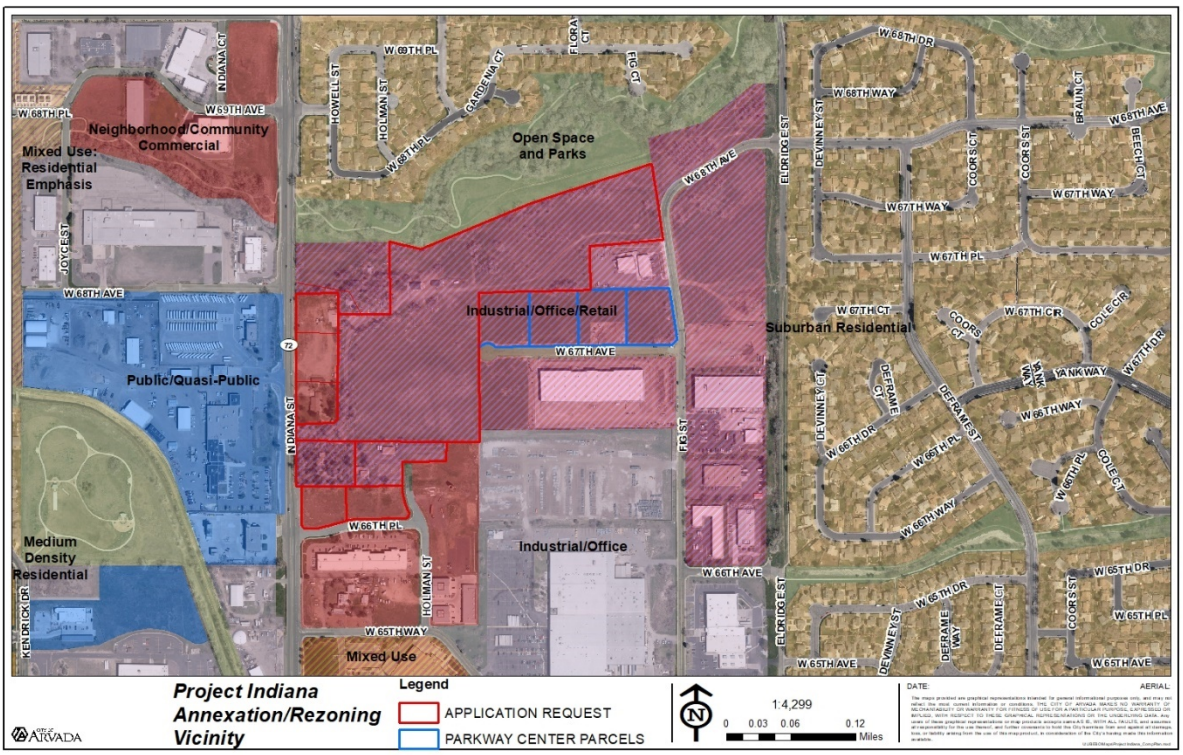
Policy ED-1.1: New Commercial and Employment Development
The City, working with the Arvada Economic Development Association, will actively promote and support commercial and employment development by recruiting primary jobs and increasing the range of products and services available to Arvada citizens.

Goal ED-2: Plan for new employment centers that will provide primary jobs in Arvada.

Policy ED-2.1: Land for Employment Uses
The City will retain lands in strategic, transit supportive parts of the City for new employment centers to accommodate office, manufacturing, high tech, flexible space, and other primary employment uses. Targeted industries include medical, manufacturing, research and development, biomedical, energy, enabling technology, and professional services. Future employment centers are located at:

- Parkway Business Center (Indiana and 64th Avenue);
- Indiana Street and 86th Parkway;
- Indiana Street and 66th Avenue (Parkway Business Center and environs);
- Olde Town;
- Ralston Creek (Triangle area);
- Ward Road and I-70; and
- Southeast Arvada and the 60th and Sheridan/Arvada Gold Strike TOD Station.

Goal ED-4: Redevelop and revitalize existing commercial and industrial areas.



Goal ED-5: Improve the City's economic base and its financial strength

Policy ED-5.1: Strengthen and Diversify the City's Tax Base
In order to fund existing and future service commitments, the City will continue to monitor and support existing retail and employment uses, as well as promote opportunities to attract new retail uses, primary employers, tourism, and targeted entrepreneurial and technical industry clusters. The City will seek supplemental revenue sources in addition to sales tax, to allow city services to be less susceptible to retail market considerations.

Goal CC-1: Plan Arvada as a City of different development character districts.

Policy CC-1.1: Variety of Development Types
The City will include a variety of development types including rural areas, suburban residential neighborhoods, historic districts, redevelopment areas, and mixed-use communities that contain services, employment, and higher density housing.

The annexation and rezoning applications comply with the above policies and goals by incorporating an enclave of land into the city boundary and rezoning it to a zoning designation (IL) that is consistent with the Comprehensive Plan. This land has been identified in the Comprehensive Plan as being a targeted area for employment uses and a future employment center.

Setbacks
The IL zone district requires that all buildings be located 20 feet from a front property line, 20 feet from a side-street, five feet from an interior side, and five feet from a rear.

Setbacks will be reviewed as part of a Site Plan application. Currently the proposal more than exceeds all the setback requirements.

Building Height
The maximum building height allowed in the IL zoning district is 40 feet. Building height will be reviewed as part of a Site Plan application. Currently, the proposal shows the building at 37.7 feet in height as measured from finished grade to the roof deck. Parapet walls may extend beyond the height restriction.

Open Space
The IL zoning district requires a minimum of 15 percent of the site be landscape surface area. Open space and landscaping will be reviewed as part of a Site Plan application. Currently the proposal shows 29.68 percent of the site as being landscaped open space.

Landscaping, Buffering and Fencing
Specific details of the landscape plan will be reviewed as part of a Site Plan application. The site contains a large quantity of existing mature trees. An arborist report and mitigation plan was required as part of the Site Plan application and the applicant will be required to provide an equal number of caliper inches on the project site as well as pay fees in-lieu in order to quantify the caliper inches lost. Fencing is also being reviewed as part of the Site Plan application. Although a buffer is not required by the LDC, a wide landscaped buffer containing a mix of deciduous and columnar trees and a masonry wall along the northern boundary of the project site and Maple Valley Park is being recommended as a condition of approval of the annexation application.

Building Design
The building design will be reviewed as part of a Site Plan application. The building is proposed to be approximately 112,000 square feet in size and contain an attached 56,867 square-foot canopy which will cover the area of the site dedicated for delivery van loading. Currently, the building design is proposed to consist of tilt-up concrete panels on all four facades with a storefront on the façade facing Indiana Street. The storefront wraps around the south elevation of the building providing additional transparency to Indiana Street and the employee and customer parking lot. This portion of the building is where the primary office use is to be located as well as customer pick-up. Techniques utilizing texture, color, scoring, and "column" projects are used in order to help break up the building. Fifteen overhead doors are proposed to be located on the east elevation which will be used for semi-truck deliveries. The final design of the buildings will be reviewed as part of a Site Plan application.

Circulation and Connectivity
There are a total of eight points of vehicular access to the site that are proposed off of City and CDOT right-of-way. Two points of access onto Indiana Street are proposed on the west-side of the site. The access on the southernmost part of the site will be restricted to right-in/right-out movements only and will provide access to the employee/customer parking lot. A second access to Indiana Street is proposed that will align with W. 68th Avenue. The applicant will be required to pay for and construct a new traffic signal at this intersection where full movements in all directions will be allowed with the signal.

An access to W. 66th Place is proposed that provides access to a delivery van surface parking lot and a point of access onto Holman Street is proposed which will provide additional circulation options to the employee and customer parking lot. The intersection of Indiana Street and W. 66th Place will be required to be restricted to a 3/4 movements with left hand turns onto Indiana being eliminated.

Two point of access are proposed onto W. 67th Avenue. One access point is proposed where a cul-de-sac currently exists. This access point will provide ingress and egress for van deliveries to the east of the site after they have been loaded. Additionally the second point of access will provide access to a delivery van surface parking lot.

Lastly, one access onto Fig Street is proposed at the northeastern portion of the site which provides access to another van surface parking lot. This access will also provide access to the private property owner of 6720 Indiana Street. This property will have a private access

easement running from west to east which is currently being negotiated between the private parties.

Semi-truck deliveries to the site will be restricted to using W. 66th Place from Indiana Street and traversing north onto Hollman Street where a cul-de-sac will be constructed and one access point at the end of will be proposed.

An east/west internal drive connecting from the signaled intersection of Indiana Street and W. 68th Avenue to W. 67th Avenue will serve as a private through connection. Pedestrian connectivity is proposed throughout the site from the various parking lots to the building.

Additional traffic related public improvements will include the construction of the entire property frontage of Indiana Street. This will include dedication of right-of-way and the construction of the remaining width of Indiana including: two northbound through lanes, deceleration and auxiliary lanes to and from the site, a detached eight-foot-wide sidewalk with tree lawn, curb and gutter. Additional curb, gutter, and sidewalk will be constructed along W. 66th Place and Holman Street where needed along the property frontage.

A traffic study was required as part of the annexation and rezoning application. The report indicates that this project will generate an average of 1,352 weekday trips, with 283 morning and 91 evening peak hour trips. In all, the study estimates a total of 906 automobile trips, 404 van trips, and 42 semi-truck trips within a 24 hour period.

The traffic study is also a part of the Site Plan application and will continue to be analyzed as that application progresses.

Grading and Drainage
Grading on-site generally flows from the southwest to the northeast. Grading will convey runoff towards multiple private inlets within the site, eventually outfalling into a private detention pond on the northeast corner of the site. This pond will provide above ground water quality and detention. The detention pond outfalls to the public storm line located in Fig Street which then eventually outfalls into Ralston Creek.

Parking and Loading
Parking and loading will be reviewed as part of a Site Plan application. Minimum parking requirements compared to what is currently being proposed are as follows:

	Required	Proposed
Office	3 spaces per 1,000 GFA (35)	128
Light Industry	1.75 spaces per 1,000 GFA (176)	1,037
Total	211 (8 ADA)	1,165 (8 ADA)

The proposed parking plan for the site is segregated across the property based on the type of vehicle and use. One parking lot to the south of the building will provide approximately 291 spaces reserved for employees and customers. Twelve parking spaces for semi-trucks are provided at the southeast portion of the site where the trucks will be routed for deliveries. One additional parking lot at the south-end of the site will contain approximately 97 delivery van spaces in addition to the 765 van spaces throughout the northern portion of the site. The total

number of parking spaces may change as the Site Plan application progresses. However, the minimum required 211 spaces will be provided.

Utility Services
Water and sanitary sewer service are provided by the City and are available. One City water main and two sanitary sewer mains run through the property and provide services to other various properties in the area.

Police and Fire Protection
Police and Fire protection are both provided for the site and Arvada Fire has reviewed the conceptual plans.

LAND DEVELOPMENT CODE APPROVAL CRITERIA

It is the responsibility of the applicant to justify the requested land use application. The Planning Commission should make a recommendation to the City Council based on its findings regarding the approval criteria shown in the table(s) below and upon testimony heard during the public hearing as it applied to the criteria.

Staff performed an analysis of the proposal, based on the approval criteria listed in Section 3 of the Land Development Code, and presents the following findings:

Div. 8-3-3 Annexation and Disconnection Approval Criteria	Finding	Rationale
1. The annexation is in accord with the Comprehensive Plan and the best interests of the City would be served by annexation of such property.	Complies	The annexation is in accord with the Comprehensive Plan. The Comprehensive Plan Future Land Use map designation for the area proposed to be annexed is Industrial/Office/Retail. The proposal aligns with that designation.
2. The property is capable of being integrated into the City and developed in compliance with all applicable provisions of this Code and the Arvada City Code.	Complies	The property is an enclave surrounded by the City and can be integrated into the City and developed in compliance with all provisions of the LDC and other City codes.
3. At the time any development of the area proposed to be annexed is completed, there will be capacity to adequately serve residents of such area with all necessary utilities, facilities and public services.	Complies	Existing utilities are available in and around the site and the City has capacity to service it.

Div. 8-3-4 Zoning and Rezoning Approval Criteria	Finding	Rationale
1. The rezoning is consistent with the Arvada Comprehensive Plan, or an adopted sub-area plan, corridor plan, or urban renewal plan, or reflects conditions that have changed since the adoption of the Comprehensive Plan.	Complies	The Comprehensive Plan Future Land Use map designation for the area proposed to be annexed is Industrial/Office/Retail. The proposed rezoning to IL (Industrial, Light) algins with that designation and is intended to implement this designation in the Comprehensive Plan. The five parcels proposed to be rezoned from CG (Commercial General) to IL is also consistent.
2. The intended land use is consistent with the stated intent of the proposed zoning district.	Complies	The proposed warehouse and distribution center, use which is defined in the LDC as Light Industry, is consistent with the intent of the IL zone district.
3. Facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire protection, and roads and transportation, as applicable) will, prior to development, be available to serve the subject property while maintaining adequate levels of service to existing development.	Complies	Facilities and services are available to service the development and will be built out with the construction of the site.
4. The intended land use for which the rezoning is sought will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, or such impacts will be substantially mitigated.	Complies	The intended land use will not result in significant adverse impacts. Efforts to mitigate negative traffic, lighting, noise, and visual impacts will be reviewed with the Site Plan application. A buffer will be required along the northern boundary which will add a wall and large trees to reduce noise and lighting impacts. Additional mitigation efforts will be dealt with in the Site Plan application.
5. The rezoning is consistent with the character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts.	Complies	The rezoning is consistent with the character of the existing neighborhood to the west, east, and south which are zoned as either IL or IG (Industrial, General) and contain industrial uses. The northern boundary will be buffered in order mitigate negative impacts to the park.

STAFF RECOMMENDATION

Based upon project analysis and review of the Land Development Code approval criteria, staff recommends approval of the project.

If the Planning Commission finds that a recommendation to approve the Annexation is supported by the approval criteria, then staff recommends that the following conditions be made part of the approval:

1. In order to substantially mitigate negative impacts to Maple Valley Park and nearby residential neighborhoods, a landscaped buffer with a six-foot-tall masonry wall shall be built along the northern boundary with the park. The width of the buffer, design of the wall, and number, size, and species of trees shall be at the discretion of the Community and Economic Development Director.

The Planning Commission may recommend denial of the request(s) if it cannot make affirmative findings of the approval criteria stated above.

Neighborhood Meeting Summary

Meeting #1: November 18, 2020

Kimley»Horn

MEMORANDUM

To:	Jeremiah Bebo, City of Arvada
From:	Stephen Litsas, PE
	Kimley-Horn and Associates, Inc.
Date:	November 18, 2020
Subject:	Project Indiana Annexation – Neighborhood Meeting Summary

A neighborhood meeting was held on November 18, 2020 at 6 pm, to discuss the annexation submission with the public. This annexation meeting included two annexations within the same discussion: DA2020-0117 (Project Indiana) and DA2020-0118 (Maple Valley Park). Due to the on-going COVID situation, this meeting was held via Microsoft Teams. Members of the public were provided a link to log in prior to the meeting and were able to ask questions via the platform. No known technical issues were reported by any of the attendees.

A link to the full recording of the meeting can be found here:
https://web.microsoftstream.com/video/786024da-00fd-406d-8967-ac2d0b5c5da9

The meeting first discussed the annexation process for both the Project Site and the Park. It then followed into a high-level proposal of the future site development submission. It was noted that this application was not for the site development; however, to be transparent to the public of the intended annexation this was discussed. The site development discussion included a conceptual site layout, conceptual building elevations, traffic management, and high-level discussions of how the facility would operate.

The following issues were raised by the public:

1. Public: The timing of the extension of Eldridge St.
    a. City Response: The extension of Eldridge St will occur as future properties along Eldridge St develop.
    b. Follow-Up: This annexation has no impact on that. No further follow-up was required for this as part of this application.
2. Public: Questions related to traffic, including volume and timing.
    a. Applicant Response: It was clarified that a majority of van traffic would be directed towards Indiana St, with most entering Indiana St at 68th Ave and most trucks entering Indiana St at 66th Ave. It was discussed that the facility operates 24 hours a day, with truck traffic occurring during the nighttime, and van traffic happening during the daytime.

   b. Follow-Up: This response was accepted by the members of the public, and the traffic pattern could not otherwise be altered.
3. Public: Concerns with the parking lot being too bright for residences or impacting wildlife in the Park.
   a. Applicant Response: The lighting level in the parking lot is designed to a "safe level" using the City's standard, not as a bright as a standard retail parking lot. In addition, the site will use cutoff lenses that allow light to be controlled to only fall on the site.
   b. Follow-Up: The Applicant will provide a photometric analysis as part of the Site Plan application that shows lighting levels do not spill onto the neighboring residential properties.
4. Public: Concerns that the floodplain for Ralston Creek will be negatively impacted.
   a. Applicant Response: The site is intentionally staying out of the floodplain, and there will be no impacts to the floodplain.
   b. Follow-Up: This response was considered adequate by the questioner, and no follow-up is required.
5. Public: Concerns on wildlife impacts, and if there have been studies done on the wildlife in the park. Including the noise as it impacts the wildlife.
   a. Applicant Response: An environment due diligence was undertaken for the site, including a critical species, and it came back with no concerns. In terms of noise, the building was put as far south as possible on the site, and the trucks were concentrated in the existing industrial parts of the site. The parking lot adjacent to the Park operates like a standard parking lot, and the noise should be minimal.
   b. Follow-Up: The environmental study was submitted as part of the annexation and is public. No further follow-up required by the applicant as part of the annexation.
6. Public: Concerns on the amount of parking:
   a. Applicant Response: It is for the function of the facility, to park the fleet of vans.
   b. Follow-Up: This amount of parking is critical for the operation of the facility, and cannot be altered.
7. Public: Concerns with stormwater drainage / runoff negatively impacting Maple Valley Park
   a. Applicant Response: The facility will include detention and stormwater quality treatment measures in accordance with City of Arvada standards. This will clean pollutants out of the water prior to it discharging to Maple Valley Park.
   b. Follow-Up: This was accepted by the questioner.

Meeting #2: March 11, 2021

Provided in the packet

Synopsis of meeting minutes from April 20, 2021 Planning Commission

Before opening the public hearing for the next case, Mr. Owens stated due to the large number of people signed up to speak, additional commenters that did not sign up to speak prior to the 5:00 pm cut off would not be allowed to make comments. He mentioned that additional comments could be made at the City Council meeting on June 7, 2021. (This date was later corrected to June 14, 2021)

Project Indiana Annexation, generally located at 6730 Indiana St.

Mr. Owens entered into the record the Staff Report dated April 20, 2021, affidavit of mailing, posting log and public comment that was received via email.

Jeremiah Bebo stated we have received 254 individual emails in support and opposition of public comment. 3 petitions from Protect Maple Valley Park submitted:

- March 1
- March 29
- April 11

Additionally, a PowerPoint presentation was received to be presented by the Protect Maple Valley Park organization, 7 photos that will be reviewed during the public comment; and a PowerPoint presentation submitted by the applicant. All items have been submitted to the public record.

Mr. Bebo introduced the Project Indiana Annexation and Rezoning. Mr. Bebo stated that Scannell Properties LLC has requested approval for annexation and rezoning of approximately 24.93 acres of land and a rezoning of approximately 5.36 acres of land already existing in the city limits. This proposal is to develop the land with approximately 112,000 sq ft warehouse fulfilment and distribution center. The project involves the assembly of 12 parcels of land and a portion of the land located at 6720 Indiana St. Mr. Bebo identified 4 lots that are already in the IL designation and part of the city limits and noted that they will not be part of this application. Staff recommends approval of the project with the following condition be made part of the approval.

1. In order to substantially mitigate negative impacts to Maple Valley Park and nearby residential neighborhoods, a landscaped buffer with a six-foot-tall masonry wall shall be built along the northern boundary with the park. The width of the buffer, design of the wall, and number, size, and species of trees shall be at the discretion of the Community and Economic Development Director.

Jill Marcotte, developer, with Scannell Properties introduced the team and gave an in depth presentation with the provided PowerPoint. She explained how the proposed design will fit with the City's Comprehensive Plan and explained the rezoning from Jefferson County A-2 and Arvada CG to IL. She explained the potential design plan for the site and how they are adding an extensive amount of buffering to protect the park. She discussed the community outreach that was held which included two neighborhood meetings; one in November and the second one in March. Both meetings had neighbors in attendance. She discussed the intended user for this project (Amazon) and the truck routing that is directed away from the nearby residential neighborhood.

Carolynne White, applicants Land Use Attorney, gave an overview of the approval criteria and how the project meets the criteria. She stated the 3 applicable annexation criteria and the 5 rezoning criteria. She acknowledged the communities concerns and stated they have listened and attempting to address the concerns. She stated there are concerns about the traffic and with this project and stated that Indiana Street will be widened along the property frontage.

Mr. Owens opened the hearing for comments from the public.

PUBLIC COMMENT

IN FAVOR

None

IN OPPOSITION

The commission allowed for an extended public comment and presentation from several Homeowner Association Groups. Gina Hallisey, Vice President of the Maple Valley HOA and Chairperson for Protect Maple Valley Park was the spokesperson for this group along with Patrick Tobin. Ms. Hallisey outlined the group's opposition to this project. Ms. Hallisey stated that over 5700 concerned Arvada and Jeffco residents desire to protect the Maple Valley Park and Ralston Creek Trail. They believe that the proposed Project Indiana industrial development does not conform to the requested zoning, is incompatible to the use and will have a negative impact on the adjacent open space and nearby homes and community. It was also highlighted the top four concerns of this group. She expanded on road congestion, light and air pollution, proximity to open space and the environmental impact to the Maple Valley Park and the Ralston Creek.

Mr. Tobin, co-presenter and the volunteer attorney for the Protect Maple Valley group discussed the stress to existing infrastructure, compared the project to other area distribution centers in Loveland and Broomfield and the impacts that those have had on those communities. He also reviewed several items that were unknown, for instance, the traffic needs of the area.

Mr. Owens reaffirmed that the remainder of public comment would be from those that signed up to speak. There were 35 individual comments from the public.

Ms. Emily Grogg, stated that several of the public commenters had identified an error in the current zoning designation of the project and for Maple Valley Park, and stated that there was a typo in the Staff Report. The Jefferson County Zoning should read as A-2 instead of A-1. She asked that at the end of Project Indiana hearing that the commission make a motion to amend the zoning on the Maple Valley Park rezoning.

There was no further public comment and Mr. Owens asked if the applicant wanted to provide a rebuttal.

APPLICANT REBUTTAL

Ms. White provided a “response to opposition presentation” document that included where many of the responses have been previously provided. This included the project’s traffic engineer, Curtis Rowe discussing the communities concern with the traffic report and addressed many of their concerns. The applicant’s team responded to the concerns over light and air pollution, noise and the communities concern over the proximity to the open space and adjacent neighborhoods. They also stated that this use was less intense than other uses that could apply.

Ms. White concluded the rebuttal with stating the application demonstrated adheres to the Comprehensive Plan and complies with the annexation and rezoning criteria. She stated they have provided a wealth of information and feel it complies with the requirements. She thanked the Commission for the consideration to recommend to City Council.

Mr. Owens closed the public input portion of the meeting and allowed comments from the Commission.

QUESTIONS FROM THE COMMISSION

Mr. Owens asked Staff if they agree that light industrial meets the criteria of the Comprehensive Plan.

Mr. Smetana confirmed that IL is for light industrial, office and retail space is identified as a zone district allowed for the Comprehensive Plan designation.

Mr. Owens asked Staff if it was found that the use being proposed by the developer is in fact light industrial.

Mr. Smetana responded that is correct.

Mr. Owens asked Staff when the last time the Comprehensive Plan was adopted.

Mr. Smetana responded the most recent plan was adopted in 2014.

Mr. Owens asked Mr. Smetana to his knowledge did the designation for this particular property change since the prior designation.

Mr. Smetana confirmed that light industrial has been planned for this area as far back as 1995.

Mr. Owens asked Staff to explain how the Comprehensive Plan is adopted and is it a public process.

Mr. Smetana stated the Comprehensive Plan has a very public process, which the last one took 18 months to develop and included several community meetings, and public discussions regarding the Comprehensive Plan. From the plan development included, meetings with individual Homeowners Associations and business groups as well as public hearings at the Planning Commission and City Council.

Mr. Owens asked if someone had objected to this type of use on this particular property, they would have had the ability to object it during the Comprehensive Plan public process.

Mr. Smetana clarified that is correct.

Mr. Owens asked when the City publishes a Comprehensive Plan it has boundaries that include places within the City limits, but may not be in Arvada.

Mr. Smetana commented that was correct and stated we use our plan to identify our growth boundary as well as the enclaves that exist within Unincorporated Jefferson County that eventually will be annexed into the City.

Mr. Owens asked for validation, if someone wanted to develop in the City of Arvada and looked at the Comprehensive Plan. They would know that the intended use was light industrial and see that it had not be changed for at least 2 sets of Comprehensive Plans.

Mr. Smetana confirmed that the Comprehensive Plan is to provide the long term guidance to the development community as to what the City anticipates appropriate uses to be.

Mr. Owens asked if there has been anything built on this piece of property or has it had any other use other than agricultural.

Mr. Smetana responded he doesn't believe so.

Mr. Gay asked staff how the City determines whether or not both City utility services and non-City services have the capacity to service new properties for annexation.

Mr. Bebo responded that the City's development review team reviews the capacity of existing sewer and water systems as well as fire and policing needs during the application review for annexation. There are various utilities that are not provided by the City and it is the responsibility of the applicant to notify other utilities, like Xcel, of the intent to annex into the City and to ensure they have capacity to serve them.

Mr. Gay asked if the traffic study that was completed by the developer had been made publically available.

Mr. Bebo confirmed that it was available publically since the beginning of the project and stated that it is required as part of the annexation application and the site plan application.

Mr. Gay asked for clarification that the traffic, light, noise and air quality study was financed by the developer.

Mr. Bebo confirmed that it has been.

Mr. Hannan asked if the current zoning is A-2, but in our Comprehensive Plan we have it projected to be industrial.

Mr. Smetana clarified that is correct.

Mr. Hannan asked if the CSU environmental study was done in the next steps and not part of the annexation or zoning. He clarified if the buffering and the additional areas, is also done at the site planning process.

Mr. Bebo responded the study that the neighborhood group referenced is a study they completed for Maple Valley Park. It was not to analyze Project Indiana; this is done at the site plan.

Mr. McCarron asked Mr. Rowe (Applicant) what the boundary is for the traffic study.

Mr. Rowe stated the traffic study scope that was received by the City Staff was to include the intersection along Indiana Street to 72nd Avenue, down to 64th Avenue. We went over to McIntyre Pkwy on the west and to the east Gardenia Street and Eldridge Street.

Mr. McCarron asked what the future plans are for the 4 lanes on Indiana Street with the train trestle.

Ms. Wolfschlag responded the City has been working with CDOT on future plans for Indiana, but at this time there is no funding for additional widening and that work would be developer driven.

Mr. McCarron asked the applicant what the traffic net effect is and is there truly an increase on the roads.

Mr. Rowe responded there has been some research done relevant to these types of facilities. He stated previously the number of trips made by individual's vs 1 delivery vehicle making 1 efficient trip.

Mr. Magee asked about the other studies that have been referenced a number of times they are done by the applicant, but under the direction and perimeters established by the City.

Mr. Bebo stated yes, but to clarify we don't review noise or pollution studies. Noise studies are not reviewed at the site plan; typically noise issues are dealt with by Code Enforcement. We have maximum decibel levels that we regulate through Code Enforcement. However, the lighting studies are reviewed during the site plan application.

Mr. Magee shared his appreciation to the Protect Maple Valley group and the citizens that have participated.

Ms. Connell expressed that her questions have been addressed and answered by the other Commissioners.

Mr. Owens asked where does the water runoff from this site go and has there ever been any crop grown on this site.

Ms. Wolfschlag answered the historic conditions for this site in the existing condition flows to the North of the property where it will eventually enter the park property and the creek.

Mr. Bebo responded he believes there is no history of crops being produced on this site.

Mr. Owens asked post development where the water goes.

Ms. Wolfschlag responded that post development the water will go to a detention pond that is located near the East side of the site in the proposal. Where it is treated for detention and water quality to meet City and Mile High Flood Districts standards, then it will be released at historic rates to the North.

Ms. Grogg stated it was coming up on the 11 o'clock hour and per the Bylaws we are allowed to extend up to 30 minutes or the Commission could vote to suspend the Bylaw to continue until finished. She asked Mr. Owens what he would like to do.

MOTION:

Mr. Owens moved to suspend the Bylaws and allow the Commission to finish all matters that are on the agenda.

DISCUSSION OF MOTION:

The following votes were cast on the motion:
Those voting Yes: Owens, McCarron, Gay, Connell, Magee, Hannan
Those voting No: None
Those absent: Griffith
The motion carried 6-0.

Mr. Owens explained that the motion carried.

Mr. Owens asked if there were any further comments, no more comments were made. Mr. Owens asked for a motion.

MOTION:

It was moved by Mr. Magee, that Project Indiana Annexation, generally located at 6730 Indiana St., be recommended to City Council for approval.

This motion is based on the findings of fact and approval criteria on Page(s) 13 & 14 of the Staff Report. He added the Staff condition one page 15 of the Staff Report also be met by the applicant.

DISCUSSION OF MOTION:

Mr. Gay stated his appreciation of everyone participating. He commented on the Criteria for Annexation as it relates to the Comprehensive Plan and he feels that CC 1.2 1.3 1.4 has not been met in his opinion and he will not be supporting the project.

Mr. Magee commented that there were things brought up about the site review process that the Commission cannot consider for the application for annexation and rezoning. Commissioner Gay brings up good points about the Comprehensive Plan. However, the Comprehensive Plan is not the Land Development Code that is not the criteria that we need to follow. He stated the Comprehensive Plan is a wish list and a desired place to be. He commented that he's not sure the Commission could assign strict criteria to that. He feels the applicant has done a good job and he will be supporting the application.

Mr. Owens thanked the public and applauded how many people attended. He feels they substantially meet the criteria specifically Criteria 1. He stated his support.
Ms. Connell agreed with the Commission on the criteria.

Mr. Gay acknowledged Mr. Magee's point. However, he is still not in support.

The following votes were cast on the motion:
Those voting Yes: Owens, McCarron, Connell, Magee, Hannan
Those voting No: Gay
Those absent: Griffith
The motion carried 5-1.
Mr. Owens explained that the motion carried.

Project Indiana Rezoning from Jefferson County A-2 to City of Arvada IL, generally located at 6730 Indiana St.

MOTION:

It was moved by Mr. Magee that Project Indiana Rezoning from Jefferson County A-2 to City of Arvada IL, generally located at 6730 Indiana St., be recommended to City Council for approval.

This motion is based on the findings of fact and approval criteria on Page(s) 13 & 14 of the Staff Report.

DISCUSSION OF MOTION:

Mr. Gay stated that the 1st criteria has identified five parcels being zoned as community commercial. He said that this makes them a candidate for other zoning. These five parcels do not meet the criteria 1 or 5. He thinks that there will be a direct impact to the neighborhood and will not support.

Mr. Hannan, confirmed that this was a tough case and that he looked at criteria 4 and stated that there is not a more beautiful place in Arvada than the Ralston Creek Trail and to change zoning is difficult. He mentioned that more of the impact on the newly annexed property of Maple Valley Park will be items for a site plan review which is not considered during this proposal. He mentioned that this has been discussed as a commercial and industrial area of Arvada. He said he will support the proposal.

Mr. McCarron said that criteria 5 is not met. He commented on the traffic and the truck trips in that area could put too much pressure on that area. He will not be in support of the rezoning,

Mr. Owens noted a few items that were important. He said that we have a very public process that develops the Comp Plan. He said it would be different if it just changed but it didn't and that we need developers to invest in Arvada. He said that this makes it difficult for him to not think that this use is not appropriate. He noted that the surrounding properties are commercial and that they have buffered the surrounding neighborhoods from the noise and light generation. He restated that there was a 2% change in traffic and that the developer was widening their piece and that the only way we can achieve widening is if developers will do their piece all of the way done. He will be supporting this request.

Ms. Grogg, requested that the commission also address the five parcels that are already in the City that have been requested to be rezoned from CG to IL. She asked that the motion be adjusted.

Mr. Magee accepted the language from Ms. Grogg.
The following votes were cast on the motion:
Those voting Yes: Owens, Connell, Magee, Hannan
Those voting No: Gay, McCarron
Those absent: Griffith
The motion carried 4-2

Mr. Owens explained that the motion carried and that it will be recommended to council for approval.

CITY OF ARVADA

PROJECT INDIANA
ANNEXATION AGREEMENT

THIS ANNEXATION AGREEMENT ("Agreement") between Scannell Properties #456, an Indiana limited liability company ("Annexor"), and the City of Arvada, Colorado, a Colorado municipal corporation ("City"), shall be effective upon execution by all applicable parties and immediately upon approval by the City of Arvada as evidence by the approval signature where indicated below.

RECITALS AND REPRESENTATIONS:

WHEREAS, the Annexor represents that it is the sole annexor of the following described property generally located at the Northeast Corner of Indiana St and W 66th Pl, to the Southeast Corner of Indiana St and W 68th Ave, to the Western side of the Fig St / W 68th Ave intersection, to the Northwest Corner of Fig St and W 67th Ave, to the Northeast Corner of Holman St and W 66th Pl. in the City of Arvada, County of Jefferson, State of Colorado ("Property"), more fully described as follows:

[See attached Legal Description as Exhibit A]

WHEREAS, the Annexor desires to annex the Property to the City, and to that end has filed a Petition for Annexation of the Property into the City, pursuant to the Colorado Municipal annexation Act, C.R.S. 31-12-101, et seq.; and

WHEREAS, the City wishes to control its growth in a planned and orderly fashion, maintaining the improvements and the quality of life and the City's ability to provide and enhance environmental amenities, services, and local opportunities for its citizens; and

WHEREAS, the Annexor is planning development of the Property as an approximately 112,000 square-foot warehouse and distribution center which is generally located at Northeast Corner of Indiana St and W 66th Pl, to the Southeast Corner of Indiana St and W 68th Ave, to the Western side of the Fig St / W 68th Ave intersection, to the Northwest Corner of Fig St and W 67th Ave, to the Northeast Corner of Holman St and W 66th Pl. The Annexor's development and construction plans include the installation of certain public infrastructure including, but not necessarily limited to, sanitary sewer facilities, water line facilities, storm drainage facilities, roadways and emergency access improvements, walks, and landscape improvements which will be addressed in a subsequent Development Agreement associated with the Site Plan.

WHEREAS, the Annexor has submitted or will submit to the City a proposed Site Plan and

construction plans for the Property, which include a final site plan, final landscape plan, final drainage plans, and other supporting documentation for the development thereof. The plat, construction plans, and other supporting documents are public records on file and available for review at the City of Arvada City Hall, 8101 Ralston Road, Arvada, Colorado. These approved plans and associated documents, will be deemed incorporated into this Agreement for all purposes including illustration and interpretation of the terms and conditions of this Agreement, and may herein be referred to collectively as the "Final Plans."

WHEREAS, the parties hereto understand and agree that the intent of this Agreement is to establish obligations and responsibilities with respect to the development of the Property in accordance with the Final Plans, said obligations and responsibilities being covenants that run with the Property, encumbering such and governing the development thereof. The Annexor shall be affirmatively bound to satisfy all of the obligations and responsibilities set forth herein (including the construction of Public Improvements).

NOW, THEREFORE, in consideration of the mutual promises, covenants, and agreements of the parties, the approval by the City of Arvada of the Final Plans for the Property, the dedication of certain land and/or easements to the City and other good and valuable consideration, the sufficiency and adequacy of which are hereby acknowledged by the parties, the parties hereto agree as follows:

1. PLAN AND AGREEMENT APPROVALS: The Annexor, upon approval of the Final Plans for the Property by the City, shall immediately submit three copies of the approved Site Plan to the Director of Community and Economic Development. No construction may occur on or associated with the Property and no building permits may be issued until construction documents for all required improvements are submitted and approved by the City Engineer. Upon approval, the Annexor shall provide the City Engineer the approved final construction plans for the construction of emergency access lanes, water lines, sanitary sewer services, storm drains and storm drainage structures and streets associated with development of the Property, as required by the City. Said Construction Plans shall meet the approval of the City and the proposed development shall be constructed according to the Final Plans. No approval of the Public Improvements as referenced in the Construction Plans is conferred by this Agreement and any approval shall be independently made by the City Engineer following the City Engineer's determination that the plans meet the applicable City engineering specifications, commonly accepted engineering practices, and all applicable codes, ordinances, and State, Federal and local laws.

2. CODE COMPLIANCE: The Annexor shall comply with all applicable codes, ordinances, and rules and regulations of the City. Development of the Property shall also be in conformance with all aspects of the Final Plans and shall be completed prior to issuance of the final certificate of occupancy within the Property. This shall include, but not be limited to, street and parking lot paving and striping, landscaping, trash enclosures, rooftop and wall mounted equipment, building elevations, and all other requirements of the Final Plans and applicable City codes, ordinances, and rules and regulations.

3. PAYMENT OF FEES: The Annexor shall pay all required fees and other charges in a timely manner as required by the City, including but not limited to building permits, inspection fees,

tap fees, drainage fees, park and school dedication and development fees, and departmental review fees imposed by the City by ordinance, rule, resolution, motion, or by the terms and conditions of this Agreement. Unless otherwise agreed to by the City, the Annexor's payment of fees and charges specified by this Agreement shall be made in the form of certified funds, cashier's check, or cash delivered to the City of Arvada, Municipal Building, 8101 Ralston Road, Arvada, Colorado 80002. The City shall not accept personal or business checks or drafts not certified by a financial institution as payable.

4. FIRE DISTRICT APPROVALS: The Annexor shall address all of the comments noted in the referral responses, including any requirements for fire hydrants, emergency access lanes, and fire lane signage, and shall obtain approval from the Fire Protection District having jurisdiction prior to issuance of each building permit and certificate of occupancy (as applicable) for the Property.

5. CONTRACTOR LICENSING: Before proceeding with work contemplated herein, the Annexor shall ensure that all contractors and/or subcontractors it employs be licensed by the City before the contractor and/or subcontractor may commence work on any improvements associated with development of the Property. The Annexor shall be responsible for ascertaining the status of any contractor or subcontractor to be utilized in the development of the Property, with respect to any uncorrected deficiencies in that entity's previous, unrelated work within the City or its outstanding omissions related to such work including, but not limited to, failure to: (i) submit as-built construction plans, (ii) complete the process of placing Public Improvements under warranty (iii) submit tax certifications, (iv) submit test records.

6. DEVELOPMENT IMPROVEMENTS: The Annexor shall, at its own expense, design, furnish, construct, and install the public and private improvements in accordance with Final Plans approved by the City. These improvements shall include, but not be limited to, construction of all public/private streets, alleys, driveways, parking areas, water lines and mains, sewer lines and mains, drainage facilities, and landscaping within and adjacent to the Property in accordance with the approved Final Plans for the Property and with the requirements of the Arvada Land Development Code ("the LDC"). "Private Improvements" includes any of the above listed infrastructure which will be constructed to support the Development but will not be dedicated to the City. "Private Improvements" does not include vertical construction of the warehouse structure or other privately owned vertical construction. "Public Improvements" includes any of the aforementioned infrastructure which will be constructed to support the Development but which will be dedicated to the City. Public Improvements must be completed prior to issuance of the final certificate of occupancy.

All Public Improvements constructed by the Annexor in public rights-of-way, easements, streets or alleys shall become the property of the City immediately upon acceptance of said improvements by the City and the Annexor shall warrant said improvements for 2 years from the date of acceptance by the City. The Annexor shall complete the process of placing completed Public Improvements under warranty promptly upon completion. Failure to place such improvements under warranty may, in the City's discretion, result in the withholding or denial of subsequent building permits or certificates of occupancy.

The City may request, and the Annexor shall provide at the Annexor's cost, documentary evidence in the form of an updated title commitment satisfactory to the City that any public right-of-way, easement, or other real property dedicated, conveyed, acquired, devised, or granted to the City are free and clear of encumbrances which, in the sole opinion of the City, defeat, limit, or impede the City's ability to use the relevant property as intended. The Annexor acknowledges that no construction may occur and no building permits may be issued until construction documents for all required improvements are submitted and approved by the City Engineer.

7. FUGITIVE DUST AND EROSION CONTROL: The Annexor shall meet all requirements and obligations imposed by the State of Colorado, County of Jefferson, and the City concerning management of stormwater runoff and fugitive dust, and shall comply with all Federal, State, County, and City requirements governing the stormwater conveyances, detention ponds, fugitive dust, and requirements associated with permits issued for erosion and sediment control on the Property. The Annexor shall provide a copy of all State and County permits acquired to Arvada's Stormwater Program prior to commencement of any earth disturbance work associated with the Property. Further, the Annexor shall fully comply with the applicable sections of the City's Site Development Permit Ordinance, Chapter 50, Sections 50-70 through and including 50-79 of the Arvada City Code, including the requirement to install and maintain best management practices to reduce soil erosion and control sediment generated by development of the Property. Compliance by the Annexor with such ordinance shall be a pre-condition of obtaining building permits or final certificates of occupancy. The City may deny or revoke any permit issued to the Annexor, in strict compliance with the applicable provisions of the LDC, in the event that the Annexor is non-compliant with City requirements.

8. RIGHTS-OF-WAY: The Annexor shall comply with all applicable provisions of Chapter 78, Article V of the Arvada City Code, entitled "Rights-of-Way." This article contains requirements including, but not limited to, Annexor escrow for improvements in public rights-of-way and street surface restoration for public streets.

9. SUBDIVISION MONUMENTATION: In accordance with the applicable Colorado Revised Statutes as amended, and in accordance with the LDC, the Annexor shall establish all subdivision monumentation and have the monumentation approved by the City prior to issuance of the final certificate of occupancy within the Property.

10. STREET IMPROVEMENTS AND MAINTENANCE: The Annexor shall maintain, in a reasonable, suitable and proper condition for travel, ingress and egress, all streets and access ways included within the Final Plans for the Property until they are completed and accepted for maintenance by the City. The Annexor shall take all steps necessary to limit and prevent the accumulation of, and to remove mud, sediment, dirt, trash, and other debris that is tracked, blown, or otherwise carried onto public property or off-site onto private property during development. Such obligation shall continue until all development associated with the Property is complete and the Public Improvements are accepted by the City for maintenance. The Annexor shall also replace any broken, damaged, or settled concrete that fronts any lot associated with this development as deemed necessary by the City, prior to the issuance of the final certificate of occupancy on the Property. The City may enforce these obligations pursuant to its enforcement powers and procedures as set forth in

the LDC.

11. W.68TH AVENUE AND INDIANA STREET SIGNAL: The Annexor shall design, furnish, and construct a traffic signal and related improvements at the intersection of W. 68th Avenue and Indiana Street and the same shall be included in the Final Plans. The Annexor shall pay for the cost of all activities associated with the design, installation, and construction of the signal. The signal shall be constructed, inspected, and placed under warranty prior to the issuance of a final certificate of occupancy for a building. Further details and specifications of the traffic signal will be included in the Site Plan application and accompanying Development Agreement.

12. INSTALLATION OF PARKING AND HARD SURFACE ACCESS: The Annexor shall install, sign and stripe all parking and hard surface areas within the Property, as illustrated on the Final Plans and in conformance with the LDC prior to the issuance of any final certificate of occupancy for the Property. The Annexor shall comply with "Interpretation of Hard Surface Areas," Arvada City Code, Chapter 94, Section 94-64 and with the LDC.

13. UNDERGROUNDING OVERHEAD UTILITIES: The Annexor shall be responsible for undergrounding existing overhead utilities in conformance with the LDC. Any required improvements must be completed prior to the issuance of any temporary certificate of occupancy within the Property and shall be completed at no cost to the City.

14. PUBLIC UTILITY FEES: The Annexor shall pay all installation charges for lighting, electric and gas required by Public Service Company/Xcel Energy for development of the Property.

15. LIGHTING RESTRICTIONS: Cut-off type fixtures with flush-mounted, flat lenses that cast light downward, and not out toward adjacent properties, must be used. All exterior lighting specifications must comply with the LDC. All exterior lighting plans must be approved by the Director of Community and Economic Development prior to issuance of the first building permit within the Property. Following construction, Annexor shall ensure that the operation of the lighting system complies with the plans as designed, and meets all applicable requirements of the LDC and the City's adopted Building Codes. Annexor acknowledges that failure to do so could result in enforcement action pursuant to the Arvada City Code.

16. STORMWATER APPURTENANCE CONSTRUCTION AND MAINTENANCE: The Annexor shall obtain approval from the City Engineer of the final drainage plan for this development prior to approval of the associated Construction Plans/Final Plans. The Annexor shall install stormwater conveyances, detention ponds, swales, infiltrations beds, underground best management practices, or any other stormwater feature as detailed on the approved construction drawings unless prior written approval is obtained from the City Engineer. The Annexor shall meet all requirements, obligations, and best engineering principles imposed by the State of Colorado, County of Jefferson, City, and Urban Drainage and Flood Control District governing the construction of stormwater conveyances, detention ponds, swales, infiltration beds, underground best management practices, or any other water quality feature, all as determined by approval from the City Engineer.

Drainage easements are required for all detention areas and drainage channels, which shall be

privately maintained by the Annexor, its successors or assigns. The Annexor shall include language to this effect in any covenants for the Property. Maintenance of stormwater appurtenances must be conducted on a routine basis and in response to the Annexor or its successors' or assigns' annual inspection and evaluation of the stormwater conveyances' condition. Should ownership of stormwater appurtenances or maintenance responsibilities change, the City of Arvada Stormwater Program must be notified in writing of all new contact information within 30 days of changes taking effect. The City will enforce stormwater installation and maintenance provisions throughout the construction of the Property and beyond as required by law. In no event shall the City be responsible for constructing or maintaining the drainage/detention facilities or maintaining the easements within the Property.

17. WATER RIGHTS: Chapter 102, Article II, of the Arvada City Code requires that all Property annexed into the City, must convey any tributary water rights appurtenant thereto to the City of Arvada. The Annexor of the Property has declared that no water rights are associated with the Property. Should it be determined otherwise, the Annexor shall be required to comply with the conveyance requirements of the Arvada City Code. In addition, the City, upon annexation, will not acquire, or require conveyance of, existing well water rights, but shall have a right of first refusal to have such rights conveyed to the City, pursuant to the LDC, in the event the Annexor, or its successors or assigns, desires to convey such rights to any party other than a subsequent purchaser of the landowner's lot(s) upon which the well is situated.

18. INSTALLATION OF LANDSCAPING AND RECREATIONAL AMENITIES: The Annexor acknowledges that the City has adopted in the past, and may in the future, adopt water restrictions which impact the viability of installing and maintaining the landscaping as illustrated on the approved landscape plans for the Property. Those watering restrictions may prohibit or qualify the installation of trees, shrubs, new seed, and/or sod for irrigated turf areas. In the event of such prohibition prior to the issuance of a final Certificate of Occupancy for the Property, the Annexor shall deposit funds with the City for escrow in an amount equal to 110% of the estimated cost of improvements not installed due to the prohibition, including, but not limited to irrigated turf areas, trees, shrubs, mulch, edger, and weed barrier. Upon expiration of water restrictions, the Annexor shall complete installation of the remaining improvements in accordance with the Final Plans for the Property, within 90 days, or such longer period of time as is reasonably necessary due to the completion of such installation being of a seasonal nature. During any restrictions, the City may encourage, but will not require, the installation of trees and shrubs, if they are drip irrigated or hand watered. However, the City may not have any water available for the irrigation of these landscape materials installed at that time. If the Annexor proceeds with the installation of any plantings at that time, it is done at the Annexor's sole risk.

Installation of irrigation systems and other hard surface areas (such as fencing, playground equipment, covered shelters, or other such amenities) shall be completed by the Annexor, at its sole expense, prior to the issuance of the final certificates of occupancy within the Property, unless the improvements have been delayed due to reasons beyond the Annexor's control, such as adverse weather conditions. The Annexor shall deposit funds with the City for escrow in an amount equal to 150% of the estimated cost of the remaining hard surface site elements (including irrigation systems, fencing and other elements as noted above) that are not installed prior to issuance of final certificates

of occupancy. During periods of time when no water restrictions are in effect, the Annexor shall deposit funds with the City for escrow in an amount equal to 150% for all improvements not completed prior to issuance of a final certificate of occupancy. A landscape contractor, acceptable to the City, shall make a determination of the estimated cost of improvements. The City, at its sole discretion and upon the City's rejection of an estimate provided by the Annexor, may obtain an estimate of the costs of landscaping. Such estimate shall be binding upon the Annexor in determining the amount of funds to be escrowed for purposes of this paragraph.

The City shall release its interest in the escrowed funds only upon completion of all landscaping obligations by the Annexor and approval of such by the City. In the event that the Annexor defaults upon its obligations as specified in this paragraph, following the escrow of funds, the City may apply all funds toward the completion of the Annexor's landscaping obligations. For the purpose of applying such funds toward the completion of the Annexor's landscaping obligations, "completion" shall mean and include the cost of labor, materials, contract management, and administration. The City shall refund the escrowed funds not applied to completion of landscaping required by the final landscape plan upon application and verification of entitlement. The method and manner in which the City elects to undertake and complete the landscaping obligations of the defaulting Annexor shall be within the sole discretion of the City; provided, however, that nothing herein shall obligate the City to install or complete the landscaping improvements and nothing herein shall prevent, prohibit, or limit the remedies available to the City to enforce the Annexor's obligations under this paragraph.

19. INSTALLATION OF BUFFER ALONG NORTHERN BOUNDARY: In order to mitigate visual impact of the Development along its northern boundary towards Maple Valley Park and beyond, the Annexor shall construct a landscaped buffer area on its Property where the Property borders the park. The design of the landscaped buffer area shall be proposed by the Annexor and approved by the City, but, at a minimum, shall include large deciduous, columnar or other tree species of the City's choosing, spaced at a distance at the discretion of the City, planted on the Property, all generally as approved by the City in accordance with the Landscape Plan submitted with the Site Plan. Additionally, Annexor shall construct , and include a six-foot-tall masonry wall along a portion of the northern boundary as depicted in the Site Plan. The Annexor shall work in good faith to ensure that the buffer is constructed at the earliest point possible in the phasing of construction. The entire landscaped buffer area shall be installed prior to the issuance of a final certificate of occupancy for the building, except that, if seasonal restrictions prevent the immediate installation of all or part of the landscaping in this area, a certificate of occupancy may nonetheless be issued in accordance with the provisions of Section 18.

20. INSTALLATION OF FENCING: The Annexor shall ensure that all fencing for the Property conforms to the Final Plans and the requirements of the LDC. Fencing shall require separate permits and approvals from the City prior to construction/installation. Installation of the fencing must be completed prior to the issuance of the final certificate of occupancy within the Property.

21. LANDSCAPING AND FENCING MAINTENANCE: The Annexor or its successors, or assigns, including any property owner's association, shall maintain in perpetuity (at its sole expense) all landscaping, fencing, and any other amenities (collectively referred to herein as "Landscaping")

installed within or associated with the Property pursuant to the Final Plans, regardless of whether the landscaping, as actually installed, fails to specifically conform to the requirements of the Final Plans and regardless of whether the Annexor or the City installs the landscaping. However, if the City adopts watering restrictions as referenced in Paragraph 18 which impair the ability of Annexor to replace or maintain installed landscaping, the Annexor shall be relieved of the obligations set forth in this paragraph for the duration of such restrictions.

22. SCREENING OF MECHANICAL EQUIPMENT: The Annexor shall screen all roof mounted and wall mounted equipment from view pursuant to the LDC to the satisfaction of the Director of Community and Economic Development prior to issuance of each certificate of occupancy within the Property.

23. TRASH ENCLOSURES: The Annexor shall construct all trash enclosures in conformance with the Final Plans and the requirements of the LDC, prior to issuance of a certificate of occupancy for the Property. The trash enclosures, including the gates, must be constructed of non-combustible materials, and have an architectural design compatible with the primary structure, using matching materials and colors. The Annexor or its successors or assigns shall keep the trash enclosure gates closed at all times, except for the periodic moments when access is needed to place trash within the containers, or empty or replace the trash receptacles themselves.

24. SIGNAGE: The Annexor shall ensure that all signage for the Property conforms to the Final Plans and the requirements of the LDC. No signage illustrated on the Final Plans is deemed approved by the City as part of the Final Plans approval. Signage shall require separate permits and approvals from the City prior to construction or installation.

25. AS-BUILT CONSTRUCTION PLANS: The Annexor shall file, or cause to be filed, with the City an original or reproducible copy of the as-built construction plans of all Public Improvements promptly upon the completion of the Public Improvements. Failure to do so will delay commencement of the two-year warranty for said Public Improvements, in which case the Annexor agrees to hold harmless and indemnify the City for any and all actions, claims, damages, injuries, and liabilities resulting from, or in any way related to, such Public Improvements or the failure to submit such as-built plans. The Annexor further understands and agrees that, as a result of its failure to promptly submit such as-built plans, the City may withhold or deny subsequent building permits or certificates of occupancy, either related to the Property or any subsequent development by the Annexor, until such failure is remedied. This section shall survive the expiration or earlier termination of this Agreement.

26. FORCE MAJEURE: Any delays in or failure of performance by any party of their respective obligations under this Agreement shall be excused if such delays or failure are a result of acts of God, fires, floods, pandemics, strikes, labor disputes, accidents, regulations or orders of civil or military authorities, shortages of labor or materials, or other causes, similar or dissimilar, which are beyond the control of such party, and which are agreed to by the parties as justifying delay.

27. WAIVER: A waiver by any party to this Agreement of the breach of any term or

provision of this Agreement shall not operate or be construed as a waiver of any subsequent breach by either party.

28. BINDING EFFECT: The parties hereto agree that this Agreement, by its terms, shall be binding upon the successors, heirs, legal representatives, and assigns thereof and shall constitute covenants running with the Property. In the event that all or part of the Property is sold, transferred, or otherwise conveyed to additional or multiple parties, all owners and developers shall be jointly and severally responsible for the obligations of the Annexor as set forth in this Agreement.

29. SEVERABILITY/AMENDMENT: Invalidation of any of the provisions of this Agreement or any paragraph sentence, clause, phrase, or word herein or the application thereof in any given circumstance shall not affect the validity of any other provision of this Agreement. This Agreement may be amended only by an instrument in writing signed by all parties.

30. NO THIRD PARTY BENEFICIARIES: It is expressly understood and agreed that enforcement of the terms and conditions of this Agreement, and all rights of action relating to such enforcement, shall be strictly reserved to the City and the Annexor, and nothing contained in this Agreement shall give or allow any such claim or right of action by any other third person on such Agreement.

31. GOVERNING LAW AND ENFORCEMENT: The laws of the State of Colorado shall govern this Agreement. The parties agree and acknowledge that this Agreement may be enforced at law or in equity. In addition to any other available remedies, it is understood and agreed that, to the extent permitted by the LDC, the City may withhold or revoke any permits or certificates, including but not limited to building permits and certificates of occupancy, for the Property or for any structure or lot within this development in the event of a breach of this Agreement by the Annexor; in doing so, however, the City will act in strict compliance with the applicable provisions of the LDC.

32. ATTORNEYS' FEES: If the Annexor breach(es) this Agreement, then they shall pay the City's reasonable costs and attorneys' fees incurred in the enforcement of the terms, conditions, and obligations of this Agreement.

33. PARAGRAPH CAPTIONS: The captions of the paragraphs are set forth only for the convenience and reference of the parties and are not intended in any way to define, limit or describe the scope or intent of this Agreement.

34. RECORDATION FEES: The City of Arvada shall record this Agreement and any approved subdivision plat for the Property (as applicable) with the Clerk and Recorder's office of the appropriate county per the provisions of the LDC. Prior to recordation, the Annexor shall provide the City with an updated title commitment to ensure that all appropriate parties in interest sign this Agreement. Prior to recordation, the Annexor shall also pay all costs associated with recordation of these items with the County Clerk and Recorder.

35. INCORPORATION OF EXHIBITS: Unless otherwise stated in this Agreement, exhibits referenced in this Agreement shall be incorporated into this Agreement for all purposes. Reference to

"Job Numbers" or "Project Numbers" in this Agreement is a reference to Final Plans and documentation which is retained as a public record on file and available for public inspection and review upon request at the City of Arvada, Municpal Building, 8101 Ralston Road, Arvada, Colorado. Such Final Plans and documentation filed with the City, approved by the City and noted within this Agreement are hereby incorporated into this Agreement for all purposes.

36. REVIEW OF REFERENCED DOCUMENTS: The Annexor hereby understand and acknowledge that the public documents referenced in this Agreement, including but not limited to the Arvada City Code, LDC, Engineering Specifications, and Design Guidelines were, prior to the execution of this Agreement, and are presently, available for review and inspection at the Arvada Municipal Building, 8101 Ralston Road, Arvada, Colorado, from 8:00 a.m. through 5:00 p.m., Monday through Friday. Any capitalized defined terms used in this Agreement which are not defined here in shall be as defined in the Arvada City Code or LDC.

37. FAILURE OR DELAY OF THE PROJECT: The parties agree that the Annexor's remedies in the event of an alleged or actual breach by the City are expressly limited to specific performance or injunctive relief. Notwithstanding anything to the contrary, neither City nor Annexor will be liable to the other for consequential damages, such as lost profits or interruption of either party's business. This section shall survive the expiration or earlier termination of this Agreement.

38. INDEMNIFICATION AND HOLD HARMLESS: The Annexor shall indemnify, hold harmless, release and discharge the City of Arvada and the City's officers, employees, agents, and contractors from all liability, claims, and demands, including reasonable attorneys' fees and court costs, which arise out of or are in any manner connected with or related to the approval of the Final Plans for the Property. This section shall survive the expiration or earlier termination of this Agreement.

39. NOTICES: Any notice or communication required or permitted by this Agreement shall be in writing and shall be deemed to have been sufficiently given for all purposes if sent by certified mail or registered mail, postage and fees prepaid, addressed to the party to whom such notice is to be given at the address set forth on the signature page below, or at such other address as has been previously furnished in writing, to the other party or parties. Such notice shall be deemed to have been given when deposited in the United States Mail or mail service such as Federal Express, United Parcel Service, etc. Such notice or communications shall be given to the parties at their addresses set forth below:

Re: Project #DA2020-0117 – Development Application (Annexation and Zoning). Related Applications: Project #DA2020-0132 – Site plan, Project #PA2020-0067 – Project Pre-Application.

Dear Mr. Stachelski:

This letter sets forth the concerns of certain citizens and property owners with respect to the above referenced Pending Applications before the City of Arvada (the "City"). Petitions signed by over 3500 individual citizens, which identify the specific citizens and property owners expressing the concerns are in process and continuing to be collected. Completed Petitions are being hand delivered with this Letter. The petitioners will be referred to herein as the "Petition Group". The Petition Group will be supplemented at Planning Commission with further statements of opposition and concern from Homeowners Association, including but not limited to the Westwoods Master Association, Westwoods Mesa Homeowners Association and the Maple Valley Homeowners Association.

The purpose of this letter is to identify matters that are incomplete and that City Staff should require the Applicant to address prior to submittal to the Planning Commission and matters that Planning Commission should require the Applicant to address in order to fulfill the Applicant's and the City's obligations under the Arvada Land Development Code as set forth in the *Arvada, Colorado Code of Ordinances Sec. 1-1-1-1, et seq.,* (the "LDC"), and to identify specific additional matters raised by the Petition Group that have not been addressed to date. We are providing this information in advance of the April 20, 2021 Planning Commission session that is scheduled to consider the Annexation and Zoning for the Property that is the subject of the Applications, so that the Planning Commission can be fully informed on the incomplete status of the Applications. We are attempting to provide a full community perspective to the Planning Commission, particularly as it relates to the size and nature of the proposed use and as to Applicants non-response to the City's initial concerns related to Zoning and other development approvals, so there will be a full record and the Planning Commission can make a decision early in the process, which might focus the issues for Staff in processing the Applications and for Council.

The information upon which this letter is based is the City of Arvada eTRAKIT files as they exist on the date of this letter and includes consideration of the most recent comments made by the City Staff in the 2nd Review Summary and Outside Ref. document found in the #DA2020-0132 files and the 3rd Staff Review Comments document found in the #DA2020-0117 files. We have not located public information in the Application files that respond to these two sets of comments as of the date of this Letter. We understand that the Development Applications are on a different schedule than the Annexation and Zoning decisions. If the Applicant has presented further information or modifications to any of the Applications referenced above, the positions taken herein will be re-evaluated as required. Where indicated below, the "Action Requested by Petition Group" should be completed in advance of the Planning Commission session.

A. Pre-Development items not addressed:

In the Pre-Application Summary date May 22, 2020, the assigned Planner, Jeremiah Bebo, identified items required to be submitted and addressed in connection with the Applications. Excerpts from this Summary appear below in quotes and italics, along with the current status of the items and identification of the Petition Groups Questions, Concerns and/or Action Request.

1. Truck Traffic in Excess of Light Industrial Zoning Limitations. *"The use can be defined as Light Industrial so long as daily truck trips are under 50."* The Petition Group noted that a representative for Amazon, the end user for the developed site, stated at the Public Meeting held on March 11, 2021, that holiday flex traffic of incoming semi-trailer truck traffic could reach "42 Trucks in a 24-hour period during holiday or other peak times". 42 Trucks would generate 84 Trips, which would violate the IL Zoning limitation. Other trip generation formulas based on the square footage of the facility and the number of vans to be operated from the facility indicate that the number of daily truck trips would be consistently in excess of the 50 trip maximum for the IL Zoning. Also, given the size of the Vans that will be used to deliver from the site, regulatory consistency would appear to require that they be counted as Trucks as well. Under the LDC, a "truck" is clearly different and distinguished from a semi-truck in that the definition of "heavy industry" references trips by "semi-trailer trucks." As such a mere "truck" is something different from and less than a semi under the LDC. The statutory definition of a truck in CRS 42-1-102(108) and the Model Traffic Code includes a cargo van, such as the vans used by Amazon. The Arvada Municipal Code has adopted the definitions contained in the Model Traffic Code for Colorado. *See, Arvada, Colorado Code of Ordinances Sec. 54-31.* Action requested by Petition Group: Discontinue processing the Applications for Light Industrial Zoning.

2. Comprehensive Plan Amendment. *"A Comprehensive Plan Amendment to Industrial/Office will be needed for the Commercial portions."* No Comprehensive Plan Amendment can be located. Questions: Is this in process? When will a draft be circulated? Actions requested by Petition Group: Enforce the existing Comprehensive Plan, particularly the requirements that the development "minimally affect surrounding properties" and will not have "significant adverse impacts upon the natural environment".

3. Floodplain Impingement. *"Water quality and detention should be located outside the 100-year floodplain."* Sketches and contour overlays located by the Petition Group and including information provided by the Applicant's engineers clearly show portions of the Detention Pond area overlaying the 100-year floodplain. Action requested by Petition Group: Require a modified Detention Pond located completely outside the Floodplain.

4. 68th Avenue Access. *"CDOT approval will be required"*. Applicant has stated that it is applying for an Access Permit, but no documents can be located, and to date the Access Permit has not been issued. Actions requested by Petition Group: (1) Obtain a copy of the Access Permit application and make it available to the Planning Commission and the Public. (2) Require an issued State Highway Access Permit in advance of any action by the Planning Commission.

5. Eldridge St and east on W 68th Ave. *"The City would like to limit access north on Eldridge St and east on W 68th Ave through the existing neighborhoods. The City is open to exploring installing a cul-de-sac with fire-only access to the intersection of Eldridge and W 68th in order to prevent cut-through traffic."* The plans submitted with the Application do not contain any mechanisms for limiting access to the referenced intersection and Staff has not followed up on the concern. There appears to be no limit on the traffic from the Applicant's property flowing through the intersection, except for relying on the "honor system" with the Applicant and Amazon, the identified end user of the developed property. It seems doubtful that over-scheduled Amazon van drivers will neglect a short cut if it is easily available. Action requested by Petition Group: Applicant's plans should strictly comply with § Sec. 4-4-2-3 of the LDC, which would require a permanent mechanism, using either physical barriers or using regulatory signaling and signage to specifically prohibit Van and Truck access from the Applicants developed property through the intersection.

6. Traffic North on Fig Street. "*Routing trucks and van deliveries north on Fig will be problematic for neighbors. It is in the applicant's best interest to avoid this route for public support."* The plans submitted with the Application do not contain any mechanisms for limiting this traffic, and again it appears to have been ignored by the Applicant and Staff. Action requested by Petition Group: Applicant's plans should strictly comply with § Sec. 4-4-2-3 of the LDC. Require a permanent mechanism, using either physical barriers or using regulatory signaling and signage to prohibit Van and Truck Traffic traveling north on Fig into the Eldridge and W 68th Avenue intersection.

7. Tree Planting. "*Tree mitigation on north portion of property may be planted on Maple Valley as well to aid in screening."* The Landscape Plan does not show any trees being planted in Maple Valley Park but does show extensive removal of existing trees on the Applicant's property. A lack of water for mechanical watering has been cited as the reason that no trees would be required to be planted along the Park boundary. Concern: Trees are currently growing and have been growing in the park area and along the boundary with the property to be developed without mechanical watering for decades. Most of the Park adjacent to the development was a hayfield where trees were previously removed at some point, so natural moisture conditions would support a variety of tree species. The Petition Group commissioned an Assessment completed by Colorado State University that advised reforesting Maple Valley Park to balance the loss of wildlife habitat from the removal 450+ trees from the Applicant's property. If the Applicant and the City want to honor the goals of the Comprehensive Plan to

avoid "significant adverse impacts upon the natural environment." A plan for reforestation of the Park should be prepared for reforestation and if necessary to provide for the means to water the trees planted. Planting Trees in Maple Valley Park, in addition to trees in the buffer area of the proposed Development Property would significantly reduce the impacts on the Park, Park users and the bird population in the area, and would go along way to showing the Applicants good faith towards its neighbors.

8. Screening. *"Site sits 10-20 feet higher than residences to the north. Attention should be made to provide as much screening from that neighborhood as possible."* Applicant has proposed a four-foot-high fence. In addition to the quoted request set forth in the #PA2020-0067 Summary, Staff has requested in the 2nd Review Summary and Outside Ref. that the developer "Provide a masonry wall along the perimeter of the northern property line". No wall height or specific functional purpose for the wall is specified. Actions requested by Petition Group: Require a visibly solid fence high enough to fully block direct view of the Parking Lot Lighting from the residences to the north. The Wall needs to be across the entire north property line. Also, a wall should be required on the Fig street side to block vehicle lights from Ralston Valley and Hill Crest neighborhood residences.

9. Excessive Parking. *"Please provide a detailed parking plan...demonstrating the need for over 1,300 parking spaces which is over the City requirements."* Staff has again requested a Parking Plan in the 2nd Review Summary and Outside Ref. Question: Why are the Applications being allowed to proceed without the Parking Plan, that was initially requested in May of 2020? Concern #1: Jefferson County in its review of DA2020-0132, dated February 22, 2021, specifically noted **"The parking for the site seems excessive. We request that the applicant provide a parking study to justify why so much parking is needed."** Concern #2: The excessive parking area adds unnecessary impervious surfaces that will adversely affect Ralston Creek which is already very close to being an impaired waterway. Concern #3: The excessive parking will add artificial light at night too close to Maple Valley Park impacting the wildlife, particularly the nesting birds and nocturnal animals that populate the Park and surrounding areas. Actions requested by Petition Group: (1) Require the Applicant to strictly justify the parking based upon the representations made about the number of on-site employees and Van Drivers that it has asserted will be parking at the facility when developed and remove all unjustified parking areas on the north side of the building and minimize impervious area impacting Ralston Creek. (2) Limit Parking to encourage use of Mass Transit and Car Pooling. (3) Require applicant to strictly enforce prohibitions on litter and human waste from Van and Van Drivers being left in the parking area or dumped into the Park or Ralston Creek.

B. Missing Study. The LDC provides in Sec. 8-2-6-2 that a Heavy Truck routing plan is required.

"A. Generally. A heavy truck routing plan is required for uses as specifically identified in this LDC and for uses that the Director determines will involve the use of semi-trailers, dump trucks, trash hauling trucks, or comparable heavy vehicles at a frequency of more than ***25 heavy truck trips per week****. The heavy truck routing plan shall be followed once approved." Arvada, Colorado Code of Ordinances Sec. 8-2-6-2*

No such Plan has been located in the files. As indicated above in the section addressing light industrial zoning, the Applicant's own filings and public statements put the heavy truck traffic well in excess of the 25 trips per week threshold. Actions requested by Petition Group: Require this Study to be completed and provide to the public when it is available.

C. **Unanswered questions from Public meetings.** The Petition Group has expressed concerns that Questions submitted for response at the Public Meeting held on March 11, 2021 were not responded to by the Applicant's representatives. By this letter the Petition Group is requesting that you, as the Director, exercise your Authority under *Arvada, Colorado Code of Ordinances Sec. 8-2-4-1 D.* and require the Applicant to respond to these Questions on before April 9, 2021 and to Suspend processing of the Applications unless the responses are received by that date. The list of questions, are set forth on Exhibit A.

D. Communication problems, confusing information. The Petition Group has expressed concerns that information relating to the Applications has been difficult to obtain and the public communication process has not functioned to get the information to the public. The City's webpage about Project Indiana has had inaccurate info and links to meetings. We have had to notify City Staff to make corrections because the community has reached out to us to get the correct info. The eTRAKIT files linked on the webpage about Project Indiana did not initially work and it has been reported that the files were slow to load or quite often wouldn't download and showed an error message, so the community had trouble seeing the Applicant's information in order to provide comment. The notification process using social media was inconsistent and confusing, and in connection with the re-scheduled February Public Meeting was not posted in a timely manner. Members of the Petition Group have made a record of the Communication Problems and if you or Mr. Deven would like to have this documentation please let us know. The Communication Problems have the effect of removing the public from the process of consideration of the Applications and could form the basis of future legal challenges to the City's decisions, which is something we would hope to avoid.

Conclusion. The Project #DA2020-0117 – Development Application (Annexation and Zoning) is incomplete and should not be processed by the Planning Commission. The incompleteness and contradictions in the Applicants plans, lack of responsiveness and a disregard for the concerns of the public and the requirements of the Comprehensive Plan are already placing a burden on the City, City Staff and Citizens. The Petition Group seeks to have these burdens eliminated by consistent enforcement of the legal requirements set forth in the Land Development Code and we encourage a very careful and deliberate approach to the Applications and the future impacts the proposed use is likely to have.

Please ensure this letter with the Exhibit and the Petitions hand delivered herewith are included in the Planning Commissions information packet. Thank you for your attention to these matters.

Sincerely,

Patrick J. Tobin
Attorney at Law

EXHIBIT A

Unanswered Questions from Amazon Neighborhood Meeting
Submitted by Protect Maple Valley Park, 3/9/2021

1. When are your comments going to be available for the questions and recommendations posed by the Jefferson County Planning staff in their comments dated January 26, 2021 and February 5, 2021 (attached). Can you please respond to Jeffco's comments?

2. There should be comparable developments as proposed by the developer in the Denver Metro area and the front range.
Please list and provide the following information on similar operations in other Colorado cities:
i. Date put into operation
ii. Number of employees
iii. Van parking spaces on-site and off-site
iv. Zoning of each location

3. How do you reconcile your proposed Project with the values for the Maple Valley Park Open Space as stated by the City of Arvada in their numerous documents recommending how Open Space should be preserved, protected, and improved?

4.What is the status of other project permits?
a. State Highway Access Permits
b. Stormwater Discharge Permit
c. Air Emissions

5. The applicant has stated since the 1st public meeting last November that the van parking is critical and cannot be altered.
Please explain why.

6. What is the projected daily amounts of wastes estimated from the Site, and the Van and Truck Traffic broken down as follows:
a. Human waste from Truck and Van Drivers?
b. Solid Waste – paper, packaging, cafeteria, pallets, containers?
c. Any Hazardous wastes?
d. Any liquid wastes such as oils, lubricant, flammables?

7. Are the truck and van drivers utilizing the restroom facilities inside the building and are the facilities sized for 1,000+ drivers over and above the 300+ associates working in the building?

8. Will Truck and Van drivers be subjected to scheduling that precludes using the restroom facilities inside the building.

9. Please provide a overlay map showing the development, including the Detention Pond and its embankments and contours overlying the floodplains, wetlands and Ralston Creek?

10. The Kimley-Horn site plan drawing 096441010_CSP_SP sheet 4 shows a location, just north of the proposed building, for a parking space for an "Emergency Mobile Generator".

a. Will there be a generator parked and connected to the building electrical system in the noted space on a permanent basis?

b. What is the intended use of the generator? Full operation of the plant? Emergency lighting or utilities such as air compressors?

c. What will be the size of the generator, both engine size and generator electrical capacity?

d. What fuel will the unit use and what is the capacity of the fuel tank for the unit?

e. Why must a generator be placed on the north side of the building which will cause increased noise and emissions for the area residents north of the project site?

11. Will there be other utility equipment, such as air compressors and boilers installed in center and if so, please provide a list and size of equipment and where the exhausts or venting of the equipment will be located?

12. Where and when is trash from Vans collected before and after return to the center?

13. Why was traffic count data taken in the middle of summer 2020 and during the pandemic which had no school traffic component and lower work traffic levels due to the pandemic used for the study and why was it adjusted with 2017 data which did not reflect current traffic volumes generated from the Westwoods Mesa, GEOS, Candelas, Leyden Rock neighborhoods, and others which increased significantly after 2017?

14. Vehicle Fleet Fueling and Servicing Questions:

a. How is the van fleet to be fueled?

b. If off-site, how many van trips for fueling and at what location?

c. If onsite either via a fueling station or a contractor using fueling service vehicles, how many heavy tanker fuel trucks would be required for an onsite fueling?

d. How is the fleet to be serviced for oil changes and fluid and where?

e. How are fleet vehicles to be washed and where?

f. Where will vehicle maintenance be performed?

15. The Traffic Impact Study mentions inadequate turn lanes on 64th and Indiana and 64th and McIntyre and essentially says that the city should address these issues. Since the proposed project will exacerbate the turn lane issues why is it not the projects responsibility to address the noted problems?

16. Why has mass transit not been discussed or investigated since there appears there could over a thousand associates and drivers commuting to the proposed project every day?

17. How will the Developer address (during the predevelopment phase) the impacts to the park from construction and from anthropogenic sources of light, noise, and air pollution generated by the Development?

18. What is the Developers light mitigation plan to allay light pollution on Maple Valley Park, its wildlife, and nearby homes?

19. What impact studies have been done at any other similar Amazon "Last Mile" Distribution Centers to document the noise decibel levels during both daytime and night time operations?

Brownstein Hyatt Farber Schreck

City of Arvada
Community and Economic Development
Attn: Ryan Stachelski, Director
8101 Ralston Road
Arvada, CO 80002

Re: Response to Mr. Patrick J. Tobin's Letter dated March 30, 2021 concerning Project #DA2020-0117 – Development Application (Annexation and Zoning) and Related Applications: Project #DA2020-0132 – Site plan, Project #PA2020-0067 – Project Pre-Application (the "Petition Group Letter")

Dear Mr. Stachelski:

We represent Scannell Properties, LLC (the "**Developer**") with respect to its annexation, zoning, and rezoning application (collectively, the "**Application**") for the proposed development of an Amazon last mile delivery station ("**Project Indiana**") to be constructed in the City of Arvada (the "**City**"). The Application will be considered at a public hearing before the Planning Commission on April 20, 2021 (the "**Public Hearing**"). We understand that Mr. Patrick J. Tobin has submitted the Petition Group Letter to document his clients' questions, concerns and requests for action with respect to the Application in advance of the Public Hearing, and on behalf of the Developer, we appreciate the opportunity to submit this letter in response to the Petition Group Letter for the record and to assist the Planning Commission in its deliberations.

As you are aware, the Application concerns the development of approximately 34 acres of land located at 6700 Indiana Street (the "**6700 Property**"), 6702 Indiana Street (the "**6702 Property**"), 6710 Indiana Street (the "**6710 Property**"), a portion of 6720 Indiana Street (the "**6720 Property**"), 6730 Indiana Street (the "**6730 Property**"), 14725 West 66th Place (the "**14725 Property**"), and 14785 West 66th Place (the "**14785 Property**") (collectively, the "**Property**"). It also concerns the annexation of Maple Valley Park (the "**Park Property**") into the City. The 6700 Property, the 6702 Property, the 6710 Property, and the 6720 Property are located in unincorporated Jefferson County, Colorado (the "**County**") (collectively, the "**County Property**"), and the 6730 Property, the 14725 Property, and the 14785 Property are located in the City (collectively, the "**City Property**"). The Developer owns the 6700 Property and is the contract purchaser of the other properties. The Developer desires to annex the County Property into the City and zone such property as Industrial, Light ("**IL**"), and to rezone the City Property from its current Commercial, General designation to IL.

As a preliminary matter, we would like to clarify that the purpose of the Public Hearing is for the Planning Commission to consider the Application, not the application for a site plan/minor subdivision for the Property (the "**Site Plan Application**"), which is under review by City Staff. Most of the issues raised by the Petition Group Letter deal with specific components of how the Project might be laid out on the site, and therefore are related to the Site Plan Application, rather than the Application.

To the Developer's knowledge, the public information in the City's eTRAKiT files with respect to the Application and related applications is complete and up-to-date. No responses from Developer are missing.

Despite the Petition Group Letter's assertion that the Application is incomplete, the Developer has submitted a complete application, as demonstrated in the responses below to the specific concerns raised in the Petition Group Letter. The Land Development Code (the "**LDC**") contains a list of required submittal items that an applicant must provide in order for an application to be accepted for review by City Staff. The Application has met those requirements and the Developer has completed the rigorous review process required by Section 8-2-3-11 of the LDC and has made numerous revisions to address comments and issues raised by Staff during that process. Only applications that appropriately respond to issues raised during the review process are deemed complete and forwarded by the Planning Director to the Planning Commission for review. *LDC § 8-2-3-11.H*.

The Developer appreciates the Petition Group Letter's commitment to a full community perspective, which is consistent with its own commitment to a full community perspective, as evidenced by the amount of community outreach in which the Developer has engaged. The Developer has exceeded the amount of community outreach required by the LDC by hosting two virtual neighborhood meetings, including a five-hour meeting during which the Developer answered more than 500 questions posed by attendees. Moreover, members of the public will have the opportunity to present their perspective at the Public Hearing and the subsequent City Council meeting.

The materials that accompany the Application provide a complete record demonstrating fulfillment of the criteria for an annexation, zoning and rezoning as well as the Developer's commitment to community outreach. In this letter, we address the other specific questions, concerns and requests for action raised in the Petition Group Letter.

A. Pre-Development Items

1. Truck Traffic

The Petition Group Letter states that the truck traffic anticipated to be generated by Project Indiana is in excess of what is permitted by the LDC. We address this comment and the requested action below.

i. *Truck Traffic in Excess of Light Industrial Zoning Limitations*.

The Petition Group Letter states that because the statutory definition of a "truck" in C.R.S. § 41-1-102(108) and the Model Traffic Code is applied to the cargo vans intended to serve Project Indiana, the number of estimated truck trips will regularly exceed the limit of 50 daily truck trips allowed in the IL zoning. However, while cargo vans may qualify as a "truck" under those authorities, the City has adopted those authorities for the limited purposes of the City's traffic enforcement ordinance, not for land use decisions such as the decisions at issue in the Application. For land use decisions, the City instead properly relies on the traffic engineering-specific definitions and methodologies promulgated by the Institute of Transportation Engineers (ITE). One of those references is the ITE Trip General Manual, which does not include cargo vans within the definition of a "truck" for purposes of analyzing traffic generation associated with various use types. Therefore, using the definition of what constitutes a "truck" for land use decisions such as those at issue in the Application, the number of daily truck trips will not typically exceed the 50 daily truck trip limit for IL zoning. The Developer acknowledges that on infrequent occasions, such as holidays, there may be up to 42 trucks—84 trips—per day. However, the proposed development satisfies the requirements for IL zoning because the typical number of daily truck trips will not exceed 50. *LDC § 11-3-3*. Land use decisions are not properly made on the basis of rare occurrences which might occur sometimes; rather, the impact of uses is determined based on their average, or typical, characteristics.

ii. *Action requested by Petition Group: Discontinue processing the Applications for Light Industrial Zoning*.

The City should not discontinue processing the Application. First, as described above, the Developer has demonstrated that the projected number of daily truck trips is compatible with the requested IL zoning. Second, even if the Developer had proposed a level of truck traffic inconsistent with zoning district standards, the proper process pursuant to Section 8-2-2-2 of the LDC is for Planning Commission to make this determination after a public hearing and not for City Staff or Planning Commission to preemptively discontinue the application before any of the relevant decision makers have reviewed it. It would be improper to discontinue processing an application for a rezoning based on a finding that has not yet been made or based upon the opponents' opinion of what the Planning Commission may find.

2. Comprehensive Plan Amendment

The Petition Group Letter noted that the City initially stated that an amendment to the 2014 Comprehensive Plan (the "**Comp Plan**") would be needed for the portions of the Property designated as Neighborhood/Community Commercial. The Petition Group Letter further noted that no proposed amendment to the Comp Plan can be located and set forth some questions and requested actions with respect to the same. We address these questions and the requested action below.

i. *Questions: Is this in process? When will a draft be circulated?*

City Staff review has subsequently concluded that the Application is consistent with the existing Comp Plan and therefore not required the Developer to amend the Comp Plan. Therefore, to the Developer's knowledge, an amendment to the Comp Plan with respect to the Property is not in process and there is no draft of such amendment to circulate.

ii. *Actions requested by Petition Group: Enforce the existing Comprehensive Plan, particularly the requirements that the development "minimally affect surrounding properties" and will not have "significant adverse impacts upon the natural environment"*

As described in detail in the Developer's two letters to the City accompanying the Application dated December 11, 2020 (the "**Developer's Letters**"), the Developer has submitted the Application in which it demonstrates that the proposed annexation, zoning, and rezoning is consistent with the Comp Plan. The Comp Plan designates a majority of the Property as "Industrial/Office/Retail," with a small portion designated as "Neighborhood/Community Commercial." The Property also is designated as a future employment center. As discussed in the Developer's Letters, the proposed uses for Project Indiana are compatible with this designation. Similarly, the Comp Plan designates the Park Property as "Open Space," which is compatible with the proposed uses for the Park Property.

As further described in the Developer's Letters, the Application also complies with the Comp Plan provisions that require development to "minimally affect surrounding properties" by proposing a design for Project Indiana that includes ample buffers between the proposed development and the surrounding uses. The buffers between Project Indiana and residential development will be further enhanced by the Park Property.

The LDC requires that a proposed zoning or rezoning shall not result in a land use with "significant adverse impacts on the natural environment", *LDC § 8-3-4-2.A.4*, and the Comp Plan sets a goal to "minimize the impact of new development on natural areas to allow continued co-habitation of people and wildlife," *Comp Plan, Goal R-1*. Project Indiana will not have "significant adverse impacts upon the natural environment" because, as detailed in the Developer's Letters, the Developer intends to construct large retention ponds

and work with the City to address any additional mitigation measures deemed necessary during review of the Site Plan Application. Therefore, the Application is in compliance with the LDC and consistent with the Comp Plan.

As an aside, it should be noted that, unlike zoning, the Comprehensive Plan is not a document which can be "enforced." Rather, the Comprehensive Plan is an advisory document, which sets forth guiding principles for making certain decisions pursuant to the LDC. The Application demonstrates numerous ways in which it is consistent with and in furtherance of the Comprehensive Plan. If the Petition Group has a different opinion, the Public Hearing is one of several fora provided by the LDC for them to express that opinion.

3. Floodplain and Detention Pond Area

The Petition Group Letter states that the Petition Group has located sketches and contour overlays demonstrating that portions of the Developer's proposed detention pond area overlay the 100-year floodplain. The Petition Group Letter sets forth the following requested action with respect to the proposed detention pond area, which we will address below:

i. *Action requested by Petition Group: Require a modified Detention Pond located completely outside the Floodplain.*

This comment is not relevant to the Application or the Public Hearing because approval of the requested annexation, zoning, and rezoning does not include approval of the placement of detention ponds within a proposed development. To the extent that any modified detention ponds are required for approval of the Site Plan Application, the Developer will address such requirements in conjunction with City staff at the appropriate time in the review process.

4. 68th Avenue Access

The Petition Group Letter states that the City has commented that approval from the Colorado Department of Transportation ("**CDOT**") will be required for approval of Project Indiana. The Petition Group Letter further states that no documents with respect to an access permit have been located and an access permit has not been issued. The Petition Group Letter sets forth the following requested actions, which we will address below:

i. *Actions requested by Petition Group: (1) Obtain a copy of the Access Permit application and make it available to the Planning Commission and the Public. (2) Require an issued State Highway Access Permit in advance of any action by the Planning Commission.*

This comment is not relevant to the Application at issue because, pursuant to Divisions 8-3-3 and 8-3-4 of the LDC, none of the criteria for approval of a requested annexation or zoning address the approval of access permits by CDOT. No requirement exists that access permits must be obtained, or even submitted, prior to submittal of other applications, such as the Application at issue here. In fact, an applicant could apply for annexation, zoning, and site plan review and not apply for an access permit for a year or more after such applications are approved. Additionally, the Developer has completed and submitted to CDOT its access permit applications.

5. Eldritch Street and East on W 68th Ave.

The Petition Group Letter sets forth a concern and the following requested action with respect to access and traffic at the intersection of Eldritch Street and W 68th Avenue:

i. *Action requested by Petition Group: Applicant's plans should strictly comply with § Sec. 4-4-2-3 of the LDC, which would require a permanent mechanism, using either physical barriers or using regulatory signaling and signage to specifically prohibit Van and Truck access from the Applicants developed property through the intersection.*

Although it should be noted that this is really a Site Plan issue and is not related to the Application, the Developer is committed to complying strictly with Section 4-4-2-3 of the LDC in any manner the City directs. The Developer does not anticipate traffic, including delivery van traffic, at the intersection of Eldritch Street and W 68th Avenue to be an issue, but if traffic becomes an issue after the last mile delivery station opens, the City will evaluate and implement measures as necessary, which may or may not include a physical barrier.

6. Traffic North on Fig Street.

Similar to Item 5 above, the Petition Group Letter sets forth a concern with respect to traffic on Fig Street along with the following requested action:

i. *Action requested by Petition Group: Applicant's plans should strictly comply with § Sec. 4-4-2-3 of the LDC. Require a permanent mechanism, using either physical barriers or using regulatory signaling and signage to prohibit Van and Truck Traffic traveling north on Fig into the Eldridge and W 68th Avenue intersection.*

The Developer's response is the same as to Item 5 immediately above. While this is a Site Plan issue, and not related to the Application, to the extent that the City wishes to restrict the use of Fig Street or require some other type of mechanism to restrict traffic, the Developer has no objection.

7. Tree Planting

The Petition Group Letter raised multiple concerns with respect to tree planting for the Property and the Park Property. Again, this issue relates principally to the Site Plan, rather than the Application. However, the Developer's plans for tree planting fully comply with the City's requirements and avoid adverse impacts upon the natural environment in compliance with the LDC.

The Developer will plant approximately 830 trees on the Property and is dedicating 1.1 acres of land to the City where the City may plant additional trees. Additionally, the Developer is also making an additional cash payment to the City for the purposes of tree mitigation, which the City can use to plant additional trees within the Park, or anywhere else in the City that it sees fit.

It is also the Developer's understanding that the City does not currently wish the Developer to plant additional trees in Maple Valley Park based on the City's evaluation. The Developer will continue to follow the City's direction with respect to this issue. Additionally, although the Assessment completed by Colorado State University suggests that planting trees would reduce the impacts on Maple Valley Park, the Developer is not permitted to plant trees in the floodplain that is adjacent to the Park Property. To the extent that the City desires trees in Maple Valley Park and the planting of trees does not violate the prohibition on planting trees in the floodplain, the Developer is willing and happy to cooperate in planting trees.

8. Screening

The Petition Group Letter states that, because the Property is approximately 10-20 feet higher than the residences to the north, the Developer should provide as much screening of Project Indiana from the neighborhood as possible. The Petition Group Letter sets forth the following requested actions, which we will address below:

i. *Actions requested by Petition Group: Require a visibly solid fence high enough to fully block direct view of the Parking Lot Lighting from the residences to the north. The Wall needs to be across the entire north property line. Also, a wall should be required on the Fig street side to block vehicle lights from Ralston Valley and Hill Crest neighborhood residences.*

Once again, it must be noted that this issue pertains to the Site Plan not the Application. However, in the Site Plan, the Developer has designed screening for the Property using a variety of techniques, including a screening wall, additional buffer area, and landscaping in different areas along the northern boundary of the Property. According to the Developer's analysis, a screening wall across the entire northern border of the Property would not be as effective as the variety of techniques the Developer has proposed. The Developer has proposed a screening wall for portions of the northern border of the Property where a screening wall would most effectively screen Project Indiana from surrounding properties and where there was no room for other buffering techniques that would provide more effective screening than a wall. Overall, the Developer has designed Project Indiana to minimize any impacts vehicle lights may have on the Ralston Valley and Hill Crest neighborhood residences to the east of the Property. To the extent that the Petition Group Letter presents concerns about the screening of parking lot lighting, the Developer has designed the parking lot lighting specifically to minimize impact on nearby properties, including the use of shorter light poles and cut-off lights. The photometric plan submitted as part of the Site Plan approval will demonstrate that it meets all the applicable criteria as it relates to lighting.

9. Excessive Parking

The Petition Group Letter raised multiple concerns with respect to parking on the Property. The Petition Group Letter sets forth the following requested questions, concerns, and actions, which we will address in turn below:

i. *Question: Why are the Applications being allowed to proceed without the Parking Plan that was initially requested in May of 2020*?

A parking plan is not required for an application for an annexation, zoning or rezoning and is appropriately considered as part of a site plan. Therefore, the requested parking for Project Indiana is not at issue in the Application to be considered at the Public Hearing.

However, even if parking were at issue in the Application, the Petition Group Letter misinterprets the City's May 2020 request. City Staff was not requesting that the Developer produce a formal parking plan. Rather, City Staff was merely seeking detailed information clarifying why the requested amount of parking was being sought for Project Indiana. During the rigorous review process, the Developer provided this information to the City, which the City accepted as part of the complete Application.

Even if the City were ultimately to determine that a formal parking plan were required for approval of the Application, the proper process pursuant to Section 8-2-2-2 of the LDC is for Planning Commission to make this determination after a public hearing and not for City Staff or Planning Commission to preemptively halt the processing of an application. As noted above, it would be improper to discontinue processing an application for an annexation or rezoning based on a finding that has not yet been made or based upon the opponents' prediction of what the Planning Commission may find.

ii. *Concern No. 1: Jefferson County in its review of DA2020-0132, dated February 22, 2021, specifically noted "The parking for the site seems excessive. We request that the applicant provide a parking study to justify why so much parking is needed."*

The Developer's response to this concern is the same as to the Petition Group Letter's question about parking above. The City's question about the amount of parking for Project Indiana was addressed during the Application review, and the City determined no parking study was necessary. More importantly, a parking study is not required for an annexation, zoning or rezoning and is appropriately considered as part of a site plan.

iii. *Concern No. 2: The excessive parking area adds unnecessary impervious surfaces that will adversely affect Ralston Creek which is already very close to being an impaired waterway.*

The Petition Group Letter's concern about impervious surfaces is irrelevant to the Planning Commission's review of the Application. The impact of parking areas on impervious surfaces and potential mitigation measures will be analyzed during review of the Site Plan Application and is not at issue for the Public Hearing.

iv. *Concern No. 3: The excessive parking will add artificial light at night too close to Maple Valley Park impacting the wildlife, particularly the nesting birds and nocturnal animals that populate the Park and surrounding areas.*

The Petition Group Letter's concern about artificial lighting is irrelevant to the Planning Commission's review of the Application. Lighting will be analyzed during review of the Site Plan Application. However, the Developer is committed to using cut-off lights and shorter light poles in the parking areas, which will alleviate potential lighting impacts.

v. *Actions requested by Petition Group: (1) Require the Applicant to strictly justify the parking based upon the representations made about the number of on-site employees and Van Drivers that it has asserted will be parking at the facility when developed and remove all unjustified parking areas on the north side of the building and minimize impervious area impacting Ralston Creek. (2) Limit Parking to encourage use of Mass Transit and Car Pooling. (3) Require applicant to strictly enforce prohibitions on litter and human waste from Van and Van Drivers being left in the parking area or dumped into the Park or Ralston Creek.*

As discussed above, the Developer has adequately justified the amount of parking for Project Indiana as part of the Application review process. Similarly, the site design incorporates the Developer's parking needs. Although Amazon strongly encourages its employees to use mass transit, carpooling and other measures, this is not an appropriate reason to reduce parking to a level that could negatively impact operation of the last mile delivery station. In response to the rather provocative claim regarding "litter and human waste," the City already has all the authority it needs to enforce its existing code provisions regarding such matters, whether on public or private property.

B. Heavy Truck Routing Plan

The Petition Group Letter states that a heavy truck routing plan is required for the use of certain vehicles at a frequency of more than 25 heavy truck trips per week but has not yet been provided. *LDC § 8-2-6-2*. The Petition Group Letter sets forth the following requested action, which we will address below:

1. *Actions requested by Petition Group: Require this Study to be completed and provide to the public when it is available.*

The Petition Group Letter's concern about the heavy truck routing plan is irrelevant to the Application because, when required, the heavy truck routing plan is part of the Site Plan Application. Moreover, heavy trucks will not be routed through residential neighborhoods.

The Developer has provided all information that will comprise the heavy truck routing plan within the traffic study and other components of its application. The Developer would be happy to compile this information into a single document entitled "Heavy Truck Routing Plan. However, it is important to note that this routing plan would become part of the Site Plan Application and is not a prerequisite to or condition of the Public Hearing.

C. **Communication Problems, Confusing Information**

The Petition Group Letter expressed its belief that the public has been "removed" from the Application consideration process as a result of communication problems and confusing information available to the public. Nothing could be further from the truth. Rather, the Developer has undertaken significant efforts above and beyond what is required by the LDC to ensure that the public can be actively involved in the review process. The Developer not only conducted the required neighborhood meeting required by the LDC in November of 2020 but responded to additional citizen interest in Project Indiana by coordinating an additional virtual neighborhood meeting (the "**Supplemental Meeting**") in an effort to hear and respond to public comment. The Developer also provided the neighborhood opposition group with an official time on the Supplemental Meeting agenda of to express its concerns.

The Developer acknowledges that shortly before the Supplemental Meeting, the Developer modified the meeting platform, leading to some confusion. However, this change in meeting platform was in an effort to accommodate the large number of participants, all of whom would not have been able to join the original meeting platform due to the platform's limit in the number of allowed participants. As soon as the Developer determined that there was some confusion about the change in meeting platform, and in an effort to ensure that all who wished to join had the opportunity and information to do so, the Developer rescheduled the Supplemental Meeting for two weeks after it had initially been scheduled. Despite this change and any confusion caused by the communication, more than 370 citizens ultimately attended the Supplemental Meeting, indicating that notice of this Supplemental Meeting was adequate. Additionally, in an effort to be responsive to citizen concerns, the Developer has offered to meet with members of Project Maple Valley Park. Thus far, no group members or representatives have accepted the invitation, although the invitation stands. Therefore, as this letter demonstrates, the Developer has not only fully complied with, but has exceeded the public outreach requirements of the LDC.

D. **Unanswered Questions from Public Meetings**

The Developer understands that a small number of the more than 500 questions presented during the recent five-hour long neighborhood meeting may not have been answered. The Petition Group Letter's request that the Director suspend the processing of the Application pursuant to Section 8-2-4-1.D of the LDC is outside of the Director's purview because Section 8-2-4-1.D of the LDC addresses instances where applicants fail to provide notice or where the notice is defective and is therefore not relevant to an instance such as this in which the Developer provided proper notice of the November 2020 neighborhood meeting required by the LDC and of the Public Hearing. Because the Supplemental Meeting was not required by the LDC, the notice requirements of the LDC did not apply. Nevertheless, the Developer made every effort to comply with the notice requirements of the LDC for the Supplemental Meeting as though those requirements did apply.

Additionally, in an effort to continue to be responsive to citizen concerns, the Developer has provided answers to all questions in Exhibit A to the Petition Group Letter in an Exhibit A to this letter.

No other matters with respect to the Application are identified as incomplete in the Petition Group Letter. The Application is complete and is properly scheduled for the Public Hearing. No basis exists for discontinuing processing of the Application or any other such preemptive action.

We understand that the Petition Group opposes the Project. They will have the opportunity to continue to express their opposition and concerns at the Public Hearing, and we look forward to hearing this information so that we may respond.

Thank you for your consideration.

Sincerely,

Carolynne C. White

Exhibit A
Response to Petition Group Questions

1. **When are your comments going to be available for the questions and recommendations posed by the Jefferson County Planning staff in their comments dated January 26, 2021 and February 5, 2021 (attached). Can you please respond to Jeffco's comments?**

We have not seen these County comments with these dates. We believe this question refers to comments that were submitted to the City, not to us, as part of the referral process on our applications, or possibly County comments on an application to the County that has since been withdrawn. In any event, we have responded to all City questions directed at us as the applicant, and do not have any planned additional responses forthcoming.

2. **There should be comparable developments as proposed by the developer in the Denver Metro area and the front range. Please list and provide the following information on similar operations in other Colorado cities:**
    a. **Date put into operation**
    b. **Number of employees**
    c. **Van parking spaces on-site and off-site**
    d. **Zoning of each location**

There are Delivery Stations similar in size, total employment and onsite parking operating in Broomfield and Thornton. Another facility is under review in Colorado Springs. Each facility complies with local zoning and land use designations.

City	**Broomfield**	**Thornton**	**Colorado Springs**
Year Opened	2021	2020	Pending
Building Size	201,000	151,000	104,767
Employees	635	425	225
Parking (emp/van)	389/1,193	318/590	153/429

3. **How do you reconcile your proposed Project with the values for the Maple Valley Park Open Space as stated by the City of Arvada in their numerous documents recommending how Open Space should be preserved, protected, and improved?**

There are no plans to disturb any portions of Maple Valley Park as part of the project. On the contrary, an additional +/- 1.1 acres will be dedicated to the City to expand Open Space and further separate the development from the closest existing residences.

4. **What is the status of other project permits?**
    a. **State Highway Access Permits** - These are being submitted to CDOT, per the request of CDOT.
    b. **Stormwater Discharge Permit** - This is a state permit, applied for prior to commencing

construction activities.

c. **Air Emissions** - These are submitted by the contractor, applied for prior to commencing. construction activities.

5. **The applicant has stated since the 1st public meeting last November that the van parking is critical and cannot be altered. Please explain why.**

As a Last Mile Distribution Center, the loading and parking of delivery vans are key uses on the site. Sufficient parking is planned to ensure all parking occurs onsite.

6. **What is the projected daily amounts of wastes estimated from the Site, and the Van and Truck Traffic broken down as follows:**

   a. Human waste from Truck and Van Drivers? These stations don't typically generate a lot of waste. Pallets and containers are sent back on the empty trucks to be reused.

   b. Solid Waste – paper, packaging, cafeteria, pallets, containers? Garbage/recycling dumpsters are emptied weekly and typically consists of lunch packaging, etc. These stations are not repackaging many shipments and so don't generate a significant amount of cardboard recycling.

   c. Any Hazardous wastes? No.

   d. Any liquid wastes such as oils, lubricant, flammables? No.

7. **Are the truck and van drivers utilizing the restroom facilities inside the building and are the facilities sized for 1,000+ drivers over and above the 300+ associates working in the building?**

The arrival of drivers is spread across a few hours in the morning and return to the station over a few hours in the evening during the day while the sortation associates primarily work at night. The facilities are designed above what is required for the utilization of restrooms in accordance with building codes.

8. **Will Truck and Van drivers be subjected to scheduling that precludes using the restroom facilities inside the building.** No.

9. **Please provide an overlay map showing the development, including the Detention Pond and its embankments and contours overlying the floodplains, wetlands and Ralston Creek?**

This is provided in the Site Plan documentation, with the floodplain limits being shown in conjunction to the stormwater detention facility. (See attachment).

10. **The Kimley-Horn site plan drawing 096441010_CSP_SP sheet 4 shows a location, just north of the proposed building, for a parking space for an "Emergency Mobile Generator".**
    a. **Will there be a generator parked and connected to the building electrical system in the noted space on a permanent basis?** This is a space allocation for a generator, if required in an emergency. A generator will not be placed in the facility on a permanent basis.
    b. **What is the intended use of the generator?** Full operation of the plant? Emergency lighting or utilities such as air compressors? As stated, it will only be brought in temporarily in an emergency situation and would be intended to run the whole facility until power is restored.
    c. **What will be the size of the generator, both engine size and generator electrical capacity?** It would be a 500 kw with about a 750 hp engine.
    d. **What fuel will the unit use and what is the capacity of the fuel tank for the unit?** Diesel full with about a 500 gallon tank.

e. **Why must a generator be placed on the north side of the building which will cause increased noise and emissions for the area residents north of the project site?** The generator needs to be placed outside the electrical room which is located on the north side.

11. Will there be other utility equipment, such as air compressors and boilers installed in the center and if so, please provide a list and size of equipment and where the exhausts or venting of the equipment will be located?

No. All other mechanical equipment which provides ventilation, heating and cooling is roof mounted.

12. Where and when is trash from Vans collected before and after return to the center?

Drivers maintain clean vehicles by utilizing garbage receptacles on site at the completion of their route.

13. Why was traffic count data taken in the middle of summer 2020 and during the pandemic which had no school traffic component and lower work traffic levels due to the pandemic used for the study and why was it adjusted with 2017 data which did not reflect current traffic volumes generated from the Westwoods Mesa, GEOS, Candelas, Leyden Rock neighborhoods, and others which increased significantly after 2017?

Traffic research publications indicate that summer months do not influence a variation in traffic counts and the majority of data suggests traffic volumes are higher during the summer months. It should be noted that school dismissal times do not align with the peak hour of the adjacent street; therefore, traffic volumes utilized during the PM peak hour in the traffic study are higher than the traffic volumes coinciding with the school dismissal hour. The afternoon peak hour of the adjacent street is the controlling hour that dictates the needs for roadway infrastructure improvements and school dismissal times do not align with this hour. Further, development cannot be constrained to months occurring outside of summer. This project was kicked-off during the summer and counts needed to be collected at that time in order to meet the project schedule.

Historical traffic information from 2017 was the most recent collected traffic data from the City to provide for a comparison. This is standard practice for comparison and preparing traffic impact studies during the pandemic.

An annual traffic growth rate was appropriately applied based on travel model forecasts. It should be noted that traffic volume projections in the Project Indiana traffic study exceed long-term traffic model projections conducted by both the Colorado Department of Transportation (CDOT) and Denver Regional Council of Governments (DRCOG).

14. Vehicle Fleet Fueling and Servicing Questions:

a. **How is the van fleet to be fueled?** We look forward to an electric fleet in the coming years, while in the short term and where allowed, there are Mobile Fueling solutions or the vans refuel as needed while out on delivery routes.
b. **If off-site, how many van trips for fueling and at what location?** If off-site, drivers refuel while on the route so no additional trips and many stations are used in multiple surrounding areas.
c. **If onsite either via a fueling station or a contractor using fueling service vehicles, how many heavy tanker fuel trucks would be required for an onsite fueling?** We do not use the heavy tanker fuel trucks with 5-10k gallon capacity. We may have 3-4 smaller 1k gallon trucks.
d. **How is the fleet to be serviced for oil changes and fluid and where?** Where allowed, Mobile Maintenance is an after-hours program that brings standard preventative maintenance onsite (oil change, filter replacement, tire rotation). The vendor also offers additional aftermarket up-fittings and repairs (ex. side steps, cameras, bulb replacements, or mirrors).

e. **How are fleet vehicles to be washed and where? There** are Mobile Washing solutions or the vans use carwashes as needed.
f. **Where will vehicle maintenance be performed?** Larger maintenance and repairs are performed at local repair shops.

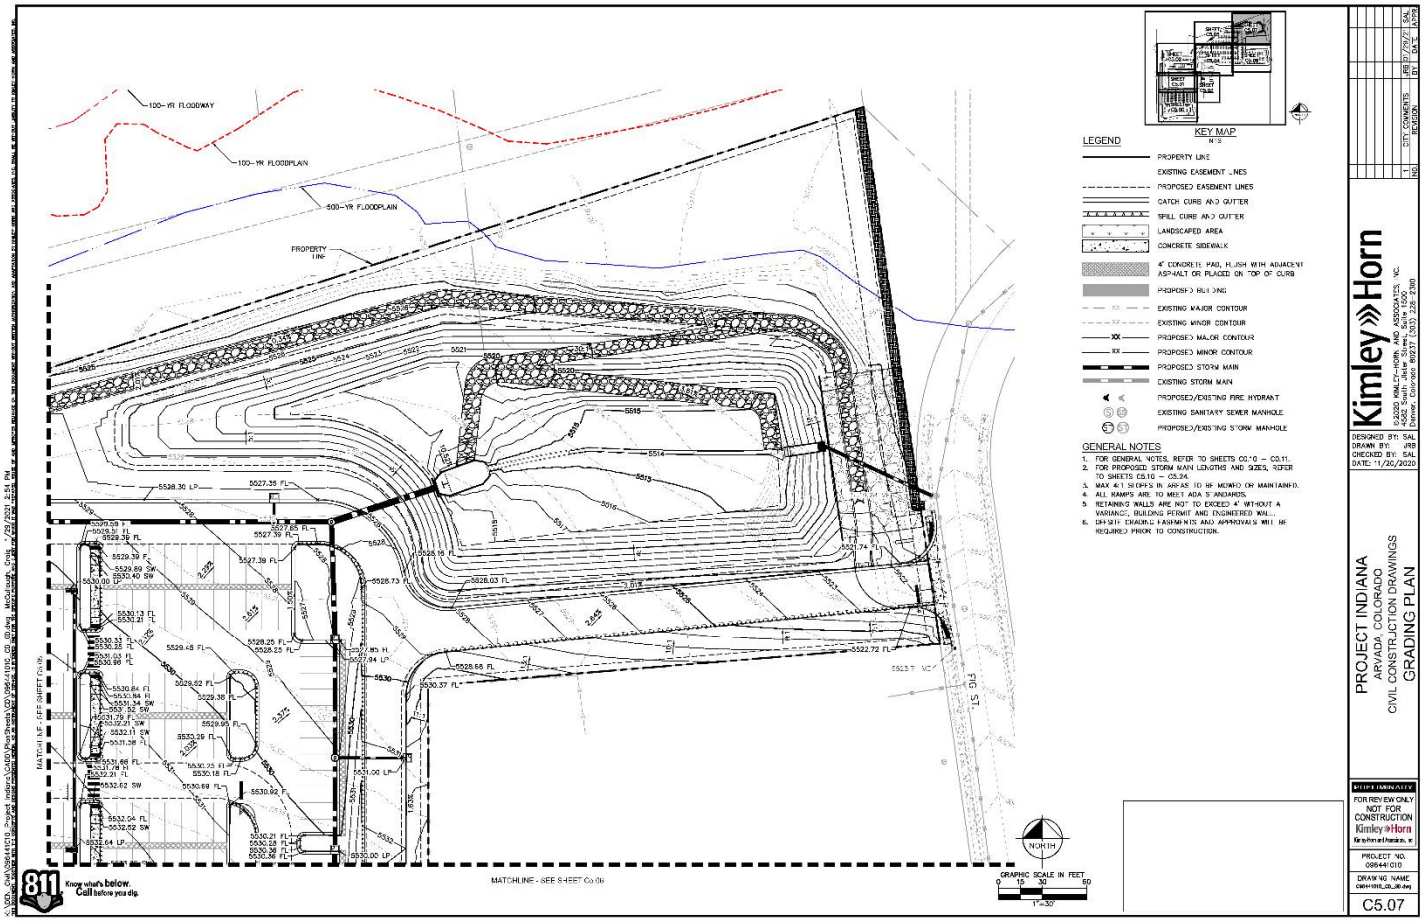
15. The Traffic Impact Study mentions inadequate turn lanes on 64th and Indiana and 64th and McIntyre and essentially says that the city should address these issues. Since the proposed project will exacerbate the turn lane issues why is it not the project's responsibility to address the noted problems?

These are existing issues and the project has negligible impacts on these intersections (less than 4% additional contribution). Therefore, it is not incumbent on this development to fix existing operational issues within the City that are not impacted by this development.

16. Why has mass transit not been discussed or investigated since there appears there could be over a thousand associates and drivers commuting to the proposed project every day?

Total employment, spread over several shifts, will be about 325 during normal operations and 750 during holiday operations. In addition, bike racks and kiss-and-ride facilities are proposed at the development to encourage carpooling and alternative transportation requirements. The sidewalk in front of the facility is being designed for both pedestrian and bike traffic.

17. How will the Developer address (during the pre-development phase) the impacts to the park from construction and from anthropogenic sources of light, noise, and air pollution generated by the Development?



There are no plans to disturb any portions of Maple Valley Park as part of the project. The developer will comply with City Code requirements during construction.

18. What is the Developer’s light mitigation plan to allay light pollution on Maple Valley Park, its wildlife, and nearby homes?

The lighting plan for the Delivery Station will comply with City Code requirements. Low impact lighting will be utilized (through the use of “cut-off” fixtures) to eliminate light trespass and reduce glare. Additionally, the pole height of any light poles planned onsite is a maximum of 22 feet, whereas City Code allows the height of exterior light fixtures, whether mounted on poles, walls or by other means to be 35 feet in the light industrial zoning district.

19. What impact studies have been done at any other similar Amazon "Last Mile" Distribution Centers to document the noise decibel levels during both daytime and nighttime operations?

The facility will operate within applicable noise limits in the City Code.

Re: Project #DA2020-0117 – Development Application (Annexation and Zoning). Related Applications: Project #DA2020-0132 – Site plan, Project #PA2020-0067 – Project Pre-Application.

Dear Mr. Stachelski:

Please include this letter and enclosures itemized below, and the additional signed Petitions, from the Petition Group delivered herewith expressing public opposition to the above-referenced Development Applications, for inclusion into the final Packet for the Planning Commission meeting scheduled for April 20, 2021. With this additional submission of Petition signatures, a total of Four Thousand Five Hundred Twenty-Two (4522) citizens have signed the Petitions. Based on additional information collected from persons signing these petitions, included in the total signatures are signatures of well over twenty-five percent (25%) of the registered electors based on the last district municipal elections.

The members of the Petition Group have asked me to express continuing frustration with the response by City Staff to the concerns that have been communicated about the planned use for the property that is the subject of the Applications, including, but not limited to the lack of response on the questions presented with my prior letter. The lack of response, coupled with the positions taken in the Report to Planning Commission on DA2020-0117 dated April 4, 2021 (the "Report") indicates that City Staff, acting in accordance with your direction, has failed to identify for Planning Commission significant problems that will impact the Re-Zoning of the property and the Report gives the appearance of acting as an advocate for the Re-Zoning Application, which does not fulfill Staff's obligations to the Planning Commission or to the City as a whole. Rather than restate the matters raised in my prior letter I want to point out two examples of statements in the Report regarding material information that in one example includes erroneous information, and another that fails to provide full information necessary for an informed decision. The specifics of these concerns are as follows:

Example #1. Incorrect information on a material issue.

The Report states on page 7 as follows:

"Light industrial uses are allowed in the IL district and are restricted to a maximum number of *semi*-truck trips of up to 50 per day." (Emphasis Added).

The actual language from the Definitions section of the LDC is as follows:

"Light industry also includes wholesaling, warehousing, and distribution uses that involve fewer than 50 truck trips per day."

Arvada, Colorado Code of Ordinances Sec. 11-3-3-1.

There is no "semi-truck" language in the definition. This misstatement needs to be corrected, so that the Planning Commission can decide if it supports the unique position Staff is advocating that the daily hundreds of Cargo Van trips should not be counted as "truck" trips.

Example #2. Material omission of information.

The Report states on page 11 as follows:

"A second access to Indiana Street is proposed that will align with W. 68th Avenue. The applicant will be required to pay for and construct a new traffic signal at this intersection where full movements in all directions will be allowed with the signal."

The Report fails to mention that the proposed access at 68th Avenue to Indiana Street (State Highway 72), requires an Access Permit from the State of Colorado and that the access permit has not been obtained. The Report further omits that a preliminary review of the 68th Avenue point of access by CDOT rejected signalization of the intersection, which would significantly alter the circulation and connectivity touted in the Report, as it relates to the hundreds of cargo vans that will each day be forced to turn north on Indiana. This information, along with any information about the access permit should have been included in the Report.

Based on the position taken by Staff in the Report and the positions taken by the Petition Group in the Summary enclosed herewith, there appears to be a fundamental disconnection between the City Staff and the Public over the meaning of words like "significant adverse impacts" and "minimally affect surrounding properties". The mandate from the Petition Group is to make certain that the Planning Commission is aware of this disconnection as it impacts the Re-Zoning decision, so that the Commission can make a fully informed decision about the Application.

Sincerely,

Patrick J. Tobin
Attorney at Law

CONCLUSION (With proposed findings) 14

Amazon Project Indiana
SUMMARY REPORT for Zoning Compliance
Protect Maple Valley Park on behalf of Petition Group
4/12/2021

Zoning Compliance

1. BURDEN OF PROOF FOR COMPLIANCE IS ON THE APPLICANT.

a. The City of Arvada Land Development Code (LDC) section 8-2-3-2 Burden of Proof and Persuasion states the following:

"The burden of demonstrating that an application complies with applicable review and approval criteria is on the Applicant."

b. The Applicant must demonstrate that the proposed Project Indiana (Project) meets all requirements for approval showing compliance with the City of Arvada Comprehensive Plan 2014, amended 2017 (Comp Plan) and Arvada Land Development Code 2020 (LDC). The Applicant must show that the proposed Project complies with the requested zoning classification and its limitations, and that the Applicant has performed studies to examine the Project impacts, and has provided mitigation of Project impacts.

c. It is our contention that the Applicant for Project Indiana **has not demonstrated** that the proposed Project meets the requirements for the **Industrial, Light zoning** as detailed in the Comp Plan and LDC. We will clearly show this in the following arguments.

2. RELEVANT COMP PLAN AND LDC REQUIREMENTS TO GAUGE APPLICANT'S COMPLIANCE.

a. The Applicant has not proven that Project Indiana complies with the following relevant sections from the Arvada Comprehensive Plan 2014, amended 2017 (Comp Plan) and the Arvada Land Development Code 2020 (LDC).

i. <u>RELEVANT COMP PLAN SECTIONS:</u>

1. The Comp Plan identifies the proposed Project site as potential for Office / Light Industrial / Retail developments (pages 2-4 and 2-15).

2. The Comp Plan states (page 2-28) that areas identified as **Industrial / Office are to be *"uses that minimally affect surrounding properties."***

3. It is recognized that the proposed Project site is a targeted infill development area per the Comp Plan. The Comp Plan provides very clear policy statements in regard to infill development under the goal for Community Character, Urban Design, and Historic Preservation (page 2-11). These three policy statements in this section of the Comp Plan are highly relevant to the proposed Project and City consideration of the proposed Project. The three policy statements are as follows:

    a. <u>**POLICY CC-1.2: Promote Integration Within Districts through Design.**</u> The City will promote integration and a sense of place within districts of the City through the context-sensitive design of new development.

b. **POLICY CC-1.3: Compatible Infill.** ***The City will encourage new infill development to be sensitive to the character of existing neighborhoods.*** Considerations shall include building scale, placement, size, height transitions, landscape, streetscape, and other design measures (see also Redevelopment and Infill Principles).
c. **POLICY CC-1.4: Work with Stakeholders.** ***The City will work with stakeholders, developers, and the community to consider a project's potential effects and strive for integration in a manner that helps enrich the district's character.***

4. **The Comp Plan Redevelopment and Infill Principles** (page 2-33) states the following:
   a. ***The City recognizes that redevelopment and infill could negatively impact existing neighborhoods if not carefully designed or if impacts are not reasonably mitigated.*** Therefore, this Plan includes the following principles for redevelopment and infill.
   b. ***Infill and development that occurs in or adjacent to existing developed areas should complement the character and visual qualities of the area and existing development.*** New developments should adhere to the following design principles:
      i. The overall scale, size, and setbacks of new buildings should be similar to or compatible with those found on adjacent properties. Transitions in building height may be appropriate (e.g., to provide a transition, the new building should not be more than two stories taller than an adjacent building).
      ii. ***Redevelopment and infill should preserve existing mature street trees and significant landscape features to extent possible.***
      iii. Redevelopment and infill should incorporate pedestrian friendly mixed use design principles where possible.
      iv. New landscaping materials should be mature enough to visually integrate with the new infill with the existing neighborhood within ten years.
      v. Usable parks, trails, and open space should be incorporated into infill and redevelopment projects to the extent possible.

5. Comp Plan Goals and Policies on Resource Conservation and Environment.
   a. The Comp Plan provides the goals and policies for Resource Conservation and the Environment (page 4-12). Key goals and policies pertinent to the proposed Project are as follows:
      i. **GOAL R-1:** ***Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife.***
         1. **POLICY R-1.1: Buffers and Setbacks.** ***The City will require new developments to provide buffers for creeks, water bodies, existing wetlands, riparian areas, and wildlife corridors to retain water quality and environmental integrity.***

ii. GOAL R-2: ***Promote improved water quality in stream corridors.***

1. POLICY R-2.1: Water Quality Features ***The City will require water quality features in new developments to minimize degradation of stream water quality.***

2. POLICY R-2.3: Best Management Practices for Storm water Conveyance. ***The City will protect water quality through implementation of Best Management Practices in the design of storm water conveyance and detention facilities.***

ii. RELEVANT LDC SECTIONS:

1. Article 11-3, **Definitions**, (page 11.24) of the LDC provides the following definition for **Light Industry** zoning:

   a. **"Light Industry"**
   Uses that involve research and development, assembly, remanufacturing, compounding, packaging, testing, or treatment of products, generally from previously prepared materials or components, with limited outside storage and **limited external impacts or risks** such that the use is not defined as heavy industry or heavy logistics center. Light industry also includes wholesaling, warehousing, and distribution uses that **involve fewer than 50 truck trips per day**."

   b. Sections 3-1-3-7 and 3-1-3-8 provide descriptions of permitted uses under Light Industry zoning.

2. Section 8-3-4-2A.4 of the LDC delineates Approval Criteria for the City Council for rezoning actions.

   Key LDC approval criteria pertaining to Project Indiana are as follows:

   i. The rezoning is consistent with the Arvada Comprehensive Plan, or an adopted sub-area plan, corridor plan, or urban renewal plan, or reflects conditions that have changed since the adoption of the Comprehensive Plan;

   ii. Facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire protection, and ***roads and transportation,*** as applicable) ***will, prior to development, be available to serve the subject property while maintaining adequate levels of service to existing development;***

   iii. ***The intended land use for which the rezoning is sought will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater***

management, wildlife, and vegetation, or such impacts will be substantially mitigated;

iv. The rezoning is consistent with the character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts.

3. HOW THE PROPOSED PROJECT INDIANA DOES NOT MEET THE BURDEN OF PROOF FOR LIGHT INDUSTRIAL ZONING.

The following are point by point arguments demonstrating how Project Indiana has not proven compliance for Light Industrial zoning with respect to the Comp Plan and LDC.

a. TRUCK TRAFFIC LIMITATIONS ARE EXCEEDED BY THE PROPOSED PROJECT.

i. The LDC definition clearly states Light Industry truck traffic must be **lower than 50 truck trips per day**.

ii. The City staff has on two occasions advised the applicant that the truck traffic must conform to the 50 truck trip per day limit.

1. The first was at the Pre-Application meeting of 5/22/2020 where City staff recorded the following: (SEE EXHIBIT #1)

   "The use can be defined as Light Industrial so long as daily truck trips are under 50."

2. The second was recently in the City staff comment in the Applicant's Traffic Impact Study where the following was stated:

   "In order to stay in conformance with the definition of Light Industry, truck trips must remain fewer than 50 per day."

iii. The Applicant clearly intends to have semi-truck traffic in excess of 50 truck trips per day which will violate Light Industrial zoning. This is evident for several reasons.

1. First, we pointed out in our letter to Ryan Stachelski. Community and Economic Director, dated March 30. The following:

   Amazon representatives presented information in their Delivery Station Operations slide (attached in the exhibits to this summary report) during the public meeting of 3/11/2021, which showed vehicle and employment levels for normal operation and for "holiday" operations. (SEE EXHIBIT #4)

   The Holiday operation data, which must be taken as an indication of peak truck traffic servicing the center, showed there would be 42 line haul trailers

(semi-trucks) in a 24-hour period. This equates to 84 semi-truck trips per day, **which would violate the IL Zoning limitation.**

One should note there is no discussion of seasonal variation in the definition for the increased limits for Light Industrial zoning.

2. Second, other trip generation formulas based on the square footage of the facility and the number of vans to be operated from the facility indicate that the number of daily truck trips would be consistently in excess of the 50 trip maximum for the IL Zoning.

3. Third, again as noted in our letter of March 30, 2021, given the size of the Vans that will be used to deliver from the site, regulatory consistency would appear to require that they be counted as Trucks as well. Under the LDC, a "truck" is clearly different and distinguished from a semi-truck in that the definition of "heavy industry" references trips by "semi-trailer trucks." As such a mere "truck" is something different from and less than a semi under the LDC. The statutory definition of a truck in CRS 42-1- 102(108) and the Model Traffic Code includes a cargo van, such as the vans used by Amazon. The Arvada Municipal Code has adopted the definitions contained in the Model Traffic Code for Colorado. (Arvada, Colorado Code of Ordinances Sec. 54-31).

   Please also note that City staff gave no clarification or definition of truck in the Pre-application meeting summary. (SEE EXHIBIT #1)

   Accordingly, the Applicant's vans are trucks, therefore; the level of van traffic clearly violates the limits for Light Industry zoning.

   Recent research shows that both the State of Colorado and Jefferson County consider the Amazon style vans as trucks further reinforcing the contention that the van traffic is truck traffic.

b. THERE ARE MANY OTHER INDICATIONS THAT THE APPLICANT'S OPERATION DOES NOT MEET THE LIGHT INDUSTRIAL ZONING AND ARE LISTED AS FOLLOWS:

i. During the question period of the public meeting of 3/11/2021 the Applicant stated that the center will deliver packages in a 50-mile radius from the center. This means that the center would deliver packages well outside of Arvada. The center could deliver items North, just short of Fort Collins, South to Castle Rock, West past Idaho Springs and East past Denver. Why does Arvada need to absorb the impacts of deliveries outside of Arvada?
   1. A **50-mile radius equates to a delivery area of 7,854 square miles**.
   2. This is a huge area for a center that is termed as a **"last mile"** delivery facility.
   3. The Comp Plan states that incorporated **Arvada covers about 40 square miles.**
   4. The delivery area of the center would be **196 times the area of incorporated Arvada**.

ii. Jefferson County in their referral comments dated January 26, 2021 expressed concerns that the proposed warehouse distribution center would have different traffic impacts than a traditional warehouse and requested additional information on transportation surrounding the proposed Project. **The Community, the City and Jeffco have all asked why there are so many parking spaces for the number of vans the Applicant has specified.**

iii. The Applicant intends to make a reported $30 million capital investment in the proposed Project, which is a large industrial complex consisting of the following:

1. 25 acres of asphalt parking lots for:
    a. 1,016 vans
    b. 292 auto spaces
    c. 15 semi-truck trailer docks
    d. 12 semi-trailer parking spaces
2. A large building covering 2.6 acres,
3. A fleet of at 531 Delivery Vans
4. This will be by far the largest industrial operation in the vicinity of the proposed site.
5. No other industrial operation adjacent to the proposed Project has any asphalt parking area rivaling the proposed Amazon lot.
6. The Proposed Building will also be the largest in the area.

iv. The Applicant showed during the public meeting of 3/11/2021 that the normal operation level will only be at 40 to 60% of the distribution center's capacity for 46 weeks out of the year. This makes little economic sense as why would you leave 40 to 60% of your investment capital idle for 88% of the year. (SEE EXHIBIT #4)

Given the huge 50 mile radius targeted for distribution, it is highly likely that the Applicant intends to broaden the distribution to fully utilize the centers capacity. This in turn will require a ramp up of semi-truck trailer deliveries to the range 30 to 42 trailers per day which equates to 60 to 84 heavy truck trips per day, again pushing the operation into a Heavy Logistics zoning classification.

v. All of the preceding clearly indicates that the proposed Project more clearly fits a Heavy Logistics operation than a Light Industrial operation.

vi. Also to note is that a similar Amazon distribution center recently built in Loveland, Colorado was given a Heavy Logistics zoning classification. The Loveland Amazon facility is located in an industrial area near I-25 with no surrounding residential uses. (SEE EXHIBIT #8)

c. **OMISSION OF PROOF OF MINIMAL IMPACTS ON SURROUNDING PROPERTIES.**

i. The Project Indiana Applicant in their annexation petition acknowledges that the development must minimally affect surrounding properties.

Section 3A, of the petition referring to section 2-8 of the Comp Plan clearly illustrates that the Applicant knows that the Project must minimally affect surrounding properties. The following is taken from the Applicant's annexation petition:

> **"The Comp Plan designates the Scannell Property as "Industrial/Office/Retail." Areas designated as such are intended to "encourage development of industrial and office uses that will minimally affect surrounding properties." (Page 4.)**

It is also very clear that the Project Indiana Applicant believes that the proposed Project will not result in significant adverse impacts on the natural environment. This is shown in the following excerpt from section II. 2. D. page 7 from the annexation petition:

> **"the intended land use for the Scannell Property will not result in significant adverse impacts upon the natural environment, or such impacts will be substantially mitigated pursuant to Section 8-3-4-2A.4 of the Code."**

Section 8-3-4-2A.4 of the Code is as follows:

> "4. *The intended land use for which the rezoning is sought will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, or such impacts will be substantially mitigated; and"*

Recognizing that the Project must not have significant impacts on the natural environment and that the Project must substantially mitigate such impacts is a good idea, however, our reviews of Project Indiana show that the Applicant has not performed all the studies to investigate impacts of the Project to prove there are no such impacts.

The few impacts that have been addressed were mitigations prescribed by code and were always adjusted just to be under code maximum allowable levels. This is highly evident in the lighting plan where 69 twenty-two foot high light poles are specified with lamps just under the allowable lumen levels. The Applicant has not studied the cumulative light impact nor the nighttime visual impact to the various adjacent neighborhoods and riparian habitat in the open space.

The Applicant has chosen to cite compliance requirements for impacts to the natural environment. He has completely ignored requirements to address **impacts to neighborhoods surrounding the proposed Project site** as required by the article of code immediately following the Section 8-3-4-2A.4 which is shown as follows:

> "5. **The rezoning is consistent with the character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts."**

The Applicant seems to have omitted any proof or studies that illustrates that this Project will minimally affect surrounding properties. Only after significant public

inquiries and questions has the Applicant shown any consideration for addressing impacts of the Project on the surrounding area neighborhoods. At the public meeting of 3/11/21 the Applicant showed some mitigation aspects by showing a screen wall partially along the property's northern perimeter and some buffer yard space. However, no details were provided or explained during the meeting.

The Applicant has not studied or substantially mitigated the impacts to the neighborhoods and other developments near the proposed Project.

For example, the Applicant has not studied the traffic impacts to the Maple Valley, Westwoods Mesa, Geos, Ralston Estates, and Hill Crest communities. Other neighborhoods such as Wyndham and Wildflower will also be impacted and should be studied. You could argue that all the residential along 64th Ave, 72nd Ave, Ward Road and McIntryre will likely have substantial impacts from traffic and that should be studied. It should be noted that the traffic study for the Project was crafted for a specific purpose and is misleading. The Applicant's traffic study has not properly studied the impact of the proposed Project on the area road system. The maximum traffic level for the Project as shown recently in the public meeting has not been examined.

The TIS did not address the 5 items discussed with city staff at the Pre-Development meeting of 5/22/2020.

1. Study **does not use peak traffic flow or hours per the Holiday Operation schedule presented at the 3/11/21** public meeting and shows traffic flow for a low level of center operation.
2. The traffic flow does not appear to include trips for van fueling or servicing. The applicant declined to answer the question about vehicle fueling and servicing at the public meeting.
3. The traffic flow did not include truck trips for trash trucks or other types of heavy service vehicles.
4. The study traffic count data was taken in the summer during the pandemic and does not represent the pre-pandemic traffic flow and excludes school and work traffic. Additionally, the study did not examine traffic flow variation for whole days or by day of week.
5. The study did not examine the traffic flow or impacts at the intersections of 69th and Indiana or Fig and Eldridge or the impacts to the residential areas and businesses served by the intersections.
6. The study does not meet CDOT standards for a traffic study to support state highway access permits.
7. The study assumes a 1.1 % traffic growth rate for Indiana. Arvada demographics indicate west Arvada population growth has averaged 1.6 to 2.6% from 2010 to 2018 so a 1.1% traffic growth rate projection does not seem plausible.
8. The study does not account for Amazon Flex traffic. The Applicant stated "routes" not "drivers". Each route can have multiple drivers.

(SEE EXHIBIT #5)

The Applicant has not performed any noise, light, air, or water impact studies for the neighborhoods or Maple Valley Park and the Ralston Creek. We obtained permitting documents for Amazon's Broomfield project. It was noted in those documents that they performed noise level evaluations for that project. **We feel noise and light studies for this use are warranted given the close proximity to the open space and residential. See example in EXHIBIT #7 for reasoning why a light study is needed.**

d. THE APPLICANT'S PROJECT HAS FAILED TO DEMONSTRATE "NO IMPACT" ON THE WATER QUALITY OF RALSTON CREEK OR THE INTEGRITY OF MAPLE VALLEY PARK AS A NATURAL AREA:

i. The comp plan (page 4-12) articulates two very important goals and requirements for new developments.
   1. The first is to minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife.
   2. The second is to promote improved water quality in stream corridors.

ii. The policy statements for each of the goals clearly state requirements for addressing these goals as follows:
   1. ***The City will require new developments to provide buffers for creeks, water bodies, existing wetlands, riparian areas, and wildlife corridors to retain water quality and environmental integrity.***
   2. ***The City will require water quality features in new developments to minimize degradation of stream water quality.***
   3. ***The City will protect water quality through implementation of Best Management Practices in the design of storm water conveyance and detention facilities.***

iii. **These Comp Plan policy statements above clearly state the buffer requirements as it would relate to Maple Valley Park and the Ralston Creek**, yet the Applicant has stated in its Annexation and Zoning letter to the City of Arvada, **"the industrial uses on the Scannell Property will not impact residential uses located to the north and east of the Scannell Property because the Park Property acts as a buffer between the Project and the residential homes to the north of the Scannell Property, and the undeveloped area to the east of Fig Street acts as a buffer between the Project and the residential homes to the east of the Scannell Property."** – Carolynne White, Attorney, letter dated December 11, 2020

iv. The Applicant, by proposing Maple Valley Park act as the buffer implies the Park Property and Ralston Creek will incur the impacts of the Project Indiana development which is an UNACCEPTABLE USE of an open space park. To reiterate the City's own policy in the three statements above, **this development is required to buffer the park and the creek. The Developer must use its own property to create a sufficient buffer to mitigate its impacts to Maple Valley Park and to residents to the north and east.**

v. To further demonstrate why Maple Valley Park should not be used as the buffer for the Project Indiana development, we would like to note the following:

Amazon Project Indiana
SUMMARY REPORT for Zoning Compliance
Protect Maple Valley Park on behalf of Petition Group
4/12/2021

1. Maple Valley Park is an environmental resource that the City says must be preserved, protected, and improved.
    a. It is a Neighborhood Park, considered the "backbone of Arvada's park system." (*Parks, Trails, Open Space 2016 Master Plan*, p. 37)
    b. It is part of the Ralston Creek Green Spine Trail, a regional trail, and an important wildlife corridor (Maps 3 and 20)
    c. It is included in the City's vision to focus "attention on improving the ecological health of our open space network and waterways to benefit wildlife habitat and outdoor recreation destinations." (*Master Plan Vision*, p. 4)

2. Maple Valley Park as Open Space performs Critical Functions in Arvada's Urban Environment (see *Maple Valley Park Ecological Assessment*, CNHP, Feb. 2021).
    a. It provides important floodplain and riparian habitats that are home to numerous species of plants and animals.
    b. Large old, cottonwoods and thick undergrowth provide high quality habitat for nesting raptors (hawks and owls), songbirds, and various species of mammals.
    c. High quality native forbs, shrubs, and wetland species along Ralston Creek create a unique plant community that compares favorably to nearby wetland and riparian areas in the Denver area.
    d. All features combine to attract bird groups, photographers, and others who highly value its natural resources.

3. The inappropriate use by Project Indiana of Maple Valley Park as a buffer, will cause the Park to suffer these disproportionate impacts:
    a. Construction Impacts: Blown dust and dirt, blown trash, construction noise, removal of hundreds of trees, air pollution from diesel machinery, uncontrolled runoff, construction traffic.
    b. 24/7 Operational Impacts: Anthropogenic sources of light, noise, and air pollution, employee and truck traffic in and out of the facility, stormwater runoff, blown trash.
    c. Unmitigated impacts will result in further degradation of Ralston Creek due to runoff from impervious surfaces; adverse effects on nesting raptors and songbirds, and especially nocturnal species; decline in food sources for wildlife, including insect populations.

vi. The proposed Project drains 25 acres of asphalt parking lot surface and 2.6 acres of building roof surface to a stormwater detention pond. The discharge of the detention pond eventually discharges into Ralston Creek.

1. The proposed parking lots have the capability to park about 1,400 vehicles which may leak various organic fluids or grease such as gasoline, motor oil, antifreeze coolant, and lubricating grease. Some of these fluids may contain soluble heavy metals such as copper, lead, and zinc.
2. Vehicles may also deposit solids and road salts onto the parking lot surface.
3. During a storm event any contaminants on the parking lot surfaces will be flushed to the detention pond.

4. During the public meeting of 3/11/2021 the Applicant's detention pond engineer stated they will treat water prior to discharge.
    a. He stated the treatment included in the proposed design is for settling of solids only.
    b. There is no treatment for any of the oil and grease or VOC (volatile organic compounds, ie. Gasoline) nor for salts.
    c. The Applicant's engineer responded to a question about the treatment system being able to remove heavy metals to which he stated yes. This answer is only true if the heavy metals are present as a solid.
    d. The sedimentation treatment system shown will **NOT** remove soluble heavy metals in the water.
    e. There is a very real potential that human sanitary waste (both as urine and fecal matter) will be deposited in containers on the parking lot surface by delivery drivers which could make its way to the detention pond. (We note this in the attached exhibits showing recent national news coverage of this problem. Additionally, we have photos from a Denver area Amazon parking lot showing bottles suspected to be filled with urine along the parking lot curb where trucks line up to unload. (SEE EXHIBITS #6, 6a1, 6a2, 6a3)

5. The facility will need a Colorado Stormwater Permit. **We asked the status of this permit during the public meeting of 3/11/2021 but have not received an answer.**

6. **Jefferson County** in their referral comments of January 26, 2021 stated the following:

    "Water quality standards will need to be implemented with the detention. This is especially important due to the large amount of parking proposed for the site."

7. **City staff** asked a similar question about the parking lot size in their review of the project.
8. We DO NOT believe that the Applicant is providing an adequate water treatment system to treat the stormwater for the oil and grease, VOCs, and other potential constituents. The Applicant has not addressed how they will prevent human waste from entering the stormwater detention system nor how they intend to treat such waste.
9. The Applicant has not addressed solid waste in the parking lot and has stated they will not have outside trash receptacles or bins. This also presents a water quality issue as trash will blow into the detention pond and offsite also. Denver area Amazon parking lots seem to have issues with waste as evidenced by the photo exhibit. (SEE EXHIBIT #3, 3a1)
10. The Applicant has also not developed a snow removal and stacking plan. A plan is necessary to ensure snow melt water flows to the detention pond for treatment and not offsite.
11. We have not yet received a composite map and we have asked the Applicant and City staff for this overlay map on several occasions. The overlay map should include the following: Project site plan, floodplain, wetlands, Ralston

Creek, contours, detention pond, and Hathaway access road. A composite of these layers is crucial for the stormwater analyses which will give a better understanding of the potential impacts.

e. COMP PLAN POLICY CC-1.4 WORK WITH STAKEHOLDERS STATES:

"The City will work with stakeholders, developers, and the community to consider a project's potential effects and strive for integration in a manner that helps enrich the district's character."

From our perspective the community's concerns with the development of Project Indiana have yet to be addressed by the Applicant. The proposed development is unprecedented in size and nature for West Arvada. City staff and the Applicant have not adequately addressed some important questions citizens have asked.

We have repeatedly asked for information regarding the nature of the proposed operations, including size of operation, number of employees, hours of operation, traffic volumes, where will employees come from as well as impact studies in order to ascertain whether the Project conforms to the requested zoning and that the impacts of the Project are mitigated.

The following lists some of our concerns about the proposed Project Indiana and as a major stakeholder, the Community's input should be considered.

i. Concerns raised by the Public that have not been addressed.

The first meeting was held on November 18, 2020. This meeting was held as required by the LDC. **The public attendees at the first meeting expressed the same concerns as we currently are expressing.** (SEE EXHIBIT #2)

These included:

- A question and concern about traffic volume and timing which was vaguely answered by saying that the majority of traffic will be directed to Indiana and using 68th and 66th avenues and truck traffic would be at night and vans in the day. No traffic volumes were stated. The Applicant said the traffic pattern could not be altered but no reason why.
- The effect of bright parking lot lighting on residences and on wildlife was questioned. The Applicant stated they would be designed to a safe level using City standards. The Applicant said a photometric analysis would be provided as part of their application. **This analysis has not been provided to date.**
- Concerns about wildlife were expressed but it was stated a study was performed that showed no concerns.
- A concern about noise was expressed and it was stated that the building was placed south on the parcel and parking lot noise should be minimal.
- The concern about the large parking lot was expressed, with the answer being it cannot be altered but no rationale why it could not be altered was given.
- The concern about stormwater affecting Ralston Creek was expressed. The answer was that a detention pond and storm water quality treatment measures

will be included to clean pollutants out. No explanation was given on the type of water treatment to be included.

- **It should be noted that Amazon as the end user was not mentioned during the meeting.**

The second neighborhood meeting was held on March 11, 2021 to address growing community concerns about the Project.

It was clear that the Applicant did not want to answer questions in any detail regarding how the distribution center operates, how the site parking functions, the traffic study, what is the minimum, average and maximum traffic levels required for center operations, and impacts on the surrounding residential areas.

The questions not answered were intended to determine if the requested zoning is appropriate, if the traffic impact study is valid, and how residential area impacts are being addressed.

There clearly was a lack of transparency by Amazon in answering questions and in providing information to the public.

The information on the "Delivery Station Operations Overview" did demonstratively show that Amazon intends to operate the distribution center at a higher level than the Light Industrial zoning will allow. The Holiday operations show 42 line haulers which are semi-trucks. This equates to 84 heavy truck trips per day and greatly exceeds the less than 50 truck trip limit for Light Industrial zoning.
(SEE EXHIBIT #4)

It is evident and further demonstrated at the 3/11 public meeting that the Applicant has not met the burden of proof required by the City of Arvada Land Development Code and Zoning regulations proving that the proposed Project meets the zoning requirements and is compliant with the City of Arvada Comprehensive Plan.

City staff has not addressed our concerns about the unanswered questions from public meetings per our letter to Ryan Stachelski, dated March 30, 2021.

The Applicant recently published their written summary of the 3/11/2021 public meeting. Their summary showed only 26 questions asked. These were highly filtered versions of what was actually submitted in the chat box during the meeting. There were well over 100 questions submitted by the community and only 26 were answered. The Applicant may assert that there were duplicate questions and they consolidated the list but we can attest that very specific, valid questions were posed and not answered in any way.

ii. Other Examples of not Working with the Community

The following are additional examples of not considering the community:

Amazon Project Indiana
SUMMARY REPORT for Zoning Compliance
Protect Maple Valley Park on behalf of Petition Group
4/12/2021

1. Proposed Changes to the 69th & Indiana Intersection
   We have noted that there are proposed changes to the intersection at 69th and Indiana. This change, which would severely restrict traffic turning movements for Maple Valley, Westwoods Mesa, and GEOs residents will force more traffic through those neighborhoods.

   We do not understand why this is part of Project Indiana. The Project Indiana traffic study did not even examine this intersection. These changes have not been discussed with the community.

2. **Unanswered Question on Intentions for Vehicle Fueling, Servicing, Washing, and Repair Facilities**

   We have repeatedly asked questions concerning the Developer/Amazon's intentions to add fueling, vehicle servicing, vehicle washing, and vehicle repair which are strongly mentioned in the Annexation petition. Jefferson County also questioned the Developer's intentions for these facilities.

   We have not received any answers from City staff nor the Developer on these facilities.

   These facilities obviously will cause more traffic flow to the site, will require more land and asphalt surfacing and can place the request for Light Industry zoning in jeopardy.

   The public has a right to know the intentions of the Developer for these facilities and do not understand why the City has not addressed this and factored these into the Application for zoning classification.

Conclusions:

The Project Indiana Annexation and Zoning Application as it is being presented to the Planning Commission does not conform to the Light Industrial zoning standards as they exist in the Arvada LDC and as they have been previously applied by the City. The attempt to present obvious noncompliance with Zoning definitions as matters to be dealt with in future deliberations relating to Site Plan mitigation has the effect of removing direct oversight by the public, acting through the Planning Commission. Any Motion for approval of the Application should be tabled, until such time as all of the issues identified in the forgoing discussion are addressed.

If a Motion for approval is not tabled because of the incomplete information, we would urge the Commission to identify the following findings of fact as the basis for denial of the Rezoning:

Amazon Project Indiana
SUMMARY REPORT for Zoning Compliance
Protect Maple Valley Park on behalf of Petition Group
4/12/2021

1. Undisputed traffic information indicates that Truck traffic for the project is in excess of the limits imposed by *Arvada, Colorado Code of Ordinances Sec. 11-3-3-1.*

2. The Applicant has not satisfied the burden of proof, as required by code, that the activity at the site will comply with 8-3-4-2A.4 (code articles 1, 3, 4, 5) of the LDC due to its significant adverse impacts on the natural environment and the impacts to neighborhoods surrounding the proposed project site.

3. The Rezoning is not consistent with the Arvada Comprehensive Plan because the use proposed will have significant adverse effects on surrounding properties.

EXHIBITS:

The following is a list of exhibits attached to the Protect Maple Valley Park Planning Commission Summary on 4/12/2021.

Pre-Application Summary

DATE: 5/22/2020

PROJECT: Project Indiana

PROJECT PLANNER: Jeremiah Bebo

PROJECT NUMBER: PA2020-0067

Dear Applicant,

I would like to take this opportunity to thank you for considering the City of Arvada for your project.

As your assigned Project Planner, I remain available as a resource as you initiate the review process in the city. Attached to this letter are the formal staff comments from your Pre-Application Meeting with the Development Review Team. The comments reflect information provided on your submittal materials as well as the discussion within the meeting and are meant to provide general direction to you in the preparation of the actual submittals. Additional comments may be provided following the first review of your formal submittal, based upon the more detailed documents provided with your application. If the plans change significantly for the project, another pre-application meeting would be advised.

If you have any questions or require additional information, please do not hesitate to contact me.

Thank you.
Jeremiah Bebo

ENG-DEVEL-PREAPP-Emiley Yoshihara-(720)-898-7676- eyoshihara@arvada.org

1. Water: There is a 10" PVC water main that runs east-west through the property. It aligns well with the proposed drive. A 20' easement will need to be dedicated over this water main via plat.
2. Sanitary: There is an 8" PVC sanitary main that runs north-south through the property. This main will need to be realigned around the proposed building. A 20' easement will need to be dedicated over the sanitary main via plat.
3. Storm: Water quality and detention will be required for this project. Water quality will need to meet the MS4 requirements. A Site Disturbance Permit will be required prior to any early grading or clearing on the site. Water quality and detention should be located outside the 100-year floodplain.
4. Floodplain/way: A section of the property is located within the floodplain and floodway. Any work in this area would require a CLOMR/LOMR and Arvada Floodplain permit.
5. Access Drives: City staff would like to see a more detailed description on truck and van routes to further analyze the proposed access points. It is preferred that the access points along Indiana St align with those across the street. CDOT approval will be required.
6. The City would like to limit access north on Eldridge St and east on W 68th Ave through the existing neighborhoods. The City is open to exploring installing a cul-de-sac with fire-only access to the intersection of Eldridge and W 68th in order to prevent cut-through traffic. See the attached sketch.
7. Traffic: A referral will be sent out to CDOT for access drives and public improvements. City staff will make recommendations to CDOT in regards to the access points, public improvements and any accel, decel lanes if recommended in the traffic study.
8. Impact Fees: There will be impact fees due at the time of construction for Indiana St. signal improvement. There will also be impact fees for W. 67th Ave and Eldridge that will be due at the time of construction.
9. ROW dedication will be required to match properties to the north and south along Indiana. That is 60' off of the centerline of the road. Indiana will also need to be improved (asphalt width, curb, gutter & detatched walk) for the length of the site.
10. A traffic study prepared by a traffic consultant will need to be provided -- please submit a base assumptions form prior to preparing the study. The base assumption form and required checklist have been attached and need to be included in the study. This study will be a crucial piece to analyze access points and traffic flow.
11. W 67th Ave: There are existing utilities stubbed out into the three lots to the north of W. 67th Ave. If those lots are to be included in this project, those utilities will need to be removed and capped at the main and then W. 67th Ave will need to be milled and overlaid.
12. LOC & Cash Escrow: The required LOC or cash escrow due at the time of construction will be 100% of the engineering estimates cost for the public improvements. This will be held until initial warranty, 20% of the certified construction costs will be held through the 2-year warranty period.
13. Access to existing house to the north will need to be provided with this project.

Comprehensive Plan Future Land Use map designation: Industrial/Office/Retail and Neighborhood/Community Commercial on other parcels. The use can be defined as Light Industrial so long as daily truck trips are under 50. A portion of the site is zoned CG, other portions zoned IL (Parkway Center lots), remainder of the site will need to be annexed into the City. Annexed portions and CG portions will need to be rezoned to IL. A Comprehensive Plan Amendment to Industrial/Office will be needed for the Commercial portions. Annexation Impact Report required with Jefferson County review. Annexation will need to include Maple Valley Park. This Annexation Map and all legal descriptions related to the park will need to be separate documents from the warehouse properties.Tree mitigation on north portion of property may be be planted on Maple Valley as well to aid in screening. Tree mitigation can also be applied on-site for landscaping and buffer requirements as well as fees in-lieu. Site sits 10-20 feet higher than residences to the north. Attention should be made to provide as much screening from that neighborhood as possible. A bufferyard will be required along the property line that is shared with the single-family residence at 6220 Indiana, see 4-6-5-3 for those options. Likewise, a fence or wall option should be considered along the property line with the parl. Access for 6220 Indiana Parkway Center is impacted and will need to be accommodated. Impact fees for Lots 1-4A for W. 67th Ave and Eldridge improvements totaling $157,037.79 will have to be paid prior to building permit. Routing trucks and van deliveries north on Fig will be problematic for neighbors. It is in the applicant's best interest to avoid this route for public support. See the Arvada Land Development Code (LDC) for all zoning standards. Section 2-1-6-2 for IL standards which include: maximum lot coverage of 50 percent, setbacks (front: 20 feet, side and rear 5 feet). Maximum building height of 40 feet. 35% maximum outdoor storage allowance. LDC 3-1-3-8-B: vehicle repairs must be conducted within an enclosed building. 3-1-3-7-5-A provides allowances for customers to pick up their orders. Such area shall be located within the principal warehouse building. See 4-5-2-2 for parking standards. Parking to be provided at 1.75 spaces per 1,000 GFA for warehousing portion and 3 per 1,000 GFA for office portion and 5 per 1,000 for retail; also see 4-5-3 for Parking and Loading Design. Parking shall not be located in a front setback; the associate parking does not appear to meet this from W 66th Place or Holman St as shown. Please provide a detailed parking plan demonstrating the need for over 1,300 parking spaces which is over the City requirements. See 5-1-2 for Building Design. 5-1-2-3 applies to all buildings and include requirements for: main entrances to face the street, massing, 360 degree architecture. The façade facing the street shall be comprised of at least 20% with windows. Maximum length of a continuous roof ridgeline is 35 feet. Incorporate horizontal and vertical articulation. See 5-1-2-6 for design standards that apply to all Nonresidential Buildings. 5-1-2-6-E-2 for articulation of industrial buildings. See 5-1-2-8 for design standards specifically for Industrial Buildings. The front façade and side walls within 40 feet of the front shall be of masonry. Flat roofs shall include a parapet. A Minor Subdivision will be required. At least one neighborhood meeting will be required. Annexation, rezoning, and comprehensive plan amendment will require public hearings in front of the Planning Commission and City Council. Site Plan and Minor Subdivision can be reviewed administratively. Applications may run concurrently. Please work with me to begin the neighborhood meeting process. We may have to explore virtual options to abide by social distancing rules and regulations. An Open House format is preferred for this project. Please make sure to reach out to CDOT to discuss your proposal with them as well as the Civil Drawings for the improvements to Indiana will be referred out to them for review which can take additional time outside of the City's review cycle. The City believes that Colorado State Statues may allow us the ability to annex in the property without the written consent of the property at 6700 Indiana provided owners over 50% of the land to be annexed sign the annexation petition.

A Tree Preservation and Replacement plan must be completed by a licensed Arborist. The required mitigation in tree caliper inches will be compared to the proposed landscape plan and credits, or replacement inches will be applied to additional tree plantings in nearby Maple Valley Park or fees in lieu applied to the project. Include a detached pedestrian walkway along Indiana in the plans. If possible connect this walkway north to the existing Ralston Creek Trail underpass under Indiana Street.

PLN LANDSCAPE-PREAPP-Shane Greenburg-- sgreenburg@arvada.org

– Final plans must be stamped by a Colorado registered landscape architect.</p>– 15% Minimum landscape area - area includes vegetated areas plus non-vehicular hardscaped areas intended for pedestrian or recreational uses </p>– Meet requirements in 4-3-2-2 Common Open Spaces. Providing employee access to the Ralston Creek Trail is preferred.</p>– Follow requirements in LDC 4-6-6-1 Street Trees.</p>– Follow requirements in LDC 4-6-6-4 Foundation Plantings </p>– Follow requirements in LDC 4-6-6-3 Parking Area Landscaping. Pay special attention to buffering on the north side of the parking lot with a berm and/or dense vegetation to limit headlight glare into the park and residential neighborhoods.</p>– All remaining landscape areas to follow requirements in LDC 4-6-6-5 General Landscape Areas.</p>– Follow requirements in LDC 4-6 -4-3 Size and Quality of Landscape Plants.</p> – Follow requirements in LDC 4-6-7-1 Water-Wise Requirements. Pay special attention to D.Soil Amendments and F.Irrigation as landscape notes are required on the plans.</p>– All buildings must be ADA accessible from public rights-of-way and parking areas.</p>– On all vehicular entrances, follow requirements found in 4-4-3-3 Intersection Visibility. No plants over 2 feet tall at maturity should be within the site triangle. Trees may be allowed if trimmed up nine feet and the city staff believes the placement will not impeded visibility.</p>

Kimley»Horn

MEMORANDUM

To: Jeremiah Bebo, City of Arvada

From: Stephen Litsas, PE

Kimley-Horn and Associates, Inc.

Date: November 18, 2020

Subject: Project Indiana Annexation – Neighborhood Meeting Summary

---

A neighborhood meeting was held on November 18, 2020 at 6 pm, to discuss the annexation submission with the public. This annexation meeting included two annexations within the same discussion: DA2020-0117 (Project Indiana) and DA2020-0118 (Maple Valley Park). Due to the on-going COVID situation, this meeting was held via Microsoft Teams. Members of the public were provided a link to log in prior to the meeting and were able to ask questions via the platform. No known technical issues were reported by any of the attendees.

A link to the full recording of the meeting can be found here:
https://web.microsoftstream.com/video/786024da-00fd-406d-8967-ac2d0b5c5da9

The meeting first discussed the annexation process for both the Project Site and the Park. It then followed into a high-level proposal of the future site development submission. It was noted that this application was not for the site development; however, to be transparent to the public of the intended annexation this was discussed. The site development discussion included a conceptual site layout, conceptual building elevations, traffic management, and high-level discussions of how the facility would operate.

The following issues were raised by the public:

1. Public: The timing of the extension of Eldridge St.
    a. City Response: The extension of Eldridge St will occur as future properties along Eldridge St develop.
    b. Follow-Up: This annexation has no impact on that. No further follow-up was required for this as part of this application.
2. Public: Questions related to traffic, including volume and timing.
    a. Applicant Response: It was clarified that a majority of van traffic would be directed towards Indiana St, with most entering Indiana St at 68th Ave and most trucks entering Indiana St at 66th Ave. It was discussed that the facility operates 24 hours a day, with truck traffic occurring during the nighttime, and van traffic happening during the daytime.

   b. Follow-Up: This response was accepted by the members of the public, and the traffic pattern could not otherwise be altered.
3. Public: Concerns with the parking lot being too bright for residences or impacting wildlife in the Park.
   a. Applicant Response: The lighting level in the parking lot is designed to a "safe level" using the City's standard, not as a bright as a standard retail parking lot. In addition, the site will use cutoff lenses that allow light to be controlled to only fall on the site.
   b. Follow-Up: The Applicant will provide a photometric analysis as part of the Site Plan application that shows lighting levels do not spill onto the neighboring residential properties.
4. Public: Concerns that the floodplain for Ralston Creek will be negatively impacted.
   a. Applicant Response: The site is intentionally staying out of the floodplain, and there will be no impacts to the floodplain.
   b. Follow-Up: This response was considered adequate by the questioner, and no follow-up is required.
5. Public: Concerns on wildlife impacts, and if there have been studies done on the wildlife in the park. Including the noise as it impacts the wildlife.
   a. Applicant Response: An environment due diligence was undertaken for the site, including a critical species, and it came back with no concerns. In terms of noise, the building was put as far south as possible on the site, and the trucks were concentrated in the existing industrial parts of the site. The parking lot adjacent to the Park operates like a standard parking lot, and the noise should be minimal.
   b. Follow-Up: The environmental study was submitted as part of the annexation and is public. No further follow-up required by the applicant as part of the annexation.
6. Public: Concerns on the amount of parking:
   a. Applicant Response: It is for the function of the facility, to park the fleet of vans.
   b. Follow-Up: This amount of parking is critical for the operation of the facility, and cannot be altered.
7. Public: Concerns with stormwater drainage / runoff negatively impacting Maple Valley Park
   a. Applicant Response: The facility will include detention and stormwater quality treatment measures in accordance with City of Arvada standards. This will clean pollutants out of the water prior to it discharging to Maple Valley Park.
   b. Follow-Up: This was accepted by the questioner.

2021 DRIVER GUIDE: HOW MUCH DO AMAZON FLEX DRIVERS MAKE?

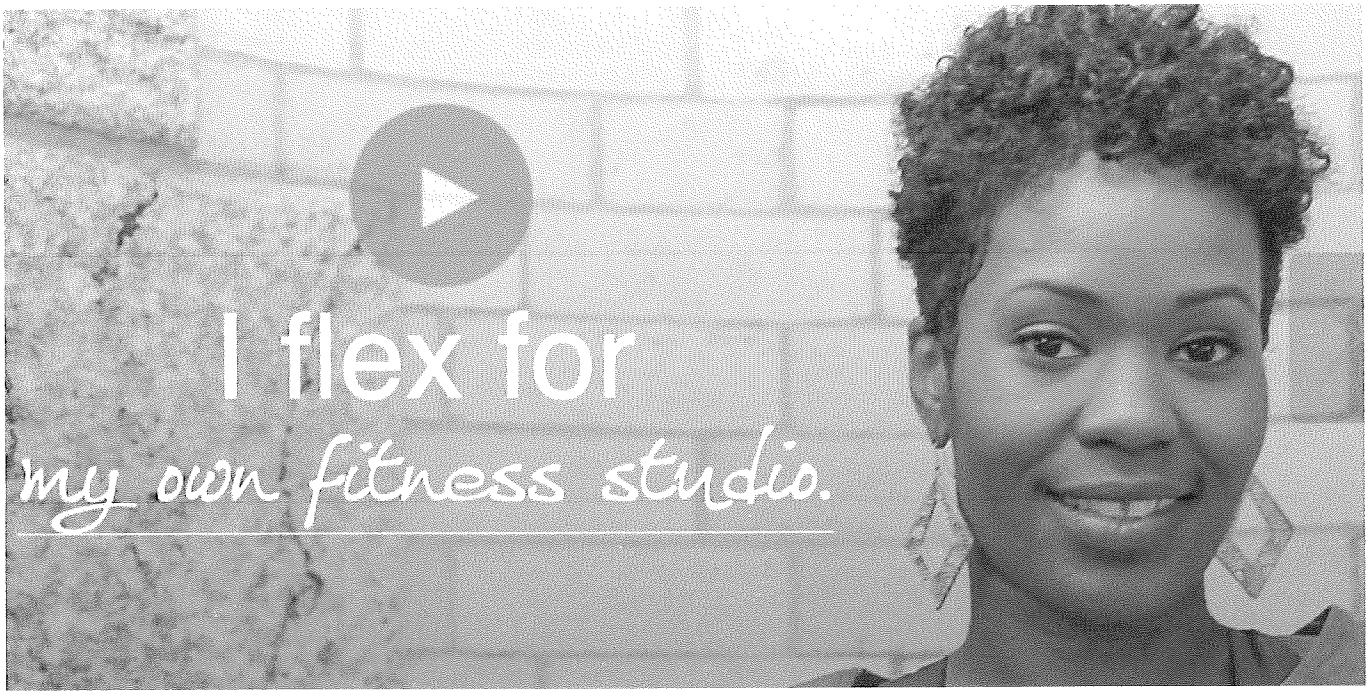
By: Brett Helling | Updated: January 12, 2021

Our website is supported by our users. We sometimes earn affiliate links when you click through the affiliate links on our website. Learn more.

When you hunt for the perfect side hustle, potential earnings are a big factor in your decision to apply or look for other options.

No matter how great driving for Amazon may sound, you need to make good use of your time if you want to meet your financial goals. So how much do Amazon Flex drivers make, and how will you actually need to spend to keep your career going?

Founded in 2015, Amazon Flex is a delivery program that connects drivers to opportunities to earn on their own schedule, using their own vehicles and smartphones.



Drivers in the program support Amazon by completing last-mile deliveries for the company's services, including Amazon Fresh, Prime Now, and Amazon.com — and there's no experience needed.

But before you take advantage of this easy gig, you need to make sure it's worth taking advantage of. This guide will give you an in-depth look at how Amazon Flex driver payments work.

Jump to:

- Amazon Flex Payment Structure
- How Much Do Amazon Flex Drivers Make?
- How Are Amazon Flex Drivers Paid?
- Amazon Flex Driver Expenses
- Frequently Asked Questions

What Is Amazon Flex?

We've covered Amazon Flex at length in our guide to Amazon delivery jobs. But if you're not familiar with the service, here's a brief overview of how it works for drivers.

Eastwoc

Eastwood is n
tools and solu

Eastwood

As we alluded to in the introduction, Amazon Flex is what enables Amazon to offer free two-hour delivery service, restaurant delivery and Sunday delivery of packages (to name just a few). Amazon Flex drivers make this possible, completing the following types of deliveries:

- **Prime** – These are regular Amazon package deliveries. While Amazon makes many of these deliveries via USPS or UPS, using contractors allows the company to increase delivery times or offer delivery on Sundays.

- **Prime Now** – Available in select markets, Prime Now is a service that allows Amazon Prime customers to receive two-hour delivery on household essentials, everyday items and select Amazon products.
- **Amazon Locker** – Drivers deliver packages to Amazon Lockers, which are like P.O. boxes that Amazon operates in order to provide alternative pickup locations for customers.
- **Merchant Pickups** – Instead of picking up the package from an Amazon station, you pick it up directly from a merchant. This is how Amazon can offer services such as AmazonFresh, as well as deliveries from local small businesses and other brick and mortar Amazon partner stores.
- **Restaurant** – These are food orders from restaurants as part of the Amazon Restaurants service.

Amazon Flex drivers deliver for all of these services, setting their own schedules based on pre-selected delivery blocks using the Amazon Flex app.

Qualifying is easy: You just need to meet the Flex requirements, pass a background check, have a smartphone that can run the app and have a vehicle you can use to make deliveries.

Americ

Find Out If So
How Much Yo

Solar-Estimat

Amazon Flex Payment Structure

Amazon Flex drivers are paid a flat sum for every shift — known as a delivery block — they accept and complete. Most available blocks typically last between two and six hours from

the time of your arrival to the pick-up location to the time of your final package drop-off.

Before you accept any delivery block, you'll always see your guaranteed earnings as well as an estimate of how long it will take to complete the relevant deliveries. This way, you'll be able to calculate how much you'll earn per hour before you commit.

For example, if a two-hour block offers a $36 guarantee, you'll know that you'll earn $18 per hour once you complete your shift.

As long as all your packages are successfully delivered (or returned to a delivery station as needed), you'll soon receive the exact earnings that were offered for your delivery block. This makes Amazon Flex's payment structure far more transparent than those of rideshare companies like Uber and Lyft, which take at least 20% commission from rides that are offered with unclear trip totals.

If you complete Prime Now deliveries, you'll also get the chance to get customer tips on top of your guaranteed earnings. Delivery partners receive 100% of the tips customers provide.

Mileage reimbursement is not included in the payment structure for any Amazon Flex delivery blocks, so keep this in mind as you calculate your real earnings for each trip.

How Much Do Amazon Flex Drivers Make?

So now, to the part you've been waiting for: the money. How much do Amazon Flex drivers make?

The base pay rate for Amazon Flex drivers is $18 per hour (higher in select markets). From there, hourly pay can climb as high as $25 per hour due to factors that increase the difficulty of the delivery. Possible factors include high demand, inclement weather or the holiday rush.

America's #1 Sol Calculator

Find Out If Solar Is Worth
Should Pay, And How Muc
Each Month

If you're delivering for Prime Now, you'll also have the chance to earn tips. Customers aren't required to give tips, but you can increase your chances of receiving them by providing prompt, professional customer service.

You'll be able to see the hourly rate for a given schedule block before you select it, so there will be no ambiguity about how much you'll be making on a shift. That being said, the precise amount you make per week or month will depend on how many shifts you're willing to work, as well as how many Amazon will give you.

To ensure that your work remains part-time, Amazon caps the maximum number of hours you can work as follows:

- Max per day — 7 hours
- Max per week — 29 hours
- Max per 30 days — 116 hours

This is because, as an Amazon Flex driver, you are a self-employed, independent contractor. Your are *not* an Amazon employee. If Amazon were to regularly give drivers 40-hour weeks, this could open them up to lawsuits demanding Amazon delivery drivers be treated as employees (and given the benefits that come with employee status). Amazon doesn't want this, so they put the above caps in place (and phrase driver job titles carefully).

Note, however, that these caps can be lifted during busy periods such as the winter holidays. Even so, rest assured that Amazon is still keeping track of the total number of hours you work and will cut you off from delivery blocks if they think you're getting too close to an amount of hours that could give you grounds to claim you're an Amazon employee.

Still, the name of the game for maximizing your Amazon Flex income is increasing the number of delivery blocks you can get. Luckily for you, we wrote an entire guide to how to get more Amazon Flex blocks.

Exhibit 5

How Are Amazon Flex Drivers Paid?

Every Amazon Flex driver is paid twice per week via direct deposit. These payments are processed on Tuesdays and Fridays, so you can expect to receive your funds within one business day (besides bank holidays). You will also receive customer tips within a couple of days of a completed delivery block.

If your bank account information ever changes, you can easily update it in the "Account" tab of your Amazon Flex app. If you run into any issues along the way, you can always contact Amazon Flex support by emailing the team at **amazonflex-support@amazon.com**.

Amazon Flex Driver Expenses

Amazon Flex is a great way to make money on the side, but it's not without its expenses. And as an independent contractor, you do not receive reimbursement for any expenses you incur in the course of the job.

Therefore, you need to consider the following expenses carefully when figuring out if Amazon Flex is a worthwhile gig to pursue. Because that $18 per hour sounds great on paper, but the reality can be a bit less when you factor in the following expenses:

- **Car payment** — Do you outright own the vehicle you're using to make Amazon Flex deliveries, or are you still making car payments to a lender? If so, then you have to

count these against whatever you're making when figuring your final profit. That being said, Amazon Flex can be a good strategy to supplement an existing car payment if you just work for the service a few hours a week on the side.

- **Vehicle maintenance** — Making deliveries using your own vehicle will increase the mileage and overall wear and tear on the vehicle itself. This means more frequent maintenance and a lower overall life span for your vehicle, which can cut into your earnings significantly.
- **Gas** — Wherever you are, you've got to pay for gas (unless you're making deliveries in an electric car or vehicle with another alternative fuel source). All that extra driving means you'll be going through extra gas as well, especially if you're driving a less fuel-efficient vehicle such as a truck or van. Make sure to understand how to save money on gas and you'll be fine.
- **Insurance** — Legally, you have to have insurance for your vehicle whether or not you use it for making Amazon Flex deliveries. But still, since you're using your vehicle for business purposes, that means your auto insurance is now a business expense.
- **Vehicle registration** — In the same vein as insurance, you have to have proper vehicle registration regardless, but it's still something you can consider as a business expense.
- **Taxes** — This is where your profits really start to shrink. Because you're an independent contractor, Amazon doesn't withhold any taxes on the money they pay. That's your responsibility now, so check out our guide to self-employment taxes to ensure you're not in for a nasty surprise at tax time.

It's impossible to give exact numbers for the above expenses, as they will vary based on where you live, what you drive and your age.

Luckily, most job-related expenses are tax-deductible, so as long as you keep track of your mileage and spending, you can save quite a bit of money once tax season rolls around. Your accountant can give you further guidance on which exact expenses qualify.

Amazon Flex Logistics Packages Change to 3 Hour Blocks

December 21, 2016 by Simon Kwok — 17 Comments

› very different services under Amazon Flex. There is one for traditional Amazon packages called n Flex Logistics, and then there are Amazon Prime Now parcels. Amazon Prime Now can include g, such as food, electronics, and liquor in some cities.

n Flex Logistics is what they Amazon calls their package delivery services. It varies a lot from n Prime Now deliveries, from the type of shifts or Amazon flex blocks to the type and number of es. A traditional route (2-hour routes) on Amazon Prime Now is typically about 5-10 stops with ·n 10-20 packages. It normally takes drivers about 60-90 minutes to finish the route. A traditional ›r Amazon Flex Logistics is made up of between 40-80 packages with about 20-50 stops. It normally rivers between 2-4 hours to finish the route, with many drivers noting that they typically finish around ɔ nours. However, there are extremes to any route, some finishing within 2.5 hours, some finishing in 6 hours (hope they had 2 4-hour blocks).

Amazon Flex Logistics Blocks

Amazon Flex Logistics blocks are typically 4 hours long. It seems as if these 4 hour blocks can be at anytime on the hour (9am-1pm) or on the half hour (9:30am-1:30pm). For Amazon Flex logistics, there is only one type of block, which are 4 hours long. Amazon Prime Now typically have 2 hour blocks, but they now have 1, 3, and 4 hour blocks and can start at any hour or half hour. You can connect 4 hour blocks if they are adjacent to each other, like 9am-1pm and 1pm to 5pm. There may be small breaks in between.

Amazon Flex Logistics Packages Change to 3 Hour Blocks

Amazon Flex Logistics announced last week that they were changing from 4 hour blocks to 3 hour blocks. Amazon can track how Amazon flex drivers are delivering on Amazon Flex logistics and they probably saw that drivers are typically finishing within 3 hours so they are adjusting to shorter Amazon flex logistics.

Note that I have heard this change has already been implemented this week in many warehouses across the country, but there may be handful that has not changed yet. Please comment below on where your warehouse is, and if they have changed to the 3-hour blocks.

cks that can add flexibility to Amazon Flex and Amazon flex drivers. With shorter Amazon flex Amazon flex drivers can have a more flexible schedule and more chance of getting Amazon flex since there may be more of them.

l there be less Amazon packages per route?

ıe drivers I spoke to, there doesn't seem to be any less packages, even though drivers have only 3 o deliver the same number of packages. It is business as usual so you can get 6 packages that are · from one another to a 60 package route that takes only 2.5 hours.

...delivered Packages at the end of my Amazon Flex Block?

I definitively know that you need to return these packages to the warehouse after your Amazon Flex block is done. If you have multiple blocks in a row, you will return the packages at the end of your overall shift. That means that you will need to drive back to the warehouse in your own time. However, the main fact is that you need to return the packages you haven't delivered. This is really important. Make sure to call into Amazon Flex driver support and note that you couldn't finish delivering the packages due to either the number of stops, traffic or anything else you can mention. You will then typically return the packages back to the warehouse.

Remember that you are only covered insurance-wise when you are working during your shift. If you work outside of your shift, Amazon Flex won't cover you if you have issues. You can't work for Amazon Flex outside of your scheduled shift.

I have heard that Amazon has been getting in trouble lately for making Amazon flex drivers work beyond their shifts. This has becoming so much of a problem lately that dispatch has been ending Amazon flex driver shift early (on Prime Now), while paying them for the rest of their shift. This means that they won't be forced to make deliveries. An example of this is when an Amazon flex driver returns to the warehouse about 30 minutes before the end of their shift. Normally, you just wait around until your time is up. Now, they are ending their shifts because Amazon Flex drivers can't reasonably deliver anything in their time remaining.

Amazon aware that workers allegedly pee in water bottles, documents show; company pushes back

The company denies that its workers don't get sufficient restroom breaks

By Audrey Conklin | FOXBusiness

Amazon is aware of its employees reportedly peeing in water bottles and defecating in bags, documents show.

The tech giant suggested in a tweet to Rep. Mark Pocan, D-Wis., that the multiple reports published in recent years -- alleging poor working conditions at Amazon and that employees complained of peeing in water bottles or not having enough time to use the restroom -- were false.

"You don't really believe the peeing in bottles thing, do you?" Amazon tweeted Thursday. "If that were true, nobody would work for us. The truth is that we have over a million incredible employees around the world who are proud of what they do, and have great wages and health care from day one."

The tweet came in response to criticism from Pocan, who accused the company of putting on the facade of being a "progressive workplace."

"Paying workers $15/hr doesn't make you a 'progressive workplace' when you union-bust [and] make workers urinate in water bottles," the congressman said.

AMAZON SWIPES AT SANDERS OVER MINIMUM WAGE, WARREN OVER 'LOOPHOLES' COMMENT

Internal documents obtained by digital investigative news outlet The Intercept, and retweeted by New York Democratic Rep. Alexandria Ocasio-Cortez, show that at least some Amazon management teams were aware of the fact that employees -- and in particular, delivery drivers -- were urinating in water bottles and defecating in bags as a result of not having enough time to use a restroom.

Stock Symbol	**AMZN**
Stock Name	AMAZON.COM, INC.
Stock Price	3,372.20
Stock Change	+72.90
Change %	+2.21%

One Pittsburgh-based Amazon employee sent a document labeled "confidential" to the outlet that lists behavior violations, including "public urination" and "public defecation."

The same employee shared an email from an Amazon manager to employees with The Intercept condemning the third instance of a driver defecating in a bag in two months.

AMAZON UNION PUSH GIVES GIANT RETAILER A TASTE OF ITS OWN PROGRESSIVE MEDICINE

"This evening, an associate discovered human feces in an Amazon bag that was returned to station by a driver," the email reads, according to The Intercept. "This is the [third] occasion in the last [two] months when bags have been returned to [the] station with poop inside. We understand that [driver associates] may have emergencies while on-road, and especially during Covid, DAs have struggled to find bathrooms while delivering."

The email continues: "We've noticed an uptick recently of all kinds of unsanitary garbage being left inside bags: used masks, gloves, bottles of urine. By scanning the QR code on the bag, we can easily identify the DA who was in possession of the bag last. These behaviors are unacceptable and will result in Tier 1 Infractions going forward. ... I know

if may seem obvious, or like something you shouldn't need to coach, but please be explicit when communicating the message that they CANNOT poop, or leave bottles of urine inside bags."

Another former Amazon delivery driver, Halie Marie Brown, told the outlet that the incidents happen because drivers "are literally implicitly forced to do so, otherwise we will end up losing our jobs for too many 'undelivered packages.'"

An email Brown shared with The Intercept warns employees to check their delivery vans "thoroughly for garbage and urine bottle[s]."

OUTCOME OF AMAZON UNION VOTE MAY BE SWAYED BY INELIGIBLE EX-EMPLOYEES: REPORT

"If you find urine bottle[s], please report to your lead, supporting staff or me. Vans will be inspected by Amazon during debrief[ings] if urine bottle[s] are found, you will be issue[d] an infraction tier 1 for immediate offboarding," the email reads, according to the outlet.

Yet another email from an Amazon manager that a Houston-based driver to The Intercept complains of "several bad accidents, a stolen van" and "drivers leaving piss bottles etc. in the vans."

A number of reporters who have researched allegations of evidence working conditions at Amazon shared proof that employees complained of peeing in water bottles or not having enough time to use the bathroom on Twitter.

Amazon did not immediately respond to an inquiry from Fox News.

Progressive politicians including Ocasio-Cortez and U.S. Sens. Bernie Sanders, I-Vt., and Elizabeth Warren, D-Mass., as well as conservative politicians including U.S. Sen. Marco Rubio, R-Fla., have increased pressure on Amazon to improve and be more transparent about worker conditions at its facilities. Their pressure comes as workers in

Bessemer, Alabama, push a union vote that the company unsuccessfully attempted to delay.

Amazon's official brand account on Twitter has sparred with a number of lawmakers in recent days as the company attempts to vanquish the unflattering allegations.

The company has come under scrutiny after employees across the globe complained of poor working conditions amid COVID-19. On the other hand, Amazon has employed 500,000 global workers in 2020, including seasonal workers, bringing its total workforce to more than 1.3 million, the company announced during its fourth-quarter earnings call. It also reached a trillion-dollar market cap in January,

The company has implemented a number of new COVID-19 safety measures and tests than 700 employees per hour, according to its earnings report. It also allocated $2.5 billion in additional pay for employees, who are paid $15 per hour, in 2020, as well as full health care benefits

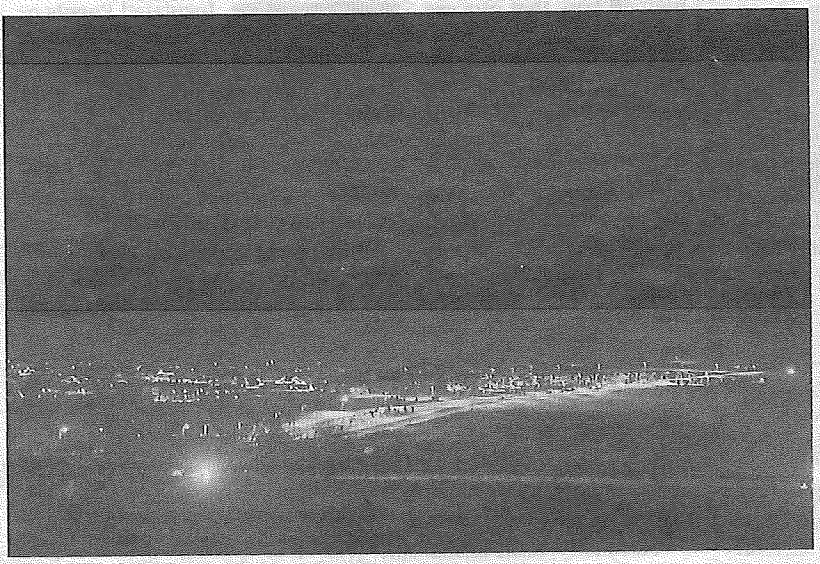
We must preserve our dark skie

We are all aware of the serious effects of air, land and water pollution. However, there is another pollution that we should be concerned about: light pollution. In 2006, the reflected light of metro Denver measured 100 times brighter than natural darkness. That reflected light has increased by a factor of 16 since then, as measured by records of local astronomers.



In the 1970s, air, land and water gained legal protections from Congress; however, light pollution and the preservation of night skies was not included. Since then, scientists have determined that excessive artificial light causes biological harm, impairing the basic functions of wildlife, plants and people.

"Saving starry skies is a worthwhile goal for many reasons: environmental, social, and fiscal," stated astronomer John Barentine, director of the International Dark-Sky Association (IDA). Dark skies also help provide "psychological relief from the sensory overload of life. There is a nature deficient syndrome and night skies offer calm, quiet contemplation," he said.

For billions of years, life has relied on Earth's predictable rhythms of day and night. It's encoded in the DNA of all plants and animals. Plants and animals depend on this innate cycle to govern life-sustaining behaviors such as reproduction, nourishment, sleep, navigation and protection from predators.

Humans adhere to a circadian rhythm, our biological clock. Artificial light at night can disrupt this cycle. Our bodies produce the hormone melatonin in response to circadian rhythm. Nighttime exposure to artificial light suppresses melatonin production. Melatonin has antioxidant properties, induces sleep, boosts the immune system, and plays an important role in other bodily functions.

Light pollution radically alters nocturnal life. Predators use light to hunt and prey species use darkness as cover. Birds that migrate or hunt at night navigate by moonlight and starlight. Scientific research shows that artificial light at night has negative effects on many creatures, including humans.

Street lights illuminate a stretch of Titan Road in Littleton on Dec. 13. International Dark-Sky Association Colorado chapter president Ryan Parker encourages residents to use shielded or dark-sky friendly fixtures to avoid light pollution and glare. "I want people to know there is a better way to light the night," he said.
Daniel Brenner, Special to The Denver Post, file

Light pollution is costly and wasteful. IDA estimates that at least 30% of outdoor lighting in the U.S. is wasted by lights that are not shielded, do not have dimmers and/or lack motion sensors and timers. That increases the cost and the demands on energy grids, releasing tons of carbon dioxide into the atmosphere. We would need to plant 875 million trees annually to offset this footprint.

On a smaller scale, light pollution can negatively impact your neighborhood and the relationship with your neighbors. There is a misconception that an overlighted neighborhood is safer. Yet, there is no scientific evidence that increased lighting deters crimes. It may make us feel safer, but it does not make us safer. The fact is that much outdoor lightning used at night is inefficient, overly bright, poorly targeted, improperly shielded, and completely unnecessary.

"The changeover to LED lighting — public and private — results in a lot of higher-energy blue light, and blue light scatters a lot more than yellow and red light," Univeristy of Denver astronomy professor Bob Stencel told the Denver Post in January. He blames street lights for roughly a third of Denver's light pollution. "It can disrupt sleep and affects flora and fauna. We're not seeking to abolish night lighting, but to reduce the excessive levels and fix misaimed lights."

"The changeover to LED lighting — public and private — results in a lot of higher-energy blue light, and blue light scatters a lot more than yellow and red light," Univeristy of Denver astronomy professor Bob Stencel told the Denver Post in January. He blames street lights for roughly a third of Denver's light pollution. "It can disrupt sleep and affects flora and fauna. We're not seeking to abolish night lighting, but to reduce the excessive levels and fix misaimed lights."

Nighttime is a precious natural resource for all life. The dark skies brimming with stars have been inspirational to our ancestors in the fields of science, religion, philosophy, art and literature. The glow of uncontrolled outdoor lighting has hidden the stars and changed the perception of the night. The night sky is our common and universal heritage. Experiencing the night sky provides perspective, inspiration and leads us to reflect on our humanity and our humble place in the universe. Star gazing is viewing our beginnings.

What can you do to reclaim and save our dark skies?

- Educate yourself and others on the importance of dark skies.
- Only use outdoor lighting when and where it's needed.
- Minimize light from your own home. Shield outdoor fixtures, direct light down. Turn lights off at night whenever possible.
- New LED lighting can reduce energy use, but only warm-white bulbs should be used.
- Dimmers, motion sensors and timers should be used to reduce illumination.

The good news is that light pollution is reversible. So please join the Dark Skies Project. Each one of us can make a difference through our actions.

As astrophysicist Neil deGrasse Tyson said, "We are all stardust."

It is to the benefit of all life to preserve our dark skies. Everything is connected.

Wouldn't it be wonderful if our community was recognized by the International Dark-Sky Association for its forward thinking in reducing nighttime pollution and preserving our dark skies?

Learn more about preserving our dark skies, including where to find specific outdoor lighting, at DarkSky.org/light-pollution/night-sky-heritage.

Kathy Webster, a longtime Colorado resident, is an avid environmentalist and helped lead a task force that worked to preserve lands in Jefferson County that eventually became South Valley Park and the South Hogback.

City of Loveland

LOVELAND PLANNING COMMISSION MEETING
AGENDA
Monday, August 12, 2019
500 E. 3rd Street – Council Chambers
Loveland, CO 80537
6:30 PM

The City of Loveland is committed to providing an equal opportunity for services, programs and activities and does not discriminate on the basis of disability, race, age, color, national origin, religion, sexual orientation or gender. For more information on non-discrimination or for translation assistance, please contact the City's Title VI Coordinator at TitleSix@cityofloveland.org or 970-962-2372. The City will make reasonable accommodations for citizens in accordance with the Americans with Disabilities Act (ADA). For more information on ADA or accommodations, please contact the City's ADA Coordinator at ADAcoordinator@cityofloveland.org.

"La Ciudad de Loveland está comprometida a proporcionar igualdad de oportunidades para los servicios, programas y actividades y no discriminar en base a discapacidad, raza, edad, color, origen nacional, religión, orientación sexual o género. Para más información sobre la no discriminación o para asistencia en traducción, favor contacte al Coordinador Título VI de la Ciudad al TitleSix@cityofloveland.org o al 970-962-2372. La Ciudad realizará las acomodaciones razonables para los ciudadanos de acuerdo con la Ley de Discapacidades para americanos (ADA). Para más información sobre ADA o acomodaciones, favor contacte al Coordinador de ADA de la Ciudad en ADAcoordinator@cityofloveland.org."

LOVELAND PLANNING COMMISSIONERS: Patrick McFall (Chair), Michael Bears, Jeff Fleischer, Rob Molloy, David Hammond, Milo Hovland, Susan Peterson, and Deborah Tygesen.

III. APPROVAL OF MINUTES

Review and approval of the July 22, 2019 meeting minutes

IV. REGULAR AGENDA

1. Taft Avenue Rezoning – Public Hearing
Presented by staff planner Emily Tarantini

This application was presented to the Planning Commission on July 8, 2019 and continued to the August 12th Commission meeting. The continuance was granted to give the Development Services Department time to respond to citizen and Commission questions.

The rezoning application, submitted by the City of Loveland, involves seven residential lots located on the west side of Taft Avenue south of Eisenhower Boulevard. The lots are zoned R1e (Established Low-Density Residential zone) which permits single family residential uses. The City has acquired these lots to accommodate additional right-of-way needed for the Taft Avenue widening project. Two of the existing homes located on these lots have been demolished; the remainder will be demolished prior to the start of the widening project.

The City is requesting B - Developing Business zone for these properties. The B District zone allows for a variety of office, commercial and multi-family uses. This zoning designation is common along many of Loveland's arterial corridors, including adjacent and nearby portions of property bordering Eisenhower Boulevard. The City intends to eventually sell the lots which will likely be consolidated into a single property and developed as a unified project. Staff believes that the B zoning designation provides for an appropriate range of use options that will accommodate the highest and best use of the property.

At the July 8th public hearing, three area residents raised concerns about B zoning and the added traffic congestion that may result from future development. These neighbors questioned the necessity of rezoning, believing that single family development will remain the most appropriate use of the property.

Staff has prepared a response to the questions raised at the July 8th public hearing and continues to recommend the initial request for B zoning. The role of the Commission is to conduct a public hearing and make a recommendation to City Council for final action.

2. Savannah Industrial/DDE8 Conditional Use Request – Public Hearing
Presented by staff planner Noreen Smyth

This application is a request to allow a Heavy Logistics Center use within the I - Developing Industrial zone. As specified by code, Heavy Logistics includes warehousing and distribution uses that generate 12 or more semi-truck trips per day. Uses of this type require conditional use approval by the Planning Commission.

The subject property is located at 4555 Viking Way and 3740-3746 Aldrin Drive in northeast Loveland. The 20-acre site consists of three lots; the westerly lot is currently developed with an un-occupied 122,000 square foot warehouse/office building along with associated parking. The remainder of the site is undeveloped and is planned to be developed with parking for employees and vehicle storage for

delivery vans associated with the proposed use. Tenant finish improvements to the existing building are planned upon approval of the conditional use. The property is among several industrial-zoned properties being developed by McWhinney that are located to the north of Kendall Parkway and to the west of Rocky Mountain Avenue.

In essence, the role of the Planning Commission is to conduct a public hearing to determine if the proposed use will be compatible with existing and future land uses within the surrounding area. The Commission may impose conditions in order to reach approval. The Commission's decision is final barring appeal. Staff recommends approval based on the findings specified in the Planning Commission staff report dated August 12, 2019.

Planning Commission Staff Report

August 12, 2019

Centerra Industrial Parking Lot Addition		
Agenda #:	**PZ #19-121**	**Conditional Use**
Location: 4555 Viking Way & 3740-3746 Aldrin Drive		

Planning Commission Hearing August 12, 2019

Recommended Motion
Recommended Motion(s): Move to make the findings listed in this Staff Report dated August 12, 2019, and based on those findings recommend approval of the Conditional Use for a Heavy Logistics Center for Lot 2, Block 1, Savanna 3rd Subdivision, Lot 2, Block 1, Savanna 2nd Subdivision, and Lot 4, Block 1, Amended Plat of Lots 2, 3 & 4, Block 1, Savanna 1st Subdivision, subject to the condition provided in this report.

Options	Consequence
Approve the Motion	Approval of the motion would allow the establishment of a Heavy Logistics Center on the property once all associated development applications have been completed.
Deny the Motion or take no action	Denying the motion would prevent the operation of a Heavy Logistics Center on the property. The applicant would need to seek an alternate location for their operation. As Heavy Logistics Centers are only allowed as a conditional use within the city, if the other location found for the use was within city limits, another Planning Commission hearing would be scheduled for the alternate location. Taking no action on the motion would cause delay in the applicant's ability to begin operation of the business.
Adopt a Modified Action	Based upon the conditional use findings (described in this report), the Planning Commission may attach additional conditions to their approval of the use, should the Commission identify impacts of the use that are in need of mitigation that are not addressed by staff's recommended conditions.
Refer back to Staff	If the item is referred back to staff, staff requests that specific direction be provided from the Planning Commission to assist in reaching resolution on the proposed use.

Attachments
1. Site Development Plan (Draft) 2. Employment-Create Loveland Comprehensive Plan 3. Traffic Generation Count 4. Traffic Memo 5. Truck Routing Plan 6. Applicant's Conditional Use Assessment

Project Summary
This report concerns a request to establish a distribution center on the subject property. The use is categorized by the Unified Development Code (UDC) as a Heavy Logistics Center. The subject property is zoned I-Developing Industrial, and Heavy Logistics Centers are designated by the UDC as a Conditional Use in that zone, and thus require a Planning Commission hearing. The subject property is situated in an industrial area of Centerra generally located south of the airport and north of Kendall Parkway, between Boyd Lake Avenue and Rocky Mountain Avenue. The subject property consists of three lots. The western lot contains a recently-constructed industrial building, and the center and east lots are undeveloped. On the adjacent property to the southeast is a similar industrial building, and construction on a similar building to the west is anticipated to begin later this year. The properties to the south consist of an in-patient health care facility and an undeveloped tract designated for industrial and commercial uses. The property to the north is undeveloped land designated for industrial uses, and to the northeast is the Union Pacific Railroad followed by the airport.

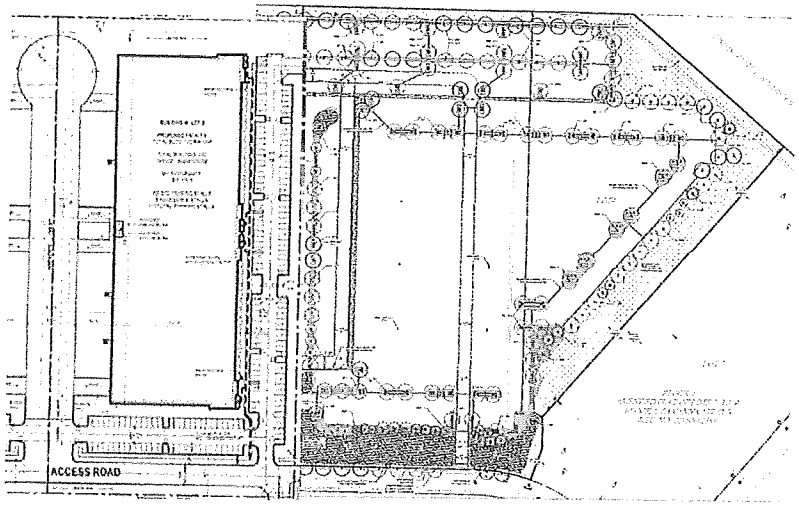
Planning Commission Hearing August 12, 2019

Project Description

Proposed Operation

The Heavy Logistics Center is a consumer goods distribution operation. It provides the last step in the delivery of customer orders. Packages are shipped to the subject property from other distribution/sortation centers, sorted at the subject property to routes, and loaded into vans for delivery to customer premises.

Twelve to sixteen semi-trailer trucks are anticipated to deliver product to the subject property between 10 pm and 7 am daily. Packages are then sorted by routes and placed onto movable racks. Sorting occurs in two shifts, the first one between 10 pm and 7 am and the second between 8 am and 1:30 pm. Approximately 200 employees plus 10 managers will be entering and departing between those times.

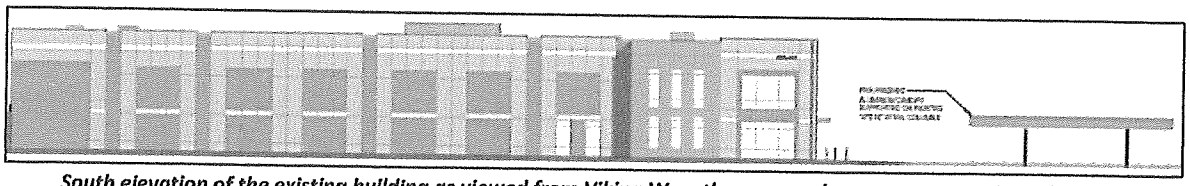


From 7:30 am to 10:30 am, the first shift of delivery vans will be loaded and dispatched from the site in intervals of 40-60 vans every 30 minutes. From 12 pm to 1:30 pm, the second shift will enter, load, and dispatch from the site in intervals of 30-60 vans every 30 minutes. After delivery routes are completed, drivers return the vans to the van storage lot, in waves similar to the dispatch. Undeliverable product is returned to the building and drivers then depart from the employee parking lot (or whatever other means is utilized to come to/from work).

In addition to conventional employees and delivery vans, the operation will utilize independent contractors, typically driving traditional passenger vehicles, for deliveries. Approximately 60-80 such delivery vehicles will enter the facility per day, staggered between 11 am and 3 pm with the assistance of logistics technologies.

Attachment #3 provides a traffic generation count of employee cars, semi-trailer trucks, dispatch vans, and delivery cars by hour of day. Note that every incoming and outgoing trip is counted, so the totals account for double the number of vehicles visiting the subject property in a 24 hour period.

Building and Site Development Plan



The subject property contains an existing unoccupied industrial building on its west side and a large undeveloped area to its east. The necessary permits for construction of the building were obtained in 2018. Parking was provided to the south and east of the building. As a spec building, the tenant was unknown at the time of permit review and construction. The current Heavy Logistics Center applicant is interested in the subject property both because the existing building serves their needs (with certain tenant finishes being pursued through the building permit process) and because the adjacent undeveloped land allow space for construction of a large paved area; see the Site Development Plan included as Attachment #1 for more detailed site design information. The paved area will function as a storage yard (parking) for the vans associated with the distribution operation and as an additional employee parking area.

The site plan for the existing building on the west side of the subject property is to the left. The site plan for proposed storage yard/parking area to its east is on the right (note that there is some overlap in the land area included in the site plans above). A new canopy structure will be situated between the building and the storage yard/parking area, and will result in the removal of the existing parking spaces to the east of the building.

Planning Commission Hearing August 12, 2019

As part of the property remodel, a canopy will be added a little to the east of the building, under which the delivery vans are loaded. The materials are transported to the vans via wheeled racks through overhead doors that will be added to the east elevation. The space between the canopy and the building includes a fire lane and a pedestrian sidewalk. The parking originally situated to the east of the building will be relocated farther to the northeast in order to accommodate the canopy structure.

South elevation of the existing building as viewed from Viking Way; the proposed canopy structure is to the right.

The Site Development Plan and associated civil construction plans to alter the west lot and to develop the storage yard/parking area on the center and east lots were submitted with the Conditional Use application as required, and are undergoing review by city staff. The staff review can be completed if and when the Conditional Use is approved. Likewise, a tenant finish building permit is under review with the Building Division. A building permit for the canopy, along with a site work permit for grading and utility installation, will also need to be submitted to develop the property as proposed. Note that although the property consists of three platted lots, there is no code requirement, or particular advantage, to merging the lots into one with this proposal.

Traffic

Truck Traffic

The semi-trailer truck traffic will access the subject property via Viking Way, a private drive utilized only by industrial properties. From there, they will connect to the south via John Glenn Drive (a local public street), then to Kendall Parkway, then to Rocky Mountain Avenue, and then to Crossroads Boulevard (all arterial streets), and then to Interstate 25. A truck routing plan has been submitted by the applicant and is included as Attachment #5; see also the vicinity map on the first page of this report for reference.

While the number of semi-trailer truck trips per 24-hour period could be higher on the subject property than on the adjacent properties to the east and west, the truck traffic is not anticipated to negatively impact these properties. Because the semi-trailers access Viking Way via John Glenn Drive, which is straight south of the subject property, they will not cross in front of the properties to the east and west. The loading docks on the subject property where the semi-trailers will be unloaded face the loading docks of the building to the west, and the drive aisle in-between is designed specifically for truck traffic. The semi-trailers trucks will pass by the north (Viking Way) and east (John Glenn Drive) sides of the health care facility to the south. While there is a vehicular entrance to that property off of John Glenn Drive, along with an entrance off of Kendall Parkway to the south, there is not anticipated to be a high volume of traffic entering and existing the health facility property. In addition, the peak time of day for vehicular trips to the health care facility will be daytime, while the semi-trailer trips to the subject property will occur at nighttime. Because of this, there is not anticipated to be a conflict.

Van Traffic

The delivery vans are anticipated to cross in front of the property to the east, on Aldrin Drive, as they go to/from Interstate 25 . In addition, the delivery vans may also travel along road networks to the south or to the west as their routes necessitate. Currently, Viking Way terminates a little to the west of the subject property but it will be extended as the properties farther west develop, and eventually connect to Kendall Parkway. While the volume of van traffic is anticipated to be high, the establishment on the subject property of an operation that includes a fleet of vans does not necessitate the Conditional Use review; rather, the establishment of an operation that includes more than 12 semi-trailer truck trips per day necessitates the added review.

Pre-Application Summary

DATE: 5/22/2020

PROJECT: Project Indiana

PROJECT PLANNER: Jeremiah Bebo

PROJECT NUMBER: PA2020-0067

Dear Applicant,

I would like to take this opportunity to thank you for considering the City of Arvada for your project.

As your assigned Project Planner, I remain available as a resource as you initiate the review process in the city. Attached to this letter are the formal staff comments from your Pre-Application Meeting with the Development Review Team. The comments reflect information provided on your submittal materials as well as the discussion within the meeting and are meant to provide general direction to you in the preparation of the actual submittals. Additional comments may be provided following the first review of your formal submittal, based upon the more detailed documents provided with your application. If the plans change significantly for the project, another pre-application meeting would be advised.

If you have any questions or require additional information, please do not hesitate to contact me.

Thank you.
Jeremiah Bebo

ENG-DEVEL-PREAPP-Emiley Yoshihara-(720)-898-7676- eyoshihara@arvada.org

1. Water: There is a 10" PVC water main that runs east-west through the property. It aligns well with the proposed drive. A 20' easement will need to be dedicated over this water main via plat.
2. Sanitary: There is an 8" PVC sanitary main that runs north-south through the property. This main will need to be realigned around the proposed building. A 20' easement will need to be dedicated over the sanitary main via plat.
3. Storm: Water quality and detention will be required for this project. Water quality will need to meet the MS4 requirements. A Site Disturbance Permit will be required prior to any early grading or clearing on the site. Water quality and detention should be located outside the 100-year floodplain.
4. Floodplain/way: A section of the property is located within the floodplain and floodway. Any work in this area would require a CLOMR/LOMR and Arvada Floodplain permit.
5. Access Drives: City staff would like to see a more detailed description on truck and van routes to further analyze the proposed access points. It is preferred that the access points along Indiana St align with those across the street. CDOT approval will be required.
6. The City would like to limit access north on Eldridge St and east on W 68th Ave through the existing neighborhoods. The City is open to exploring installing a cul-de-sac with fire-only access to the intersection of Eldridge and W 68th in order to prevent cut-through traffic. See the attached sketch.
7. Traffic: A referral will be sent out to CDOT for access drives and public improvements. City staff will make recommendations to CDOT in regards to the access points, public improvements and any accel, decel lanes if recommended in the traffic study.
8. Impact Fees: There will be impact fees due at the time of construction for Indiana St. signal improvement. There will also be impact fees for W. 67th Ave and Eldridge that will be due at the time of construction.
9. ROW dedication will be required to match properties to the north and south along Indiana. That is 60' off of the centerline of the road. Indiana will also need to be improved (asphalt width, curb, gutter & detatched walk) for the length of the site.
10. A traffic study prepared by a traffic consultant will need to be provided -- please submit a base assumptions form prior to preparing the study. The base assumption form and required checklist have been attached and need to be included in the study. This study will be a crucial piece to analyze access points and traffic flow.
11. W 67th Ave: There are existing utilities stubbed out into the three lots to the north of W. 67th Ave. If those lots are to be included in this project, those utilities will need to be removed and capped at the main and then W. 67th Ave will need to be milled and overlaid.
12. LOC & Cash Escrow: The required LOC or cash escrow due at the time of construction will be 100% of the engineering estimates cost for the public improvements. This will be held until initial warranty, 20% of the certified construction costs will be held through the 2-year warranty period.
13. Access to existing house to the north will need to be provided with this project.

Comprehensive Plan Future Land Use map designation: Industrial/Office/Retail and Neighborhood/Community Commercial on other parcels. The use can be defined as Light Industrial so long as daily truck trips are under 50. A portion of the site is zoned CG, other portions zoned IL (Parkway Center lots), remainder of the site will need to be annexed into the City. Annexed portions and CG portions will need to be rezoned to IL. A Comprehensive Plan Amendment to Industrial/Office will be needed for the Commercial portions. Annexation Impact Report required with Jefferson County review. Annexation will need to include Maple Valley Park. This Annexation Map and all legal descriptions related to the park will need to be separate documents from the warehouse properties.Tree mitigation on north portion of property may be be planted on Maple Valley as well to aid in screening. Tree mitigation can also be applied on-site for landscaping and buffer requirements as well as fees in-lieu. Site sits 10-20 feet higher than residences to the north. Attention should be made to provide as much screening from that neighborhood as possible. A bufferyard will be required along the property line that is shared with the single-family residence at 6220 Indiana, see 4-6-5-3 for those options. Likewise, a fence or wall option should be considered along the property line with the parl. Access for 6220 Indiana Parkway Center is impacted and will need to be accommodated. Impact fees for Lots 1-4A for W. 67th Ave and Eldridge improvements totaling $157,037.79 will have to be paid prior to building permit. Routing trucks and van deliveries north on Fig will be problematic for neighbors. It is in the applicant's best interest to avoid this route for public support. See the Arvada Land Development Code (LDC) for all zoning standards. Section 2-1-6-2 for IL standards which include: maximum lot coverage of 50 percent, setbacks (front: 20 feet, side and rear 5 feet). Maximum building height of 40 feet. 35% maximum outdoor storage allowance. LDC 3-1-3-8-B: vehicle repairs must be conducted within an enclosed building. 3-1-3-7-5-A provides allowances for customers to pick up their orders. Such area shall be located within the principal warehouse building. See 4-5-2-2 for parking standards. Parking to be provided at 1.75 spaces per 1,000 GFA for warehousing portion and 3 per 1,000 GFA for office portion and 5 per 1,000 for retail; also see 4-5-3 for Parking and Loading Design. Parking shall not be located in a front setback; the associate parking does not appear to meet this from W 66th Place or Holman St as shown. Please provide a detailed parking plan demonstrating the need for over 1,300 parking spaces which is over the City requirements. See 5-1-2 for Building Design. 5-1-2-3 applies to all buildings and include requirements for: main entrances to face the street, massing, 360 degree architecture. The façade facing the street shall be comprised of at least 20% with windows. Maximum length of a continuous roof ridgeline is 35 feet. Incorporate horizontal and vertical articulation. See 5-1-2-6 for design standards that apply to all Nonresidential Buildings. 5-1-2-6-E-2 for articulation of industrial buildings. See 5-1-2-8 for design standards specifically for Industrial Buildings. The front façade and side walls within 40 feet of the front shall be of masonry. Flat roofs shall include a parapet. A Minor Subdivision will be required. At least one neighborhood meeting will be required. Annexation, rezoning, and comprehensive plan amendment will require public hearings in front of the Planning Commission and City Council. Site Plan and Minor Subdivision can be reviewed administratively. Applications may run concurrently. Please work with me to begin the neighborhood meeting process. We may have to explore virtual options to abide by social distancing rules and regulations. An Open House format is preferred for this project. Please make sure to reach out to CDOT to discuss your proposal with them as well as the Civil Drawings for the improvements to Indiana will be referred out to them for review which can take additional time outside of the City's review cycle. The City believes that Colorado State Statues may allow us the ability to annex in the property without the written consent of the property at 6700 Indiana provided owners over 50% of the land to be annexed sign the annexation petition.

MEMORANDUM

To: Jeremiah Bebo, City of Arvada

From: Stephen Litsas, PE

Kimley-Horn and Associates, Inc.

Date: November 18, 2020

Subject: Project Indiana Annexation – Neighborhood Meeting Summary

---

A neighborhood meeting was held on November 18, 2020 at 6 pm, to discuss the annexation submission with the public. This annexation meeting included two annexations within the same discussion: DA2020-0117 (Project Indiana) and DA2020-0118 (Maple Valley Park). Due to the on-going COVID situation, this meeting was held via Microsoft Teams. Members of the public were provided a link to log in prior to the meeting and were able to ask questions via the platform. No known technical issues were reported by any of the attendees.

A link to the full recording of the meeting can be found here:
https://web.microsoftstream.com/video/786024da-00fd-406d-8967-ac2d0b5c5da9

The meeting first discussed the annexation process for both the Project Site and the Park. It then followed into a high-level proposal of the future site development submission. It was noted that this application was not for the site development; however, to be transparent to the public of the intended annexation this was discussed. The site development discussion included a conceptual site layout, conceptual building elevations, traffic management, and high-level discussions of how the facility would operate.

The following issues were raised by the public:

1. Public: The timing of the extension of Eldridge St.
    a. City Response: The extension of Eldridge St will occur as future properties along Eldridge St develop.
    b. Follow-Up: This annexation has no impact on that. No further follow-up was required for this as part of this application.
2. Public: Questions related to traffic, including volume and timing.
    a. Applicant Response: It was clarified that a majority of van traffic would be directed towards Indiana St, with most entering Indiana St at 68th Ave and most trucks entering Indiana St at 66th Ave. It was discussed that the facility operates 24 hours a day, with truck traffic occurring during the nighttime, and van traffic happening during the daytime.

   b. Follow-Up: This response was accepted by the members of the public, and the traffic pattern could not otherwise be altered.
3. Public: Concerns with the parking lot being too bright for residences or impacting wildlife in the Park.
   a. Applicant Response: The lighting level in the parking lot is designed to a "safe level" using the City's standard, not as a bright as a standard retail parking lot. In addition, the site will use cutoff lenses that allow light to be controlled to only fall on the site.
   b. Follow-Up: The Applicant will provide a photometric analysis as part of the Site Plan application that shows lighting levels do not spill onto the neighboring residential properties.
4. Public: Concerns that the floodplain for Ralston Creek will be negatively impacted.
   a. Applicant Response: The site is intentionally staying out of the floodplain, and there will be no impacts to the floodplain.
   b. Follow-Up: This response was considered adequate by the questioner, and no follow-up is required.
5. Public: Concerns on wildlife impacts, and if there have been studies done on the wildlife in the park. Including the noise as it impacts the wildlife.
   a. Applicant Response: An environment due diligence was undertaken for the site, including a critical species, and it came back with no concerns. In terms of noise, the building was put as far south as possible on the site, and the trucks were concentrated in the existing industrial parts of the site. The parking lot adjacent to the Park operates like a standard parking lot, and the noise should be minimal.
   b. Follow-Up: The environmental study was submitted as part of the annexation and is public. No further follow-up required by the applicant as part of the annexation.
6. Public: Concerns on the amount of parking:
   a. Applicant Response: It is for the function of the facility, to park the fleet of vans.
   b. Follow-Up: This amount of parking is critical for the operation of the facility, and cannot be altered.
7. Public: Concerns with stormwater drainage / runoff negatively impacting Maple Valley Park
   a. Applicant Response: The facility will include detention and stormwater quality treatment measures in accordance with City of Arvada standards. This will clean pollutants out of the water prior to it discharging to Maple Valley Park.
   b. Follow-Up: This was accepted by the questioner.

2021 DRIVER GUIDE: HOW MUCH DO AMAZON FLEX DRIVERS MAKE?

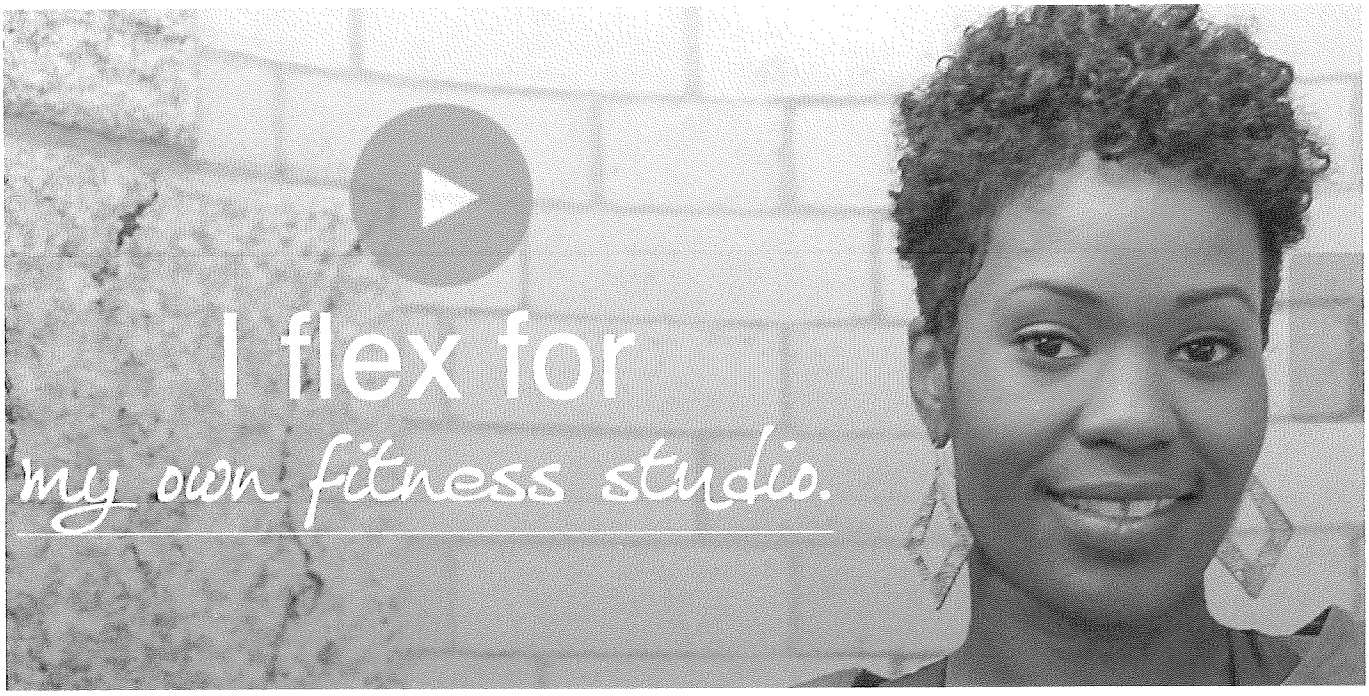
By: Brett Helling | Updated: January 12, 2021

Our website is supported by our users. We sometimes earn affiliate links when you click through the affiliate links on our website. Learn more.

When you hunt for the perfect side hustle, potential earnings are a big factor in your decision to apply or look for other options.

No matter how great driving for Amazon may sound, you need to make good use of your time if you want to meet your financial goals. So how much do Amazon Flex drivers make, and how will you actually need to spend to keep your career going?

Founded in 2015, Amazon Flex is a delivery program that connects drivers to opportunities to earn on their own schedule, using their own vehicles and smartphones.



Drivers in the program support Amazon by completing last-mile deliveries for the company's services, including Amazon Fresh, Prime Now, and Amazon.com — and there's no experience needed.

But before you take advantage of this easy gig, you need to make sure it's worth taking advantage of. This guide will give you an in-depth look at how Amazon Flex driver payments work.

Jump to:

- Amazon Flex Payment Structure

- How Are Amazon Flex Drivers Paid?
- Amazon Flex Driver Expenses
- Frequently Asked Questions

What Is Amazon Flex?

We've covered Amazon Flex at length in our guide to Amazon delivery jobs. But if you're not familiar with the service, here's a brief overview of how it works for drivers.

Eastwoc

Eastwood is n
tools and solu

Eastwood

As we alluded to in the introduction, Amazon Flex is what enables Amazon to offer free two-hour delivery service, restaurant delivery and Sunday delivery of packages (to name just a few). Amazon Flex drivers make this possible, completing the following types of deliveries:

- **Prime** – These are regular Amazon package deliveries. While Amazon makes many of these deliveries via USPS or UPS, using contractors allows the company to increase delivery times or offer delivery on Sundays.

- **Prime Now** – Available in select markets, Prime Now is a service that allows Amazon Prime customers to receive two-hour delivery on household essentials, everyday items and select Amazon products.
- **Amazon Locker** – Drivers deliver packages to Amazon Lockers, which are like P.O. boxes that Amazon operates in order to provide alternative pickup locations for customers.
- **Merchant Pickups** – Instead of picking up the package from an Amazon station, you pick it up directly from a merchant. This is how Amazon can offer services such as AmazonFresh, as well as deliveries from local small businesses and other brick and mortar Amazon partner stores.
- **Restaurant** – These are food orders from restaurants as part of the Amazon Restaurants service.

Amazon Flex drivers deliver for all of these services, setting their own schedules based on pre-selected delivery blocks using the Amazon Flex app.

Qualifying is easy: You just need to meet the Flex requirements, pass a background check, have a smartphone that can run the app and have a vehicle you can use to make deliveries.

Americ

Find Out If So
How Much Yo

Solar-Estimat

Amazon Flex Payment Structure

Amazon Flex drivers are paid a flat sum for every shift — known as a delivery block — they accept and complete. Most available blocks typically last between two and six hours from

the time of your arrival to the pick-up location to the time of your final package drop-off.

Before you accept any delivery block, you'll always see your guaranteed earnings as well as an estimate of how long it will take to complete the relevant deliveries. This way, you'll be able to calculate how much you'll earn per hour before you commit.

For example, if a two-hour block offers a $36 guarantee, you'll know that you'll earn $18 per hour once you complete your shift.

As long as all your packages are successfully delivered (or returned to a delivery station as needed), you'll soon receive the exact earnings that were offered for your delivery block. This makes Amazon Flex's payment structure far more transparent than those of rideshare companies like Uber and Lyft, which take at least 20% commission from rides that are offered with unclear trip totals.

If you complete Prime Now deliveries, you'll also get the chance to get customer tips on top of your guaranteed earnings. Delivery partners receive 100% of the tips customers provide.

Mileage reimbursement is not included in the payment structure for any Amazon Flex delivery blocks, so keep this in mind as you calculate your real earnings for each trip.

How Much Do Amazon Flex Drivers Make?

So now, to the part you've been waiting for: the money. How much do Amazon Flex drivers make?

The base pay rate for Amazon Flex drivers is $18 per hour (higher in select markets). From there, hourly pay can climb as high as $25 per hour due to factors that increase the difficulty of the delivery. Possible factors include high demand, inclement weather or the holiday rush.

America's #1 Sol Calculator

Find Out If Solar Is Worth
Should Pay, And How Muc
Each Month

If you're delivering for Prime Now, you'll also have the chance to earn tips. Customers aren't required to give tips, but you can increase your chances of receiving them by providing prompt, professional customer service.

You'll be able to see the hourly rate for a given schedule block before you select it, so there will be no ambiguity about how much you'll be making on a shift. That being said, the precise amount you make per week or month will depend on how many shifts you're willing to work, as well as how many Amazon will give you.

To ensure that your work remains part-time, Amazon caps the maximum number of hours you can work as follows:

- Max per day — 7 hours
- Max per week — 29 hours
- Max per 30 days — 116 hours

This is because, as an Amazon Flex driver, you are a self-employed, independent contractor. Your are *not* an Amazon employee. If Amazon were to regularly give drivers 40-hour weeks, this could open them up to lawsuits demanding Amazon delivery drivers be treated as employees (and given the benefits that come with employee status). Amazon doesn't want this, so they put the above caps in place (and phrase driver job titles carefully).

Note, however, that these caps can be lifted during busy periods such as the winter holidays. Even so, rest assured that Amazon is still keeping track of the total number of hours you work and will cut you off from delivery blocks if they think you're getting too close to an amount of hours that could give you grounds to claim you're an Amazon employee.

Still, the name of the game for maximizing your Amazon Flex income is increasing the number of delivery blocks you can get. Luckily for you, we wrote an entire guide to how to get more Amazon Flex blocks.

Exhibit 5

How Are Amazon Flex Drivers Paid?

Every Amazon Flex driver is paid twice per week via direct deposit. These payments are processed on Tuesdays and Fridays, so you can expect to receive your funds within one business day (besides bank holidays). You will also receive customer tips within a couple of days of a completed delivery block.

If your bank account information ever changes, you can easily update it in the "Account" tab of your Amazon Flex app. If you run into any issues along the way, you can always contact Amazon Flex support by emailing the team at **amazonflex-support@amazon.com**.

Amazon Flex Driver Expenses

Amazon Flex is a great way to make money on the side, but it's not without its expenses. And as an independent contractor, you do not receive reimbursement for any expenses you incur in the course of the job.

Therefore, you need to consider the following expenses carefully when figuring out if Amazon Flex is a worthwhile gig to pursue. Because that $18 per hour sounds great on paper, but the reality can be a bit less when you factor in the following expenses:

- **Car payment** — Do you outright own the vehicle you're using to make Amazon Flex deliveries, or are you still making car payments to a lender? If so, then you have to

count these against whatever you're making when figuring your final profit. That being said, Amazon Flex can be a good strategy to supplement an existing car payment if you just work for the service a few hours a week on the side.

- **Vehicle maintenance** — Making deliveries using your own vehicle will increase the mileage and overall wear and tear on the vehicle itself. This means more frequent maintenance and a lower overall life span for your vehicle, which can cut into your earnings significantly.
- **Gas** — Wherever you are, you've got to pay for gas (unless you're making deliveries in an electric car or vehicle with another alternative fuel source). All that extra driving means you'll be going through extra gas as well, especially if you're driving a less fuel-efficient vehicle such as a truck or van. Make sure to understand how to save money on gas and you'll be fine.
- **Insurance** — Legally, you have to have insurance for your vehicle whether or not you use it for making Amazon Flex deliveries. But still, since you're using your vehicle for business purposes, that means your auto insurance is now a business expense.
- **Vehicle registration** — In the same vein as insurance, you have to have proper vehicle registration regardless, but it's still something you can consider as a business expense.
- **Taxes** — This is where your profits really start to shrink. Because you're an independent contractor, Amazon doesn't withhold any taxes on the money they pay. That's your responsibility now, so check out our guide to self-employment taxes to ensure you're not in for a nasty surprise at tax time.

It's impossible to give exact numbers for the above expenses, as they will vary based on where you live, what you drive and your age.

Luckily, most job-related expenses are tax-deductible, so as long as you keep track of your mileage and spending, you can save quite a bit of money once tax season rolls around. Your accountant can give you further guidance on which exact expenses qualify.

Amazon Flex Logistics Packages Change to 3 Hour Blocks

December 21, 2016 by Simon Kwok — 17 Comments

› very different services under Amazon Flex. There is one for traditional Amazon packages called n Flex Logistics, and then there are Amazon Prime Now parcels. Amazon Prime Now can include g, such as food, electronics, and liquor in some cities.

n Flex Logistics is what they Amazon calls their package delivery services. It varies a lot from n Prime Now deliveries, from the type of shifts or Amazon flex blocks to the type and number of es. A traditional route (2-hour routes) on Amazon Prime Now is typically about 5-10 stops with ·n 10-20 packages. It normally takes drivers about 60-90 minutes to finish the route. A traditional ›r Amazon Flex Logistics is made up of between 40-80 packages with about 20-50 stops. It normally rivers between 2-4 hours to finish the route, with many drivers noting that they typically finish around ɔ nours. However, there are extremes to any route, some finishing within 2.5 hours, some finishing in 6 hours (hope they had 2 4-hour blocks).

Amazon Flex Logistics Blocks

Amazon Flex Logistics blocks are typically 4 hours long. It seems as if these 4 hour blocks can be at anytime on the hour (9am-1pm) or on the half hour (9:30am-1:30pm). For Amazon Flex logistics, there is only one type of block, which are 4 hours long. Amazon Prime Now typically have 2 hour blocks, but they now have 1, 3, and 4 hour blocks and can start at any hour or half hour. You can connect 4 hour blocks if they are adjacent to each other, like 9am-1pm and 1pm to 5pm. There may be small breaks in between.

Amazon Flex Logistics Packages Change to 3 Hour Blocks

Amazon Flex Logistics announced last week that they were changing from 4 hour blocks to 3 hour blocks. Amazon can track how Amazon flex drivers are delivering on Amazon Flex logistics and they probably saw that drivers are typically finishing within 3 hours so they are adjusting to shorter Amazon flex logistics.

Note that I have heard this change has already been implemented this week in many warehouses across the country, but there may be handful that has not changed yet. Please comment below on where your warehouse is, and if they have changed to the 3-hour blocks.

cks that can add flexibility to Amazon Flex and Amazon flex drivers. With shorter Amazon flex Amazon flex drivers can have a more flexible schedule and more chance of getting Amazon flex since there may be more of them.

l there be less Amazon packages per route?

ıe drivers I spoke to, there doesn't seem to be any less packages, even though drivers have only 3 o deliver the same number of packages. It is business as usual so you can get 6 packages that are · from one another to a 60 package route that takes only 2.5 hours.

...delivered Packages at the end of my Amazon Flex Block?

I definitively know that you need to return these packages to the warehouse after your Amazon Flex block is done. If you have multiple blocks in a row, you will return the packages at the end of your overall shift. That means that you will need to drive back to the warehouse in your own time. However, the main fact is that you need to return the packages you haven't delivered. This is really important. Make sure to call into Amazon Flex driver support and note that you couldn't finish delivering the packages due to either the number of stops, traffic or anything else you can mention. You will then typically return the packages back to the warehouse.

Remember that you are only covered insurance-wise when you are working during your shift. If you work outside of your shift, Amazon Flex won't cover you if you have issues. You can't work for Amazon Flex outside of your scheduled shift.

I have heard that Amazon has been getting in trouble lately for making Amazon flex drivers work beyond their shifts. This has becoming so much of a problem lately that dispatch has been ending Amazon flex driver shift early (on Prime Now), while paying them for the rest of their shift. This means that they won't be forced to make deliveries. An example of this is when an Amazon flex driver returns to the warehouse about 30 minutes before the end of their shift. Normally, you just wait around until your time is up. Now, they are ending their shifts because Amazon Flex drivers can't reasonably deliver anything in their time remaining.

Amazon aware that workers allegedly pee in water bottles, documents show; company pushes back

The company denies that its workers don't get sufficient restroom breaks

By Audrey Conklin | FOXBusiness

Amazon is aware of its employees reportedly peeing in water bottles and defecating in bags, documents show.

The tech giant suggested in a tweet to Rep. Mark Pocan, D-Wis., that the multiple reports published in recent years -- alleging poor working conditions at Amazon and that employees complained of peeing in water bottles or not having enough time to use the restroom -- were false.

"You don't really believe the peeing in bottles thing, do you?" Amazon tweeted Thursday. "If that were true, nobody would work for us. The truth is that we have over a million incredible employees around the world who are proud of what they do, and have great wages and health care from day one."

The tweet came in response to criticism from Pocan, who accused the company of putting on the facade of being a "progressive workplace."

"Paying workers $15/hr doesn't make you a 'progressive workplace' when you union-bust [and] make workers urinate in water bottles," the congressman said.

AMAZON SWIPES AT SANDERS OVER MINIMUM WAGE, WARREN OVER 'LOOPHOLES' COMMENT

Internal documents obtained by digital investigative news outlet The Intercept, and retweeted by New York Democratic Rep. Alexandria Ocasio-Cortez, show that at least some Amazon management teams were aware of the fact that employees -- and in particular, delivery drivers -- were urinating in water bottles and defecating in bags as a result of not having enough time to use a restroom.

Stock Symbol	**AMZN**
Stock Name	AMAZON.COM, INC.
Stock Price	3,372.20
Stock Change	+72.90
Change %	+2.21%

One Pittsburgh-based Amazon employee sent a document labeled "confidential" to the outlet that lists behavior violations, including "public urination" and "public defecation."

The same employee shared an email from an Amazon manager to employees with The Intercept condemning the third instance of a driver defecating in a bag in two months.

AMAZON UNION PUSH GIVES GIANT RETAILER A TASTE OF ITS OWN PROGRESSIVE MEDICINE

"This evening, an associate discovered human feces in an Amazon bag that was returned to station by a driver," the email reads, according to The Intercept. "This is the [third] occasion in the last [two] months when bags have been returned to [the] station with poop inside. We understand that [driver associates] may have emergencies while on-road, and especially during Covid, DAs have struggled to find bathrooms while delivering."

The email continues: "We've noticed an uptick recently of all kinds of unsanitary garbage being left inside bags: used masks, gloves, bottles of urine. By scanning the QR code on the bag, we can easily identify the DA who was in possession of the bag last. These behaviors are unacceptable and will result in Tier 1 Infractions going forward. ... I know

if may seem obvious, or like something you shouldn't need to coach, but please be explicit when communicating the message that they CANNOT poop, or leave bottles of urine inside bags."

Another former Amazon delivery driver, Halie Marie Brown, told the outlet that the incidents happen because drivers "are literally implicitly forced to do so, otherwise we will end up losing our jobs for too many 'undelivered packages.'"

An email Brown shared with The Intercept warns employees to check their delivery vans "thoroughly for garbage and urine bottle[s]."

OUTCOME OF AMAZON UNION VOTE MAY BE SWAYED BY INELIGIBLE EX-EMPLOYEES: REPORT

"If you find urine bottle[s], please report to your lead, supporting staff or me. Vans will be inspected by Amazon during debrief[ings] if urine bottle[s] are found, you will be issue[d] an infraction tier 1 for immediate offboarding," the email reads, according to the outlet.

Yet another email from an Amazon manager that a Houston-based driver to The Intercept complains of "several bad accidents, a stolen van" and "drivers leaving piss bottles etc. in the vans."

A number of reporters who have researched allegations of evidence working conditions at Amazon shared proof that employees complained of peeing in water bottles or not having enough time to use the bathroom on Twitter.

Amazon did not immediately respond to an inquiry from Fox News.

Progressive politicians including Ocasio-Cortez and U.S. Sens. Bernie Sanders, I-Vt., and Elizabeth Warren, D-Mass., as well as conservative politicians including U.S. Sen. Marco Rubio, R-Fla., have increased pressure on Amazon to improve and be more transparent about worker conditions at its facilities. Their pressure comes as workers in

Bessemer, Alabama, push a union vote that the company unsuccessfully attempted to delay.

GET FOX BUSINESS ON THE GO BY CLICKING HERE

Amazon's official brand account on Twitter has sparred with a number of lawmakers in recent days as the company attempts to vanquish the unflattering allegations.

The company has come under scrutiny after employees across the globe complained of poor working conditions amid COVID-19. On the other hand, Amazon has employed 500,000 global workers in 2020, including seasonal workers, bringing its total workforce to more than 1.3 million, the company announced during its fourth-quarter earnings call. It also reached a trillion-dollar market cap in January,

The company has implemented a number of new COVID-19 safety measures and tests than 700 employees per hour, according to its earnings report. It also allocated $2.5 billion in additional pay for employees, who are paid $15 per hour, in 2020, as well as full health care benefits

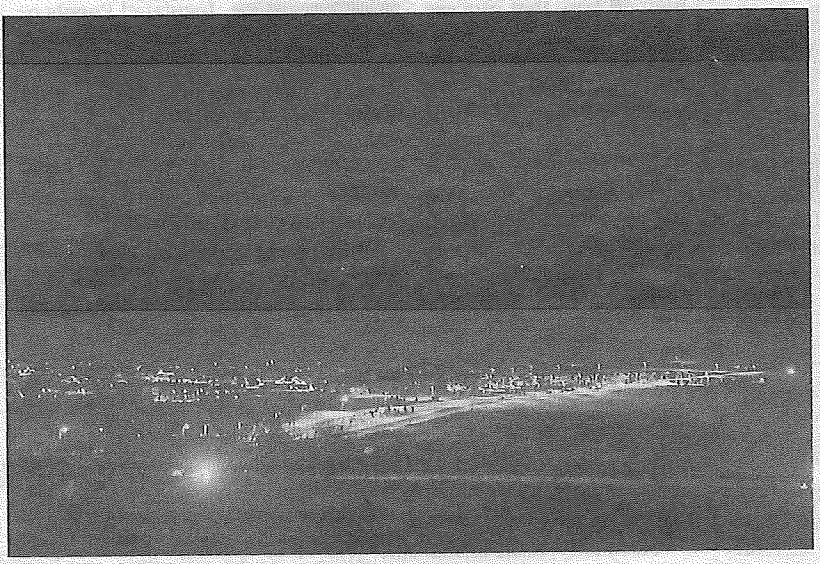
We must preserve our dark skie

We are all aware of the serious effects of air, land and water pollution. However, there is another pollution that we should be concerned about: light pollution. In 2006, the reflected light of metro Denver measured 100 times brighter than natural darkness. That reflected light has increased by a factor of 16 since then, as measured by records of local astronomers.



In the 1970s, air, land and water gained legal protections from Congress; however, light pollution and the preservation of night skies was not included. Since then, scientists have determined that excessive artificial light causes biological harm, impairing the basic functions of wildlife, plants and people.

"Saving starry skies is a worthwhile goal for many reasons: environmental, social, and fiscal," stated astronomer John Barentine, director of the International Dark-Sky Association (IDA). Dark skies also help provide "psychological relief from the sensory overload of life. There is a nature deficient syndrome and night skies offer calm, quiet contemplation," he said.

For billions of years, life has relied on Earth's predictable rhythms of day and night. It's encoded in the DNA of all plants and animals. Plants and animals depend on this innate cycle to govern life-sustaining behaviors such as reproduction, nourishment, sleep, navigation and protection from predators.

Humans adhere to a circadian rhythm, our biological clock. Artificial light at night can disrupt this cycle. Our bodies produce the hormone melatonin in response to circadian rhythm. Nighttime exposure to artificial light suppresses melatonin production. Melatonin has antioxidant properties, induces sleep, boosts the immune system, and plays an important role in other bodily functions.

Light pollution radically alters nocturnal life. Predators use light to hunt and prey species use darkness as cover. Birds that migrate or hunt at night navigate by moonlight and starlight. Scientific research shows that artificial light at night has negative effects on many creatures, including humans.

Street lights illuminate a stretch of Titan Road in Littleton on Dec. 13. International Dark-Sky Association Colorado chapter president Ryan Parker encourages residents to use shielded or dark-sky friendly fixtures to avoid light pollution and glare. "I want people to know there is a better way to light the night," he said.
Daniel Brenner, Special to The Denver Post, file

Light pollution is costly and wasteful. IDA estimates that at least 30% of outdoor lighting in the U.S. is wasted by lights that are not shielded, do not have dimmers and/or lack motion sensors and timers. That increases the cost and the demands on energy grids, releasing tons of carbon dioxide into the atmosphere. We would need to plant 875 million trees annually to offset this footprint.

On a smaller scale, light pollution can negatively impact your neighborhood and the relationship with your neighbors. There is a misconception that an overlighted neighborhood is safer. Yet, there is no scientific evidence that increased lighting deters crimes. It may make us feel safer, but it does not make us safer. The fact is that much outdoor lightning used at night is inefficient, overly bright, poorly targeted, improperly shielded, and completely unnecessary.

"The changeover to LED lighting — public and private — results in a lot of higher-energy blue light, and blue light scatters a lot more than yellow and red light," Univeristy of Denver astronomy professor Bob Stencel told the Denver Post in January. He blames street lights for roughly a third of Denver's light pollution. "It can disrupt sleep and affects flora and fauna. We're not seeking to abolish night lighting, but to reduce the excessive levels and fix misaimed lights."

Nighttime is a precious natural resource for all life. The dark skies brimming with stars have been inspirational to our ancestors in the fields of science, religion, philosophy, art and literature. The glow of uncontro

"The changeover to LED lighting — public and private — results in a lot of higher-energy blue light, and blue light scatters a lot more than yellow and red light," Univeristy of Denver astronomy professor Bob Stencel told the Denver Post in January. He blames street lights for roughly a third of Denver's light pollution. "It can disrupt sleep and affects flora and fauna. We're not seeking to abolish night lighting, but to reduce the excessive levels and fix misaimed lights."

Nighttime is a precious natural resource for all life. The dark skies brimming with stars have been inspirational to our ancestors in the fields of science, religion, philosophy, art and literature. The glow of uncontrolled outdoor lighting has hidden the stars and changed the perception of the night. The night sky is our common and universal heritage. Experiencing the night sky provides perspective, inspiration and leads us to reflect on our humanity and our humble place in the universe. Star gazing is viewing our beginnings.

What can you do to reclaim and save our dark skies?

- Educate yourself and others on the importance of dark skies.
- Only use outdoor lighting when and where it's needed.
- Minimize light from your own home. Shield outdoor fixtures, direct light down. Turn lights off at night whenever possible.
- New LED lighting can reduce energy use, but only warm-white bulbs should be used.
- Dimmers, motion sensors and timers should be used to reduce illumination.

The good news is that light pollution is reversible. So please join the Dark Skies Project. Each one of us can make a difference through our actions.

As astrophysicist Neil deGrasse Tyson said, "We are all stardust."

It is to the benefit of all life to preserve our dark skies. Everything is connected.

Wouldn't it be wonderful if our community was recognized by the International Dark-Sky Association for its forward thinking in reducing nighttime pollution and preserving our dark skies?

Learn more about preserving our dark skies, including where to find specific outdoor lighting, at DarkSky.org/light-pollution/night-sky-heritage.

City of Loveland

LOVELAND PLANNING COMMISSION MEETING
AGENDA
Monday, August 12, 2019
500 E. 3rd Street – Council Chambers
Loveland, CO 80537
6:30 PM

The City of Loveland is committed to providing an equal opportunity for services, programs and activities and does not discriminate on the basis of disability, race, age, color, national origin, religion, sexual orientation or gender. For more information on non-discrimination or for translation assistance, please contact the City's Title VI Coordinator at TitleSix@cityofloveland.org or 970-962-2372. The City will make reasonable accommodations for citizens in accordance with the Americans with Disabilities Act (ADA). For more information on ADA or accommodations, please contact the City's ADA Coordinator at ADAcoordinator@cityofloveland.org.

"La Ciudad de Loveland está comprometida a proporcionar igualdad de oportunidades para los servicios, programas y actividades y no discriminar en base a discapacidad, raza, edad, color, origen nacional, religión, orientación sexual o género. Para más información sobre la no discriminación o para asistencia en traducción, favor contacte al Coordinador Título VI de la Ciudad al TitleSix@cityofloveland.org o al 970-962-2372. La Ciudad realizará las acomodaciones razonables para los ciudadanos de acuerdo con la Ley de Discapacidades para americanos (ADA). Para más información sobre ADA o acomodaciones, favor contacte al Coordinador de ADA de la Ciudad en ADAcoordinator@cityofloveland.org."

LOVELAND PLANNING COMMISSIONERS: Patrick McFall (Chair), Michael Bears, Jeff Fleischer, Rob Molloy, David Hammond, Milo Hovland, Susan Peterson, and Deborah Tygesen.

III. APPROVAL OF MINUTES

Review and approval of the July 22, 2019 meeting minutes

IV. REGULAR AGENDA

1. Taft Avenue Rezoning – Public Hearing
Presented by staff planner Emily Tarantini

This application was presented to the Planning Commission on July 8, 2019 and continued to the August 12th Commission meeting. The continuance was granted to give the Development Services Department time to respond to citizen and Commission questions.

The rezoning application, submitted by the City of Loveland, involves seven residential lots located on the west side of Taft Avenue south of Eisenhower Boulevard. The lots are zoned R1e (Established Low-Density Residential zone) which permits single family residential uses. The City has acquired these lots to accommodate additional right-of-way needed for the Taft Avenue widening project. Two of the existing homes located on these lots have been demolished; the remainder will be demolished prior to the start of the widening project.

The City is requesting B - Developing Business zone for these properties. The B District zone allows for a variety of office, commercial and multi-family uses. This zoning designation is common along many of Loveland's arterial corridors, including adjacent and nearby portions of property bordering Eisenhower Boulevard. The City intends to eventually sell the lots which will likely be consolidated into a single property and developed as a unified project. Staff believes that the B zoning designation provides for an appropriate range of use options that will accommodate the highest and best use of the property.

At the July 8th public hearing, three area residents raised concerns about B zoning and the added traffic congestion that may result from future development. These neighbors questioned the necessity of rezoning, believing that single family development will remain the most appropriate use of the property.

Staff has prepared a response to the questions raised at the July 8th public hearing and continues to recommend the initial request for B zoning. The role of the Commission is to conduct a public hearing and make a recommendation to City Council for final action.

2. Savannah Industrial/DDE8 Conditional Use Request – Public Hearing
Presented by staff planner Noreen Smyth

This application is a request to allow a Heavy Logistics Center use within the I - Developing Industrial zone. As specified by code, Heavy Logistics includes warehousing and distribution uses that generate 12 or more semi-truck trips per day. Uses of this type require conditional use approval by the Planning Commission.

The subject property is located at 4555 Viking Way and 3740-3746 Aldrin Drive in northeast Loveland. The 20-acre site consists of three lots; the westerly lot is currently developed with an un-occupied 122,000 square foot warehouse/office building along with associated parking. The remainder of the site is undeveloped and is planned to be developed with parking for employees and vehicle storage for

delivery vans associated with the proposed use. Tenant finish improvements to the existing building are planned upon approval of the conditional use. The property is among several industrial-zoned properties being developed by McWhinney that are located to the north of Kendall Parkway and to the west of Rocky Mountain Avenue.

In essence, the role of the Planning Commission is to conduct a public hearing to determine if the proposed use will be compatible with existing and future land uses within the surrounding area. The Commission may impose conditions in order to reach approval. The Commission's decision is final barring appeal. Staff recommends approval based on the findings specified in the Planning Commission staff report dated August 12, 2019.

Planning Commission Staff Report

August 12, 2019

Centerra Industrial Parking Lot Addition		
Agenda #:	**PZ #19-121**	**Conditional Use**
Location: 4555 Viking Way & 3740-3746 Aldrin Drive		

Planning Commission Hearing August 12, 2019

Recommended Motion
Recommended Motion(s): Move to make the findings listed in this Staff Report dated August 12, 2019, and based on those findings recommend approval of the Conditional Use for a Heavy Logistics Center for Lot 2, Block 1, Savanna 3rd Subdivision, Lot 2, Block 1, Savanna 2nd Subdivision, and Lot 4, Block 1, Amended Plat of Lots 2, 3 & 4, Block 1, Savanna 1st Subdivision, subject to the condition provided in this report.

Options	Consequence
Approve the Motion	Approval of the motion would allow the establishment of a Heavy Logistics Center on the property once all associated development applications have been completed.
Deny the Motion or take no action	Denying the motion would prevent the operation of a Heavy Logistics Center on the property. The applicant would need to seek an alternate location for their operation. As Heavy Logistics Centers are only allowed as a conditional use within the city, if the other location found for the use was within city limits, another Planning Commission hearing would be scheduled for the alternate location. Taking no action on the motion would cause delay in the applicant's ability to begin operation of the business.
Adopt a Modified Action	Based upon the conditional use findings (described in this report), the Planning Commission may attach additional conditions to their approval of the use, should the Commission identify impacts of the use that are in need of mitigation that are not addressed by staff's recommended conditions.
Refer back to Staff	If the item is referred back to staff, staff requests that specific direction be provided from the Planning Commission to assist in reaching resolution on the proposed use.

Attachments
1. Site Development Plan (Draft) 2. Employment-Create Loveland Comprehensive Plan 3. Traffic Generation Count 4. Traffic Memo 5. Truck Routing Plan 6. Applicant's Conditional Use Assessment

Project Summary
This report concerns a request to establish a distribution center on the subject property. The use is categorized by the Unified Development Code (UDC) as a Heavy Logistics Center. The subject property is zoned I-Developing Industrial, and Heavy Logistics Centers are designated by the UDC as a Conditional Use in that zone, and thus require a Planning Commission hearing. The subject property is situated in an industrial area of Centerra generally located south of the airport and north of Kendall Parkway, between Boyd Lake Avenue and Rocky Mountain Avenue. The subject property consists of three lots. The western lot contains a recently-constructed industrial building, and the center and east lots are undeveloped. On the adjacent property to the southeast is a similar industrial building, and construction on a similar building to the west is anticipated to begin later this year. The properties to the south consist of an in-patient health care facility and an undeveloped tract designated for industrial and commercial uses. The property to the north is undeveloped land designated for industrial uses, and to the northeast is the Union Pacific Railroad followed by the airport.

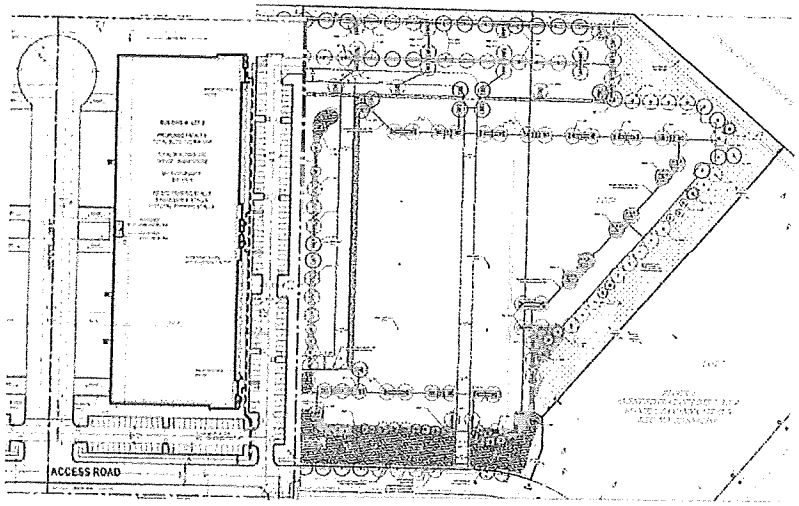
Planning Commission Hearing August 12, 2019

Project Description

Proposed Operation

The Heavy Logistics Center is a consumer goods distribution operation. It provides the last step in the delivery of customer orders. Packages are shipped to the subject property from other distribution/sortation centers, sorted at the subject property to routes, and loaded into vans for delivery to customer premises.

Twelve to sixteen semi-trailer trucks are anticipated to deliver product to the subject property between 10 pm and 7 am daily. Packages are then sorted by routes and placed onto movable racks. Sorting occurs in two shifts, the first one between 10 pm and 7 am and the second between 8 am and 1:30 pm. Approximately 200 employees plus 10 managers will be entering and departing between those times.

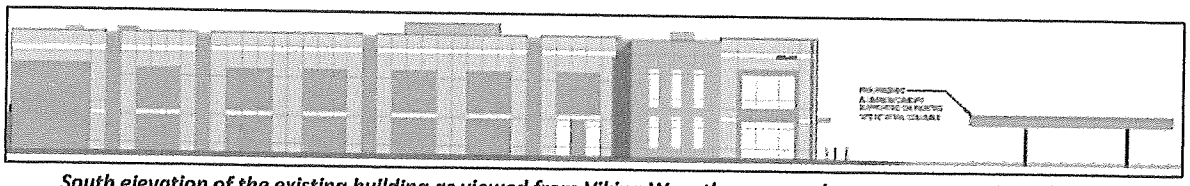


From 7:30 am to 10:30 am, the first shift of delivery vans will be loaded and dispatched from the site in intervals of 40-60 vans every 30 minutes. From 12 pm to 1:30 pm, the second shift will enter, load, and dispatch from the site in intervals of 30-60 vans every 30 minutes. After delivery routes are completed, drivers return the vans to the van storage lot, in waves similar to the dispatch. Undeliverable product is returned to the building and drivers then depart from the employee parking lot (or whatever other means is utilized to come to/from work).

In addition to conventional employees and delivery vans, the operation will utilize independent contractors, typically driving traditional passenger vehicles, for deliveries. Approximately 60-80 such delivery vehicles will enter the facility per day, staggered between 11 am and 3 pm with the assistance of logistics technologies.

Attachment #3 provides a traffic generation count of employee cars, semi-trailer trucks, dispatch vans, and delivery cars by hour of day. Note that every incoming and outgoing trip is counted, so the totals account for double the number of vehicles visiting the subject property in a 24 hour period.

Building and Site Development Plan



The subject property contains an existing unoccupied industrial building on its west side and a large undeveloped area to its east. The necessary permits for construction of the building were obtained in 2018. Parking was provided to the south and east of the building. As a spec building, the tenant was unknown at the time of permit review and construction. The current Heavy Logistics Center applicant is interested in the subject property both because the existing building serves their needs (with certain tenant finishes being pursued through the building permit process) and because the adjacent undeveloped land allow space for construction of a large paved area; see the Site Development Plan included as Attachment #1 for more detailed site design information. The paved area will function as a storage yard (parking) for the vans associated with the distribution operation and as an additional employee parking area.

The site plan for the existing building on the west side of the subject property is to the left. The site plan for proposed storage yard/parking area to its east is on the right (note that there is some overlap in the land area included in the site plans above). A new canopy structure will be situated between the building and the storage yard/parking area, and will result in the removal of the existing parking spaces to the east of the building.

Planning Commission Hearing August 12, 2019

As part of the property remodel, a canopy will be added a little to the east of the building, under which the delivery vans are loaded. The materials are transported to the vans via wheeled racks through overhead doors that will be added to the east elevation. The space between the canopy and the building includes a fire lane and a pedestrian sidewalk. The parking originally situated to the east of the building will be relocated farther to the northeast in order to accommodate the canopy structure.

South elevation of the existing building as viewed from Viking Way; the proposed canopy structure is to the right.

The Site Development Plan and associated civil construction plans to alter the west lot and to develop the storage yard/parking area on the center and east lots were submitted with the Conditional Use application as required, and are undergoing review by city staff. The staff review can be completed if and when the Conditional Use is approved. Likewise, a tenant finish building permit is under review with the Building Division. A building permit for the canopy, along with a site work permit for grading and utility installation, will also need to be submitted to develop the property as proposed. Note that although the property consists of three platted lots, there is no code requirement, or particular advantage, to merging the lots into one with this proposal.

Traffic

Truck Traffic

The semi-trailer truck traffic will access the subject property via Viking Way, a private drive utilized only by industrial properties. From there, they will connect to the south via John Glenn Drive (a local public street), then to Kendall Parkway, then to Rocky Mountain Avenue, and then to Crossroads Boulevard (all arterial streets), and then to Interstate 25. A truck routing plan has been submitted by the applicant and is included as Attachment #5; see also the vicinity map on the first page of this report for reference.

While the number of semi-trailer truck trips per 24-hour period could be higher on the subject property than on the adjacent properties to the east and west, the truck traffic is not anticipated to negatively impact these properties. Because the semi-trailers access Viking Way via John Glenn Drive, which is straight south of the subject property, they will not cross in front of the properties to the east and west. The loading docks on the subject property where the semi-trailers will be unloaded face the loading docks of the building to the west, and the drive aisle in-between is designed specifically for truck traffic. The semi-trailers trucks will pass by the north (Viking Way) and east (John Glenn Drive) sides of the health care facility to the south. While there is a vehicular entrance to that property off of John Glenn Drive, along with an entrance off of Kendall Parkway to the south, there is not anticipated to be a high volume of traffic entering and existing the health facility property. In addition, the peak time of day for vehicular trips to the health care facility will be daytime, while the semi-trailer trips to the subject property will occur at nighttime. Because of this, there is not anticipated to be a conflict.

Van Traffic

The delivery vans are anticipated to cross in front of the property to the east, on Aldrin Drive, as they go to/from Interstate 25 . In addition, the delivery vans may also travel along road networks to the south or to the west as their routes necessitate. Currently, Viking Way terminates a little to the west of the subject property but it will be extended as the properties farther west develop, and eventually connect to Kendall Parkway. While the volume of van traffic is anticipated to be high, the establishment on the subject property of an operation that includes a fleet of vans does not necessitate the Conditional Use review; rather, the establishment of an operation that includes more than 12 semi-trailer truck trips per day necessitates the added review.

City of Arvada
Community and Economic Development
Attn: Ryan Stachelski, Director
8101 Ralston Road
Arvada, CO 80002

Re: Response to Mr. Patrick J. Tobin's Letter dated April 12, 2021 concerning Project #DA2020-0117 – Development Application (Annexation and Zoning). Related Applications: Project #DA2020-0132 – Site plan, Project #PA2020-0067 – Project Pre-Application (the "Second Petition Group Letter")

Dear Mr. Stachelski:

As you know, we represent Scannell Properties, LLC (the "**Developer**") with respect to its annexation, zoning, and rezoning application (collectively, the "**Application**") for the proposed development of an Amazon last mile delivery station ("**Project Indiana**") to be constructed in the City of Arvada (the "**City**"). The Application will be considered at a public hearing before the Planning Commission on April 20, 2021 (the "**Public Hearing**"). We understand that Mr. Patrick J. Tobin has submitted the Second Petition Group Letter to document his clients' concerns with respect to the Staff Report to Planning Commission, dated April 20, 2021 (the "**Staff Report**"). The body of the Second Petition Group Letter asserts two items of concern: (A) that there is incorrect information on a material issue in the Staff Report and (B) that the Staff Report omits material information. Mr. Tobin has enclosed with the Second Petition Group Letter his Summary Report for Zoning Compliance (the "**Summary Report**") documenting his clients' additional concerns. On behalf of the Developer, we appreciate the opportunity to submit this letter in response to the items of concern in the Second Petition Group Letter and Summary Report for the record and to assist the Planning Commission in its deliberations.

Despite the Second Petition Group Letter's assertion that City Staff has failed to identify significant problems in the Staff Report that will affect Planning Commission's consideration of the Application, the items of concern raised in the Second Petition Group Letter have been properly addressed by the Developer and City Staff in accordance with the Land Development Code (the "**LDC**"), and the Staff Report fulfills its role to assist Planning Commission in making an informed decision about the Application.

For ease of reference, this letter and Exhibit A uses the same headings as Mr. Tobin, although we disagree with the characterizations made in these headings.

A. Incorrect information on a material issue.

The Second Petition Group Letter states that page 7 of the Staff Report incorrectly refers to "semi-truck trips" rather than "truck trips." The Second Petition Group Letter is correct that "semi-truck trips" is not a term used in the definition of "Light Industry" in the LDC. However, despite any minor typographical difference in the language of the Staff Report and the LDC, Staff is not advocating a "unique position" with respect to truck

trips because the Staff Report correctly identifies that Project Indiana's use of vans complies with the 50-truck trip limitation set forth in Section 11-3-3 of the LDC.

As discussed in our April 19, 2021 response (the "**Developer Letter**") to Mr. Patrick J. Tobin's letter dated March 30, 2021 (the "**First Petition Group Letter**"), the 50-truck trip limitation does not apply to Amazon's vans because Amazon's vans do not fit the definition of a "truck" for purposes of land use decisions such as those at issue in the Application. Although the Model Traffic Code does include a statutory definition of "truck" in C.R.S. § 41-1-102(108) that could be interpreted to include Amazon's vans, the City has adopted the Model Traffic Code only for the limited purpose of traffic enforcement in the City and not for land use decisions. The definitions in the Model Traffic Code are inapplicable and wholly irrelevant to land use decisions. For its land use decisions, the City relies on the traffic engineering-specific definitions and methodologies promulgated by the Institute of Transportation Engineers (ITE), which do not include cargo vans within the definition of a "truck." Therefore, for purposes of the LDC limitation, trips by Amazon's vans do not constitute "truck trips," and Staff properly concludes in the Staff Report that the number of daily truck trips proposed in the Application complies with the requirements for the Industrial, Light ("**IL**") zoning district.

B. **Material omission of information.**

According to the Second Petition Group Letter, the Staff Report improperly fails to mention that the Colorado Department of Transportation ("**CDOT**") has not yet granted an access permit for the proposed access point at the intersection of 68th Avenue and Indiana Street and that a preliminary review of the access point by CDOT rejected signalization of the intersection. However, these omissions were in fact proper because these comments are not relevant to the Application and do not relate to the criteria at issue. Pursuant to Divisions 8-3-3 and 8-3-4 of the LDC, none of the criteria for approval of a requested annexation or zoning address the review or approval of access points or access permits by CDOT. Additionally, the Developer has prepared and submitted to the CDOT its access permit applications.

C. **Summary Report**.

The Summary Report sets forth various citizen concerns related to the Application and Project Indiana. The Developer has provided responses to the concerns set forth in the Summary Report in an **Exhibit A** to this Letter for consideration by the Planning Commission. As a threshold matter, it must also be noted that, even if it were true that the Developer had not yet met its burden of proof demonstrating that the Application meets the criteria in the LDC for annexation and zoning/rezoning, the record is not complete until the hearing before the Planning Commission, including all presentations, public testimony, additional evidence, and questions and answers, is closed. Mr. Tobin appears to be attempting to file some type of land use Motion for Summary Judgment to attempt to persuade the City to dismiss the Application before it has been fully heard and considered by the decision maker. Although his clients, as members of the public, certainly have the right to comment on the application, the Developer, as the applicant, also has a right to due process, which includes a full hearing on the Application.

Although we understand that the Petition Group opposes Project Indiana, the Staff Report is not improper or incomplete in any way, but rather fulfills City Staff's obligations to the Planning Commission and the City and will assist the Planning Commission in making a fully informed decision about the Application.

Thank you for your consideration.

Sincerely,

Carolynne C. White

Exhibit A

Response to Summary Report for Zoning Compliance

I. Burden of Proof for Compliance is on the Applicant

The Summary Report correctly states that an applicant must demonstrate that a development application, such as an application for an annexation, zoning or rezoning, complies with all applicable review and approval criteria. *LDC § 8-2-3-2*. However, the Summary Report incorrectly replaces the review and approval criteria from the LDC with criteria not contained in the LDC. Applications for annexation, zoning, or rezoning are reviewed for compliance with the applicable review and approval criteria in Sections 8-3-3-3 and 8-3-4-2 of the LDC, and as discussed in the Application and Developer's two letters to the City accompanying the Application dated December 11, 2020 (the "**Application Letters**"), the Developer has satisfied the applicable review and approval criteria contained in the LDC.

II. Relevant Comprehensive Plan and LDC Requirements to Gauge Applicant's Compliance

A. Comprehensive Plan Requirements

The Summary Report argues that the Developer has not proven that the Application complies with a number of sections in the 2014 Comprehensive Plan (the "**Comp Plan**") related to (1) Comp Plan designation; (2) community character, urban design, and historic design; (3) redevelopment and infill; and (4) resource conservation and environment. It is important to note that the Comp Plan is an advisory document and projects need not promote every policy in the Comp Plan; rather the approval criteria for a zoning or rezoning listed in Section 8-3-4-2 of the LDC require that a zoning or rezoning be "consistent with" the Comp Plan.

Indeed, as noted in the LDC, and consistent with basic principles of land use law, the purpose of the Comp Plan is to provide policies to guide major decision-making, but the actual regulatory document of the City is the LDC itself. *LDC § 1-1-5-1*. The Planning Commission and City Council shall pay "reasonable regard" to the policies of the Comprehensive Plan, but it is not a binding regulatory document like the LDC. *LDC § 1-1-5-2*.

The Developer, in fact, has demonstrated clearly in the Application Letters that the Application is consistent with the Comp Plan, including the sections referenced in the Summary Report. We now will discuss how the Application is consistent with each of the Comp Plan sections referenced in the Summary Report.

1. Comp Plan Designation

A majority of the Property is designated as "Industrial, Office, Retail." *Comp Plan Fig. 2-8, Future Land Use Map*. As the Summary Report notes, this designation is intended to encourage development that "will minimally affect surrounding properties." *Comp Plan p. 2-28*. Project Indiana will minimally affect the surrounding properties, including the residences located in the vicinity of the Property, because of the Developer's thoughtful site design. The Property is approximately 34 acres in size, which allows the Developer to incorporate large setbacks for the building and parking areas and position the building and primary noise producing activities away from the existing residences.

Although Project Indiana's site design and orientation will ensure that Project Indiana minimally affects surrounding properties, the Developer also has integrated a number of features to further minimize Project Indiana's impact on surrounding properties. For example, the Developer is constructing a six-foot tall screening wall along a portion of the Property's northern border, dedicating 1.1 acres of land to the City to expand Maple Valley Park, installing additional on-site buffering, installing extensive landscaping to shield Project Indiana, using full cut-off light fixtures, and using 22-foot light poles (13 feet shorter than what is allowed on the Property). Additionally, much of Project Indiana is surrounded by other industrial and commercial uses of similar mass, intensity and scale, for which no mitigation or other protective measures are necessary.

Compared to other uses which would be allowed by right within an area designated as "Industrial, Office, Retail," Project Indiana is towards the low end of the spectrum in terms of its mass, intensity and scale. Therefore, Project Indiana fits squarely within the development envisioned by the Comp Plan for the Property.

2. Community Character, Urban Design, and Historic Design

The Summary Report erroneously suggests that Project Indiana does not comply with three policy statements within the Comp Plan goal for Community Character, Urban Design, and Historic Preservation.

First, the Summary Report identifies the Comp Plan policy of promoting integration within districts of the City through "context-sensitive design of new development" as a relevant policy statement. *Comp Plan p. 2-11*. Project Indiana supports this policy because Project Indiana represents the fulfilment of the City's goal of creating a city of different development character districts. *Comp Plan p. 2-11*. The Comp Plan recognizes that successful cities are not homogenous; rather, successful cities contain different types of development. In fact, as the Summary Report concedes, the City has identified the Property as ripe for Office / Light Industrial / Retail development. *Comp Plan Fig. 2-4*. Project Indiana is light industrial development, a use expressly envisioned by the City, and will allow the City to capitalize on a strategic investment in an area with predominantly commercial and industrial uses. Therefore, the Application promotes this policy statement.

Second, the Summary Report identifies the Comp Plan policy of "encouraging new infill development to consider and be sensitive to the character of existing neighborhoods . . . including building scale, placement, size, height transitions, landscape, streetscape, and other design measures" as a relevant policy statement. *Comp Plan p. 2-11*. Project Indiana supports this policy. The Property is vacant and primed for infill development, and, although the site design is not part of the Planning Commission's determination at this time, the Developer has considered the character of the existing neighborhood in its site design. Much of the Property is surrounded by other comparable commercial or industrial developments and, to the extent that the Property borders Maple Valley Park (the "**Park**") or is located near residential developments, the Developer has integrated the protective measures discussed in Section II.A.1 above, including buffering, into the site design to protect these uses from any negative effects caused by Project Indiana. Therefore, the Application promotes this policy statement.

Third, the Summary Report identifies the Comp Plan policy of working with stakeholders, developers, and members of the community "to consider a project's potential effects and strive for integration in a manner that helps enrich the district's character" as a relevant policy statement. *Comp Plan p. 2-11*. Again, Project Indiana supports this policy. As will be discussed in greater detail in Section III.E below, the Developer has actively worked with a number of stakeholders throughout the review process. The Developer has had a robust dialogue with stakeholders about Project Indiana's potential effects and ways in which Project Indiana can enrich the area, including making a standing offer to meet with members of Protect Maple Valley Park; holding an additional neighborhood meeting beyond that required by the LDC to hear and address community public feedback; reaching out to local businesses; reaching out to the Arvada Economic Development Association; and reaching out to the Jefferson County Economic Development Corporation. Therefore, the Application promotes this policy statement.

3. Redevelopment and Infill

The Summary Report also erroneously states that Project Indiana does not adhere to a number of Comp Plan design principles on Page 2-33 of the Comp Plan related to redevelopment and infill, intended to ensure that development and infill development complement the character and visual qualities of the area and existing development, and does not have negative impacts on existing neighborhoods. However, Project Indiana, in fact, is consistent with these design principles.

First, the overall scale, size, and setbacks of Project Indiana are similar to or compatible with those found on adjacent properties. Because the Property includes multiple parcels, Project Indiana can accommodate

larger setbacks than those found on adjacent commercial or industrial properties (or what would occur if the Property were to develop as individual parcels). Additionally, its scale and size are minimized by the site design as described in more detail above in Section II.A.1.

Second, Project Indiana preserves existing mature street trees and significant features to the extent possible. As discussed in the Developer Letter, Project Indiana fully complies with the City's requirements related to trees. The Developer is cooperating with the City to preserve existing mature trees during development and will plant approximately 830 new trees on the Property. The Developer also is making an additional payment to the City, which will allow the City to plant new trees in the Park.

Third, Project Indiana incorporates pedestrian friendly elements into its design. The Developer is constructing a detached sidewalk and planting trees along Indiana Street to enhance the area for pedestrians. Additionally, the Developer is constructing a pedestrian pathway along Fig Street at the northeast corner of the Property to connect with the Park.

Fourth, the new landscaping materials will be mature enough to visually integrate the new infill with the existing neighborhood within ten years. A variety of spruce and pine trees are proposed, providing dense screening along the floodway at the north border of the Property. In addition to the evergreen trees, a screen wall with alternating evergreen plantings of Inkberry Holly and Carol Mackie Daphne have been proposed along the northern parking areas.

Fifth, usable parks, trails, and open space will be incorporated to the extent possible. As discussed above, the Developer will be constructing pedestrian trails along Indiana Street and a portion of Fig Street. Additionally, the Developer will be dedicating 1.1 acres of land to the City, which can be used by the City to expand the Park.

Finally, it should be noted, and must be emphasized, that in planning, "compatible" and "complementary" do not mean "the same as." Rather, these terms refer to how land uses of different intensities can be located in proximity yet remain in harmony, due to the use of site design, buffering, landscaping, and other techniques. As will be further addressed in the subsequent site plan application (the "**Site Plan Application**"), Project Indiana can and will satisfy these design principles.

4. Resource Conservation and Environment

The Summary Report also states that Project Indiana is not consistent with Comp Plan goals and policies related to resource conservation and the environment. However, Project Indiana will minimize the impact of new development on natural areas to allow the continued cohabitation of people and wildlife and will not impact water quality in stream corridors.

First, the Summary Report identifies the policy related to buffers and setbacks for creeks, water bodies, existing wetlands, riparian areas, and wildlife corridors as being relevant to Project Indiana. *Comp Plan p. 4-12*. However, Project Indiana meets or exceeds all LDC requirements related to buffers and setbacks as demonstrated in the Application and Application Letters.

Second, the Summary Report identifies the policy related to water quality features in new development being required to minimize the degradation of stream water quality as relevant to Project Indiana. *Comp Plan p. 4-12*. As discussed in the Developer Letter, a project's impact on water quality in stream corridors is addressed during review of the Site Plan Application, and is not relevant to review of an application for annexation, zoning, and rezoning.

Third, the Summary Report identifies the policy related to protecting water quality through implementation of best management practices in the design of storm water conveyance and detention facilities as relevant to

Project Indiana. *Comp Plan p. 4-12*. Project Indiana's storm water conveyance and detention facilities will be addressed during review of the Site Plan Application, and are not relevant to the criteria for review of an application for annexation, zoning, and rezoning.

B. LDC Requirements

The Summary Report argues that the Developer has not proven that the Application complies with several sections in the LDC related to (1) the definition of light industry and (2) rezoning approval criteria. The Developer, in fact, has demonstrated clearly in the Application Letters that Project Indiana fits squarely within the definition of Light Industry and meets the approval criteria for rezonings.

1. Light Industry

The Summary Report claims that Project Indiana does not comply with the LDC's definition of Light Industry, highlighting the definition's "limited external impacts or risks" and uses that "involve fewer than 50 truck trips." However, as discussed in the Application, Application Letters, and Developer Letter, Project Indiana is a light industrial use within the definition of Light Industry.

Project Indiana does not have the same external impacts or risks such that the use would be defined as Heavy Industry. "Heavy Industry" uses are those uses that can be described as (1) primary processing, manufacturing, assembly or repair operations not specifically defined in the LDC which involve, among other things, a material risk of significant environmental contamination, explosion, or fire; perceptible ground vibration at the property line; excessive noise or dust emissions at the property line and downwind; and outside emission of objectionable odors; (2) processing of minerals, ores, logs, pulpwood, or fossil fuels; or (3) activities that must undergo New Source Review under the federal Clean Air Act, or are subject to construction or operation permits pursuant to the Colorado Stationary Sources Program or Title V of the federal Clean Air Act. *LDC § 11-3-3*. Project Indiana does not involve any of these activities.

Nor is Project Indiana properly defined as a Heavy Logistics Center. A heavy logistics center is a wholesaling, warehousing and/or distribution use that provides a central location for receiving, storing and distributing raw materials, semi-finished goods, or finished goods that generates more than 50 truck trips per day. *LDC § 11-3-3*. As discussed in this letter and the Developer Letter, Project Indiana does not generate more than 50 truck trips per day. In this context, the term "truck" refers only to large commercial semi-trucks, as defined in the ITE Trip Generation Manual, and discussed in more detail below.

All proposed uses associated with Project Indiana are allowed uses in the IL zoning district, and Project Indiana fits the definition of Light Industry in the LDC. *LDC §§ 3-1-2, 11-3-3*. Moreover, all proposed uses comply with the use-specific standards for primary land use set forth in Sections 3-1-3-7 and 3-1-3-8 of the LDC.

2. Rezoning Criteria

The Summary Report also states that the Developer has not proven that the proposed zoning and rezoning complies with the criteria for approval set forth in Section 8-3-4-2.A of the LDC. However, as discussed at length in the Application Letters, the Developer has provided ample information demonstrating that Project Indiana complies with the approval criteria.

First, as discussed above in Section II.A and in the Application Letters, the proposed zoning and rezoning is consistent with the Comp Plan. The Comp Plan supports Project Indiana's light industrial and office uses and Project Indiana's use of buffers and setbacks ensures that the development will have a minimal effect on surrounding properties. Moreover, the proposed development is comparable in scale to another use envisioned by the Comp Plan for the Property, large format retail, and in fact, has fewer off-site impacts than large format retail would have because large format retail typically generates more traffic.

Second, Project Indiana is consistent with the stated intent of the IL zoning district. The IL zoning district is intended to provide areas for light manufacturing, assembly and fabrication, office, research, food and beverage processing, packaging, bottling, and compatible recreational activities. As a last mile distribution facility, Project Indiana fits squarely within those uses, and therefore is consistent with the stated intent of the IL zoning district.

Third, facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire protection, and roads and transportation, as applicable) will, prior to the completion of the development, be available to serve the subject property while maintaining adequate levels of service to existing development. Moreover, as demonstrated in the traffic study submitted by the Developer, Project Indiana will not generate a significant amount of traffic, and the Developer will improve Indiana Street to handle the slight increase in traffic caused by the development.

Fourth, Project Indiana will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, or such impacts will be substantially mitigated. As discussed in the Application Letters and the Developer Letter, the development will not result in significant adverse impacts to the natural environment, and to the extent that any impacts are caused by Project Indiana, the Developer will mitigate such impacts. The potential impacts will be evaluated during review of the Developer's Site Plan Application.

Finally, the zoning and rezoning is consistent with the character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts. The IL zoning district is consistent with the character of the surrounding area because much of the surrounding area to the south and west of the Property contains industrial or commercial development. Moreover, to the extent that the Property borders the Park and is close to residential neighborhoods, the Developer will construct or install a number of protective measures to buffer those areas from any negative impacts caused by Project Indiana.

Therefore, the Application complies with Section 8-3-4-2.A of the LDC.

III. **Meeting the Burden of Proof for Light Industrial Zoning**

The Summary Report argues that the Developer has not proven that the Application complies with Light Industrial zoning requirements as a result of (1) truck traffic limitations; (2) the Developer's operations; (3) impacts on surrounding properties; (4) water quality impacts on Ralston Creek and the integrity of the Park as a natural area; and (5) work with stakeholders. However, the Developer, in fact, has demonstrated clearly in the Application Letters, the Developer Letter, and this letter, that the Application does demonstrate compliance with the requirements Light Industrial zoning. We now will discuss how Project Indiana is properly categorized as Light Industry.

A. Truck Traffic Limitations

The Summary Report asserts that Project Indiana exceeds the number of truck trips allowed for Light Industry. However, as discussed in the Developer Letter and this letter, this assertion is incorrect, and Project Indiana traffic does not exceed the permissible number of truck trips. While the Summary Letter cites definitions of "truck" from Colorado statutes and the Model Traffic Code, the City evaluates land use decisions using the definitions and methodologies promulgated by a different authority: the Institute of Transportation Engineers (ITE). The definitions and methodologies promulgated by the ITE do not include vans like Amazon's cargo vans within the definition of "trucks." The van trips generated by Project Indiana do not constitute "truck trips" for purposes of the LDC and do not violate IL zoning district requirements. Moreover, that Project Indiana may generate more than 50 "truck" trips per day on occasion during the holiday season does not violate the IL zoning limitation. Although the LDC does not explicitly discuss seasonal variation in truck traffic, land use decisions are not properly made on the basis of atypical or rare occurrences; rather,

the impact of uses is determined based on their average, or typical, characteristics. Therefore, Project Indiana does not exceed the 50-truck trip limitation in Section 11-3-3 of the LDC relevant to Light Industry.

B. Operations

The Summary Report argues that Project Indiana more clearly fits the definition of a Heavy Logistics Center, as defined in the LDC, than Light Industry. Project Indiana does not fit the definition of a Heavy Logistics Center because it does not typically generate more than 50 truck trips per day. The LDC explicitly states that the difference between a Heavy Logistics Center and Light Industry is the number of truck trips generated: "Heavy logistics centers are ***expected to generate at least 50 truck trips per day***. Warehousing and distribution uses that involve fewer than 50 truck trips per day are classified as light industry." *LDC § 11-3-3*. [Emphasis added.]

In support of the Summary Report's assertion that Project Indiana does not fit the definition of Light Industry, the Summary Report sets forth the following arguments, to which the Developer will respond in turn:

First, the Summary Report cites the Developer's statement that the proposed development will deliver packages within a 50-mile radius to argue that Project Indiana does not fit the definition of Light Industry. However, the delivery area covered by the development is not relevant to the classification of the development as a Heavy Logistics Center or Light Industry. As noted above, the principal difference between a Heavy Logistics Center and a use allowed in Light Industry is the number of truck trips generated by the use, not the area of delivery, and the number of daily truck trips generated by Project Indiana will typically be less than 50, which classifies the development as Light Industry.

Second, the Summary Report notes that Jefferson County expressed concern about the traffic impacts of the proposed development, and multiple parties have requested more information about the parking requested for the development. However, the nature of traffic impacts and parking concerns are not relevant to the classification of Project Indiana as Light Industry or a Heavy Logistics Center. Rather, as noted above, the relevant consideration is the number of truck trips, and Project Indiana will generate fewer than 50 daily truck trips. General concerns related to traffic and parking are addressed elsewhere in the Developer Letter and this letter.

Third, the Summary Report notes the types of parking spaces, size of the proposed building, and the number of delivery vans as being indicative of a Heavy Logistics Center. However, once again, none of these considerations are relevant to the classification of the development as a Heavy Logistics Center or Light Industry, and Project Indiana will generate fewer than 50 daily truck trips. As noted above, the relevant consideration is the number of truck trips.

Fourth, the Summary Report cites the Developer's assertion that the typical operation level of Project Indiana will be at 40% to 60% of the distribution center's capacity for 46 weeks out of the year. The Summary Report asserts that operating at this level of capacity for 88% of the year does not make economic sense and summarily concludes that the Developer must intend to fully utilize the capacity of the development, which would increase the number of truck trips past the limit for Light Industry. However, the Summary Report fails to take into account that not all businesses have a singular approach related to operations and investment capital. For Amazon, the development must be equipped to handle high demand for deliveries during the holidays, but the Developer reasonably does not anticipate that the demand for deliveries will require the same level of capacity for the other 88% of the year. That the Developer incorporates a range in demand in the design of Project Indiana in no way suggests that the Developer or Amazon intends to fully utilize the development's capacity on a regular basis after it receives approval of the Application. If such usage did occur, to the extent such usage resulted in routinely exceeding the allowed number of trips, or any other requirement of the LDC, the City has robust police powers to enforce such violations.

Finally, the Summary Report states that an Amazon distribution center recently built in the City of Loveland, Colorado, was given a heavy logistics zoning classification and placed within a zoning district permitting a heavy logistics center. However, the City of Loveland and the City of Arvada are not governed by the same zoning code, and there are key differences between the codes and governing processes of those cities that means that the zoning districts are not comparable. For example, whereas the LDC defines a heavy logistics center as a use that generates more than 50 truck trips per day, the City of Loveland Unified Development Code ("**UDO**") defines a heavy logistics center as a use that generates at least 12 truck trips per day. Therefore, the zoning classifications between the LDC and the UDO are not comparable for purposes of classifying Project Indiana as a Heavy Logistics Center under the LDC.

Consequently, Project Indiana properly fits the definition of Light Industry and not a Heavy Logistics Center.

C. Minimal Impacts on Surrounding Properties

As the Summary Report recognizes, the criteria for zoning and rezoning in the LDC require that the intended land use "will not result in significant adverse impacts upon the natural environment . . . or such impacts will be substantially mitigated." *LDC § 8-3-4-2.A.4*. The Summary Report asserts that the Developer "has not performed all the studies to investigate impacts of the [Application] to prove there are no such impacts." By making this assertion, the Summary Report misinterprets the criteria in the LDC. The LDC requires that there be no "significant adverse impacts" or that if significant adverse impacts exist that they "be substantially mitigated." The LDC does *not* require, as asserted by the Summary Report, that there be "no such impacts" at all. The Developer has performed all studies required by the LDC, and these studies demonstrate that Project Indiana will not result in no significant adverse impacts on the natural environment.

The Summary Report also objects that the impacts that the Developer addressed were "adjusted just to be under code maximum allowable levels" and that the Developer has not yet studied the cumulative light impact or nighttime visual impact to the surrounding neighborhoods. City Staff has determined that the existing photometric analysis is complete for purposes of the Application. The Developer agrees that the results of the photometric analysis demonstrate that impacts would be below the maximum allowable levels specified by the LDC. However, such results are grounds for approval of the Application, not denial. As the Planning Commission is aware, it is not possible to provide actual measurements for a facility that is not yet constructed. A photometric plan like that provided by the Developer is the appropriate way to predict the future lighting impacts for land use decision-making. Again, in the event that, following construction, actual light levels exceeded the allowable limits, the City has robust police powers to enforce the provisions of the LDC in this regard.

The Summary Report further asserts that the Developer has not provided any proof or studies demonstrating that Project Indiana will "substantially buffer or otherwise mitigate any negative impacts" to surrounding properties as required by Section 8-3-4-2.A.5 of the LDC. However, as the Summary Report acknowledges, during the additional neighborhood meeting, the Developer described various buffering techniques to be employed for Project Indiana, including screening walls, buffer areas, and landscaping. Greater detail with respect to such mitigation methods will be relevant and necessary during the Site Plan Application process and shall be available when relevant, necessary and appropriate. The Summary Report asserts that the Developer has neither studied nor substantially mitigated impacts to the surrounding area neighborhoods and other developments near the Property. This assertion ignores that further studies and mitigation measures are appropriately considered during Site Plan approval, not during review of an application for annexation, zoning and rezoning such as the Application. As Project Indiana proceeds through the Site Plan approval process, the Developer will cooperate with the City to design appropriate mitigation measures as the City directs. To the extent that the City determines that additional noise, light, air, or water impact studies are necessary for Site Plan approval, the Developer will certainly provide them.

The Summary Report also states that traffic impacts to communities including Maple Valley, Westwoods Mesa, Geos, Ralston Estates, and Hill Crest have not been studied. The Summary Report states that the

traffic impact analysis submitted by the Developer "was crafted for a specific purpose and is misleading" and that the traffic impact analysis "has not properly studied the impact of the proposed Project on the area road system." The Summary Report also requests information related to the "maximum traffic level" for Project Indiana. The traffic impact analysis submitted to the City meets the established engineering standards for such reports, including the use of the ITE Trip Generation Manual for the estimation of traffic volume. Prior to conducting the traffic impact analysis, the traffic engineers met with the City staff to determine the appropriate scope for the study. The traffic impact analysis includes all of the required intersections and movements as identified by the City. City Staff has not identified any deficiency in Developer's traffic impact analysis. Rather, City Staff has determined that the Application with the existing traffic impact analysis is complete for purposes of the Public Hearing.

The submitted traffic impact analysis demonstrates that Project Indiana will not have significant adverse impacts on surrounding neighborhoods and developments, which satisfies the approval criterion of a zoning and rezoning in Section 8-3-4-2.A.5 of the LDC.

The Summary Report also lists several items related to the traffic impact analysis that it states the Developer and City Staff discussed but which were not addressed by the Developer. The Developer will address each in turn as follows:

First, the Summary Report states that the traffic impact analysis does not use proper traffic information.

1. *Study does not use peak traffic flow or hours per the Holiday Operation schedule presented at the 3/11/21 public meeting and shows traffic flow for a low level of center operation.*

The traffic impact analysis evaluates the average operations of the last mile delivery station, which covers all days of the year excluding the four to six weeks during the holidays. Because Project Indiana is a low traffic generating use, the difference in traffic volumes between peak season and average operations do not change any results or conclusions reached in the traffic study. Nevertheless, an evaluation was conducted to analyze the peak season traffic, and no modifications to the intersection operations and offsite improvements were determined to be necessary to accommodate the peak season traffic.

Second, the Summary Report states that the traffic impact analysis excludes trips related to van fueling and servicing.

2. *The traffic flow does not appear to include trips for van fueling or servicing. The applicant declined to answer the question about vehicle fueling and servicing at the public meeting.*

This statement is incorrect. The traffic impact analysis included all truck trips into and out of the Property, including van fueling and servicing.

Third, the Summary Report states that the traffic impact analysis excludes truck trips related to trash removal.

3. *The traffic flow did not include truck trips for trash trucks or other types of heavy service vehicles.*

This statement is incorrect. The traffic impact analysis included all truck trips into and out of the Property, including trash trips and other heavy service vehicles.

Fourth, the Summary Report states that the traffic impact analysis was improperly conducted using data collected during the COVID-19 pandemic.

4. *The study traffic count data was taken in the summer during the* pandemic *and does not represent the pre-pandemic traffic flow and excludes school and work traffic. Additionally, the study did not examine traffic flow variation for whole days or by day of week.*

The Summary Report is correct that the traffic counts were conducted during the COVID-19 pandemic. However, the Summary Report fails to mention the number of measures implemented by the traffic engineer to ensure that the traffic counts reflected normal, pre-pandemic counts. First, the traffic counts were adjusted to normal traffic conditions by evaluation to historical traffic conditions pre-pandemic. Second, the traffic impact analysis included a seasonal adjustment. Third, the traffic impact analysis was conducted following the standard methodology and procedure required by CDOT and the City. Also, it is worth noting that, if anything, the traffic volumes used in the traffic impact analysis are likely conservative because the trend of more people working from home is anticipated continue into the future, well after the pandemic ends.

Fifth, the Summary Report states that the traffic impact analysis did not evaluate all relevant intersections.

5. *The study did not examine the traffic flow or impacts at the intersections of 69' and Indiana or Fig and Eldridge or the impacts to the residential areas and businesses served by the intersections.*

This statement is inaccurate. The scope of the traffic impact analysis was identified through discussions with the City and CDOT, and the intersections included in the traffic impact analysis were determined to be an appropriate scope to evaluate the impacts of traffic generated by Project Indiana on the surrounding street network. The City did not include other streets, such as the intersections of W. 69th Avenue and Indiana Street and Fig Street and N. Eldridge Street, because the City does not believe them to be significantly impacted by traffic generated from Project Indiana.

Sixth, the Summary Report states that the traffic impact analysis did not meet CDOT standards.

6. *The study does not meet CDOT standards for a traffic study to support state highway access permits.*

This statement is inaccurate. The traffic impact analysis was prepared per CDOT standards and has been submitted to CDOT. Additionally, the Developer has prepared and submitted to CDOT access permit applications.

Seventh, the Summary Report states that the traffic impact analysis did not use a plausible traffic growth rate projection amount.

7. *The study assumes a 1.1 % traffic growth rate for Indiana. Arvada demographics indicate west Arvada population growth has averaged 1.6 to 2.6% from 2010 to 2018 so a 1.1% traffic growth rate projection does not seem plausible.*

The Developer's traffic impact analysis used the CDOT and Denver Regional Council of Governments ("**DRCOG**")'s future traffic model projections as a baseline for the traffic impact analysis, which both indicate an average annual growth rate of 1.1% per year in the vicinity of Project Indiana. However, it should be noted that the actual traffic volume growth rate used in the Project Indiana traffic impact analysis is approximately 15% higher than the future traffic model projects projected by CDOT and DRCOG in order to account for additional known projects in the study area.

Finally, the Summary Report states that the traffic impact analysis failed to account for flex traffic.

8. *The study does not account for Amazon Flex traffic. The Applicant stated "routes" not "drivers". Each route can have multiple drivers. (SEE EXHIBIT #5)*.

Again, this statement is inaccurate. The traffic impact analysis included all traffic into and out of the Property.

The City is required to evaluate Project Indiana on its own applicable land use code requirements, and the characteristics of this project – Project Indiana – not on the basis of other projects the opponents have identified in other cities.

D. Water Quality of Ralston Creek or Integrity of the Park as a Natural Area

The Summary Report argues that the Application has failed to demonstrate "no impact" on the water quality of Ralston Creek or the integrity of Maple Valley Park as a natural area. However, neither the Comp Plan nor the criteria in the LDC for an annexation, zoning or rezoning sets forth a requirement that a new development have "no impact" on surrounding areas. As the Summary Report identifies, however, the Comp Plan does set forth goals to "minimize the impact" of new development and to "promote improved water quality in stream corridors." *Comp Plan Goal R-1, Goal R-2*. To accomplish these goals, new developments should provide buffers to ensure water quality and environmental integrity, include water quality features that minimize degradation of stream water quality, and protect water quality through Best Management Practices in the design of storm water conveyance and detention facilities. *Comp Plan Policy R-2.1, Policy R-2.2, Policy R-2.3*. As discussed above in Section II.A.4, the Application is consistent with these goals and policies set forth in the Comp Plan and any additional evaluation that is deemed necessary by the City will be completed during review of the Developer's Site Plan Application.

The Developer is in agreement with the Petition Group that the Park is an important environmental resource that must be preserved, protected and improved. For this reason, the Developer is committed to maintaining the Park as open space to ensure that the air, water quality, wildlife and vegetation will be preserved and protected. In accordance with the findings in the *Maple Valley Park Ecological Assessment* cited in the Summary Report, the Developer also is committed to minimizing impact of Project Indiana on the Park and Ralston Creek. To ensure proper stormwater management, the Developer will construct large retention ponds that minimize impact on Ralston Creek. To minimize the impact of lighting on the Park, the Developer will construct a screening wall and plant a number of trees along the northern border to screen the Property. The Developer also will utilize full "cut-off" fixtures and light poles 13 feet shorter than allowed by the LDC. To minimize any other impacts on the Park, the Developer is committed to cooperating with the City throughout the process for Site Plan approval to incorporate appropriate measures to mitigate any adverse impacts created by the construction of Project Indiana.

The Summary Report objects to Developer's assertion that the Park will act as a buffer between Project Indiana and the residential uses to the north of the proposed development, stating that the Developer must use its own property to create a buffer between Project Indiana and the Park. The Developer would like to emphasize that it will be using (and always has intended to use) its own Property to create a buffer between Project Indiana and the Park. Project Indiana will employ a variety of buffering techniques between the new development and the Park, including screening walls, open area, and landscaping. These buffering techniques are designed to protect the Park and Ralston Creek from impacts caused by the new development, allowing residents and visitors to continue to be able to enjoy the natural wildlife, vegetation and environment of the Park. To the extent that the Park lies between the new development and the nearby residential uses, the Park acts as a buffer between the development and the residential uses *in addition to* the primary buffering techniques planned for the development.

In addition to the concerns with respect to buffering, the Summary Report also sets forth a number of concerns related to stormwater and drainage. These concerns are addressed as follows:

First, the Summary Report expresses concern that vehicles may leak various fluids.

1. *The proposed parking lots have the capability to park about 1,400 vehicles which may leak various organic fluids or grease such as gasoline, motor oil, antifreeze coolant, and lubricating grease. Some of these fluids may contain soluble heavy metals such as copper, lead, and zinc.*

Although all parking lots have an inherent risk of leaving some fluids, Amazon's vans will be properly maintained, which will reduce the risk of leaking fluids. However, the stormwater pond is intended to have a water quality section specifically designed to remove pollutants before any stormwater enters public drainage system. Water will be held within an extended detention basin located in the pond, with the intention of pollutants settling prior to being discharged into the public drainage system.

Second, the Summary Report expresses concern that delivery vehicles may deposit solids and road salts onto parking lots.

2. *Vehicles may also deposit solids and road salts onto the parking lot surface.*

Although vehicles may deposit solids and road salts onto the parking lot surface, any solids and road salts will be treated within the detention pond prior to being released into the public drainage system.

Third, the Summary Report expresses concern that contaminants could be transported to the detention pond.

3. *During a storm event any contaminants on the parking lot surfaces will be flushed to the detention pond.*

The Summary Report correctly states that contaminants on the parking lot surfaces will be flushed to the detention pond during a storm event. Once flushed, the detention pond will treat the stormwater for water quantity and water quality, ahead of the stormwater being released to the public drainage system.

Fourth, the Summary Report expresses concern related to water treatment and discharge.

4. *During the public meeting of 3/11/2021 the Applicant's detention pond engineer stated they will treat water prior to discharge. (a) He stated the treatment included in the proposed design is for settling of solids only. (b) There is no treatment for any of the oil and grease or VOC (volatile organic compounds, ie. Gasoline) nor for salts. (c) The Applicant's engineer responded to a question about the treatment system being able to remove heavy metals to which he stated yes. This answer is only true if the heavy metals are present as a solid. (d) The sedimentation treatment system shown will NOT remove soluble heavy metals in the water. (e) There is a very real potential that human sanitary waste (both as urine and fecal matter) will be deposited in containers on the parking lot surface by delivery drivers which could make its way to the detention pond. (We note this in the attached exhibits showing recent national news coverage of this problem. Additionally, we have photos from a Denver area Amazon parking lot showing bottles suspected to be filled with urine along the parking lot curb where trucks line up to unload. (SEE EXHIBITS #6, 6a1, 6a2, 6a3).*

The principal issue the opponents seem to be raising here is that they believe the water treatment system will be inadequate. With regard to this issue, the Developer has submitted its proposed water quality and detention design to the City for its technical review, according to the applicable technical standards. The final design will be reviewed and approved as part of the Site Plan review process.

With regard to the farfetched allegation that Project Indiana will somehow generate human waste in inappropriate areas, as addressed in Exhibit A to the First Petition Group Letter, Project Indiana's facilities are designed above what is required for the utilization of restrooms in accordance with the building code and

truck and van drivers' scheduling will allow them to use restroom facilities inside the building. Regardless, even if such activities were to occur on the Property, as mentioned elsewhere, the City already has broad authority and a robust system in place for code enforcement, whether on public or private property.

Fifth, the Summary Report expresses concern related to a Colorado Stormwater Permit.

5. *The facility will need a Colorado Stormwater Permit. We asked the status of this permit during the public meeting of 3/11/2021 but have not received an answer.*

A Colorado Stormwater Permit is not required for approval of the Application but will be obtained as required as part of the Developer's Site Plan Application.

Sixth, the Summary Report expresses concern with water quality standards and detention.

6. *Jefferson County in their referral comments of January 26, 2021 stated the following: 'Water quality standards will need to be implemented with the detention. This is especially important due to the large amount of parking proposed for the site.*'

To the extent such additional standards may be necessary or required by the City, they will be incorporated into the final design during the Site Plan review process.

Seventh, the Summary Report expresses concerns related to parking lot size.

7. *City staff asked a similar question about the parking lot size in their review of the project.*

The final design and dimensions of the parking lot will be determined during the Site Plan review process.

Eighth, the Summary Report expresses concerns related to water treatment related to stormwater.

8. *We DO NOT believe that the Applicant is providing an adequate water treatment system to treat the stormwater for the oil and grease, VOCs, and other potential constituents. The Applicant has not addressed how they will prevent human waste from entering the stormwater detention system nor how they intend to treat such waste."*

See above regarding water treatment, and concerns regarding "human waste."

Ninth, the Summary Report expresses concerns related to solid waste.

9. *The Applicant has not addressed solid waste in the parking lot and has stated they will not have outside trash receptacles or bins. This also presents a water quality issue as trash will blow into the detention pond and offsite also. Denver area Amazon parking lots seem to have issues with waste as evidenced by the photo exhibit. (SEE EXHIBIT #3, 3a1)*.

Such plans are typically not part of the annexation or zoning/rezoning application process. To the extent such plans are required by the City, they will be provided at the appropriate time in the development review process.

Tenth, the Summary Report expresses concerns related to snow removal.

10. *The Applicant has also not developed a snow removal and stacking plan. A plan is necessary to ensure snow melt water flows to the detention pond for treatment and not offsite.*

Such plans are typically not part of the annexation or zoning/rezoning application process. To the extent such plans are required by the City, they will be provided at the appropriate time in the development review process.

Finally, the Summary Report expresses concerns related to the need for a composite map.

11. *We have not yet received a composite map and we have asked the Applicant and City staff for this overlay map on several occasions. The overlay map should include the following: Project site plan, floodplain, wetlands, Ralston Creek, contours, detention pond, and Hathaway access road. A composite of these layers is crucial for the stormwater analyses which will give a better understanding of the potential impacts.*

All Site Plans provided by the Developer have, as applicable, shown the location of floodplains, contours, wetlands, detention ponds, and the Hathaway access road. The Developer cannot show the surveyed boundary of Ralston Creek because Ralston Creek is not located on the Property and the Developer does not have legal access to creek to conduct a survey. Moreover, it is important to note that the inclusion of Ralston Creek in any Site Plans is not necessary for the Site Plan Application because Project Indiana will have no impacts on the creek.

E. Work with Stakeholders

The Summary Report asserts that the community's concerns with Project Indiana have not been addressed by the Developer and that important citizen questions have not been adequately answered. According to the Summary Report, the Developer's response to the community has not been consistent with Comp Plan Policy CC-1.4, which states, "[t]he City will work with stakeholders, developers, and the community to consider a project's potential effects and strive for integration in a manner that helps enrich the district's character." According to the Summary Report, citizens have requested detailed information that has not been provided regarding the proposed operations, including the size of the operation, number of employees, hours of operation, traffic volume, where employees will come from, and impact studies. However, it is important to note that the approval of the Application constitutes an approval of the annexation, zoning and rezoning of the Property to the IL zoning district, not approval of the Developer's specific proposed operations. Additionally, throughout the review process for the Application, the Developer has complied with all requirements of the LDC with respect to community outreach and has in fact gone above and beyond those requirements to listen and respond to community concerns. The Developer has provided as much information as possible, where relevant to the Application.

With respect to the neighborhood meeting held November 18, 2020, the Summary Report provides a list of concerns on a variety of topics that it states have not been addressed. The Developer has the following responses:

1. Traffic

Traffic and access are Site Plan issues and are not related to the Application. However, the Developer has provided a traffic impact analysis responsive to citizen concerns about the impact of Project Indiana on local traffic.

2. Lighting

Lighting is a Site Plan issue and is not related to the Application. The Developer will provide a photometric plan in its application for Site Plan approval. The Developer is committed to employing techniques to alleviate potential off-site lighting impacts, such as using cut-off lights and shorter light poles in the parking areas.

3. Wildlife

As the Summary Report notes, citizen concerns related to wildlife were addressed by reference to a study that showed no concerns.

4. Noise

As the Summary Report notes, the Developer addressed concerns about noise by demonstrating that the proposed building will be placed on the south side of the Property and that parking lot noise should be minimal. Additionally, Project Indiana will comply with the noise ordinance enacted by the City.

5. Parking

A parking plan is not required for the Application and is appropriately considered as part of an application for a Site Plan. However, throughout the Application review process, the Developer has provided detailed information to the City with respect to Developer's requested parking. The City has accepted this information, and the Planning Commission will determine whether the parking information is sufficient for processing of the Application.

6. Stormwater

Stormwater issues are appropriately considered as part of a Site Plan application. Nonetheless, as the Summary Report notes, the Developer has addressed concerns about stormwater affecting Ralston Creek by describing the proposed detention pond and storm water quality treatment measures. Further details related to water treatment will be addressed during review of the Site Plan Application.

7. End User

The end user of a property is not relevant to the Application. However, as the Summary Report notes, citizens have been informed that Amazon is the intended end user of the site.

The LDC requires one neighborhood meeting as part of the review process for applications for annexation, zoning, and rezoning. *LDC § 8-2-2-2*. However, in an effort to further involve the community in the review process and to respond to community concerns, the Developer held an additional five-hour long neighborhood meeting on March 11, 2021 (the "**Second Meeting**"). Although the Summary Report suggests that the Developer failed to answer a majority of community questions during the Second Meeting, the Developer responded to as many of the more than 500 questions posed in the Second Meeting as completely as possible during the five-hour meeting and published a summary consolidating the answers to those questions. In the First Petition Group Letter, Mr. Tobin set forth a list of questions that he asserts were unanswered during the Second Meeting. The Developer has responded to each of these questions in the Developer Letter.

The Summary Report also identifies two additional items that it considers to be examples of the Developer not working with the community. The Developer responds as follows:

First, the Summary Report asks why proposed changes to the intersection at 69th and Indiana are a part of Project Indiana and notes that the changes have not been discussed with the community. It should be noted that access and traffic concerns are considered as part of the Site Plan Application. These issues will be addressed at the appropriate time in the review process.

Second, the Summary Report states that the Developer has failed to respond to questions posed by the Petition Group related to the proposed fueling, vehicle servicing, vehicle washing and vehicle repair noted in

the Application. However, the Summary Report does not identify what specific questions have gone unanswered. The proposed uses, including the fueling, vehicle servicing, vehicle washing and vehicle repair uses are not stand-alone uses; rather, they are intended to complement the last mile delivery facility. Moreover, these uses are permitted within the IL zoning district, and therefore, do not impact the Application with respect to the zoning and rezoning.

In an effort to ensure that the Developer has heard and responded to all citizen questions and concerns, the Developer has also offered to meet with members of Project Maple Valley Park. This invitation stands, although no group members or representatives have yet accepted. As demonstrated by the Second Meeting, the Developer Letter, and the Developer's invitation to meet with members of Project Maple Valley Park, the Developer has not only met but has gone above and beyond the requirements of the LDC for community outreach, and the Developer's commitment to community outreach is consistent with the policies of the Comp Plan.

IV. **Conclusion**

As demonstrated above, in the Application, the Application Letters, and the Developer Letter, Project Indiana complies with all of the criteria in the LDC relevant to the annexation, zoning and rezoning of the Property and complies the IL zoning district standards. The Summary Report does not identify any instances of noncompliance with the LDC, including with the definitions in the LDC.

In its conclusion, the Summary Report requests as a remedy that the motion for approval of the Application be tabled until all of the issues raised in the Summary Report have been addressed. However, as described in the Developer Letter, this remedy is not appropriate. Pursuant to Section 8-2-2-2 of the LDC, the proper process is for the Planning Commission to determine whether the Application is sufficient to support approval of an annexation, zoning and rezoning after a public hearing. It is not appropriate for City Staff or the Planning Commission to preemptively table an application prior to a public hearing based on a prediction of what the Planning Commission may or should find if the public hearing were to go forward.

Based on the materials included in the Application, the Developer Letter, and this letter, the Developer respectfully requests that after a public hearing the Planning Commission find that the Application satisfies all of the criteria in the LDC for approval of an annexation, zoning and rezoning.

April 7, 2021

To whom it may concern:
Please include my public comment set forth below in the April 20, 2021 Arvada Planning Commission meeting information packet, regarding the annexation and rezoning of Maple Valley Park and the property included in "Project Indiana".

As a 30-year resident of Arvada, and specifically a 28-year resident of the Maple Valley neighborhood, I oppose the annexation and rezoning of Maple Valley Park and Project Indiana to light industrial use for the purpose of building an Amazon distribution center. To date, a number of the community's and City's concerns have not been addressed by the developer. These concerns range from traffic impacts, to pollution, to preservation of open space, amongst others.

Although there are many unanswered questions, there is something that we do know: this facility will change the fabric of our community. This community relies on Maple Valley Park as its access to the natural world, an escape from the hustle and bustle of our ever-growing cityscape. With the Amazon distribution center looming along the park's fragile boundaries, taking over the wetlands' "buffer" zone, people will no longer be able to experience nature in their own neighborhood. Everything unnatural coming from the facility; traffic noise, human produced waste, truck emissions, and light pollution; will take its toll on the community.

There are many scientific studies indicating that accessibility of and exposure to nature significantly reduces depression, anxiety, and stress. These mental health factors in one individual may be easily addressed through counseling or pharmaceuticals, but when applied across an entire community these problems are not as easily managed. Preventative action must be taken to keep these problems from seeping into the community. Maintaining Maple Valley Park as accessible nature with its buffer at the Project Indiana property is an easy action to take. This follows the values of the Vibrant Communities and Neighborhood Work System, one of five work systems that aligns with the city's priority areas in the Biennial Budget.

This Amazon distribution facility does not fit into the values set out by the City of Arvada for its Biennial Budget. Please do not annex and rezone the property included in the Project Indiana for light industrial use. Please follow the Parks Master plan and the City's Comprehensive plan to find another use for this land if annexed into the City of Arvada.

Sincerely,

Audrey Tobin

Ladies and Gentlemen,

I am writing in opposition to Scannell's Project Indiana to build an Amazon distribution center.

I believe the traffic study is flawed and does not accurately reflect this business's impact on traffic. The current traffic study does not include the impact of traffic to and from the proposed distribution center on Fig, the connector streets to Fig, or the impact on nearby residential streets. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig and adjacent connector and residential streets. A realistic traffic study needs to include these streets and volumes.

Thank you,

Anita Clark

Ms. Hope, thank you for your email. I am forwarding it to the City Clerk so that it can be made part of the record when we consider this project during a quasi judicial public hearing. It is not appropriate for Council to comment on the project prior to that public hearing. We will consider all of the evidence presented, including emails such as yours.

> If you do not live in this area, then you are NOT qualified to determine what should be built here!!!!!!! STOP!

I have lived in Arvada since the early 70's, grew up here, moved to Arizona and then moved back. People stay here because Arvada has (or HAD) a small town feel. It was SAFE, it was friendly, it was clean. Not anymore, because you all are ruining it and not keeping it safe, and you are not keeping the people of Arvada safe!! Have you not learned anything from the fiasco that is Walmart???

Stop thinking of money and start thinking of people! PLEASE!!!! Be loyal to the people that LIVE here and not your own pocketbooks or egos!!!!!!!!!

Disturbed,
Geraldine Wright

Fwd: Proposed Amazon Warehouse

WFP POA [redacted] Sun, Mar 21, 2021 at 12:59 PM
To: djones@arvada.org, mdeven@arvada.org
Cc: RICHARD KUBERSKI <rokuberski@msn.com>, protectmaplevalleypark@gmail.com, mwilliams@arvada.org, rstachelski@arvada.org, jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@arvada.org, dmiller@arvada.org, bfifer@arvada.org

Dear Councilman Jones, Mr. Deven, and all,

I am the president of the Wildflower Ponds Property Owners' Association.

Our neighborhood is located on the south side of 64th Avenue, between Indiana and Gardenia Streets.

A number of us listened in on the March 11 online meeting with the Amazon people and their representative from Scannell.

Based on the information provided in that meeting, I have some surrounding questions.

The first question is regarding road maintenance. We know some of the streets involved in this project are under CDOT authority for maintenance, but we have concerns surrounding the traffic this project would generate. In one piece of information given by Amazon, they showed up to 42 semi truck trips during peak traffic, and my understanding is this traffic will be going through the intersection at 64th & Gardenia. This intersection is already poorly maintained, with many potholes and pavement damage in the lanes going southbound from Gardenia onto eastbound 64th. How does the city propose to ensure enough money is set aside to maintain this intersection?

Two examples of improper planning surrounding traffic/maintenance issues come to mind:
1. Our neighborhood was slated for a full repave in 2020, but we were told we had been put off because resources had been redirected to other, more urgent, projects. How will the city ensure this same scenario does not happen at the 64th & Gardenia intersection?
2. The development of Candelas brought an immense amount of increased traffic to the 64th & Indiana intersection. This intersection was not redeveloped until WELL AFTER the problem was already negatively impacting this intersection. Were traffic studies faulty? Could the current traffic study surrounding the Amazon development also be faulty? What is not being addressed before it becomes an issue?

Further, with 64th & Indiana being state-maintained roadways, how does the state plan to ensure proper maintenance? I could not easily find an email address for the person at CDOT who might be the proper person to answer this question.
Perhaps one of you could reply with that email address?

Next question, we are curious as to how the city and county benefit from this development.
How are revenues other than vehicle tax/registration generated and what do you project these revenues to be?
What other benefits has Amazon promised the city and/or county, besides the road improvement of Indiana at its immediate location?
What is the motivation for Amazon and/or the city/county for placing this facility in a mostly residential/light industrial area? We see no advantage to this area (traffic, insfrastructure, parks, home values) in placing this facility here.

Next point: we believe Amazon's agenda in putting this facility this close to homes includes the testing and implementation of limited radius drone delivery even though the Amazon rep stated this is not in their current plan.
Amazon Corporation has stated for quite some time that drone delivery technology is an objective of their corporation.
We have also read that drones will land atop street lights to recharge.
Amazon also uses its drones to gather analytics subsequently used to market products and services.
The drones will also be noisy, maybe noisier than the vans currently illustrated in their plan, and we do not welcome the additional noise.
We would ask that Arvada be made a drone-free zone, to keep our property values high.

Final question - what noise mitigation measures will be implemented? There are housing developments to the north, east, and south of this property.
We have homes which back to 64th, and anticipate noise from semi backup alarms will be generated, and we imagine this noise will carry across 64th, especially if occurring in the middle of the night, when traffic on 64th is virtually nonexistent. We also expect the noise of semi trucks moving through the 64th & Gardenia intersection to be disruptive. The Amazon rep stated the van backup alarms will not make significant noise due to the traffic pattern into and out of the warehouse area (one-way, always forward) , but we did not address how the vans will initially be moved out of their parking places. If this involves backing up, it will create alarm noise.
How do you plan to enforce noise ordinances in our area? Noise is already bad mid-evening from racing diesel trucks and modified cars and there seems to be no enforcement now. Why would our neighborhood want to increase our nighttime noise?

Lastly, Mr. Kuberski had submitted the following question in his email on February 7. Has anyone provided him/us with the list of contacts for surrounding HOAs?
"I believe that the City has contact information for the HOA's, can you furnish me with a copy for the area surrounding the project in question?"

As may be readily apparent, our neighborhood is not in favor of this development. We feel the city is not necessarily looking out for the interests of current residents, nor do we feel the city is doing a great job of maintaining existing infrastructure, and do not feel adding more pressure to an already overwhelmed system is the best idea.

We suggest Amazon look at other, more appropriate areas for this development, such as Highway 93.

I look forward to your response to our questions.

Thank you,
Anne Schweitzer

Subject: Proposed Amazon Warehouse

February 7, 2021

Mr. David Jones

Arvada City Council - District 4

Dear Mr. Jones,

This is Richard Kuberski from the Wild Flower Ponds neighborhood.

As news of the proposed Amazon Warehouse in West Arvada spreads around, many of my friends and neighbors, myself included, are very concerned about this proposed project. All we really know is what little information has been in the press. Size of building, size of parking lot and location.

The building itself is not so much of a concern as are the activities that will be associated with this project. To date, the light industry area to our north has not had a deleterious effect on the surrounding residential neighborhoods. But this Amazon project has the likely potential to overload the very few roads available to them to move the huge number of large and medium sized trucks that will service this warehouse.

Wild Flower Ponds and the other neighborhoods surrounding this project most certainly want an opportunity to be involved in any decisions affecting our part of the City/County.

We would like to have the opportunity to review all of the information that the City has on this project. I tried to find information on this project on line, but was not able to. Has there been a formal submittal to the City or the Planning Commission? If so, can you furnish me with a digital copy?

We would also like to have an opportunity to meet in person with Amazon project managers, City officials and other interested parties. We know this can be done because it's been done before for us. Most recently was when Home Depot wanted to have zoning changes to allow them to build in the residential area to the north of the Westwoods Shopping Center. A project that was wisely decided to be inappropriate for that location.

I believe that the City has contact information for the HOA's, can you furnish me with a copy for the area surrounding the project in question?

We appreciate your time on this issue and look forward to being involved in this process.

Thanks,

Rich Kuberski

Dear Council Member April 7, 2021

I am Bob West, a Fourth generation Arvadan and longtime supporter of what is best for Arvada, not special interest groups. I say this from 13 years on Jeffco Open Space, 17 years on Financial Oversight Committee for Jeffco Schools, Jefferson Economic Council 7 years 2 as Chairman, Chairman of .25% Tax increase in 2006 for more Arvada Cops, and 8 years North Jeffco Park and Rec. District (Apex PRD) 2 years as president. Because of my love for Arvada, I must address the self-serving protest for the Amazon Distribution Center by the residents of Maple Valley.

People who continually feel they can tell land owners what they can do with their land has always bothered me. The only ones who have this right are the local jurisdictions who have well intended rules and regulations and the interests of the entire City of Arvada, not Maple Valley residents.

When I was on Jefferson Economic Council, we were always looking for primary employers who would move their business' to Jeffco, and I had particular interests in Arvada. We would use a 3.5 multiplier for total job creations. One primary job would be responsible for 3.5 more jobs to support this business. I do not have how many jobs the distribution would bring to Arvada, but I would assume 400 would be a good number. Which is 1,400 support jobs for a total of 1,800 new jobs for Arvada. I spent the last 20 years of my career working in Arvada and if Amazon can present that opportunity to some Arvadan's, then they will have happier employees and personnel who take pride in representing both them and their City.

Currently all Amazon deliveries emanate in Thornton which is 15 miles from the proposed site. Assuming 2 van loads per day, 200 vans, 7 days a week, you get 84,000 miles a week. Do we need these wasted miles wearing out highways, addition pollution, and excess traffic in the Metro? Remember we are all part of Metro Denver and we need to do our best in being good neighbors, not 500 people in one neighborhood.

I like to have these letter be one page and I am sorry to run over, but this is a key issue for ALL OF ARVADA. 1,800 new Jobs, especially for younger people who are trying to find themselves. Getting Amazon to pay for getting Indiana finished four-laned from 64th to 72nd and a signalized intersection for the City Maintenance Center and School bus Center. Win-Win for everyone. Please keep in mind you represent all of Arvada and the Amazon Distribution Center is best for all of Arvada, Jefferson County, and Metro Denver.

Thank You

Bob West

Subject: Amazon warehouse

City Council of Arvada,
My family has lived in three different houses in Arvada during the past 31 years. We moved recently to I am dismayed that Amazon wants to build a warehouse in a prime area of west Arvada, near treasured wildlife habitats along Ralston Creek and residential properties that were built to enjoy the beauty of the surrounding area.I have two adult children who work in supply management for different companies. Their companies' warehouses are nowhere near residential areas. There is a good reason for that zoning.
Long term studies show that pollution is high in communities with warehouses and diesel trucks. Not only will the quality of life be affected by the noise and air pollution, a warehouse will add traffic in an already congested area at 64th and Indiana. Not one of my neighbors has told me that they think a warehouse close to 64th Ave is a good idea. Please listen to your constituents and help Amazon find an area that is not close to established residential property.
Thank you.

To: jbebo@arvada.org, nford@arvada.org
Cc: rstachelski@arvada.org, lsimpson@arvada.org

Good Morning All Interested Persons:

I hope this email finds you all well. As a resident and tax payer of Arvada and West Wood Mesa, I am once again writing in opposition to the Amazon distribution center at 68th and Indiana. This area is not the most ideal place to allow 21 semitrucks and hundreds of distribution vans to operate. Indiana St. struggles, and this is putting it lightly, with traffic as it is. Additionally this center is planning on using drones to deliver packages and can use AI to send ads to the homes it flies over. I have come to enjoy my quiet neighborhood, as I am sure you enjoy yours. This would substantially change that environment. What will become of the Ralston Creek trail in that area? We are likely to see a significant amount of noise pollution, light pollution on that section of trail. Many people exercise on the trail and walk the trail for the peaceful tranquility that it provides. Approving this project would destroy that!. This project, at least in this area, is a BAD idea. I am for business coming to Arvada but better strategic planning can be completed before just giving the green light. Wouldn't this area be better served as an "Old Town Arvada, West?" There are hundreds of tax paying residents that are against this. We are your voting constituents.

Finally, As Scannell Properties has withdrawn the minor variation and adjustment applications from the county, where is Amazon locating the main access driveway off of Indiana? Please provide and make public all current information that you have about the 68th Avenue and Indiana Street intersection plans and the access permit application to CDOT?

Have a wonderful day.

Scannell Properties, aka Project Indiana (Application #DA2020-01117) and Maple Valley Park Annexation (Application #DA2020-0118)

Brian Glover [redacted] Fri, Feb 19, 2021 at 12:23 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Dear Mr. Bebo-

My name is Brian Glover. I am an Arvada "native" who has lived in Arvada from the time I was 6 months old until now (63 years total). I have a lot of heritage in Arvada and my relatives are the Spano's (whom you may have heard of).
My Grandfather and Grandmother Spano owned a celery and other produce farm in Arvada and my mother and her sisters were born in Arvada on that farm. My mother went to Arvada High school as did I and my siblings. I've lived in Olde Town Arvada, central Arvada and west Arvada. I currently live in west Arvada and have since 2002. I've seen a tremendous amount of growth in Arvada on the west side since moving here and I'm certain development will continue to be a regular occurrence. My hope is that we see "smart" and "sensible" development that is a good fit for the surrounding area.

I'm writing today to voice my concerns about the Scannell Properties (AKA Project Indiana and Maple Valley Park Annexation).

I do not believe that a large Amazon distribution center and warehouse is a good fit in the area being considered. There are many other individuals who live nearby that feel the same. Here, I list a variety of reasons why Amazon should not locate in this area:

- The development of that size is out of place within the surrounding area. It's a huge operation and will be operating 24/7 in a relatively quiet area near a park, open space and adjacent homes.
- Indiana street is incredibly busy now with traffic and may not be able to withstand a new large development that will see a huge increase of traffic coming off of and onto the street. The surrounding/adjacent streets will also see a tremendous increase in traffic that may not be able to support it.
- With increased traffic including large trucks transporting goods, and vans constantly in and out, maintenance of Indiana and adjacent roadways will need to be constant resulting in an increased cost to everyone that pays for road maintenance.
- The Ralston Creek Trail is in very close proximity to the proposed warehouse site and will be totally disturbed by having the Amazon facility functioning 24/7. This trail has historical significance to Arvada and should be respected and left as undisturbed as possible. Development should be considered that fits with the historical significance and character of that trail.
  - This trail area is a habitat for many kinds of wildlife (birds –including owls and raptors, squirrels, bobcats, raccoons and more) and would be severely disturbed by a large warehouse and accompanying traffic, lights, noise and activity. Numerous trees will have to be removed to build the Amazon facility. This is an extremely negative thing for the creatures that now use them for living, mating, hiding, finding food and shelter. They will all have to relocate which should not be acceptable without an incredibly valid reason.
  - The trail is used by numerous people every day for exercise, relaxation and nature viewing and would be negatively impacted by a large warehouse and accompanying traffic, lights and activity within close proximity.
- Amazon may wish to have a distribution area out on the west side of the Denver Metro area. Locating it in western Arvada may help them but would be negative for mostly everyone else. There are other areas to consider for such a large Amazon operation. Perhaps somewhere along I-76 in the already busy industrial area. It's only about 10 minutes away from the proposed Arvada site, meaning quick access to the west area. I'm certain that there are other possibilities for location as well.
- There is a shortage of restaurants in the west Arvada area meaning the potential lunch crowd of Amazon workers would not be handled efficiently. Where will these workers go to eat? What about that increased traffic at that time? Not everyone brings their lunch every day.
- Homeowners' property values nearby are bound to decrease after Amazon locates in the proposed site. After all, if someone wants a home, it's hard to imagine they would be satisfied living close to a huge, noisy industrial operation. As a result, the value of the home because of the area it's in, will logically decrease.

I'm certain that revenue potential should not be the overwhelming consideration for Arvada approving this project. Revenue streams can be identified and captured in other more reasonable development projects in the vacinity. It's critical that we are respectful to the people, animals and the accompanying ecosystem and habitat that has long had a presence in the area. It is not fair or equitable to suddenly have a large industrial neighbor like Amazon right next door that dominates all and sacrifices so much. Amazon is a huge corporation that can easily find another suitable location for development. They will not be negatively impacted if they cannot locate here but the people already here certainly will be if they do.

Thank you and please feel free to reach out to me to discuss any of this further.

Brian Glover

Project Indiana comments for March 16, 2021 meeting

1 message

Bill Kun [redacted] Tue, Mar 2, 2021 at 11:33 AM
To: cedboardsandcommission@arvada.org

After review of the Project Indiana project proposal I have the following comments-

One would be hard pressed to find a less appropriate developement for the site in question. The close proximity to the residential areas and adjacent greenbelt/trail is totaly in conflict with the proposed use. There will be high levels of traffic 24/7, (On an already overly congested Indiana) truck engines idling 24/7, back-up warnings going off 24/7. HVAC/airconditioning will run24/7- try sleeping within earshot of that all summer long. And there will be high levels of parking lot lighting all night. For anyone living nearby it will be a nightmare.

Storm water run off will inevitably create pollution to the creek and tax the stormwater system. Regardless of engineering studies, it will happen. As a facility and operations manager for large sites I know this to be an almost universal constant.

In addition, the Ralston trail and greenbelt is an amenity which is irreplaceable to the residents of Arvada. Having such intense development next to it shows a complete lack of vision or understanding on why people chose to live in this area. It is the lack of intense commercial developement, trails and openess that attracts residents. There are far more valuable uses for this site than what is being proposed. This area should be given far more consideration as the asset it is, rather than just another spot for another commercial eyesore.

Amazon Distribution Center

Beth Tannehill <[redacted]> Mon, Mar 22, 2021 at 4:37 PM
To: Jeremiah Bebo <jbebo@arvada.org>

Dear Mr. Bebo, ,

I am writing to express my opposition to the Amazon Distribution Center proposed location off Indiana and 67th Streets in Arvada. After reading the Phase I Environmental Impact Report (prepared by Terracon in September of 2020) I have multiple concerns about the long-term safety for residents of the area if Amazon is allowed to build at this location.

My concerns, in part, are based on these conclusions in Terracon's report:

-The former presence of leaking underground storage tanks at 6730 Indiana Street.
-The reported presence of an historical landfill at a south-adjoining property
-The long-term maintenance operations, including historical use of a waste oil UST, which lacked adequate closure sampling, at the west-adjoining Arvada Fleet Maintenance Division facility.
-Likely use of PFAS-containing AFFF at the west-adjoining, Arvada Fire Protection District Training facility

According to Terracon's report: "Based on the scope of services, limitations, and conclusions …, Terracon recommends conducting additional investigation.… If the client anticipates encountering groundwater in the down-gradient vicinity of the west-adjoining Arvada Fire Protection District Training facility as a result of redevelopment activities, Terracon recommends analyzing groundwater in that area for PFAS compounds to evaluate ….management practices are warranted."

Per Amazon's own schematic, their plans create an entrance at Indiana Street directly across from the Arvada Fire Protection district Training Facility. This construction would potentially disturb the groundwater. I can find no information that an additional, more comprehensive, environmental study has been conducted. Has the groundwater been tested for PFA compounds? According the the U.S. Fish and Wildlife National Wetlands Inventory, Ralston Creek is a Riverine and is thus considered a wetlands area. As recent as 2013 the area flooded due to heavy rains and is considered a flood plain. There is a clear relationship between groundwater, wetlands and the flood plain in Ralston Creek. According to FEMA "Surface water, ground water, floodplains, wetlands and other features do not function as separate and isolated components of the watershed, but rather as a single, integrated natural system. Disruption of any one part of this system can have long-term and far-reaching consequences on the functioning of the entire system."

It is clear that additional information on potential hazards must be gathered before the City of Arvada and/or Jefferson County authorize any building at this location. It seems incumbent for city and county officials to thoroughly consider the health and safety of residents and the costs of disturbing the watershed before agreeing to any rezoning or building applications. For these reasons I believe that Amazon's rezoning request should be denied and that the proposed Amazon Distribution Center is better suited to a different location.

Sincerely,
Beth Lovering
7258 Kendrick Street
Arvada

Proposed Arvada Distribution Center

Beth Tannehill <[redacted]> Mon, Feb 15, 2021 at 8:10 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Dear Mr. Bobo,

Hello, we are residents of Westwoods Estates, a neighborhood located at 72nd Avenue and Indiana Street. We are writing to express our opposition to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, this is the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton. Why would Arvada or Jefferson County grant a zoning variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why we believe Amazon's request for a zoning variance to build at this location should be denied:
* **Building Size:** Amazon's building will be +/- 112,000sf with a height of 44 feet, which is greater than the current 35 foot Arvada height limit code.
* **Light Pollution:** The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 sf parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of residential and rural properties.
* **Noise Pollution:** Future drone operations proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.
* **Environmental Impact:** The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species.
* **Traffic:** Amazon's initial traffic study suggests at least an additional 1,400 trucks per day coming and going from the Distribution Center. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36 or C470? In addition, there will be surely be a few hundred truck and van drivers and drone operators coming and going from their homes in other parts of town to the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

Residents are drawn to this part of Arvada and Jefferson County for its rural feel. Our property is adjacent to a cattle ranch. Riders cross 72nd with their horses to walk through our neighborhood. Bobcats roam our streets with their kits. A 24/7 distribution center, bringing with it noise and light pollution as well as a significant increase in traffic noise from thousands of trucks, vans and drones is at odds with the rural feel of this area and will diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other, more appropriate nearby locations.

Sincerely,

Scott and Beth Lovering
7258 Kendrick Street
Arvada, Colorado 80007

Amazon Distribution Center in Arvada

Bryan Lindsey <[redacted]> Sat, Feb 20, 2021 at 1:36 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>
Cc: michelle [redacted]

Jeremiah Bebo,

We are residents of Westwoods Estates, a neighborhood located west of Indiana St. at 72nd Ave, and we are writing to express our opposition to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, **this is the only facility that would be located in a primarily residential area**.

All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25.

Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are the reasons why we STRONGLY believe Amazon's request for a zoning variance to build at this location should be denied:

- **Building Size:** Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?

- **Light Pollution:** The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes.

- **Noise Pollution:** Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.

- **Environmental Impact:** The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species.

- **Traffic:** Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will be entering and exiting the Distribution Center. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36 or C470? In addition, there will be surely be a few hundred truck and van drivers as well as drone operators coming and going from their homes in other parts of town to the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

My wife and I, and our neighbors, moved here to raise our family in the quiet suburbs of West Arvada. IF **YOU** allow this facility to be built in our neighborhood, with all its impacts mentioned above, you will be responsible for destroying the community culture we have fought to hard to preserve.

Would **YOU** want to raise your family, live or retire in a community with such noise and light pollution from drones and trucks continuously moving around your neighborhood?

We ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Bryan, Michelle, Sam & Ben Lindsey

7249 Kendrick St.
Arvada, CO 80007

Re: Development Application #DA2020-0117 – Project Indiana

We have reviewed the documents related to this project and have some major concerns.

Impact on the roads and streets in Arvada.

As the proposed location is not located near a major highway, the 12-15 semi trucks which will go to the "distribution center" every night will have to take Ward Rd and 64th Avenue as an option. Both streets already have very heavy traffic which require maintenance and repair on them. The City and state are already overburdened with both. Unfortunately, the citizens of Arvada weren't willing to increase a funding source for the maintenance and repair. Can either street handle so much increased traffic? We don't think so.

If the option of using Indiana Street to get to a state highway is used, that will impact the already bumper to bumper traffic on the street all day long.

It looks like the proposed 3 entrances to the parking lot off of Fig Street is a suggested way for 12 semi trucks, 896 vans and 292 associates (employee) to get to the parking. This increase of traffic 24 hours a day will have an incredibly negative impact on the Hillcrest and surrounding neighborhoods, let alone 64th Ave. and whatever access used to get to 64th.

At a time when the City of Arvada is trying to implement a sustainability plan, adding the traffic 24/7 of hundreds of employees, vans for delivery and 12-15 semi-trucks only adds to the impact from fuel emissions and would be counter to any effort the City is making to have a sustainable city. As there is no public transportation to the site for hundreds of employees who do not live in adjourning neighborhoods, they will have to drive from other parts of the Denver Metro Area. This project contributes nothing to Arvada and causes much harm. It is a very poor location for a "distribution center" with so much traffic.

Annex property from Jefferson County and rezone to light industrial.

While we are not opposed to the annexation of the property and the rezoning to light industrial, we would question how this proposed Project Indiana with a distribution center and so much traffic fits the definitions of Industrial/Office -Light Industrial (Arvada Comprehensive Plan page 2-28), which discusses development that will minimally affect surrounding properties. The project also does not meet the definition of "Land for Employment Use" (Arvada Comprehensive Plan Policy ED 2.1). This policy targets industries that include medical, manufacturing, research and development, biomedical, energy, enabling technology and professional services**.** A warehouse and distribution center doesn't fit either of these definitions or examples and impacts all the neighborhoods surrounding the project as well as the whole character of West Arvada.

We are strongly opposed to Project Indiana. We are sure that the City has other development options that would fit the various planning documents of the City.

Sincerely,

Wendy Brown

Project Indiana Distribution Center Development

2 messages

Benjamin Stanley [redacted] Wed, Feb 24, 2021 at 9:31 AM
To: jbebo@arvada.org, cedboardsandcommission@arvada.org

Greetings Jeremiah and City of Arvada Officials,

Thank you for taking the time to illicit public comment regarding the proposed development of a 24/7 distribution center located on Indiana Street in Arvada.

As a neighbor and longtime resident of Arvada, I would like to express my strong opposition to this project in the proposed form. I chose to raise my two children in this neighborhood based on the quiet nature and access to walking trails and the mostly undisturbed viewshed of the foothills and North Table Mountain. This proposed distribution center is in direct conflict with the neighborhood values and the reason why residents moved here in the first place.

Traffic along 64th Avenue, Indiana and McIntyre has increased exponentially and is already congested and busy. The intersection at 64th and Indiana is constantly backed up and is the scene of constant MVAs. The addition of hundreds of semi truck trailers and vans going through the area will only serve to increase congestion, frustration, and dangers to the commuting public. The increase in traffic will drastically decrease the quality of life enjoyed by residents in the area, who are proud to call Arvada home.

I realize that this undeveloped parcel of land would likely be developed at some point. I am a wildlife biologist, and I have enjoyed the wildlife that frequent the area including Great Horned Owls, Red Tailed Hawks, Bald Eagle, Osprey, Bobcats, mule deer, coyotes, and even a mountain lion. Vital wildlife corridors such as these should be preserved whenever possible, however I understand that some will eventually be developed. Some functions of these valuable corridors can still be preserved with other development that does not include constant vehicular semi truck traffic, vans and unmanned aerial vehicles (UAVs). Development of the parcel to include constant traffic, light pollution and a massive parking lot will ensure that all wildlife, including the bald eagles that travel east from Arvada Reservoir will be driven out of the area permanently.

The other proposed development for the property, the mixed use development including commercial and residential space could be developed in a way that would both preserve the neighborhood home values, and allow for the wildlife (some federally protected species) to continue to inhabit the area and utilize the wildlife migration corridors. I believe this route would be a winning situation for everyone involved, City of Arvada included.

To be clear, I am in strong opposition of the proposed distribution center, in any form. I would however, be in strong support of the mixed use commercial and residential development of the area to include restaurants and local businesses. This area has very few options for dining, particularly within walking or biking distance. If the City of Arvada is looking to develop the area in a way that would increase tax revenue, provide services for residents, and increase home values while keeping the roadways quiet and safe, then either a vote of non-development, or the mixed use development is undeniable the correct choice for the residents that you represent.

Thank you for taking the time to read my email, and please make the decision that will support the sentiments of the City of Arvada residents and taxpayers.

Ben Stanley

Good Morning Ben,

Thank you for your comments. I will make sure that they are added to the record.

Regarding the annexation and rezoning applications, a Planning Commission public hearing will be held virtually on March 16th and a City Council public hearings will be held later this spring. Public notice will be given as required by the Land Development Code.

Please utilize the webpage we have created on the City's website to obtain additional information on the project including links to the plans.

Ms. Thompson,

The City of Arvada has created a dedicated webpage for this project, which can be found here. The webpage has links to all aspects of this project's applications and a link to the packet for the Planning Commission on April 20th. The documents include all of the information related to the proposed access drive off Indiana Street.

Traffic study

2 messages

Bonnie Thompson <[redacted]> Thu, Feb 11, 2021 at 4:24 PM
To: cedboardsandcommission@arvada.org

Concerns public meeting March 16, 2021.

I am writing in opposition to Scannell's Project Indiana to build an Amazon distribution center.
I believe the traffic study is flawed and does not accurately reflect this business's impact on traffic. The current traffic study does not include the impact of traffic to and from the proposed distribution center on Fig, the connector streets to Fig, or the impact on nearby residential streets. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig and adjacent connector and residential streets. A realistic traffic study needs to include these streets and volumes.
Thank you,
Glenn and Bonnie Thompson

Hello Ms. Thompson,

We have received your comments for Project Indiana and will included them in the packet that is sent to the Commission, the packet will be available on March 11, 2021 and can be viewed online. Due to the increase interest in the March 16th meeting, KATV will air the meeting on channel 8 and 880 as well as provide a live stream at www.arvada.org/live-stream. Please let me know if I can provide any other assistance to you.

Thank you,

Fulfillment center

Brian Turner [redacted] Mon, Feb 1, 2021 at 1:28 PM
To: jbebo@arvada.org

Jeremiah,

My name is Brian Turner and my home is at 7159 Devinney Ct. Arvada. Recently I have learned of a potential building sight for an Amazon fulfillment center that is 115’000 sq. ft. facility with over 800 delivery vans and 46 load bays to stock the facility. There is a reason that distribution centers of this size are not located in proximity of neighborhoods. The 24 hour 7 days a week traffic and activity at these facilities would destroy what we all are trying to support and build in West Arvada. We were drawn to this area to this area for the outdoor accessibility and condition of the neighborhoods. The investment that we have made into this community would take a very large negative hit if this plan were allowed to go through. Please reconsider and put yourself in our shoes.

Concerned citizen,

Brian Turner

One of the surest ways to know a human reached out to you is when we make a mistake. It's the most human thing. Our email yesterday had a bad link and may have tripped your local IT security settings when you attempted to click to our website. Here is the article with the link corrected. Our apologies and happy reading!

Our land bank community of practice is expanding!

Pittsburgh announced new leadership to get their land bank up and running. We also received word from our friends at Center for Community Progress that they have a new staff to helm their Georgia efforts.

How exciting!

From our experience working with land banks since 2012, we see three ingredients as critical to success:

- Strong political buy-in at the top,
- A clear plan or strategy, and
- Organizational commitment to implementation.

Seems pretty simple, right? Not so much.

Political leadership gets pulled in different directions or turns over from elections. Best laid plans sometimes don't pan out and a pivot or shift is required. And the commitment to implement may be strong at the start, but wanes over time.

We've written a bit about this topic in our latest blog post, titled "A Man A Plan a Canal Panama." Check it out.

If you or your community are considering a land bank or any other strategy for turning around distressed property, give us a call. We've been at the forefront of community revitalization going on a decade and are happy to share lessons learned. You can also see some of the other topics we are writing about on our website.

Amazon

Cari Gerlock <[redacted]> Sun, Apr 11, 2021 at 8:39 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Mr. Bebo,

Please do what you can to stop the Amazon project from moving forward. We and most of our neighbors moved to the awesome area of west Arvada to avoid this kind of development. It would be very disappointing to have to move and take our tax dollars elsewhere because of this continued development...the majority of residents in this area chose this location because of the lack of traffic, congestion, noise, and light pollution. This is what makes this part of Arvada so special! We trust our city officials will do everything they can to support the residents of Arvada in keeping these types of developments out of our neighborhoods.

Thank you for your time and support!

Re: Amazon/Scannell Properties proposal

The virtual meeting that was held by this group to inform residents what was being proposed gave some information that needs to be explored. They glossed over these items like they had no major significance. Please address the following issues.
During this meeting it was mentioned that they propose to use the southern entrance off of 65th way and Gardenia St. when leaving for deliveries. They indicate that at non holiday season there will be about 200 trucks leaving this site around 10:00 AM. Using their count, if a truck left the site every two minutes that would be over 6 hours of non stop vehicles leaving the site. I use this route to go to the nearby shopping areas at McIntyre. The thru traffic on 65th has right of way turning right from 65th to Gardenia. Coming from the opposite direction on 65th, I could never get through the train of trucks leaving the site. As I understand it, during the holiday season the number of trucks will more than double. How can the city allow this kind of traffic on a street system that was not designed to have this kind of use?
Item 2, they indicated that the lighting at the parking lot would be reduced to 70% of normal during the night. Even at 70% the light pollution would create a glare that will extend far beyond, the one block away on the Ralston Creek greenbelt, where I live. This will virtually ruin the atmosphere of living in a semi rural area which people living on the greenbelt enjoy. I am not the only resident in this area that feels this way.

I am adamantly against this project especially when they could move this further north past Candelas, where the area is not as densely populated, has a lot of open land, and it would have less of an effect on wildlife.

Sincerely, Craig Johnson

Proposed commercial distribution site between Indiana St and Fig St

[redacted] < [redacted] Tue, Feb 16, 2021 at 12:17 PM
Reply-To: [redacted]
To: "jbebo@arvada.org" <jbebo@arvada.org>

Mr. Bebo,

You will hear plenty of legitimate reasons, from Maple Valley Park residents, why this annexation and rezoning is a poor and misconceived idea. Here is another reason from a Ralston Valley/Shadow Mtn. Park resident. Just across Indiana from this site is an industrial building that has been vacant for quite a while. It is already in an industrial area with the Jefferson County school district bus lot and City of Arvada streets division on the south. It would have no more impact on the local citizens than it already has. Why, in the name of common sense, wouldn't city and county officials look at this alternative rather than trying to disrupt hundreds of lives and lower all property values. So what, if it isn't as large a site. Your office should have some bright people in it, you can figure it out. It might cost more but the proposed company that will use this site is has plenty of money. The City has already allowed two new commercial warehouses to be built on Fig street with multiple bay doors for truck pickup/delivery. Now you want to add 1000 plus commercial and employee vehicles traveling the streets. This proposed annexation and rezoning should never get past your office.

Adamantly, Craig Johnson

I am writing in **opposition** to Scannell's Project Indiana to build an Amazon distribution center.

1st - This is not what we the residents want of Arvada. I realize the Pro Growth stance that the city takes but this is just too much!! Roads are not maintained with existing increased traffic from additional housing built. This will only make road maintenance worse AND will NOT add to Quality of Life in Arvada.

2nd - I believe the traffic study is flawed and does not accurately reflect this business's impact on traffic. The current traffic study does not include the impact of traffic to and from the proposed distribution center on Fig, the connector streets to Fig, or the impact on nearby residential streets. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig and adjacent connector and residential streets. A realistic traffic study needs to include these streets and volumes.

The current traffic studies only estimate 1,352 daily trips and underestimates the daily trips by a factor of three, since it does not account for 292 building employees and the 896 van drivers–a total of 4,168 trips per day
• 292 building employees making a trip in and a trip out = 584 daily trips
• 896 van drivers making a trip into work and out of work = 1,792 daily trips
• 896 van drivers making a delivery trip out of the premises and a delivery trip returning to the premises = 1,792 daily trips
• An acceptable traffic study needs to include realistic estimates.

The current traffic study does not include the impact of traffic to/from Fig and the connector streets to Fig or the impact on nearby residential streets
• Limited access from Indiana and peak volumes in/out will force employees and delivery vans onto Fig and adjacent connector streets and residential streets
• A realistic traffic study needed to include these streets and volumes.

Cc: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>, "jbebo@arvada.org" <jbebo@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "nford@arvada.org" <nford@arvada.org>

It's Amazon rather than the less confrontational "Project Indiana". Call it what it is.

I realize it would be improper for Council to respond but here's another email to add to the "packet".
The traffic study guy could not say who paid for the traffic study he did but later referred to "WE" when talking about having the vans and employees enter and leave following a specific route. His study is highly suspect given the pandemic and traffic patterns over the last one year.
Of the 4 hour call, a whooping 20 minutes was allowed for Maple Valley's time to the point of calling "1 minute left" while the PR spin from Amazon continued for **hours** to present the Kool Aid to be consumed by Arvada (or pronounced another way by one of the Amazon talking heads who cares so much about our community he couldn't be bothered to know how to say Arvada).
The call was not open and transparent and clearly was delayed for 2 weeks while a PR firm could work their magic and control the entire call. It was scripted and constrained.
This will not enhance life in Arvada! It does nothing to help any Arvada Small Business.
We do not need their 1000 employees (their number for a 6 week+ seasonal spike) nor the 12+ semi's per night nor 500-600 daily vans (again - their numbers) and the traffic, congestion, noise and pollution brought by all that. Common sense tells a rational person these numbers do not correspond with the numbers and low traffic impact that was presented by the Traffic guy.
As for job opportunities for Arvada citizens, when asked, Amazon could not even say what the retention rate of employees is (Really???! Every large company knows that and Mega Amazon certainly knows it too).

Bottom line - Still NO! And for my part I will NEVER buy another thing from Amazon.
I will be highly disillusioned should the Arvada City Council (and Jeffco for their part) allow this monstrosity to intrude on our lives and already changing community.
Arvada seems to want to be the Aurora of the west side. Stop it!

Jeremiah Bebo <jbebo@arvada.org>

Amazon Distribution Center West Arvada

Carol Tveitmoe [redacted] Wed, Feb 3, 2021 at 6:23 AM
To: Jbebo@arvada.org

Mr. Bebo,

I am writing as a Citizen and Native of Arvada for over 62 years and currently own a home and live in West Arvada Whisper Creek subdivision. My opposition is in regards to the proposed Amazon Distribution Center at 66th and Indiana. In addition, I have a daughter who is a Manager employed at one of the local Amazon Distribution Centers so I am familiar with the Distribution Centers.

The size and operation of this large development and it being a 24/7 operation is going to negatively impact residents in the West Arvada home developments as well as the Wildlife surrounding. Commercial operations of this magnitude should not be put in the middle of a residential neighborhood. It does not meet the current character or culture of this area. Indiana is already stressed with high traffic volume especially at the intersection of 64th and Indiana and to add more high volume traffic from the Distribution Center is unreasonable. I had read whereby a project traffic study was completed during the Covid lockdown so it is highly inaccurate.

I am also very concerned about the height of the building 44' not meeting Arvada's code of 35' as well as the lighting 24/7 and the noise created by a very large industrial building. It seems like we just went through this with the City Council and planners for the development of storage units in West Arvada. The development of these businesses in the middle of residential areas just does not make sense. It is not good for the people of West Arvada! In my opinion these sites should be away from residential homes.

It is my hope that you will listen to all the concerns about this Amazon Distribution Center development and make good and thoughtful decisions about building a very large commercial project in our communities. We moved to West Arvada for a reason and it was not this.

Sincerely,
Carol Tveitmoe

Planning Commission/City Council

Re: Amazon Distribution Center

To Concerned Parties:

We are addressing you regarding our concerns surrounding the Amazon distribution center. It is our understanding and belief that the location is being used in accordance with the land development code and we have no quarrel with that aspect. In fact, we are pleased that the increased activity will aid the local businesses and increase the City of Arvada's sales tax revenue. Hopefully, these increases can be used for the required road improvements.

Our concern is in relation to the traffic infrastructure that the development will require. In its current state, traffic on Indiana, 64th Avenue and 72nd Avenue can be daunting. Local residents experience difficulty gaining access to these roadways and there are numerous wait times, darting merges and safety concerns. These observations and experiences are based on daily use of the roads and we assume are known to the City of Arvada. Adding the Amazon employee traffic, along with the in-bound delivery box trucks and tractor trailers to their existing delivery traffic will greatly increase the vehicle count levels. We understand that Amazon plans on staging the timing of in-bound deliveries and employee arrivals/departures that may create a full time "rush hour" on these roads.

Consequently, we request the detailed plans for improvements to the roadways to handle this increased traffic be made public. We assume the impact will be from Simms on the east to Highway 93 on the west and from 96th Avenue on the north to Highway 58 on the south. The number and location of additional traffic lights, turn lanes, the planned decrease in traffic speeds, the widening of Indiana to four lanes and the traffic light timing coordination should all be publicized. Currently we are only aware of one additional traffic light at 68th and Indiana that is being considered.

We also understand that portions of the roadways are State of Colorado controlled. We assume that the City of Arvada has contacted and planned with the State of Colorado and we would also like to have this information publicized. It is no secret that the Colorado and Arvada roads and highways have been neglected for years in favor of other expenditures. We would like to believe that this project will not be an extension of that neglect.

In summary, what are the planned improvements for traffic control in the area within the borders listed above?

Thank you,
Dave Doherty

DENISE BOHON <[redacted]> Mon, Apr 19, 2021 at 11:10 AM
To: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>

I am opposed to this proposed development. It is clearly not compatible with the surrounding character of our neighborhood. It is a massive asphalt parking lot equivalent to 15 football fields! How is that compatible with our neighborhood! And it brings all the associated pollution with it. The parking lot will cause an increase in the chemical pollutants into Ralston Creek adversely affecting the water quality and function of the stream. The settling pond can not and will not be able to “filter out” chemicals that are dissolved in water (basic chemistry), nor will it filter out petroleum based pollutants. The large black surface area will function as a heat generator, increasing air temperatures in the surrounding area, and causing increased water temperature pulses into Ralston Creek. This is a project that belongs in Commerce City, not in my neighborhood.

Cc: Deborah Guiducci <dguiducci@guiduccilaw.com>

Dear Arvada City Council Members:

I am vehemently opposed to the proposed Amazon Warehouse located off of Indiana close to 64th Avenue. I live in Maple Valley and I walk my dog daily on the Ralston Valley Trail and thru the Maple Valley Park. I am very concerned about the 24 hour traffic at this proposed Amazon Warehouse sight. The other warehouses in this area do not have 24 hour operations nor do they have this extreme amount of traffic. I believe that the traffic studies that you have conducted are inaccurate and that if employees are included, the number of trips going in and out of this facility will be close to 4200 vehicles per day. I do not want the traffic congestion, light pollution, and noise from this type of facility to ruin my peaceful use and enjoyment of the Ralston Velley Trail, the Maple Valley Park and my home in Maple Valley. Amazon also wants to start using drones. I absolutely do not want drones flying over my house multiple times per day which would again interfere with my peaceful use and enjoyment of my house. This proposed Amazon Warehouse will undoubtedly hurt my home values because of the constant light pollution, noise, drones, and traffic congestion. This is not the area of Arvada to place this kind of facility and this high traffic, 24 hour warehouse is not consistent with the other businesses in the area.

I believe that this parcel of land in Arvada would be more beneficial to area residents if it was turned into an area with small restaurants and shops that is walkable. We desperately need more restaurants in this area of Arvada and this would benefit both the City of Arvada with increased tax revenues, while at the same time increasing our home values in the area and being an attractive place for the community to gather.

If you persist in your approval of this Amazon Warehouse at this location, I hope that you make Amazon 1) improve the roads and traffic lights to handle 4200 vehicles per day; 2) make Amazon install a large dense grouping of tall blue spruce to act as a buffer for sound and light pollution; 3) prohibit Amazon from using ANY drones at this location; 4) change the access patterns so that Amazon traffic is forced to enter and exit on Indiana only to avoid having 4200 vehicles go through the neighborhoods.

I hope that you vote against any proposed measures including rezoning, which would enable Amazon to build a Warehouse in this location.

Sincerely,

Deborah K. Guiducci

To: <POD@arvada.org>

Dear Arvada Planning,

Please do your homework. To maximize revenues, Amazon will optimize their robotic process automation. As automation system flexibility increases and costs continue to decline, so to will employment decline. So much for local employment growth.

Commercial real estate prices will soar, and so may new projects. Arvada will get a small bump in population, and a huge bump in truck traffic and associated infrastructure costs. City revenues will increase, but continue to lag expenses, and the bond market is clearly ballooning. So much for sustainable growth.

My question to the council and planners: do you envision Arvada the next Boulder, or Commerce City? Also, this growth will require expansion of Indiana, where you've got many concerned citizens, not to mention radiological concerns along the Flats.

Kind regards,
Dave Knutson

Amazon distribution facilities and Community Involvement

dave [redacted] <[redacted]> Tue, Mar 23, 2021 at 2:34 PM
To: Jeremiah Bebo <jbebo@arvada.org>

Dear Mr Bebo,

Thank you for the courtesy of reply.

Suffice it to say I place little faith that community voice will ever be heard given their weak voting drive and the strong presence of real estate professionals in the City Council.

Arvada isn't what we moved back into 30 years ago. It's looking more and more like "Generic Overbuilt Suburb USA," with green space gone (not everyone should be entitled to zoning changes to develop their land), strip malls with vacancies for decades (Builders Square and Home Depot lease buyouts) while the City pays to move Carpet Exchange for Costco (when does their tax deferral end?), residents complaining about being next to dumps (or plutonium trigger factories, on top of coal mines, in river drainage, etc), new developments need only build a turning pocket or get the City to subsidize roadways (who's paying for those bonds?), traffic (most daylight hours it's 20 mins to get across town), brownouts and blackouts, construction dust (Candellas - maybe Cesium too!), landfill debris (polyester fiberfill in our yard apparently from Republic mattress recycling miles west of us), water that used to be fresh but now tastes like pool water with all the chloramine, and excessive reliance upon builder self-inspection (fox guarding henhouse, which I and my neighbors are still paying to correct).

Finally, Arvada has an excessive reliance upon PUDs. It's in public literature, journals, and in my own anecdotal observations from decades as a board member at two associations. PUDs drive residential spite, anger, and indifference - individual ("it's my property so I can do what I want") or electoral ("the city's not involved in my neighborhood so no one I vote for really cares what happens here"). They may save a few admin dollars but HOA enforcement pits neighbor against neighbor, rather than against an amorphous "City Hall." This indifference means people don't look out for each other, and that gives criminals a place to breed.

Like that Boulder criminal.

IMHO.

Kind regards,
Dave Knutson

1 message

David Konigsberg [redacted] Tue, Apr 6, 2021 at 3:27 PM
To: cedboardsandcommission@arvada.org

I would like to ask the planning board to consider a plan to complete Eldridge while deciding on this plan. The current plan for completing Eldridge relied on the selling of all commercial parcels in this area and the amount from the sales would pay for the road. I have been informed at other meetings that the amount collected will be at 1980? prices and will not cover the cost to complete this piece of road.

If we were to approve the Amazon WH there will be increased traffic in our neighborhood and it vital that Eldridge be completed so as to alleviate pressure from other local roads in the area, such as Deframe, Beach and Yank to name a few. Allowing this development will greatly increase the traffic in this area and continuing to kick this decision down the road without a plan or funding is reckless. At minimum use this opportunity to properly fund and complete Eldridge so that there are more ways for traffic to flow through our neighborhoods.

Thu, Mar 11, 2021 at 2:27 PM

David Trumbo, OD
[redacted]
5823 Cole Way, Arvada

Concerned about the Indiana Amazon Project.
Some quick points
1. A project that should have easy freeway access
2. Indiana and the parkway have yet to be upgraded, finished or even started or built.
3. Will there be easy access in the future to properly engendered roadways leading to freeway access to avoid traffic through residential?
4. Impact on local residential quality of life.
5. Possible future lawsuits if there is an impact on residential neighborhoods.
6. Amazon has enough money to purchase land close to 36 or 50.

These are some of the questions I had when Arvada started Candelas and Leydon Rock. I always wondered why the county and city allowed suck large scale projects before improving the infrastructure? Now, once many familues live in these areas it makes it more difficult.

I lived in orange county california for several years and developments weren't allowed until the infrastructure was in place first. Libby Szabo would tell me it's all about the money. I can't believe there isn't enough new money coming from these developments.

Just some food for thought

Project Indiana

Diane Vliem <[redacted]> Sun, Feb 14, 2021 at 12:43 PM
To: mwilliams@arvada.org, jbebo@arvada.org

Two negative impacts need to be avoided to keep Arvada attractive to home and business.

1. Protect the meager amount of park space Arvada can enjoy! Studies increasingly show the health benefits of outdoor and natural spaces. It would be a shame on Arvada, to reduce any dedicated land for parks. Arvada has a long held reputation of, "never seeing a developer it didn't like". Change that, and protect our open space and park land!

2. The gross negative impact of traffic and air pollution on Indiana. Indiana historically was a pleasant drive through fruit farms, equestrian centers, creek and cottonwoods. To keep attracting residential and business interests in Arvada, PROTECT what we love.

Arvada now has clout to stand up to mega corporations and protect the standard of quality in our beloved city.

Please do your diligence in protecting our parks, air quality, and reduce traffic on Indiana St.

Mr. Guiducci,

The City of Arvada has created a dedicated webpage for this project, which can be found here. The webpage has links to all aspects of this project's applications and a link to the packet for the Planning Commission on April 20th. The documents include all of the information related to the proposed access drive off Indiana Street.

Opposition to Amazon 24 hour warehouse

3 messages

Ed Guiducci [redacted] Mon, Mar 1, 2021 at 10:19 PM
To: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>, "jbedo@arvada.org" <jbedo@arvada.org>, "nford@arvada.org" <nford@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>

Dear Arvada City Council Members:

I am a resident of Arvada and am very opposed to the City of Arvada permitting Amazon to build a 24 hour facility off of Indiana and North of 64th Avenue. I live near-by and my family and I use frequently use the Ralston Valley Trail and Maple Valley Park. I am very concerned about the 24 hour traffic at this proposed Amazon Warehouse sight. The other warehouses in this area do not have 24 hour operations nor do they have this extreme amount of traffic. I believe that the traffic studies that you have conducted are inaccurate and that if employees are included, the number of trips going in and out of this facility will be close to 4200 vehicles per day. I do not want the traffic congestion, light pollution, and noise from this type of facility to ruin my peaceful use and enjoyment of the Ralston Velley Trail, the Maple Valley Park and my home in Maple Valley. Amazon also wants to start using drones. I absolutely do not want drones flying over my house multiple times per day which would again interfere with my peaceful use and enjoyment of my house. This proposed Amazon Warehouse will undoubtedly hurt my home values because of the constant light pollution, noise, drones, and traffic congestion. This is not the area of Arvada to place this kind of facility and this high traffic, 24 hour warehouse is not consistent with the other businesses in the area.

I believe that this parcel of land in Arvada would be more beneficial to area residents if it was turned into an area with small restaurants and shops that is walkable. We desperately need more restaurants in this area of Arvada and this would benefit both the City of Arvada with increased tax revenues, while at the same time increasing our home values in the area and being an attractive place for the community to gather.

If you persist in your approval of this Amazon Warehouse at this location, I hope that you make Amazon 1) improve the roads and traffic lights to handle 4200 vehicles per day; 2) make Amazon install a large dense grouping of tall blue spruce to act as a buffer for sound and light pollution; 3) prohibit Amazon from using ANY drones at this location; 4) change the access patterns so that Amazon traffic is forced to enter and exit on Indiana only to avoid having 4200 vehicles go through the neighborhoods.

I hope that you vote against any proposed measures including rezoning, which would enable Amazon to build a Warehouse in this location.

Hello,

Due to technical issues with the neighborhood meeting scheduled for February 25, 2021, the applicant has requested that the public hearing be moved to the Planning Commission meeting scheduled for April 20, 2021. Your comments have been received and will included them in the packet that is sent to the Commission, the packet will be available on April 15, 2021 and can be viewed online. Due to the increase interest in the April 20th meeting, KATV will air the meeting on channel 8 and 880 as well as provide a live stream at www.arvada.org/live-stream. More information about the project can be found online at https://arvada.org/business/development-in-arvada/project-indiana.

Opposition: Proposed Arvada Amazon

Ethan Steinberg <[redacted]> Wed, Mar 10, 2021 at 6:16 PM
To: jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@arvada.org, djones@arvada.org, dmiller@arvada.org, bfifer@arvada.org, mwilliams@arvada.org

Hello,

I saw the story in the Denver Post about an Amazon warehouse being built off of Indiana.

As a nearby neighbor to the proposed site (my partner and I live in the Lamplighter Neighborhood) I strongly object to the zoning being redone to allow for such a large facility.

- We love walking the Ralston Creek Trail and have seen many animals there given the natural habitat for the many beautiful birds and other types of wildlife on the path. Adding industrial buildings will disrupt the remaining natural ecosystem and remove any remaining ecological value left in the area.
- We've already seen a steady increase in local traffic. Increasing commercial traffic would be a clear negative impact on our daily lives and would make our streets more crowded. Amazon's own traffic study estimates the site will generate 1,352 daily vehicle trips on weekdays.
- There are negative impacts for increased particulates/greenhouse gas (GHG) emissions due to the increased traffic. Amazon's presence will add pollution and increase localized GHG emissions, given that semi-trucks are not yet electric and the fleet of Amazon trucks is not fully electrified.

I run an Arvada-based business that focuses on supporting farmers to sequester carbon, increase biodiversity and build soil health. It is frustrating that my local community would approve the type of industrialization that quite literally drives the negative impacts that my business works so hard to combat.

The Denver Post article mentioned the West Arvada Arts & Culture development proposed in 2018. What happened to that? With the addition of so many homes in the Candellas area and west of us in Golden, I believe like a "West Side Olde Town" would do well! Loki brewery and Red Barn coffee are already staples for us. We'd love to see more small businesses thrive in Arvada, especially as more and more people move into homes here.

Please let me know if I can provide any other information that would help you to make up your mind regarding the obvious choice to oppose the Amazon development, and focus on a more sustainable & locally-owned thriving community.

Thank you,

Ethan

PS. I am excited about the unified trash service option coming this year. I believe that encouraging our citizens to recycle is a very good thing.

Amazon Development Application Concerns

1 message

Felix Nus [redacted] Tue, Apr 6, 2021 at 3:16 PM
To: cedboardsandcommission@arvada.org

Meeting: Tuesday April 20, 2021
Planning Commission Meeting

Dear Planning Commission,

I was recently made aware of the application Amazon had submitted to develop a plot of land and build a distribution center in Arvada. I am a resident of Arvada and live approximately a mile from this location. I frequently walk along the Ralston Creek trail and know the area slated for development well.

The area in question is not a good fit for this type of facility. The additional traffic of not only semi trucks but the cargo vans that will accompany this sort of development is not in the best interest of the community. The plan calls for 1300 parking spaces. This speaks volumes as to the additional stress this will put on our already busy roads and congested intersections.

The additional light and noise pollution from such a business in this area is going to be disruptive to the surrounding neighborhoods and Ralston Creek trail.

The area in which the Amazon is applying to build a facility is in a Light Industrial zone. But the businesses in this area are smaller operations that do not bring the same amount of traffic, light and noise to the surrounding area. This area is surrounded by residential neighborhoods that will be adversely affected by an Amazon facility of this size. A facility such as this is not suitable for this site.

Regards,
Felix Nuss

CITY OF ARVADA

Jeremiah Bebo <jbebo@arvada.org>

OPPOSITION TO PROJECT INDIANA

Laura Fukui <[redacted]> Mon, Feb 1, 2021 at 11:46 AM
To: jbebo@arvada.org

A distribution center (presumably Amazon) with 24/7 operations is not compatible with the adjacent open space and residential use and will have a negative impact on wildlife, residents, and property values in the area.

The traffic congestion from nearly 1,000 vans in and out all day and 12-15 semi-trucks delivering all night will negatively impact the surrounding area and quality of life for nearby residents and wildlife. The light and noise pollution from a 24/7 operation will have a huge negative effect on the nocturnal wildlife that use Maple Valley Park as their habitat, especially the great horned owls that nest in the large growth trees in the area. There are a multitude of wildlife species that use Maple Valley Park and the surrounding area as habitat that need to be protected as well as the water quality of Ralston Creek.

We envision a development smaller in nature with small businesses or offices that serve the neighborhood such as locally owned restaurants, real estate companies, professional offices, coffee shops, wellness centers, retail clothing boutiques, art galleries, and antique stores, etc.

Sincerely,

Laura and Bill Fukui

Amazon

Gayle Cleary <jaydcleary@msn.com> Thu, Apr 15, 2021 at 10:12 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Concerning the thought that the Arvada City and leaders think you should bring the Amazon warehouse to this area, could you please provide the following answers for me. I would like to be fully assured the City of Arvada could handle the responsibility.

How many days, weeks, months has the intersection and streets been closed, under repair, construction, blocked, or limited at 64th and Indianna, in the last 5 years? As a business owner at that corner, to my thinking it's been in disrepair more than it's been open. A major intersection that you can't keep functional at this point, let alone after dumping thousands of semis and vans on to it.

What steps has Arvada taken to adequately repair the east bound, south lane of 64th and Eldridge? It seems to be in a state of permanent potholes and faulty patching. Never is it repaired or maintained and your planning on more heavy traffic on a totally dysfunctional section of road.

What steps is the City of Arvada doing to see that all lanes at east bound 64th just before Zinnia St are kept repaired and cleared of all snow and ice, at all times. Both lanes and the turn lanes. Plowing efforts leave the turn lane packed with snow and ice.

What steps has Arvada taken to see that Ward Road is kept in good repair?

Do any of you drive these roads and a daily basis, multiple times a day?

What is the accident rate at the Ward Road and 64th intersection? 64th & Indiana?

Really don't care who owns or maintains the sections of Ward, 64th or Indiana, these are major Arvada roadways that you neglect now. Can't imagine the conditions if you allow Amazon to drive all over them from a warehouse. You voted for one trash hauler to eliminate the wear and tear on roads. How does that thinking work if you're going to be able to maintain the roads I'm concerned about semis with traffic increasing with more semis and vans. Can't have it both ways. Roads are roads and I expect them to be in good condition.

Appreciate answers to all these questions.

SUBJ: Project Indiana - City of Arvada

We, Gerrard and Lorna Coelho, reside in Wild Flower Ponds, less than 1/2 mile south of this proposed development.

Our house backs to 64 th Avenue. Our main and primary concern is the volume of traffic both into and out of this warehouse, annoying noise and light pollution. We already have this by the surrounding restaurants and shops across from our house. The red neon lights come directly into our bedrooms. We are fearful that this project will make it worse than what it is currently.

Just recently we were subjected to unwanted heavy trucks, noise such as back-up alarms, loading and unloading of dirt, equipment and materials including bright lights throughout the night and until 2:30 a.m. from the gas line project at W. 64th & Indiana. Our neighbors and we certainly want to ensure that we are not subjected to a similar intolerable annoying situation for as long as we live in this neighborhood.

We understand the warehouse will be 44Ft high covering 112,000 SF, 21 truck docks, 60 van staging parking spaces, 60 van loading parking spaces, 402 associate parking spaces, 12 trailer parking spaces. 983 parking spaces for vans operating with 2 daily shifts. 1.966 vans in and out DAILY, 12-15 semi- trucks delivering every night of the week.

Outbound from the warehouse in the morning rush hour will be 283 delivery vans, (from Traffic Report) with 1,352 daily vehicle trips anticipated. Some headed north, but most likely the majority of them will head south, towards the greater number of homes. This traffic will have to go through a congested signalized tee intersection. All this reversing in the afternoon/evening as the vans make their way back to the warehouse as they complete their deliveries.

The nearest freeway via CO 72 as it zigzags down Indiana, W. 64th and Ward Road to Interstate 70 to the proposed project site is approximately 4 miles. Large trucks including semi-trucks providing supplies, etc., to the warehouse will likely use this route.

We are extremely concerned about the noise generated by equipment at the proposed site. We can hear the back-up alarms at our home when the street department is loading sand trucks (across Indiana St. from this development) in the middle of the night and early morning during a snow event. We anticipate that the back-up alarms on the delivery trucks and vans will also penetrate the air throughout the day and night. **With the number of vehicles at the site, this will be an ongoing intolerable noise and irritation. Both of us have underlying serious health issues and this would definitely jeopardize it more adversely.**

A distribution center (presumably Amazon) with 24/7 operations is not compatible with the adjacent open space and residential use and will have a negative impact on wildlife, residents and property values in the area. The existing Arvada zoning just to the east of the project is light industry. While

there are warehouses in this area, the traffic they generate does not compare to what this proposed project will generate.

We are requesting that this project **should not be approved** based on the location and the homes that surround it. We moved to Arvada for its environment and safety. We hope it will remain that way.

Thank you for your consideration and support.

Regards,
Gerrard Coelho

In Opposition

Strongly opposed to the proposed Amazon distribution facility in west Arvada off Indiana Road.

There is too much traffic in the area already. The roads are already a mess. The lights are already tedious. This proposal will thousands of full sized semitrailer and delivery vans and make West Arvada impossible to navigate.

Full sized semis turning from McIntyre to 64th to Indiana will cripple all those intersections.

It's a stupid idea and I can't believe anyone in Arvada City Government would endorse it. There is zero net benefit to Arvada. Stop growing and start doing a better job of managing the existing problems. If you want a 'jobs center' to increase the City's tax revenues, this is NOT it.

Reference Project Indiana

Gina <gina.m.colucci@gmail.com> Sat, Apr 17, 2021 at 7:34 PM
To: cedboardsandcommission@arvada.org, jbebo@arvada.org

Dear Sir or Madam,

Regarding Project Indiana, I emphatically disagree with the Amazon Distribution Center location. Besides the obvious disruption to the neighborhood, the amount of traffic with trucks, vans, and employees, specifically semi-trucks 24/7 , is my main concern.

Traffic flow from the South on McIntyre, Indiana, and Ward would create a large disruption to our neighborhood on roads that are not equipped to handle this type of traffic.

We live at the corner of 58th Ave and Indiana and the amount of traffic from trucks already is terrible. On an average day, we have 25 semi-trucks cutting through our neighborhood to avoid the already congested McIntyre and Ward from CO 58 and 44th Ave TA travel center. In addition there are no sidewalks on Indiana, 64th Ave and Eldridge.

Distribution centers are best located in Industrial use space near major highway access. I strongly recommend that the City of Arvada not rezone this public green space to accommodate this project.

Thank you for your consideration,

Gina Colucci

Amazon proposal

gary Lauricella <[redacted]> Tue, Apr 13, 2021 at 10:43 AM
To: jbebo@arvada.org

Trying to wrap my head around this proposal given the fact Indiana Street will carry most traffic and since 72nd and 64th are the nearest east west through, how in earth could a professional planner think this will not impact traffic.
We live in the Saddle Brook neighborhood and drive this area regularly and contend with the ridiculous traffic pattern at Mcintye, Indiana and Eldridge and complicate things with a light at McDonalds.
One does not need to be a traffic engineer to see what a mess that area is most of the day.
As a life long resident of Arvada I am increasingly disappointed by decisions to drop housing or businesses wherever there is open land and use the same roads that have been in place for years. This "let the developer fix things" stinks and affects our quality of life.
We are gathering support in our community as well as several hundreds of thousands of dollars to to encourage our leaders to rethink this and maybe concentrate on repairing our miserable patchwork of existing roadways

Protect Maple Valley Park and surrounding neighborhoods in Arvada

Gary Tenhulzen [redacted] Fri, Mar 12, 2021 at 2:25 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Dear Mr. Bebo:

I am writing in opposition to Scannell's Project Indiana to build an Amazon distribution center. After listening to the Zoom Conference call with representatives from Amazon and Scannell Properties last night, two major negative impacts have me very concerned about our Arvada neighborhood.

- I believe the traffic study is flawed and does not accurately reflect this business's impact on traffic. The current traffic study does not include the impact of traffic to and from the proposed distribution center on Fig Street, the connector streets to Fig, or the impact on nearby residential streets. The traffic engineer's explanations last night during the Zoom conference call did not address/answer these concerns. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig and adjacent connector and residential streets. He stated this can be a controlled access street. I am not convinced. A realistic traffic study needs to include these streets and volumes.

- This proposed major industrial 24 hour a day, 7 day a week distribution center with 220 route trucks and 12 large semi-trailer deliveries during normal periods (in bound during the night hours, outbound during the day) and 530 route trucks and 42 large semi-trailer during holiday periods will be devastating to the quality of life, environment, and wildlife in this portion of Arvada. My house will be very close to the retention pond on the northeast corner of their development, near the Ralston Creek trail. The odor from this pond, the noise and unsightly views of the huge parking lot will be unwelcome.

I recognize the importance of commercial/light industrial businesses in Arvada to generate revenue for the City and provide good paying jobs for the community. However, this location for an Amazon logistics center is not the solution. Many other sites within the city limits offer a more suitable location for this around the clock, high volume traffic business that will be within 300 yards of neighborhood homes and their families.

I have lived in Arvada for almost 40 years and cherish the open spaces, wildlife, and quality of life this offers us. And I have been fortunate enough to live in Maple Valley for over 29 years and have been grateful to enjoy seeing the ducks, hawks, owls, foxes, bobcats, deer and even coyotes that have lived among us here along Ralston Creek and Maple Valley Park. All will be negatively impacted if this distribution center is approved.

Thank you.

Hello Arvada City Council, Mr Mayor, and Planning Deptment

This email is to state that I oppose the potential development of an Amazon or like company along the east side of Indiana in West Arvada.

I feel this would be a very disruptive business for our area. Currently I walk the area most days and enjoy the natural feel and wildlife of the area. Traffic has certainly increased in the past few years and this will add even more.

I do realize that this area is zoned light commercial, rezoning it to house a gigantic warehouse with delivery vehicles, employee autos and large semi trucks is not what is needed in the area. It seems that warehouse delivery buildings, like the one in Thorton, are in areas that do not affect residential homeowners property values or lifestyles.

Please listen to and consider the area neighbors in regards to this matter.

Thank you in advance,

Heidi Burtoni

Amazon warehouse opposition

Ian Clifton <[redacted]> Mon, Apr 12, 2021 at 6:03 AM
To: jbebo@arvada.org

Jeremiah,

I do not support the Amazon warehouse on Indiana as this will cause additional congestion in an area of bad streets and intersections. This warehouse will lower the quality of life in the area with additional noise, light, traffic, and pollution.

As Scannell Properties has withdrawn the minor variation and adjustment applications from the county, where is Amazon locating the main access driveway off of Indiana? Please provide and make public all current information that you have about the 68th Avenue and Indiana Street intersection plans and the access permit application to CDOT.

April 20th meeting comments

1 message

Jeri [redacted] Wed, Apr 7, 2021 at 10:14 AM
To: cedboardsandcommission@arvada.org

hello,
I am commenting on the proposed Project Indiana Development. I understand that Amazon is going to bring a lot of money into Arvada, and it seems that they are actually trying to do the best job they can of fitting into the community. But there are a couple of concerns.
My main one is the impact to the Ralston Creek Trail area. It sounds like they will be removing a lot of trees and having a water retention pond near the creek. Having a lot of runoff into the water is not desirable. Also having a large number of lights near the wildlife areas would be detrimental to the nocturnal animals. I would like to see Arvada work to protect the natural areas and make sure that Amazon replaces any trees that are removed.
Arvada Land Development code sets standards for preserving and protecting trees and wildlife habitat. The city needs to ensure that Amazon will follow all existing codes. Also, the Master Plan for parks has identified this area as high priority -- so we should be increasing park area, not reducing it.

Hello, my name is Jane Starke and I live on W. 59th Ave. My home backs onto Eldridge Street. If you approve the Amazon project, it will greatly effect the already horrible traffic on Eldridge Street. Eldridge is not designed or equipped to handle so much traffic. The city of Arvada approved the thousands (tens of thousands?) of houses up Indiana without thought of how it effects others. The added vehicles going up and down Eldridge has been terrible. We now call it the Eldridge speedway. Having Amazon trucks running 24/7 driving on Eldridge will not only impact my peace and property value but will also make it much harder to just turn onto Eldridge at 59th Place. All of the subdivisions along Eldridge will feel the impact. PLEASE, please do not approve this project!

March 16 Planning Commission Meeting-Project Indiana/Scannell Property and Amazon Distribution Center

1 message

Jacqui Ainlay-Conley [redacted] Wed, Feb 24, 2021 at 6:17 PM
To: cedboardsandcommission@arvada.org

Dear Planning Commissioners:

I am writing in opposition to Scannell's Project Indiana to build an Amazon distribution center.

I believe the traffic study is flawed and does not accurately reflect this business's impact on traffic. The current traffic study does not include the impact of traffic to and from the proposed distribution center on Fig, the connector streets to Fig, or the impact on nearby residential streets. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig and adjacent connector and residential streets. A realistic traffic study needs to include these streets and volumes.

Thank you,

Jacqui Ainlay-Conley

Mr. Ryan Stachelski
Arvada Director Of Community & Economic Development

Ryan, I cannot support a 24/7 Amazon Distribution Center off Indian & 64th in Arvada.

I believe this project is INCOMPATIBLE with our community at this Location.

We raised our family in Maple Valley Subdivision for 27 years. A perfect place to raise family!!

Time to downsize and wanting to stay near Ralston Creek path for Walking and biking. We decided to move across street to Westwood Mesa Subdivision and have lived here one year now.

Ryan you said in the Denver Post, " you will make sure a project Will NOT be INCOMPATIBLE in our community." This sure is incompatible!!

This location is great for small business, walkable, biking, eating and farmers Market. A European feel is what people want for relaxation and Enjoy Creek, wildlife watching and be with our neighbors.

Please consider other ideas for this property for the enjoyment of our Arvada community.

Thanks,
Judy Bohling

Project Indiana

JESSE BROWN [redacted] Mon, Feb 22, 2021 at 9:09 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Dear Mr. Bebo,

My name is Jesse Brown, and my wife and I live in Maple Valley Subdivision in Arvada. Our home borders Maple Valley Park to our south, facing the proposed site of the Project Indiana. We have lived here for over 25 years and value the beauty and access to the ribbon of nature that the park provides our community.

I am sending you this email to express my opposition to the proposed Project Indiana. I have many concerns but want to bring up one issue that I feel is particularly important. The proposed use of Maple Valley Park as a buffer for this large 24/7 operation is an inappropriate use of this space.

First, I believe that the park is totally inadequate to the task of buffering the residential property from the intrusion of noise and light pollution from the distribution center. The park was never intended for such a purpose and does not offer the level of mitigation that will be needed for such a large 24/7 operation. The planting of a few pine trees on the site of the Indiana Project will add little additional protection to the residential neighbors. Also, using the park as a buffer means that the open space will have to absorb all the noise and light pollution from the Project Indiana site all day, every day. For example, as I write this in late February, all the trees are naked. The lush cover of leaves is still months away. Those leaves in the summer months might offer some diminution of the constant noise and light pollution but what about the significant part of the year when the trees are leafless. Most of the trees and shrubs in Maple Valley park are deciduous.

Also, if the park is used as a buffer what will protect the park from the constant assault of the activities on the Project Indiana site? The light and noise pollution will have a huge negative impact on the many species of animals that call Maple Valley park home. Hawks and Great Horned Owls nest in the trees in the park. Many other animals use the park as a corridor to move up and down Ralston Creek. The use of the park as a buffer ignores all of this and, in my opinion, willingly sacrifices the park's utility as a place to experience nature.

The City of Arvada expresses its value of and commitment to open space like Maple Valley Park in its 2016 Parks, Trails and Open Space Master Plan. I believe the City of Arvada should live up to the values regarding Open Space and protect Maple Valley Park. I feel allowing Project Indiana to use the park as a buffer will be an act by the City of Arvada that throws their stated values to Open Space under the bus, or perhaps a better description might be under the delivery van.

I am not opposed to development in the industrial park that is south of Maple Valley Park. There have already been several new buildings added or under construction. I am, however, opposed to a totally incompatible project such as Project Indiana.

Thank you for accepting my email expressing my opposition to this proposed project.

Jesse J. Brown

Scannell Project Indiana

JANICE EDWARDS ASTON <[redacted]> Fri, Feb 19, 2021 at 2:40 PM
To: Jbebo@arvada.org

Dear Mr Bebo,
Thank you for your service to the citizens of Arvada.
As a resident of Maple Valley since 2014, I join my neighbors in opposing the proposed annexation, rezoning and development of the Scannell property (Project Indiana and Maple Valley Park Annexation).
The proposed industrial use is incompatible with the nearby and surrounding residential and open space uses. Land disturbing activities that will change a vegetative property into a sea of asphalt requires mitigation to protect the surrounding residential community and Ralston Creek.
This project would threaten wildlife migration and the current Maple Valley Park and Ralston Creek habitat.

Noise pollution from a 24/7 operation will directly impact the quality of life for residential and wildlife.
Old growth trees must be protected.

Increased traffic congestion on Indiana Street will be a nightmare.

Since 1850, the Ralston Creek Trail has served the community by increasing the quality of life of Arvada citizens.
Allowing this area to be utilized in this development benefits only the developer.

The Arvada Parks, Trails and Open Space 2016 Master Plan has prioritized the areas for providing new parks and improvement to existing parks in this area.
The property values and quality of life of nearby home owners will be negatively impacted by a 24/7 operations and development of this type.

Please consider the other land use for this area as proposed in a previous communication from the Project Maple Valley Committee.

Sincerely,
Janice L Edwards Aston
14586 W 68th Pl
Arvada 80004

Feb 1st, 2021

This letter is in regards to the proposal of building an Amazon delivery warehouse facility next to the Maple Valley neighborhood and adjoining park near 66Th Pl and Indiana St. I would like to express my concerns on how such a facility would negatively impact the quality of life and more importantly, the impact of the property values to the homeowners in the area. My perspective comes from being one of the top real estate brokers in Jefferson County, with over 25 years of experience having helped nearly 1000 clients buy and sell residential real estate in our community. In addition, my wife and I have been residents in the community for over 30 years.

According to Amazon's own traffic study, the proposed facility would generate approximately 1352 vehicle trips per day. In addition, the lights from the facility and parking area would burn all night long, impacting the wildlife in the park and the residential feel of the Maple Valley neighborhood. Based on my experience, the impact that such an industrial facility would have to the property values in the area would be enormous. Having sold homes that do and don't back to similar large facilities, my experience tells me that having a very large warehouse directly behind a residential area and the increased traffic associated with it, would lower each homes value by approximately $30,000 - $40,000. If you look at this estimation and multiply it by the approximately 30 homes that would be directly impacted (not to mention the homes indirectly impacted) it would be a total property value loss to the neighborhood of at least $900,000 - $1,200,000.

The numbers above only addresses the financial impact of putting such a large industrial facility directly next to a residential neighborhood. As I mentioned earlier, the negative effect on the quality of life of to the homeowners and the negative impact to the wildlife would be tremendous. Obviously, for many reasons it just doesn't make sense to put such a large industrial complex so close to a residential neighborhood and adjoining park. There are many places throughout the city where such an industrial warehouse would not have near the negative impact.

Please feel free to reach out to me if you have questions or would like any further information.

Project Indiana

1 message

d foster <misspup13@yahoo.com> Mon, Apr 19, 2021 at 10:46 AM
To: cedboardsandcommission@arvada.org

Planning Commission,

I'm contacting you to express my objections regarding the annexation and rezoning of the properties identified as "Project Indiana."

I have concerns with about every aspect of the proposed project.

I'm sure you have received numerous objections regarding the effect on wildlife and the destruction of the natural habitat. I strongly support each and every one of those objections.

But there is another aspect which I would like to address in more detail.

Last year the Arvada City Council instituted a controversial single trash hauler system to reduce the number of trash trucks on the streets of Arvada. The concerns included the number of trucks on our streets damaging the streets and polluting our air.

The Planning Commission and City Council are now considering laying the groundwork for a development which will add potentially 2,000 delivery van trips per day, 15 semi-trucks per day and numerous employee vehicles each day. The traffic on city streets each day will far exceed the number of trash trucks which were on the streets prior to the single hauler system. Those trucks were a small fraction of those anticipated by this proposed development. The vehicle traffic created by this development will damage city streets and generate significant pollution, far in excess of that caused by various trash trucks.

The US Forest Service published a document on the benefits of urban trees on air quality which speaks to the benefit of trees in reducing air pollution. The proposed plans for Project Indiana anticipate removing about 500 trees, keeping only 8 while replacing negligible numbers (if any) at the site. Substantially increasing pollution while removing the majority of trees which could help reduce the pollution makes the pollution problem even more troublesome.

I'm struggling to understand the rationale to move forward with Project Indiana as proposed when City Council is trying to minimize street damage and control pollution.

The overall negative impact of allowing this project will affect almost every sector of Arvada. By allowing a substantial increase in traffic, more noise and more pollution, the development will reduce the number of people who are able to enjoy the serenity of the Maple Valley Park area. Removal of the trees and causing wildlife displacement will provide less opportunity for Arvada residents to safely enjoy the natural beauties currently available in our city.

I feel that many times the City Council is more focused on the financial welfare of the city, while I am more concerned with my quality of life. Cutting down trees in order to significantly increase traffic and pollution does not improve, or even maintain that quality of life that I currently enjoy.

Please reject the annexation and rezoning of the proposed "Project Indiana" and preserve the environment and our quality of life.

J. Foster

Opposition: Proposed Arvada Amazon

Jenny Fukui McCarthy [redacted] Tue, Feb 2, 2021 at 4:33 PM
To: jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@arvada.org, djones@arvada.org, dmiller@arvada.org, bfifer@arvada.org, mwilliams@arvada.org

Hello,

I saw the story in the Denver Post about an Amazon warehouse being built off of Indiana.

As a close neighbor to the proposed site (my husband and I live in Wildflower Ponds) I strongly object to the zoning being redone to allow for such a large facility.

- We love walking down Ralston Creek Trail and have seen many animals there. It would be a shame for them to be dislocated! We get so many beautiful birds and other types of wildlife on the path next to the cemetery back here... I imagine that adding more industrial buildings will hamper that - literally in our backyard.
- We've already seen a steady increase in traffic, but that many trucks would be quite an impact on our daily lives and would make it so we likely wouldn't feel comfortable walking over to Red Barn coffee on our weekly strolls. "Amazon's own traffic study estimates the site will generate 1,352 daily vehicle trips on weekdays." Plus semi-trucks are not able to be electric and the fleet of trucks is not fully electric for Amazon either yet. So there would be added pollution to our air. My husband and I both suffer from Asthma and adding more pollution to the nearby area will negatively impact our lives. (The fires are bad enough!)
- The article mentioned West Arvada Arts & Culture development proposed in 2018. What happened to that? With the addition of so many homes in the Candellas area and west of us in Golden, I feel like a "West Side Olde Town" would do well! Loki brewery and Red Barn coffee are already staples for us! We'd love to see more small businesses thrive in Arvada, especially as more and more people move into homes here. I almost forgot to mention the completely new neighborhood over on the West family's old ranch that has popped up so quickly!

Please let me know if I can provide any other information that would help you to make up your mind.

Thank you,

Jenny

PS. Off-topic, but I am excited about the unified trash service option coming this year. I don't know if my HOA will allow us to participate, but encouraging our citizens to recycle is a very good thing. I really hate that companies like Crush have convinced people to not recycle. I'd love it if we could get to a point where, like Denver, we have a quick and easy compost option too!

Comment on Proposed Scannell Properties Development

Jim Horan [redacted] Thu, Feb 4, 2021 at 1:56 PM
To: "bfifer@arvada.org" <bfifer@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "jbebo@arvada.org" <jbebo@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>, "nford@arvada.org" <nford@arvada.org>

Dear Arvada and JeffCO planners, administrators and council members

I would like to voice my strong opposition to the proposed Amazon Distribution Center project on 68th and Indiana Streets. The proximity of this project to the Ralston Creek Trail will have a detrimental effect on the wildlife and natural value of Ralston Creek open space. The Ralston Creek Trail is very popular and remains a showcase for Arvada to promote open space for citizens and visitors. This project will have a very detrimental impact on the environment with paving of open land areas, destruction of wetlands, and introduction of air and water pollution. The warehouse will have 24/7 operations with associated light pollution and noise. Traffic will increase dramatically in this area affecting the safety of Arvada citizens. In the future, Amazon will incorporate drones in the delivery process which will negatively affect noise and well-being of nearby neighborhoods. All of the environmental impacts of this operations have not been fully investigated and considered.

As a resident of the GEOS neighborhood in Arvada, I am committed to the environmental sustainability of our city. Obviously, Amazon is not. They propose paving a huge swath of land which will impact water resource availability and produce pollution. They propose lighting the vast area of this development all night. They have not committed to renewable energy and energy efficiency built into their warehouse. They will continue to burn fossil fuels in all of the vehicles they use which will contribute greatly to climate change and pollution. The land they develop will destroy natural habitat for a wide variety of plants and animals that live in the area.

Instead of allowing a huge distribution warehouse with all of its negative impacts in our city, we should consider alternatives that will have a more sustainable footprint that promotes community values and wholesomeness. For example, we could turn this area near the Ralston Creek trail into a vibrant community showcase of small businesses and social gathering places. We could develop a "New Town Arvada" concept with small shops, outdoor activities and walkable and bike friendly village where citizens can gather and socialize. This type of development would support jobs, commercial tax base and open space that would be a more desirable use of this land.

Sincerely

Jim Horan.

Opposition to the Amazon Distribution Center in Arvada

Jane Keys [redacted] Fri, Feb 19, 2021 at 10:50 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "nford@arvada.org" <nford@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>

Dear Members of Jeffco Planning, Arvada Planning and Arvada City Council

I am a resident of West Woods Estates , a neighborhood located at 72nd Ave and Kendrick Ct and am writing to express my opposition to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, this is the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25. Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why we believe Amazon's request for a zoning variance to build at this location should be denied:
***Building Size:** Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?
***Light Pollution:** The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes.
***Noise Pollution:** Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.
***Environmental Impact:** The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species.
***Traffic:** Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will be entering and exiting the Distribution Center. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36 or C470? In addition, there will be surely be a few hundred truck and van drivers as well as drone operators coming and going from their homes in other parts of town to the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

Residents are drawn to this part of Arvada and Jefferson County for its rural feel. Riders and their horses walk through and around our neighborhood constantly. You are able to walk around not only our community but the surrounding communities without the intrusion of large industrial vehicles. Indianna is maintained by CDOT and is predominately a single lane highway that runs all along a residential corridor - there is a dis-connect in what is planned in Arvada and what is planned by CDOT - the infrastructure of this highway will be stretched with the added traffic that this distribution center will impose. A 24/7 distribution center, bringing with it noise and light pollution as well as a significant increase in traffic from the thousands of cars, trucks, vans and drones is at odds with the rural feel of this area and will diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Jane Keys

Subject: Proposed Amazon site

Ryan -

Please have the backs of the residents of Arvada, and specifically West Arvada, to not support Amazon's wishes to shoehorn in a distribution center into a neighborhood and open space where people have the ability to exercise; Not to mention the continued disruption of the natural habitat. It seems that local governments, in general, bow to developers and businesses for the sole purpose of money/increasing tax base. In this instance, it will be a shame to allow Amazon to continue on their ways of disrupting local areas in the pursuit of the almighty dollar.

Thank you for considering this feedback. I hope you take it seriously and consider the residents of this area first and foremost before making this decision.

Jeff Landskov

I oppose project Indiana

Jen Melton Levy <[redacted]> Sat, Mar 20, 2021 at 9:00 PM
To: jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@arvada.org, djones@arvada.org, dmiller@arvada.org, bfifer@arvada.org, mwilliams@arvada.org

Hello Arvada reps!

Thank you for representing our city and for the time and consideration you're giving Project Indiana. I'm writing to oppose the proposal. Although I do enjoy Amazon's selection and speed, they are not a "neighborhood brand". I'm satisfied with their current delivery times and options and see no reason why a distribution center needs to be so close to parks and homes. As a former resident of the Ralston Estates neighborhood who recently moved to Candelas, I see this proposal as detrimental to my commute and to Arvada's local charm.

Not to bring trouble to my neck of the woods, but Amazon could totally build a distribution center over by Storage Quest. Nothing fun is happening over on that side of 72. Why allow such a contentious land deal when there are better properties in Arvada?

Regardless of whether Amazon moved in or not, Indiana needs to be wider.

I LOVE the suggested mixed use town square vision for that area, and would absolutely support a vehicle-free village!!! We're hoping for something like that up here in Candelas too - although at this point I think most of us would be happy with a good donut shop and a few more non-chains.

Thank you,
Jen Levy

Dear Sir or Madam,

I believe the detention pond on the proposed Amazon mega distribution center is too small to adequately ensure that water from a large storm on the property will not enter the floodplain area before being cleaned. Almost all of the water landing on the 36 acre lot will flow to the northeast corner of the property where the detention pond is to be located. A one inch rain over the 36 acres amounts to 3 acre-ft of water. A 2" rain storm would deposit 6 acre-ft - the amount the proposed pond would hold. In the last 10 years the Denver area has had a 6" and a 2.4" rain storm. A 3" or greater rain storm would cause about 3 acre-ft of untreated water to enter the floodplain and Ralston Creek.

Thank you,
Jim Maley

Dear Sir or Madam,

During the public zoom meeting last week it was stated by an Amazon employee that during the busy holiday season 600 vans/day could be on the road. This equates to 600 employees in, 600 vans out, 600 vans back in and 600 employees going home. That's 2400 more vehicles on the road not including the employees that work inside the building and the trucks supplying the center.

Maple Valley Park

Jen McCallum <[redacted]> Mon, Apr 12, 2021 at 9:25 AM
To: jbebo@arvada.org

Hi Jeremiah,
As Scannell Properties has withdrawn the minor variation and adjustment applications from the county, where is Amazon locating the main access driveway off of Indiana? Please provide and make public all current information that you have about the 68th Avenue and Indiana Street intersection plans and the access permit application to CDOT.

Our biggest concern is increased traffic on Indiana, which is already impossible to navigate at any time of day. Will they be paying to widen Indiana, especially at the train bridge?

Jeremiah Bebo <jbebo@arvada.org>

Amazon facility

Joanne Nirschl [redacted]
To: jbebo@arvada.org

Sat, Feb 20, 2021 at 2:52 PM

Mr. Bebo,

We live within a mile from the potential new Amazon warehouse on 67th and Indiana, and strongly oppose this planned facility for the following reasons:

A distribution center (presumably Amazon) with 24/7 operations is not compatible with the adjacent open space and residential use and will have a negative impact on wildlife, residents and property values in the area.

The traffic congestion from nearly 1000 vans in and out all day and 12-15 semi trucks delivering all night will negatively impact the surrounding area and quality of life for nearby residents and wildlife. In addition, Indiana St. was not built to withstand this kind of congestion. The traffic in that area is already problematic daily.

The light and noise pollution from a 24/7 operation will have a huge negative effect on the nocturnal wildlife that use Maple Valley Park as their habitat, especially the Great Horn Owls that nest in the large growth trees in the area.

There are a multitude of wildlife species that use Maple Valley Park and the surrounding area as habitat that need to be protected as well as the water quality of Ralston Creek

We envision a development smaller in nature with small businesses or offices that serve the neighborhood such as locally owned restaurants, real estate companies, professional offices, coffee shop, wellness center, retail clothing boutiques, art galleries, antique stores, etc.

Sincerely,
Joe and Joanne Nirschl, residents Wildflower Ponds, Arvada, CO

Hello, my name is Jane Starke and I live on W. 59th Ave. My home backs onto Eldridge Street. If you approve the Amazon project, it will greatly effect the already horrible traffic on Eldridge Street. Eldridge is not designed or equipped to handle so much traffic. The city of Arvada approved the thousands (tens of thousands?) of houses up Indiana without thought of how it effects others. The added vehicles going up and down Eldridge has been terrible. We now call it the Eldridge speedway. Having Amazon trucks running 24/7 driving on Eldridge will not only impact my peace and property value but will also make it much harder to just turn onto Eldridge at 59th Place. All of the subdivisions along Eldridge will feel the impact. PLEASE, please do not approve this project!

Re: Project #DA2020-0117 – Development Application (Annexation and Zoning).

Related Applications: Project #DA2020-0132 – Site plan, Project #PA2020-0067 – Project

We wish this email to be entered into as written comment for the public hearing meeting regarding project Indiana taking place on April 20, 2021.

We have recently been made aware of the Project Indiana industrial development and we are strongly opposed to this type of development in our area.

We moved to West Arvada 26 years ago for the quiet atmosphere and a good place for our family. The recent development of the Precient yard on Fig St. is anything but quiet. The truck and forklift traffic are definitely not quiet and this pales in comparison to the 24/7 air, noise, and light pollution that the Project Indiana would bring.

We understand that development is inevitable, however it doesn't have to be a giant warehouse and parking lot right next to the most valuable park on the west side of the city. It's valuable because of its home to wildlife and an escape for urban dwellers. This is even more important today due to the increased development and population growth in the area.

In the past, the master plans of Arvada Parks and the Arts and Culture District have proposed use of this land for the benefit of all the residents. We are in support of the Protect Maple Valley's proposal of the "Town Square". This would be consistent with the previous mater plans. Project Indiana is not compatible with the surrounding area; however, the proposed "Town Square" is compatible and more desirable.

Do we really want to cave to the wishes of the developers and big business and not to the wishes of the citizens? Is it really only about the dollars or is this about the quality of life that we have all come to love living in Arvada? What kind of legacy do we want to leave for future generations, parking lots and warehouses filled with corporate greed or beautiful parks and multi-use spaces for all to enjoy?

Respectfully,

Julie and John Christopher
13695 W. 66th Place
Arvada, CO 80004

To: <kristen@arvada.org>, <cedboardsandcommission@arvada.org>

Ahead of the Planning Commission meeting on April 20 and City Council meeting on June 7, I'm writing to express my strong opposition to Amazon's fulfillment center. I attended the 4-hour March 11 meeting on this topic (run by Amazon PR) with curiosity and left feeling very concerned for our community. I do NOT want this type of operation in my neighborhood--or anyone's neighborhood.

- The use does not align with the **character** of our community.
- It is not in the **best interest** of our City to increase **traffic and emissions, decrease property value, and impact Ralston Creek**. (Remember, as the species "in charge" we have a responsibility to consider all the other species impacted who have no voice in this decision and no seat at the table.)
- I don't **trust** Amazon, and I believe that they will change various operations once they get approved to develop. They implied **drones** could begin being used in the future, when they said drones were not part of their *current* operation.

I would support a different use of this land, such as extension of open space or trails and small footprint locally-owned small businesses and restaurants.

Thank you for the opportunity to comment,
Katie Connolly

Arvada Planning Commission

We would like to comment on the proposed "Project Indiana" that is coming up before the board, and express our very strong opposition to this project. The location, being adjacent to the Ralston Creek Trail, and proximity to large residential developments does not fit well in this area. As you are probably aware, Indiana Street is undersized for current rush hour traffic, and doesn't seem to have plans to increase flow, primarily due to railroad underpass to the north. 64th Street is also maxed out during rush hour and has already been "upgraded". We think a development of this size in that area will degrade the quality of life we currently enjoy in Arvada. Please do not allow this project to proceed!

Dear Mr. Bebo,

Regarding case no. DA202-0117, I suggest leaving the Jefferson County parcels as A-1 and remaining with the county, and the City of Arvada parcels as General Commercial. The current zone designations are acceptable to the neighborhood. Rezoning to General Commercial would be incompatible with the surrounding area. I think that industrial activity in such a dense residential area would reduce property values and cause around-the-clock disturbance to the quiet neighborhood. I don't believe the disturbance from industrial activities can be alleviated simply by landscaping and buffering.

Regards,
Keith Gawlik

GEOS Neighborhood, Arvada OPPOSED to Project Indiana but SUPPORT a Town Sq. Village Concept

Karen Gerbatsch [redacted] Mon, Feb 1, 2021 at 4:54 PM
To: "bfifer@arvada.org" <bfifer@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "jbebo@arvada.org" <jbebo@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>, "nford@arvada.org" <nford@arvada.org>

As a part of the Homeowners Advisory Committee for the GEOS Metro District of 28 homes located on the west side of Indiana between 68th and 69th, I write to you to state that the entire GEOS community opposes Project Indiana for an Amazon distribution center. We have gathered signatures on a petition from every resident against the project. We would appreciate a review of our concerns and a stop to Project Indiana with an Amazon Distribution Center. What we do support is the 2016 Arvada master plan for a second cultural district at this location. We have also gathered signatures for a walkable town square village concept in the space that would complement all the homes and businesses in the neighborhoods and expand Maple Valley Park.

We have significant community concerns of the amount of vehicles and traffic that will increase dramatically with a 24/7 operation of workers commuting, delivery vans coming and going in 3 shifts and semi tractor trailers delivering to the distribution center. Indiana is already a dangerous road with too much traffic. Last September my car was hit from behind by a truck when I was turning from Indiana onto 69th by the Public Storage facility. The street infrastructure heading north on Indiana and east/west on 72nd can't handle the volume of traffic now, much less thousands of more vehicles if the distribution center is allowed to go forward at this location.

GEOS is an intentional community for sustainability and many of us have one or more electric vehicles. We highly value living along the Ralston Creek Trail with the quiet walking and biking opportunities it brings. The air quality and noise issues that the Amazon distribution center and the multitude of vehicles will create will have a negative impact on our community's air and quality of life. Also, the increased lighting of a 24/7 operation will be very detrimental to all the people, domesticated and wild creatures that live in the surrounding areas. Many of the reasons why we bought houses in this part of Arvada will be destroyed if a giant warehouse is allowed to be built along the Ralston Creek trail. And all of these negative aspects will decrease the value of our properties for the neighborhoods that surround the proposed project.

Therefore, please say NO to the Project Indiana Amazon project. Thank you for your consideration.

Karen Gerbatsch

Jeremiah and Alicia,

I am a long -time resident of Jefferson County, and a native Coloradoan. I want to express my concern for Arvada allowing Amazon to potentially build at 67th and Indiana. Please, do NOT allow this to happen. There are many more industrial areas that would be a more appropriate fit, buildings that will soon be empty due to corporations asking staff to permanently work from home. Why not research alternate buildings in a more industrial neighborhood?

Arvada is a great place to live because we have open space, parks and trails. Why would we want to destroy the area where we can find peace, beauty and a little nature. It doesn't make sense.

Amazon has become so huge, and is ruining our brick and mortars, our small businesses – the things that make our community so great.

I am begging you, please don't allow this to happen – why ruin a neighborhood and an area that people enjoy with a loud 24 x 7 operation? The traffic on Indiana is already troublesome during peak hours.

Let's figure out a different location, and let us enjoy our homes – we don't want to live in an area where trucks are pulling in and out 24 x 7, and 1,500 people coming to work.

What do you recommend that we do? We are asking that you research a different, non-residential area. Please don't allow AMAZON to ruin our neighborhoods. Would you want this building going in next to your neighborhood?

Ms. Martin,

The City of Arvada has created a dedicated webpage for this project, which can be found here. The webpage has links to all aspects of this project's applications and a link to the packet for the Planning Commission on April 20th. The documents include all of the information related to the proposed access drive off Indiana Street.

Hi
I am utterly devastated that you would put this monolith of a warehouse in our neighborhood. 12 -15 semis daily, the noise, the traffic the constant lighting. What kind of tax breaks are you giving them? Why aren't you putting them out in Candelas,,,your lovely huge development? They'd have access to 93, Indiana, and the NW expressway. We are so upset over this development in our neighborhood.

To whom it may concern
RE: Maple Valley Amazon last mile distribution facility:

My name is Kay Rees. I am President of the WestWoods Ridge HOA. I am representing the opinions and concerns of the WWR board of directors and homeowners.
Collectively, our HOA recently argued against the Cherrywood senior assisted living development planned for the vacant lot at the corner of W 63rd Ave and McIntyre Parkway. Among the six discussion points that detailed our objections, our number one issue was our concern around the negative impact Cherrywood would place on our community. Despite providing evidence and research that showed the Kimley-Horn traffic study was flawed and that data used as the basis for the study was over 5 years old, the city accepted this inaccurate study as the standard for decision making. We requested consideration of traffic control measures (some as recommended by Kimley-Horn) to keep the already stressed intersection at the corner of W. 63rd and McIntyre Pkwy safe for ingress and egress of neighbors on both the east and west sides of McIntyre Pkwy. These requests were found by the city to be unnecessary based on the findings of Kimley-Horn.

Our comments and concerns were forward looking. We anticipated from a macro level. We asked the city to consider the traffic impact of new housing developments along the south end of McIntyre Pkwy; the proposed multi family housing planned for W 52nd and McIntyre Pkwy; the recent apartment development at the corner of W. 64th and McIntyre; new homes at 72nd and Indiana; the Candelas and Whisper Creek housing developments and associated commercial projects; and the postponement of the Northwest Parkway project. All of these factors in combination are creating voluminous traffic stress along this corridor as drivers access the major artery of I-70 which is accessed via highway 58 at the south end of McIntyre Pkwy.

We also asked that the data gathered for the Kimley-Horn study take into consideration that McIntyre Pkwy has been ‘under construction’ for the past 3-4 years (leading drivers to seek other routes to access I-70); and that the study was done during the COVID Pandemic when normal traffic volume was decreased by 75%. Instead, the city used a process of micro review and stationed a solitary person to do ‘‘car counting’ at the corner of W. 63rd and McIntyre Pkwy for 3 hours a day for 3 days to validate traffic volume. They deemed that traffic impact of the new Cherrywood development would be minimal. All aspects of our concerns were found to be “insignificant”.

We are now learning the details of yet another commercial project proposed for the Indiana/McIntyre Pkwy corridor. The scope and size of this project would have a serious negative impact on all neighborhoods lining the entire Indiana/McIntyre Pkwy corridor. Once again, we are asking that the city pursue a macro level review of the constant addition of new housing and commercial projects and the negative impact they have on existing neighborhoods.

We have polled our HOA members and have approval from a vast majority to proceed with voicing our collective opposition to the Maple Valley Amazon project. We have 52 homeowners in WestWood Ridge where home values are between $700k - $1 million. Our homeowners are very concerned about the impact on property values when ingress and egress is rendered impossible by continuously increasing traffic along the one and only access point to our homes. Our development is over 20 years old. We are all aware that the quiet, rural, country neighborhood we bought into so long ago would not stay that way forever. We have accepted growth and change and welcomed the many developments that have grown up over the past several years. However, we feel that in the quest for tax revenue, the city has sacrificed the elements we all valued when we purchased homes in Arvada. West Arvada is becoming a commercial quagmire and the city is turning a blind eye to the concerns and issues of the long time tax paying residents.

Of our 52 homeowners, we polled 49 who were in favor of supporting opposition to Maple Valley. Sadly, the remaining three homeowners were also opposed to the Amazon project, but said “getting involved again will not make any difference…. So why bother”. You have delivered a very poor message to your constituents…. ‘Being active and involved with your city and it’s government is a waste of time’.

We hope that this grass roots movement will have a greater impact than our efforts and that the City of Arvada will deny the Amazon project request or find another location that would not so negatively impact traffic along the Indiana / McIntyre Pkwy corridor.

Sincerely,
Kay Rees
President, WestWood Ridge HOA

Project Indiana Arvada | Please advise on Annexation of Maple Valley Park to utilize it as buffer

kristen danzig <[redacted] Mon, Apr 19, 2021 at 1:26 PM
To: rstachelski@arvada.org, jbebo@arvada.org, jordan.likes@state.co.us, tktharp@jeffco.us, gordon@arvada.org

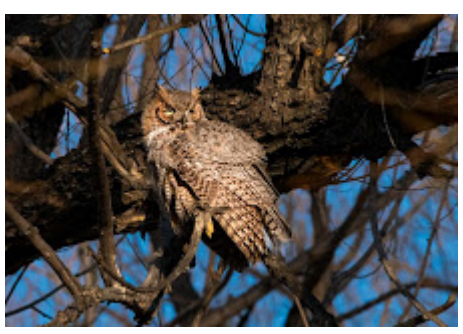
Dear Ryan Stachelski, Jeremiah Bebo, Tracy Tharp, Jordan Likes, Gordon Reusink,

I hope this finds you well. I am writing to ask why the City of Arvada does not think the park deserves a buffer from the proposed distribution center? To annex the park from Jeffco open space to City of Arvada so that the developer can utilize the park to fufill the buffer requirement seems very inappropriate. The park should and needs to be protected and should not be the buffer. We should be buffering the wildlife, birds, and ecosystems of the park not using it so that the developer can make their plan work.

The animals, birds, and ecosystem will be greatly harmed without this buffer. Light pollution being a major concern as the distribution center is to run 24/7. Please see below the light pollution effects. I used to live by the ocean in Jupiter Florida and there are rules in place to reduce light pollution for the Sea turtles as it disturbs their nesting. Below is a link from the National Park services regarding light pollution and also the excerpt from the letter dated Jan 5, 2021 stating what is needed for the raptor species.

https://www.nps.gov/subjects/nightskies/lightpollution.htm

I read through the letter from the Colorado Division of Wildlife that is posted on Project Indiana Info in the City of Arvada. Is the developer implementing these precautions? We have an active nest of Great Horned Owl babies in the Park now. Please see the photos attached. Specifically the portion of this portion of the letter where the developer is to adhere to appropriate seasonal closures and the requirement of larger buffer zones. Also that a permit be necessary and to contact the US Fish and Wildlife Service.



"*If there are any active raptor nests found within the project area or in the vicinity of the project area, CPW recommends that the developer adhere to the appropriate seasonal closures and minimize human encroachment of the active nests. Disturbance of active nests can result in nest failure. Some raptor species require larger buffer zones to minimize human encroachment than other raptor species. Seasonal closures also vary by raptor species. If the developer is unable to adhere to the appropriate seasonal closures or the development will unavoidable encroach on any active raptor nests, CPW recommends that the developer consult with the United States Fish and Wildlife Service to obtain the appropriate permit prior to beginning construction. USFWS can be reached at https://fwsepermits. servicenowservices.com/fws?id=fws_index or at (303) 236-8171.* "

Please let me know and Please reconsider using Maple Valley Park as your buffer. We need to protect the wildlife residents and their ecosystems as well.

Sincerely,

Kristen Danzig

Proposed Amazon in Arvada on Indiana

Krystle T <[redacted] Mon, Feb 8, 2021 at 11:40 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>, "ahalberg@jeffco.us" <ahalberg@jeffco.us>, "ckudlaus@jeffco.us" <ckudlaus@jeffco.us>, "bfifer@arvada.org" <bfifer@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "nford@arvada.org" <nford@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>, "ldahlkem@jeffco.us" <ldahlkem@jeffco.us>, "akerr@jeffco.us" <akerr@jeffco.us>, "tktharp@jeffco.us" <tktharp@jeffco.us>

My name is Krystle Valdez and I am a long term Arvada resident writing on opposition of the proposed Amazon facility on Indiana.

You are allowing our city to be over developed and are not managing the population as is. Our resources are not set up for the crowding and traffic that this facility will bring. Not to forget we already have so many developed areas that need improvement.

This will have a negative impact on the wildlife and communities in the area. The wildlife and open space attract families to our city not industrial buildings. Attracting retailers to these empty storefronts we have will bring in more sales tax revenue for our city.

What are the financial benefits of the Amazon facility at this location and how much will it cost our city not only up front but long term?

Listen to the people of Arvada. We don't want this so please do not rezone the area and do not vote for this proposition.

Thank you.

CITY OF ARVADA

Jeremiah Bebo <jbebo@arvada.org>

Case #20-123867MAA Rezoning 6700 and Indiana

Kurt Seela [redacted] Wed, Feb 10, 2021 at 6:05 AM
To: "ahalberg@co.jefferson.co.us" <ahalberg@co.jefferson.co.us>, "ckudlaus@co.jefferson.co.us" <ckudlaus@co.jefferson.co.us>, "mwilliams@arvada.org" <mwilliams@arvada.org>, "nford@arvada.org" <nford@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "jbebo@arvada.org" <jbebo@arvada.org>

Good morning,

I along with many other Arvada and Jefferson County residents have major concerns with the proposed development of a high traffic 24/7 operation at 67th and Indiana. I am sure you have heard from many other residents on this location. I ask that you and your publicly elected team take the residents concerns into consideration and understand that we are not against growth we just want respectful reasonable growth.

To place a major warehouse with a high volume semi and delivery traffic demand that operates 24/7 at this location is very concerning. Lets only focus on the traffic and environmental issues at this point.

1. The intersection at 64th and Indiana through to 64th and McIntyre is poorly designed and doesn't have the ability to be corrected because of the infrastructure around it. All hours day and night this intersection is already a nightmare.
2. Indiana north from 64th to highway 128th is two lanes that are congested pretty much sun up to sun down. There are no near future plans to correct this issue due to the railroad bridge, which at a past city zoning and planning meetings we were told would not be addressed for at least 10 years. Ranches along that route and a long standing dispute on the highway going to nowhere are also other factors.
3. The intersection at 64th and Ward is maxed out with traffic all day and many hours after sundown. This intersection also can not be increased for larger capacity of vehicle traffic.
4. Ward Road is at capacity pretty much sun up to sun down. How many new cars will be added to Ward Road once the town homes, homes and apartments are sold south of 58th and south of 52nd ?
5. 72nd from Indiana to Simms St. is years away from being corrected. Zoning and planning had no immediate plans for correction on 72nd from Indiana to Ward Road at this point.

These are just a few issues that make adding this type of operation at this location a bad idea. Not to mention all this traffic and congestion will increase the pollution to the air and ground environment in our area. We ask that you look into a better location for this type of warehouse. Here are some locations that I feel would be a better fit.

1. North of Candelas off of Indiana. This would allow better access to Highway 93 across highway 72. Also better access to highway 36th across Highway 128. This would be a good time to sell the right of way for the highway to nowhere to recapture some of Arvada's wasted money's.
2. Out around Highway 93 and highway 72. This would be a direct shot to Highway 58 and highway 36 for semi traffic. Again a great time to sell the right of way for the highway to nowhere and recover some of Arvada's wasted money's.
3. Anywhere along highway 93 makes sense because of the already large presents of semi and delivery traffic.
4. Maybe down along McIntyre and 44th around Coors tech. Great access to the Highway 58, Highway 93 and I-70.

These area's give plenty of room for delivery trucks to disburse across the westside of Arvada and provide access to all areas of Jefferson County. These locations also lesson the opportunity of semi traffic driving through the cities.

Other Amazon warehouse locations along the front range are placed in respectful locations directly off of a state highway or interstate. Some examples are 136th and I-25 or I-70 and E-470. These locations make great sense this because your not driving semis and a large quantities of delivery vehicles through those city's. For Arvada and Jefferson County to allow this kind of operation to move to this location also contradicts the single source trash hauler push that the city pushed through to lesson street traffic through Arvada doesn't it?

I know some of the areas referenced above don't directly benefit Arvada maybe from a property/ business tax stand point for this project, but it does create close jobs for Arvada residents and other sources of revenue and opportunity for the City of Arvada. Arvada's focus for this location should be some type of 12 hour a day operation with less traffic requirements like Sundyne or Ester Owens. I know Microsoft, CenturyLink, Comcast, AT&T, Google and many others are looking to expand Data Center locations.

Please consider all of us residents that have not only been in the city of Arvada for a life time, but those who moved here because of the city we once was.

Thank You for your time. Please contact me if you would like to discuss my view on this project.

Kurt Seela

Amazon Distribution Center

Kasey Vair <[redacted]>
To: Kasey Vair <[redacted]>
Bcc: jbebo@arvada.org

Fri, Mar 26, 2021 at 4:25 PM

I am writing in opposition of the Amazon distribution center that is being proposed off of 68th and Indiana. As a resident of the Shadow Mountain neighborhood, I am concerned about the negative effects that this will have on residents in the surrounding area. I am very disappointed that Arvada would even consider this location for this type of facility. When we bought our house, the area to the south of us was all zoned A2. Then some of the land was rezoned to light industrial and now you are looking to rezone the remaining land. This is incredibly frustrating because we bought our house in this area because we loved the quiet area and open space. We did our research so that we wouldn't be in a situation like the one we are currently facing with this distribution center. What is the point of even having zoning laws if they are allowed to be changed by whoever pays the most money? This distribution center is going to put a high volume of traffic around my neighborhood, create noise in a previously peaceful area, disturb the wildlife, create light pollution and be an eyesore to a once beautiful area. I have been an Arvada resident for over 20 years and I grew up in Wheat Ridge. West Arvada used to be one of the most beautiful areas in the metro area, but now every little farm is being rezoned for either houses, apartments, retail or industrial. We are losing what makes our city so unique and beautiful.

Amazon has several warehouses and distribution centers in Colorado, but this will be the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25. Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why I believe Amazon's request for a zoning variance to build at this location should be denied:
***Building Size:** Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?
***Light Pollution:** The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes.
***Noise Pollution:** Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners. Plus, the beeping sound of reversing delivery trucks all day long and semi-trucks unloading during the middle of the night.
***Environmental Impact:** The proposed site provides very little buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species. According to wildlife experts, the 24/7 lights in the parking lot will have a significant impact on insect populations, which will significantly impact bird populations who call the creek home.
***Traffic:** Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will enter and exit the Distribution Center parking lot 24/7. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) the delivery vans will travel on residential side streets to reach nearby Highways. In addition, there will be hundreds of employees traveling to and from several times a day with the day and night shifts. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

Please reconsider this proposed plan and vote to protect residents who did **NOT** buy property next to industrial land. We planned our futures in an area with agricultural land and open space and this distribution center is threatening to take that away from us. This proposal will diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Kasey Vair

As Scannell Properties has withdrawn the minor variation and adjustment applications from the county, where is Amazon locating the main access driveway off of Indiana? Please provide and make public all current information that you have about the 68th Avenue and Indiana Street intersection plans and the access permit application to CDOT.

Thank you

Rezoning and development of Maple Valley Park

Lauricella, Gina <[redacted] Wed, Feb 3, 2021 at 12:51 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>

I am contacting you to implore you NOT to allow for such and intrusive facility to be built within the neighborhoods of Maple valley and Ralston Estates. As a second generation Arvada citizen, raising the 3rd generation in Ralston Estates, I can tell you that the traffic this facility will bring to the surrounding neighborhoods is of grave concern. The surrounding streets are filled with children. Traffic on through streets in Ralston Estates, such as Yank, Deframe and Eldridge/Fig will increase exponentially. This poses a VERY dangerous situation in an area that if flooded with children. Please research these neighborhoods. Spend time here and you will see the level of danger the added vehicles will bring.

Please, protect our children!

Amazon Distribution Center

Lynne Bessette [redacted] Wed, Feb 17, 2021 at 9:22 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Dear Mr. Bebo,

I am a resident of Westwoods Estates , a neighborhood located one block west of 72nd Avenue & Indiana. I am writing to express my opposition to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, this is the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25. Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why we believe Amazon's request for a zoning variance to build at this location should be denied:
***Building Size:** Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?
***Light Pollution:** The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes.
***Noise Pollution:** Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.
***Environmental Impact:** The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species.
***Traffic:** Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will be entering and exiting the Distribution Center. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36 or C470? In addition, there will be surely be a few hundred truck and van drivers as well as drone operators coming and going from their homes in other parts of town to the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

Residents are drawn to this part of Arvada and Jefferson County for its rural feel. We moved here many years ago because we were drawn to the idyllic setting. In the thirty years that we have lived here we have seen unparalleled growth, with the ensuing traffic and urbanization. This warehouse is the last straw. A 24/7 distribution center, bringing with it noise and light pollution as well as a significant increase in traffic from the thousands of cars, trucks, vans and drones is at odds with the rural feel of this area and will diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Lynne Bessette

Opposition to Project Indiana

Linda Brown <[redacted]> Thu, Feb 4, 2021 at 7:17 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Dear Mr. Bebo,

My name is Linda Brown, and my husband and I live in the Maple Valley Subdivision of Arvada. Our home faces south toward Maple Valley Park and toward the site of the proposed Project Indiana. We have lived here for 25 years and have come to love the neighborhood and appreciate the natural resources of this park and environs.

This email is to let you know that we are definitely opposed to the proposed Project Indiana for a number of reasons:

- A distribution center (presumably Amazon) with 24/7 operations is not compatible with the adjacent open space and residential use and will have a negative impact on the local natural resources, residents and property values in the area.
- The traffic congestion from nearly 1000 vans in and out all day and 12-15 semi trucks delivering all night long will adversely impact the surrounding area and quality of life for nearby residents and wildlife.
- The light and noise pollution from a 24/7 operation will have a huge negative effect on residences in the area as well as the nocturnal wildlife that use Maple Valley Park as their habitat, especially the Great Horn Owls that nest in the large growth trees in the area.
- Using Maple Valley Park as a buffer between Project Indiana and Maple Valley residences is totally incompatible with the City of Arvada's vision for its parks as stated in its *2016 Parks, Trails and Open Space Master Plan*. There are numerous wildlife species that use Maple Valley Park and the surrounding area as habitat that need to be protected as well as the water quality of Ralston Creek.

We are not opposed to development in the area. However, a more appropriate vision would be a development smaller in nature with small businesses or offices that serve the neighborhood such as locally owned restaurants, real estate companies, professional offices, coffee shop, wellness center, retail clothing boutiques, art galleries, antique stores, etc.
The *2018 Arvada Arts and Culture Master Plan* describes the site as a possible Second Cultural Hub, which would be more appropriate use of the agricultural/open space land.

Thank you for receiving our email in opposition to the planned development.

Sincerely,

Linda J Brown

Project Indiana (Amazon Distribution Center) - 3/16/2021 Hearing Date

2 messages

Lee Conley <[redacted]> Thu, Feb 11, 2021 at 4:06 PM
To: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>

Members of the Planning Commission,

I urge you to take a strong, skeptical look at the Scannell's Project Indiana to build an Amazon Distribution Center at 68th and Indiana.

The Traffic Study describes traffic counts from July of 2020 being adjusted using counts from April and June 2017, before much of the development to the north was completed. While a 1.1%/year growth may have come from CDOT, I believe that number is over conservative (small) considering the development north on either side of Indiana.

I have bigger concern about the 1352 estimated daily trips in the Traffic Study. Reading the methodology description on Page 18, a trip is a vehicle entering or leaving the site. The site plan has parking for 896 delivery vans. If a van makes a single run in a day, that is two trips. Unless public transportation is used or some type of van pooling used -- not suggested in the Traffic Study -- the commute for each van driver adds two trips. Warehouse employees in multiple shifts add additional multiples of trips. Unless Amazon only plans to use a fraction of the available van parking places, the estimated daily trips is vastly low, even without a van making multiple runs in a shift or there being evening/night delivery shifts.

In summary, the traffic study looks flawed in both undercounting post-COVID traffic and grossly undercounting the traffic that the operating Amazon Distribution Center will add to the area.

Please look at this project with a skeptical eye and reject it if the developer cannot or will not provide reasonable, realistic traffic impacts as part of their Application.

Thank you,

Lee Conley, P.E.

Comments Against Scannell/Amazon Project Indiana on April 20 Meeting

1 message

Lee Conley [redacted] Sun, Apr 18, 2021 at 2:44 PM
To: CED Boards and Commission <cedboardsandcommission@arvada.org>
Cc: Arvada Mayor Marc Williams <mwilliams@arvada.org>, Dot Miller <dmiller@arvada.org>, "nford@arvada.org" <nford@arvada.org>, "jsimpson@arvada.org" <jsimpson@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>

Members of the Arvada Planning Commission,

I ask you to deny Scannell/Amazon Project Indiana.

This project will have significant impact on surrounding properties. This project will have significant adverse impacts upon the natural environment. The Arvada Comprehensive Plan states that a development "minimally affect surrounding properties" and will not have "significant adverse impacts upon the natural environment".

- This project will add traffic to an already congested Indiana Avenue. Until/unless a light is added for the property on Indiana, a stated 200 vans per day will have to northbound on Indiana (and then starburst on 72nd or through neighborhoods to get to other directions than north?).
- This property will have all of it's parking areas lit for security/safety. This will add bright lights shining into bedrooms of the neighborhoods north and east of the development.
- The vans will have backing alarms which will create periods of incessant noise from the property as the parking plan does not provide drive-through parking stalls, necessitating backing either to park or pull out of parking spaces.
- Amazon warehouse and delivery centers have well-documented issues of delivery drivers having to urinate into plastic bottles because of aggressive scheduling, inadequate facilities, or denial of facilities to contractors ("small business partners"). This will exacerbate the litter on Fig beyond it's current state of plastic mini-liquor bottles every few feet.
- This project turns most of 35+ acres of field into non-permeable asphalt which will drain into Ralston Creek via a detention pond. It will be brightly lit at night. It will be loud. It will adversely impact adjacent Ralston Creek train and park.

This project will not comply with requested zoning. At the public meeting on March 11, 2021, an Amazon Operations representative stated that semi-truck traffic could reach 42 trucks in a 24-hour period during holiday and peak times—this 84 trips would exceed the daily truck trip limit of 50. That number completely excludes the +/- 200 non-peak daily delivery vans, which seem to meet the definition of "truck", also.

This project will put in over 1300 parking places for a nominal 200 delivery vans, warehouse employees, and van drivers. This facility is being designed **not to follow** operations as described in its project description to Jefferson County and City of Arvada, **nor comply** with the zoning being requested, nor abide by it's own traffic study.

Stopping this project now will save years of complaints by your constituents and preempt need for compliance actions (or abdication of enforcement) by the City of Arvada.

Respectfully,

EXHIBIT B- Public Comment

>
> >> I have lived in the Shadow Mountain neighborhood for 30 years. In the last few years the traffic in the surrounding area is extremely heavy especially in the early morning hours and between 3:00pm to 6:00pm. The expansion of housing and businesses without thought to the existing streets and traffic flow has already impacted this area greatly. I plan my trips from the house to avoid the hours that seem to double my drive time. Ward Road is absolutely terrible during those hours and can make a previous ten minute trip now a thirty minute or longer. Adding to that hundreds of people working at a Amazon facility and the hundreds of trucks coming and going will be unmanageable!
> >> I have had the privilege of enjoying the trail next to the creek for the last 30 years. Now in addition to my husband and myself walking the trail I enjoy it with my grandchildren. Two of my grandchildren call it our nature walk. We frequently see all types of wildlife including owls, coyotes, Wood peckers, squirrels and even deer on a few occasions. One of my grand daughters even has a special tree she thinks is fairy tree and is magical. I know these things seem small but are really huge to people in this area.
> >> Thinking of why the people in the area live here is of the utmost importance.
> >> What will happen to my property value if this facility is built? Is Amazon going to reimburse the neighbors in the area for the decrease of the value of our homes? I think not.
> >> I am 64 years old and have lived in Arvada my entire life. So I have watched to grow, the good along with the not so good.
> >> If Arvada wants to do something with that property please think and do something that will really benefit the people in Arvada!!
> >> It seems Amazon would be better to pick a location with the infrastructure to support it, like close to a highway so as not to impact a small area like 64th and Indiana. I will most likely give up on Arvada if Amazon is allowed to build in this area and move to a city with better planning for its citizens.

Opposition to Scannell's Project Indiana - Public Hearing 3/16/2021

2 messages

Sara Loiacono [redacted] Thu, Feb 18, 2021 at 8:22 PM
To: cedboardsandcommission@arvada.org

Dear Arvada Planning Commission -

I am writing in opposition to Scannell's Project Indiana to build an Amazon distribution center. The date of public hearing for this project is scheduled for March 16, 2021.

I believe the traffic study is flawed and does not accurately reflect this business's impact on traffic. Not only does the current traffic study underestimate the trips per day, but it does not include the impact of traffic to and from the proposed distribution center on Fig Street, the connector streets to Fig Street, or the impact on nearby residential streets. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig Street and adjacent connector and residential streets.

Furthermore, vehicles entering and exiting the facility from W 68th Ave will pose safety issues for the large numbers of pedestrians and bikers, many of whom are children, who use both the Ralston Creek and Yankee Doodle Trails. The increased traffic that this project would cause on W 68th Street would create safety issues for people who use Eldridge to connect between the Yankee Doodle Trail and Ralston Creek Trail and for the Ralston Creek Trail users who must utilize an at-grade street crossing just north of where W 68th Avenue curves into Beech Street. I am very concerned about the safety issues that will be created by the large numbers of employees and delivery vans who will undoubtedly use these residential streets.

A realistic traffic study needs to include these streets and an appropriate number of trips per day based on the maximum number of employees and delivery drivers anticipated for the facility.

I urge you to consider the traffic and safety impacts this proposed project will have on Arvada's citizens.

Thank you,

Sara Loiacono

Project Indiana

1 message

Louis Weltzer <[redacted] Sun, Apr 18, 2021 at 7:22 PM
To: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>

To the Commission:

Like most people living in the Arvada area, I feel that the proposed Amazon warehouse would create greater traffic congestion, air pollution, noise pollution and light pollution and would have a very deleterious effect on the quality of life throughout the City and especially in the nearby neighborhoods. I do have a more specific question, though, concerning water.

As you are aware, there is a very large aquifer underlying this whole area, and many hundreds of square miles in addition. As the incessant development has proceeded, large areas of what was open land has been replaced with buildings, pavement and cement. A result of that has been a decrease in the water table - a condition that may soon adversely affect those of us who depend on household wells for our water.

I have seen the plans for the proposed development and note that retention ponds are to be employed to hold storm runoff. I would like to know what ultimately happens to the water in the ponds. Is it allowed to seep into the ground to help recharge the aquifer, or is eventually released to Ralston Creek to be part of the South Platte drainage and gone forever from our area?

Thank you,

Louis Weltzer

Hello,

I live in Arvada very near to 64th and Indiana. It seems that Amazon is considering a distribution center in this neighborhood on Indiana just north of 64th near Ralston Creek. I am opposed to this location because of the disruption that a huge increase in truck traffic will cause. This will have negative impact on property values in the area and will disrupt the peaceful recreation that Ralston Creek trail provides residents.

I think that Amazon can find a much better location closer to I70 so that the truck traffic on city streets is minimized.

Sincerely,

RE: Complaint on the proposed Scannell Properties Development

Chris OKeefe <cokeefe@co.jefferson.co.us> Mon, Feb 1, 2021 at 9:59 AM
To: Mehmet Belviranli [redacted]
Cc: "jbebo@arvada.org" <jbebo@arvada.org>

Good morning, Mr. Belviranli,

Thank you for your comments regarding the Scannell Properties. I am copying the Arvada Planning Department with this reply since the project relies on the property being annexed into Arvada and rezoned to accommodate some proposed future use. Your comments are particularly important for the consideration of the rezoning. These processes are Arvada processes. Jeremiah Bebo is the case manager with Arvada.

I hope this is helpful.

Sincerely,

Chris O'Keefe

Subject: --{EXTERNAL}-- Complaint on the proposed Scannell Properties Development

CAUTION: This email originated from outside Jefferson County Government. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Chris O'Keefe,

I am a recent home owner at Westwood Mesa neighborhood near 72th Ave and Indiana Ave. I am also an Assistant Professor at Colorado School of Mines and I very much enjoy this beautiful corner of Jefferson County where I both live and work.

Today, with much surprise, frustration and fear, I have learned about the "Scannell Properties Development" -- proposed for the south of maple valley park. I couldn't believe that such a huge industrial logistics facility will be built in the heart of the arguably most beautiful residential and natural neighborhood of Arvada.

As a resident of this city, I felt that it is my duty to raise the **strongest objection** for this proposed project.

Here is a summary of my concerns:

1. Noise/light and traffic pollution. Trucks run on diesel and there is an obvious reason why I didn't buy a house near a highway.
2. Increased traffic: The Indiana & 64th Ave intersection is already quite congested, and I already wait at least a minute or two on that intersection during regular working hours. There is no way that neither Indiana Ave. nor 64th Ave will handle this traffic.
3. Decreased property value in the neighborhood: People would not prefer to buy/rent a house near a big distribution center.
4. Negative impact to the nearby wildlife: There is no doubt the wildlife will be evicted or scared away from the activity.
5. Future drone operations: I don't want drones whizzing over the top of my neighborhood. This is unacceptable just as much as any other item above.

I strongly urge the planning committee **TO STOP THIS PROJECT** from happening. I love my neighborhood and I want to keep loving it.

I would be happy to raise my concerns over the phone or via physical presence in front of any potential hearing committee.

Best Regards,

Mehmet E. Belviranli

Amazon distribution center

Mia Burr <[redacted]> Sat, Jan 30, 2021 at 12:53 PM
To: jbebo@arvada.org

A better location for this would be near the FedEx facility and rocky mountain regional airport rather than in Maple Valley neighborhood. Indiana is already a mess with traffic congestion, let alone adding an amazin distribution center to the mix. That just makes no sense at all when there are more suitable locations such as near the fedex facility.

Subject: Indiana Project - Public Comment and Questions

Project Team,

I am a resident that lives within 1 mile of the proposed project and am opposed to it as currently proposed; I believe there are other properties nearby that are far more suitable for this type of development and use – resulting in equivalent, or better, outcomes for the Company, Developers and City of Arvada.

There is already a zoned, industrial site at the crossroads of Highway 93 and Highway 72 (72nd Avenue) adjacent to the Candelas development. This location would provide the potential developer and tenants with equivalent, or more, available land, better access to transportation and major roads and highways, in a less congested neighborhood, with fewer impacts to residents, wildlife, air and water quality and the community as a whole. It is understood that the Developer, and owners, of the proposed Indiana Project may not be the Developer, or owners, of the Hwy 93 & Hwy 72 location – but that should be immaterial to the Arvada Planning Commission which should be wholly objective

in assessing and evaluating the impacts and desirability of these 2 potential project sites in determining the path forward for this, or any other project under consideration.

My comments and questions relative to the proposed Indiana Project include:

- The neighborhood is currently zoned for smaller industrial, and residential uses. This zoning has been in place for many years and has provided for slow development with companies and industries that are compatible with the surrounding rural environment and infrastructure. The proposed development is orders of magnitude larger, in terms of multiple impacts :
  - Transportation (truck/van/car trips vs road capacity, congestion, public transportation availability),
  - pollution (air -ozone, PM-10, road dust, CO, visibility impacts to nearby parks and mountain vistas)/water – (stormwater runoff, sewage treatment and potable water infrastructure and resource availability/solid waste /night skies (area lighting impacts on already impacted dark skies)),
  - public safety (vehicle-pedestrian conflicts due to heavy truck and employee traffic, increased usage of local support businesses, schools and Jeffco School bus facility traffic, fire department training, etc…)/increased vandalism (residences and vehicles due to increased concentration of and human presence (located immediately adjacent to significant existing residential development),
  - increased demand for Public Safety officers (due to increased human presence and interaction),
  - Wildlife (the area currently is home to significant wildlife - endangered eagles that roost in the area hawks, falcons and other avian species that do not tolerate heavy human/wildlife intermixing, foxes, coyotes, bobcats, bears, deer, Prebels Meadow jumping mouse and Ladies Tresses violet habitat, that will be further threatened or harmed from such a massive development immediately adjacent to the Ralston Creek drainage and protected areas
  - Negative impacts on residential property value (this area is currently perceived as a desirable rural environment due to the less developed nature provided by the protected and undeveloped lands – this will be lost if the enormous Amazon facility is built),

- The Indiana road is currently a 2-lane road that is already heavily overloaded and subject to daily congestion impacts. How will Indiana, 64th Avenue, McIntyre Street, Ward Road, 72nd Avenue, Quaker street, Easley roads be improved or insulated from usage by the Amazon traffic? Would Amazon and the Developers be OK with a development condition that restricted their ability to operate heavy trucks on any roads other than Indiana north to Highway 72, Highway 72, Highway 93) why? Why-not?
- Would the Developer and Amazon agree to develop an employee parking area somewhere adjacent to Highway93 (i.e. the Candelas area, or Rock Flats industrial site, or I70&Ward Road) and running employee busing to the new warehouse? Why? Why not?
- How will the developer and development protect the wildlife (eagles/cordata/carnivora/ rodentia/etc…) that currently exist and are increasing in the area?
- Is there an existing wildlife inventory for the impacted area, or will one be conducted prior to any development to ensure that the development does not cause negative impacts to wildlife in the development area? Why? Why not?
- The area is already non-attainment/marginal for PM-10 and Ozone, what will the project due to offset vehicle emissions (truck/van/auto) and the resulting health impacts that are caused by the project? Note that there are multiple senior living developments in the area and those

individuals are at most risk from these increased impacts. Would Amazom and any future leasees/owners accept a development condition requiring the use of all electric vehicles (including all heavy trucks/vans/automobiles) for the development? Why? Why not?

- Assuming that there will be a requirement for increased stormwater runoff/detention will the developer be required to treat stormwater runoff to remove selenium/uranium/heavy-metals and release only treated water to the groundwater/creeks/aquifer that run through and under the area? Why? Why not?
- Will the Developer and existing business agree to the installation /retrofit of low impact area lighting to prevent negative impacts to the noght skies? Why? Why not?
- The area is heavily used by bike riders, and this resource has already been negatively impacted by the heavy residential development in the surrounding areas. Will the Developer agree to fund the construction of separated “bike lanes” on Indiana, 64th, 72nd, Quaker, Easley, McIntyre, Ward Rd, Leyden Road to offset the otherwise negative impacts due to the enormous transportation impact in the area? Why? Why not?
- Will the developer and leasees agree to cease operations during rush hours, and events at the nearby sports complex to avoid even larger impacts and congestion than occur from events and traffic in the area currently? Why? Why not?

How does the Developer, City of Arvada and potential Leasee justify such an odious development in a semi-rural area, facing such significant public opposition when there are equivalent, even superior, areas within 3 miles of the proposed project that are already zoned for heavy industrial use, have existing infrastructure in place, provide superior access to heavy truck traffic and access to major highways (I-70; Northwest Parkway. I-225, I-25, 6th Ave), don’t have as heavy an impact on wildlife, don’t have such a heavy impact on local transportation, don’t have as heavy impact on Public Safety, etc…

I note that the City of Arvada has already designated the Candelas area for industrial/commercial development and that there is an underused industrial development already in existence at the southeast corner of Highway72 and Highway 93 as well as under-developed land in the Rocky Flats site that are far better suited to the uses and needs of something like the proposed Amazon Warehouse and Distribution center; the proposed Indiana Project location should not be rezoned, or approved for the proposed development.

Finally I note that the Indiana Project does not come close to the recommended land uses and development recommendations contained in the Jefferson County North Plains Area Master Plan including limiting the approval of heavy industrial development near residential areas or close to sensitive riparian and wildlife areas.

The Planning Commission and City of Arvada should reject the proposed project and work with the Developers in the area to utilize one of the many industrial sites that already exist along the Highway 93 corridor near/adjacent to the Candelas development. In this fashion the City can realize its goal of increasing the tax base without compromising the quality of life for the residents in the proposed project area as well as draw the smaller commercial developments to the under developed land in the proposed Indiana Project location.

Respectfully submitted,

Hello,

Due to technical issues with the neighborhood meeting scheduled for February 25, 2021, the applicant has requested that the public hearing be moved to the Planning Commission meeting scheduled for April 20, 2021. Your comments have been received and will included them in the packet that is sent to the Commission, the packet will be available on April 15, 2021 and can be viewed online. Due to the increase interest in the April 20th meeting, KATV will air the meeting on channel 8 and 880 as well as provide a live stream at www.arvada.org/live-stream. More information about the project can be found online at https://arvada.org/business/development-in-arvada/project-indiana.

Please register for the Planning Commission meeting on April 20, 2021 using this link: https://zoom.us/webinar/register/WN_qAIzPd9GQ_mBGCsEExpqnQ

Proposed Amazon Distribution Center

Michael Horwith [redacted] Thu, Feb 25, 2021 at 2:59 PM
To: jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@arvada.org, djones@arvada.org, dmiller@arvada.org, bfifer@arvada.org, mwilliams@arvada.org

To Employees and Elected Officials of Arvada:

I am a resident of Spring Mesa, a neighborhood located at the western edge of Arvada, and a frequent user of the Ralston Creek Trail. I am writing to express my opposition to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, this is the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25. Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why I believe Amazon's request for a zoning variance to build at this location should be denied:

*__Building Size:__ Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?

*__Light Pollution:__ The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes.

*__Noise Pollution:__ Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.

*__Environmental Impact:__ The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species. According to wildlife experts, the 24/7 lights in the parking lot will have a significant impact on insect populations, which are the basis of the food change for many animals who call the creek home.

*__Traffic:__ Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will be entering and exiting the Distribution Center. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36 or C470? In addition, there will be surely be a few hundred truck and van drivers as well as drone operators coming and going from their homes in other parts of town to the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

Residents are drawn to this part of Arvada and Jefferson County for its rural feel. A twety-four/seven distribution center, bringing with it noise and light pollution as well as a significant increase in traffic from the thousands of cars, trucks, vans and drones is at odds with the rural feel of this area and will diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Michael and Anastasia Horwith

OPPOSITION TO PROJECT INDIANA

Meg McCarthy [redacted] Mon, Feb 1, 2021 at 4:22 PM
To: jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@arvada.org, djones@arvada.org, bfifer@arvada.org, mwilliams@arvada.org, dmiller@arvada.org

Greetings!

I live in the Maple Valley Development. My house at 14486 W 68th Pl, Arvada, abuts Ralston Creek. I am writing to oppose the proposed Amazon facility applying for this variance and adjustment. A 24/7 operation with 24/7 lighting, noise and traffic will negatively impact my community and my property values.

It will also negatively impact the wildlife in the area. There may be the use of drones that would disturb birds, the increased traffic would be dangerous for both people and animals. This is the wrong project to develop an area so close to homes and parkland.

- Traffic from nearly 1000 vans and 12-15 semi trucks delivering 24/7 will impact traffic in this area severely.
- Light and noise pollution from a 24/7 operation will impact quality of life in my community.

Because this area will probably be developed in any event, a development smaller in nature with small businesses or offices would be more acceptable. I am not against development, but a distribution center would not be desirable.

Thank you for your consideration,

Meg McCarthy

Jeremiah Bebo <jbebo@arvada.org>

Amazon Traffic Study

Meg McCarthy <[redacted]> Sat, Feb 13, 2021 at 4:17 PM
To: Jeremiah Bebo <jbebo@arvada.org>

Mr. Bebo,

I am a constituent writing in opposition to Scannell's Project Indiana to build an Amazon distribution center. I believe the traffic study does not accurately reflect this business's impact on traffic. I live in this area and will have to deal with this traffic on a daily basis.

The current traffic studies does not account for 292 building employees and the 896 van drivers – a total of 4,168 trips per day

- 292 building employees making a trip in and a trip out = 584 daily trips
- 896 van drivers making a trip into work and out of work = 1,792 daily trips
- 896 van drivers making a delivery trip out of the premises and a delivery trip returning to the premises = 1,792 daily trips

The current traffic study does not include the impact of traffic to and from the proposed distribution center on Fig Street., the connector streets to Fig, or the impact on nearby residential streets. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig and adjacent connector and residential streets. A realistic traffic study needs to include these streets and volumes.

Thank you for your consideration,

Meg McCarthy

Amazon's proposed Distribution Center in Arvada

Mel Millward <[redacted]> Wed, Mar 17, 2021 at 2:00 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "nford@arvada.org" <nford@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>

Dear Arvada City

I am a resident of Shadow Mountain , a neighborhood located at 14410 W 70th Drive and I am writing to express my opposition to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, this is the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25. Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why I believe Amazon's request for a zoning variance to build at this location should be denied:
***Building Size:** Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?
***Light Pollution:** The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes.
***Noise Pollution:** Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.
***Environmental Impact:** The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species. According to wildlife experts, the 24/7 lights in the parking lot will have a significant impact on insect populations, which will significantly impact bird populations who call the creek home.
***Traffic:** Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will enter and exit the Distribution Center parking lot 24/7. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36 or C470? In addition, there will be surely be a few hundred truck and van drivers as well as drone operators coming and going from their homes in other parts of town to work at the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

Residents are drawn to this part of Arvada and Jefferson County for its rural feel. Our property is adjacent to equestrian property, feed store and cattle ranch. Riders cross 72nd with their horses to walk through our neighborhood. Bobcats roam our streets with their babies. I love our neighborhood, it is incredibly family friendly and the roads are super safe. A 24/7 distribution center, bringing with it noise and light pollution as well as a significant increase in traffic from the thousands of cars, trucks, vans and drones is at odds with the rural feel of this area and will diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Proposed Amazon distribution center

Margie Snow [redacted] Mon, Feb 1, 2021 at 8:05 PM
To: jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@arvada.org, djones@arvada.org, dmiller@arvada.org, bfifer@arvada.org, mwilliams@arvada.org
Cc: Larry Snow [redacted]

Hello all
I am writing to voice my concerns over the proposed Amazon distribution center
To be located between Indiana and Fig just S of the Ralston Creek open space & Maple Valley Park.
I live in the Ralston Creek neighborhood off of Eldridge St to the NE of this proposed development.
My neighbors and I are extremely concerned about allowing a 24/7 operation of this magnitude to be located adjacent to residential properties and wildlife open space.
I will name some of my biggest concerns
1. Light and noise pollution from this operation will have a huge negative impact on the quality of life for residential neighborhoods; the air quality; light pollution, and will negatively impact our wildlife habitat- the owls, the eagles, the blue jays, the other nesting birds, & the mallard ducks.
2. We moved here to be close to nature & live in a quiet community- the widening of
72nd is already amping up the traffic- but noise of nonstop delivery trucks along Indiana, 72nd, and Eldridge will be unimaginable & unbearable
3. Our “dark skies” in this area will be gone with a 24/7 distribution center nearby
4. Our property values will be negatively impacted
5. Our building ht. Limit per Arvada code is 35’ yet this warehouse is planned for 44’

Our small industry development along Fig is relatively quite & not having a major impact on the wildlife or on our quality of life. We enjoy the Red Silo coffee shop & had been anticipating a more community based development with added restaurants & retailers & artists in future development

I will be discussing this proposed development with my neighbors & will encourage them to reach out with their concerns
Sincerely,
Margie & Larry Snow
7128 Devenney Ct.

Project Indiana

Marie Sonnen <[redacted]> Wed, Mar 3, 2021 at 11:31 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>
Cc: Chuck Sonnen [redacted]

Hi Jeremiah,

At the upcoming meeting to discuss Project Indiana, we would very much like to hear about the plans to deal with the heavy increase of traffic on Indiana (which is highway 72). Indiana already has very heavy traffic even during Covid. For those of us who live near Indiana and have to use Indiana to commute to work, the idea of much heavier traffic is difficult to fathom. We live off Indiana and 75th. A CDOT engineer informed me, via email, that our Saddle Brook neighborhood already paid for a stop light at that intersection, but it has never been installed. At this time, it is extremely difficult and dangerous to make a left (north) turn onto Indiana. It will be that much more difficult and dangerous when there are so many people commuting to work and all the Amazon vans coming and going for distributions. Since this is a state highway, what control will the City of Arvada have over the necessary improvements to highway 72, what improvements will be made, and will those improvements be made prior to the completion of the proposed project? Please address this specific question at the upcoming meeting.

We would also like to hear about the impact on our community. Traffic is just one minor piece of the impact. Our area in Arvada is very residential and like that. A huge Amazon distribution center is not in keeping with our community. We like Amazon. In fact, our son works for Amazon in Seattle, but that doesn't mean that an Amazon distribution center located in our neighborhood is appropriate. Please address all of the issues that will impact our community by changing the zoning to allow for enormous project in our small community.

Sincerely,
Marie Sonnen

Project Indiana

Michael Vair <[redacted]> Wed, Mar 24, 2021 at 9:37 PM
Bcc: jbebo@arvada.org

I am a resident of Shadow Mountain , a neighborhood located at 70th and Eldridge in Arvada and a lifelong resident of Jefferson County. I am writing to express my **opposition** to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, this is the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25. Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why I believe Amazon's request for a zoning variance to build at this location should be denied:
***Building Size:** Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?
***Light Pollution:** The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes. Just the sheer amount of lights will disrupt the viewing of the night sky.
***Noise Pollution:** Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.
***Environmental Impact:** The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species. According to wildlife experts, the 24/7 lights in the parking lot will have a significant impact on insect populations, which will significantly impact bird populations who call the creek home.
***Traffic:** Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will enter and exit the Distribution Center parking lot 24/7. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36 or C470? In addition, there will be surely be a few hundred truck and van drivers as well as drone operators coming and going from their homes in other parts of town to work at the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

Residents are drawn to this part of Arvada and Jefferson County for its rural feel. Our property is adjacent to the Ralston Creek Trail. We watch wildlife such as owls and bobcats move around on the trails. A 24/7 distribution center, bringing with it noise and light pollution as well as a significant increase in traffic from the thousands of cars, trucks, vans and drones is at odds with the rural feel of this area and will diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Michael D. Vair

[redacted]

Ryan,
Okay I understand where you are coming from but I would note that our group alone asked well over 100 questions at the March 11th meeting and with the numerous other neighbors asking I'm sure there were several hundreds of questions asked yet 26 of them (reworded to fit a narrative) were made public as the FAQs by the Applicant. That is clearly propaganda/marketing not a recap of the public meeting. Many of you were on that zoom and you saw the hundreds of questions that were asked. Even with consolidating, there wouldn't be only 26 and those 26 were cherry picked to answer, evidenced by the fact that our important questions aren't even on the list.

The community to date has not had their questions answered by the Applicant. The community who asked the questions knows they weren't addressed and it appears the community concerns and voice is being suppressed. We hear this continually from neighbors who are signing the opposition petition. They think the City is not even listening to them and they are frustrated and even angry at what's happening in Arvada. We will continue to advocate and share on behalf of the 4500+ Arvada voices who need to be heard with the hopes that some City officials are listening and will have the courage to address the concerns in this Application.

We will also continue to be active (as much as will be allowed) in the Application process for Project Indiana and hope that the Planning Commission or the City Council asks the Applicant the important questions on the community's behalf.
PLEASE FORWARD THIS EMAIL TO THE PLANNING COMMISSION. The website is www.protectmaplevalleypark.com

Thanks,
Gina Hallisey on behalf of the PMVP Petition Group

Amazon on Indiana

Neil Bartel [redacted] Sun, Apr 18, 2021 at 1:23 PM
To: cedboardsandmommissions@arvada.org, kristen@arvada.org, jbebo@arvada.org

Look at the huge traffic associated with this facility and it is obvious it needs to be AT a non-stop lighted type intersection like an interstate, beltway, or expressway like Colo Hwy 58. Like the facility at I-25 and 136th. It's amazing it has gotten this far at an interior location with many many stoplights and bottlenecks that will be so heavily impacted.
Arvada wants the tax revenue. I-70/I-76 Sheridan area MUCH better.

Development - Project Indiana St

Nancy Sheiner <[redacted]> Tue, Mar 30, 2021 at 10:38 AM
To: jbebo@arvada.org

Good morning Mr Bebo
As an Arvada resident I am pleading with you & the city of Arvada to decline the proposed Amazon's Distribution Center. There is plenty of open space by DIA which would be much
more suitable for a project of this nature. Placing this distribution center in such a already packed with homes area would be disastrous for all local residents within 5 miles. The traffic on Indiana St is already overflowing with the Candelas homes & businesses. Just in the 3 years we have lived here Indiana St traffic has tripled. Adding a warehouse with never ending trucks would contribute to much more traffic than Indiana St could accommodate.
Protecting Ralston Trail is vital for all of us local users. This project would insure damage to this wonderful trail & is not compatible with the quality of life we moved here to enjoy.
Thank you in advance for your consideration of this request !!

Project Indiana: Pros and Cons

pam o'donnell <pam_odonnell@hotmail.com> Thu, Apr 15, 2021 at 11:08 AM
To: Jeremiah Bebo <jbebo@arvada.org>
Cc: "mwilliams@arvada.org" <mwilliams@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "nford@arvada.org" <nford@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "lsimpson@arvada.org" <lsimpson@arvada.org>

Dear Mr Bebo,

Pros and cons

Pros: increased city revenues, Increase in number of jobs (unfortunately with a high turnover rate*)

Cons: noise, light pollution, air pollution, additional traffic, decrease in wildlife along the Ralston Creek trail, negative impact to Ralston Creek trail due to noise and change in ambiance, loss of revenue to Arvada retail and grocery businesses, loss of rural feel for western Arvada residents, decreased property values for those of us affected by the Amazon Distribution Center, decrease in resident satisfaction with the city government.

In addition we are disappointed with the city government. When we moved to Arvada 4.5 years ago, we were aware that more companies would be building a half mile from our home. And so far, so good. The businesses for the most part operate weekdays till 5 PM and generate little traffic, noise and light pollution. **Never did we think that the city would try to shoehorn a 24/7 business with a gigantic warehouse and hundreds of delivery vehicles into the light industrial park.**

We have another concern**. Will future potential businesses look elsewhere because of Amazon's presence? What new business would open in Arvada when Amazon will deliver the same product for less in a few hours?**

Case in point: A highly successful bookstore, Little Shop of Stories (littleshopofstories.com), in Decatur, GA whose retail store will be reopening to customers May 1. It is profitable and a tremendous community resource. Prepandemic it employed about 13 adults. The profits for the 14 year old business have come largely from kids' birthday parties and nine weeks of kids' summer camps (parents are lined up for hours before registration), book signings, participation in the annual Decatur book festival, etc. In addition prepandemic there were weekly story hours and eleven monthly book clubs for all ages. During the pandemic the community continues to support the bookstore through phone ordering and curbside pickup and a go fund me page which has raised more than $60,000
Unfortunately there is little profit in book selling because of Amazon.

We believe it would be fantastic for our community if Arvada attracted more retail businesses that promote community involvement. We are pessimistic, though, that it would even be possible if our city government approves the Amazon Distribution Center.

Project Indiana - Concerned home owners - Comments for Public Hearing

Patrick Latella [redacted] Sat, Apr 17, 2021 at 12:37 PM
To: cedboardsandcommission@arvada.org, jbebo@arvada.org

Hello,
My wife and I are home owners on Deframe Ct. in Arvada near the proposed site for the Amazon distribution center.

We are extremely against the Amazon distribution center being built on the proposed site.

Our reasons are:
- The development's incompatibility with the community
- Traffic congestion and concerns on all the surrounding streets
- Light, noise, air and visual pollution so close to open space and homes
- **Negative impact on property values**
- **Negative impact to our quality of life**

We would like to see the proposed site developed in a more community based way.

We do not want to see our quiet, peaceful neighborhood transformed into an industrial park. We know there are alternate initiatives for potential development of the site that would provide much greater value to our community. Pedestrian shopping and walking areas, an outdoor music venue, a community park, etc. This kind of development would bring a much needed central location for positive community building; families enjoying community space where friendships can grow, community appreciation can grow, and a sense of togetherness between the citizens of this area can grow. This is what we need for Arvada...this is what we want for Arvada. We do not want to see our community turned into an industrial park. We do not want the site used for an Amazon distribution center.

So we want you to vote against this project. By doing so you will show that you care about the families of Arvada and the desire to grow a sense of community in our city.

I would appreciate answers to these questions:

- What is the benefit of Amazon building this facility here to Arvada?
- What benefit will the Amazon distribution center bring to my family, and to any of the families in the surrounding area?

Thanks very much for your time.

Patrick and Erin Latella

City of Arvada Council Members, Planners and Mayor

Greetings,

Project Indiana site specific location concerns

As neighbor I object to the approval of an Amazon distribution center at the proposed location at 67th and Indiana. I am hoping to add new questions and reasons for denial to this project that have not been mentioned previously. One such objection has been the increase of traffic but no mention of increase to traffic on the streets W. 69th Ave, Devinney st, Fig St., Eldridge St and W. 72nd Avenue. Those streets and intersections are conspicuously absent from the report yet much traffic will be generated through our neighborhoods. No study of any of this in the traffic report. It looks as if half of all deliveries might exit the facility to the East onto Fig street and quite a lot of traffic into the facility from the same. I wonder what the particular routing of Vans through the site will look like because it looks confusing looking at crossing traffic in the site. That alone would suggest drivers exiting the facioliity would rather head East on W 67th Avenue.

Second, the proposal shows parking of 600 vans, 300 associate and other parking but shows no maintenance or refueling facilities. Refueling and maintenance should not be situated in our neighborhood. So where will these Vans get their fuel. And by fuel, I mean any energy source.

Third, a detention pond alone is not adequate to ensure water quality released into Ralston Creek. A robust water quality control system must be in place before it reaches the detention pond. Salt, magnesium chloride, petroleum and sand and other pollutants will be deposited here on a daily basis and must be cleaned up.

Sincerely,

Pat Herrin

Shadow Mountain Resident.

Project Indiana Pedestrian Safety Issue

1 message

pam o'donnell <[redacted]> Wed, Feb 24, 2021 at 11:26 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Project Indiana Pedestrian Safety Issue

Impact of Amazon Distribution Center on pedestrians crossing 64th St. and Indiana St. (Colorado Highway 72)

THE ISSUE
What will be the impact to pedestrians crossing 64th St. at Indiana St. if an Amazon Distribution Center is constructed? How many Amazon vans, semi trucks, and employee vehicles will be turning right on 64th and Indiana each day? Who has determined that the current intersection configuration will be safe for pedestrians?

THE INTERSECTION
Currently drivers going west on 64th and turning right onto Indiana as well as drivers traveling south on Indiana and turning right onto 64th St view a yellow metal crosswalk sign and a yellow metal arrow as they turn the corner. These signs are not visible to the drivers until they are already turning. If the Amazon Distribution Center is located on Indiana St., the already somewhat dangerous intersection will be much more dangerous for pedestrians.

MY EXPERIENCE
Prepandemic (and again soon), I walked west on the north side of 64th St once or twice a week from my home in Ralston Estates to McDonalds, Sprouts and Kohl's on 64th St. and returned home the same way. I was able to cross the intersection at 64th and Indiana by myself or with my four grandchildren as long as I was extremely aware of turning vehicles. **Often I found it difficult to determine which vehicles were turning and thus had to turn my head multiple times to check if it were safe before crossing.** This may seem excessive but I had observed that to my chagrin, **many if not most drivers did not enter the right turn lane until the last second and barely slowed down when making the turn.** Many were only concerned with merging onto Indiana St. Some paid NO attention to pedestrians.

MY RECOMMENDATION
It is mandatory that the turning lanes at this intersection be reviewed for the safety of all pedestrians. Controlling turning traffic with a combination of stop lights and "NO TURN ON RED" signs and WALK / DON'T WALK lights at the 64th St. and Indiana St. intersection must be completed before the Amazon Distribution Center is approved and operational.

Pedestrians should NOT be forced to ascertain the intentions of turning vehicles. The right of way must be controlled by traffic signals.

No one should ever has to ask "Is it safe to cross the 64th St. and Indiana St. (Colorado Highway 72) intersection?"

Project Indiana

pam o'donnell <[redacted]> Tue, Feb 23, 2021 at 7:04 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Dear Mr. Bebo,

I am a resident of Ralston Estates in Arvada. My house is three blocks from 67th and Fig St. I am writing to express my opposition to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, this is the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25. Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why I believe Amazon's request for a zoning variance to build at this location should be denied:
*__Building Size:__ Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?
*__Light Pollution:__ The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes.
*__Noise Pollution:__ Future drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.
*__Environmental Impact:__ The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species.
*__Traffic: This is our biggest concern. It is not one issue but several. As such, this issue will be addressed in future emails.__

Residents are drawn to this part of Arvada and Jefferson County for its rural feel. __I love living a half block from the Ralston Creek trail. Even though we were hesitant to buy our home as the house backs onto Eldridge St., it has not proven to be an issue.__ A 24/7 large distribution center will bring increased traffic behind our home. It is at odds with the rural feel of this area and will diminish our property values and quality of life. Therefore, I ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Pamela O'Donnell

Project Indiana Pedestrian Safety Issue UPDATED with photos

pam o'donnell <[redacted]> Tue, Mar 9, 2021 at 10:37 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Project Indiana Pedestrian Safety Issue UPDATED (photos now included)

Impact of Amazon Distribution Center on pedestrians walking west using the northeast crosswalk at 64th St. and Indiana St. (Colorado Highway 72)

THE ISSUE
What will be the impact to pedestrians walking west and crossing 64th St. at Indiana St. if an Amazon Distribution Center is constructed? How many Amazon vans, semi trucks, and employee vehicles will be turning right on 64th and Indiana each day? Who has determined that the current intersection configuration will be safe for pedestrians? Is Project Indiana prioritizing Amazon and revenue over pedestrian safety?

THE INTERSECTION

THE NORTHEAST CROSSWALK IS DANGEROUS FOR PEDESTRIANS.
To turn right from 64th St. onto Indiana St., vehicles enter a slip lane. There is no stop light or stop sign.

I have been walking west and am standing at the northeast corner of the crosswalk at 64th and Indiana. I am facing southwest. (I am 5’8”)

I turn my head left to view oncoming traffic to determine when to cross.
The metal cabinet is 5’9” tall and is 4’ wide. To its right is a small metal box that is 4’ high by 1’. It is 45’ from me. Visibility is limited for both the pedestrian and the driver.
The approaching vehicle is not visible until it is approximately 50’ away. I estimate most turning vehicles are traveling 25 mph to 35 mph.

EXHIBIT B- Public Comment

If I were in the crosswalk, the vehicle may have been unable to stop.

Hundreds of Amazon vehicles turning at this intersection will make this crosswalk more difficult and more dangerous for pedestrians.

MY EXPERIENCE
Currently and prepandemic I walked west on the north side of 64th St once or twice a week from my home in Ralston Estates to McDonalds, Sprouts and Kohl's on 64th St. and returned home the same way. I am able to cross the intersection at 64th and Indiana by myself or with my four grandchildren as long as I am **extremely** aware of turning vehicles. **Often I have found it difficult to determine which vehicles are turning and thus have had to turn my head multiple times to check if it is safe before crossing.** This may seem excessive but I have observed that to my chagrin, **that sedans and sport cars are particularly difficult to see even though I am tall. Also, many vehicles barely slow down when making the turn.** They are only concerned with merging onto Indiana St. Some paid NO attention to pedestrians.

MY RECOMMENDATION
It is mandatory that the turning lanes at this intersection be reviewed for the safety of all pedestrians. Controlling turning traffic with a combination of stop lights and "NO TURN ON RED" signs and WALK / DON'T WALK lights at the 64th St. and Indiana St. intersection must be installed before the Amazon Distribution Center is approved and operational.

Pedestrians should NOT be forced to ascertain the intentions of turning vehicles. The right of way must be controlled by traffic signals.

No one should ever has to ask "Is it safe to cross the 64th St. and Indiana St. (Colorado Highway 72) intersection?"

Pamela O'Donnell
7079 Devinney Ct
Arvada CO 80004

Slip lanes are dangerous because they prioritize vehicle speed over the safety of everyone who needs to use the road

Slip lanes increase the distance that people have to cover to cross a street, put people into spots that are often the hardest for drivers to see, and encourage drivers not to slow down when approaching an intersection and a crosswalk— ...
That driver could be hitting maximum speed right as they reach the crosswalk across the **slip lane**—exactly the spot where engineers have said that a pedestrian should "safely" cross this street

Opposition to Scannell's Project Indiana to build an Amazon Distribution Center - Traffic Study is Flawed!

2 messages

Pamela Rose <[redacted]> Thu, Feb 11, 2021 at 2:27 PM
To: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>, Jeremiah Bebo <jbebo@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "lsimpson@arvada.org" <lsimpson@arvada.org>, Nancy Ford <nford@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, Dot Miller <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "Marc Williams, Arvada Mayor" <mwilliams@arvada.org>

February 11, 2021 - Dear Arvada Planning Commission and City Councilmembers,

As a concerned neighbor of the proposed Scannell's Project Indiana, I am opposed to the proposed development. The traffic study is flawed! The following need to be addressed:

- **An acceptable traffic study needs to include realistic estimates. The current study only estimates 1,352 daily trips and underestimates the daily trips by a factor of three, since it does not account for the 292 building employees and the 896 van drivers – a total of 4,168 trips per day!**
- **292 building employees making in/out trip = 584 trips**
- **896 van drivers making in/out trip = 1,792 trips**
- **896 van drivers making delivery trip out/in = 1,792 trips**

- **The current study does not include the impact of additional traffic to/from Fig Street and the connecting streets to Fig - and the impact on additional nearby residential streets.**
- **Limited access to/from Indiana Street during peak hours will force employees to use the surrounding access streets.**
- **A realistic study needs to include these streets and additional volumes.**

- **This development is not compatible with the surrounding residential properties, and Ralston Trail.**

Respectfully submitted,

Pamela Rose

7114 Fig Street

Second email Regarding Opposition to Maple Valley Park Annexation

Pamela Rose <[redacted] Fri, Jan 29, 2021 at 2:32 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "nford@arvada.org" <nford@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>

January 29, 2021 - Dear Arvada City Councilmembers,

As a concerned neighbor of the proposed development Project Indiana (Application #DA2020-01117) Maple Valley Park Annexation (Application #DA2020-0118), and Amazon Project Indiana Plan (DA#2020-0132), I am opposed to the proposed development. I respectfully ask for no heavy industrial development use on this parcel, not because I am anti-growth, but because I am an enthusiastic supporter of smart, planned urban development. My most compelling reasons include:

- **The Proposed property development is inconsistent with Arvada's Master Plan or Vision.**
- **The proposed property detention pond is annexing Jefferson County Open Space – AKA Maple Valley Park as a buffer. The developer is the only one to benefit from this allocation, it should be required to build a berm. This detention pond will filter the run-off of road chemicals used to de-ice roads, gasoline residue, rubber residue from vehicle tires, diesel, and oil residue, all from the 1500 parking space parking lot and equipment used there, which will end up in Ralston Creek. This is detrimental to wildlife and should be reconsidered as it is not the correct use for a buffer. The developer is using this land inappropriately, and this is in a 100 year FEMA Flood Plain.**
- **This development is not compatible with the surrounding residential properties. Article 1 General Provisions: 1.3. - PURPOSE AND INTENT; 1.3.4. Preserve and protect existing trees and vegetation, agricultural lands, floodplains, stream corridors, wildlife corridors, wetlands, lakes and other water bodies, significant ridgelines, and other sensitive environmental areas from adverse impacts of urban and suburban development.**
- **The proposed building height of 44 feet is not within the current building code of 35 feet and is inappropriate.**
- **For the foregoing reasons, I urge you to vote against this proposed development.**

Respectfully submitted,

Pamela Rose

January 29, 2021 - Dear Arvada City Councilmembers,

As a concerned neighbor of the proposed development Project Indiana (Application #DA2020-01117) Maple Valley Park Annexation (Application #DA2020-0118), and Amazon Project Indiana Plan (DA#2020-0132), I am opposed to the proposed development. I respectfully ask for no heavy industrial development use on this parcel, not because I am anti-growth, but because I am an enthusiastic supporter of smart, planned urban development. My most compelling reasons include:

- **The Proposed property development is inconsistent with Arvada's Master Plan or Vision.**
- **If this is approved and the planned development completed, the residential neighborhoods, open space of Maple Valley Park, Shadow Mountain and the surrounding properties will witness a dramatic increase in traffic in an already heavily congested area, which will lead to more accidents, injuries, and fatalities. This will directly impact air quality, vehicle and equipment noise, and light pollution in a primarily residential neighborhood.**
- **Insufficient road infrastructure – Nearby intersections simply cannot handle the dramatic increase in traffic that will occur if the rezoning is permitted. Indiana Street does not have traffic lights that would allow safe turning from this proposed development. The residential areas surrounding this proposed development do not allow for heavy through traffic. Additionally, the surrounding streets are narrow and do not allow for turn lanes, notably limiting traffic flow.**
- **For the foregoing reasons, I urge you to vote against this proposed development.**

Respectfully submitted,

Pamela Rose

In regards to Scannell's Project Indiana

Paul Schlimgen <[redacted]> Sat, Feb 13, 2021 at 10:37 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Dear Mr. Bebo,

I'm writing in opposition to the Scannell's Project Indiana to build an Amazon distribution center.

I believe the traffic study is flawed and does not accurately reflect this business's impact on traffic. The current traffic study doesn't not include the impact of traffic to and from the proposed distribution center on Fig, the connector streets to Fic, or the impact on nearby residential streets. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig and adjacent connector and residential streets. A realistic traffic study needs to include these streets and volumes.

I'm also concerned with the additional load on Indiana directly. Before COVID, Indiana from 64th going north is consistently bottle necked by the train bridge past 82nd (only two lanes wide) during the morning and evening commutes. In the winter months, I've experienced delays for ~40 minutes just to get past the train bridge. Adding ~1800 daily trips from Amazon delivery vans will just compound the traffic on Indiana.

Thank you,

Paul G Schlimgen

To: jbebo@arvada.org, mwilliams@arvada.org

I am writing to IMPLORE you reject the Amazon Distribution Center on Indiana and 66th. As a matter of fact, I do not for my life, know how this issue can even be put on paper and run across your desk. I read that they are estimating 1532 'trips' per day 24/7: so perhaps I can state that I can think of 559,180 reasons as to why I think Amazon and The Ralston Creek Trail Maple Valley are a BAD FIT.

What happened to the plan of the Arvada Arts District - even that will dispute nature and peace & quite, but it is surely less than 559,180 truck and van trips per year let alone a 112,000 sq foot warehouse with it's 55,000 square foot canopy/1500 parking spaces (!!!) and all night lighting. (I mean, why don't we just put in a Big O Tire store, a couple of restaurants, and a couple of strip malls??).

What has happened to the spirit of Colorado?

IT IS A BAD FIT! Please, please reject Jeff Bezos and his vision of Amazon.

Proposed Amazon Warehouse in NW Arvada

February 10, 2021

SUBJ: Project Indiana - City of Arvada

Dear Sir;

My name is Richard Kuberski, I reside in Wild Flower Ponds, less than 1/2 mile south of this proposed development.

Many of my neighbors and I are concerned about the likely negative impact that this development will have in North West Arvada. My primary concerns are the amount of traffic both into and out of this warehouse, unwanted noise and light pollution.

It's about 4 miles from the proposed project site to the nearest freeway via CO 72 as it zigzags down Indiana, W. 64th and Ward Road to Interstate 70. Large trucks supplying the warehouse will likely use this route.

Outbound from the warehouse in the morning rush hour will be 283 delivery vans, (from Traffic Report) with 1,352 daily vehicle trips anticipated. Some headed north, but most likely the majority of them will head south, towards the greater number of homes. This traffic will have to go through a congested signalized tee intersection. All this reversing in the afternoon/evening as the vans make their way back to the warehouse as they complete their deliveries.

The existing Arvada zoning just to the east of the project is light industry. While there are warehouses in this area, the traffic they generate does not compare to what this proposed project will generate.

What is the Level of Service for CO 72 along this route now during the AM rush hour and what it the projected LOS after the facility is in full operation? What is the projected time to get through the traffic signal at Indiana & W. 64th Ave. heading southbound at peak morning rush hour?

Is this a Phase I project, or is this the full build out? Will the developer go on record that this facility will NOT be added to in the future?

Is this a 24-hour operation?

What type of site lighting will be installed? How will you keep light from spilling off of the property?

Will there be any noise generated by equipment at the site? During a snow event, when the street department is loading sand trucks (across Indiana St. from this development) in the middle of the night, I can hear the back-up alarms at my home. I anticipate that the back-up alarms on the delivery trucks and vans will also pierce the air throughout the day and night. **With the number of vehicles at the site, this will be an ongoing intolerable cacophony.**

Having recently been subjected to unwanted noise and lights throughout the night from the gas line project at W. 64th & Indiana, my neighbors and I certainly want to ensure that we are not subjected to a similar intolerable assault for the rest of our lives.

Please consider how you would like to have this facility near to your own home.

City of Arvada addressees, please acknowledge receipt of this email

Thank you for your consideration.

Sincerely,

Richard Kuberski

Against the Amazon last mile distribution center

Ronald Sacks <[redacted]> Sat, Mar 20, 2021 at 12:12 PM
To: jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@aqrvada.org, djones@arvada.org, dmiller@arvada.org, bfifer@arvada.org, mwilliams@arvada.org

All,

I have been a resident of Arvada for 15 years. My address is 7561 Urban St., Arvada, CO 80005.

I am against the Amazon last mile distribution center project for these reasons:

- Negative impact on wild life
- Human safety related to recognized environmental conditions
- 24/7 operation is incompatible with surrounding community and wildlife
- Light and noise pollution negatively impacts nearby wildlife and homes
- Negative impact on quality of life and property values
- Storm drainage concerns
- Removal of hundreds of mature trees impacting air quality and reducing bird nesting availability
- Increased traffic
- Inconvenienced residents by forcing a single trash hauler in the name of reducing traffic. This project would significantly increase traffic
- Future drone operations would negatively impact wildlife and residents
- Research indicates that Amazon has the reputation of being an undesirable neighbor

Amazon

Rick Squires <[redacted]> Tue, Mar 9, 2021 at 7:48 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>, "cokeefe@jeffco.us" <cokeefe@jeffco.us>, "mwilliams@arvada.org" <mwilliams@arvada.org>

I would like to let you know I am STRONGLY 100% against any Amazon Distribution Center in any boundary in the City of Arvada. Even the very thought of such a monstrosity is beyond me. 24/7 of trucks in and out of that facility? 1300+ trucks and van trips each day?! Infuriating back-up 'beeping' and neon lights at night?

I am frankly stunned that the leaders of Arvada and JeffCo could possibly even think of stamping 'approved' on such a proposal.

Talk about 'not the right fit'. I am fundamentally against, and strongly opposed to any further industrial building moving forward - I moved here 30 years ago to get away from over-developed lands and I increasingly see more and more (I won't even start with Candelas, it's parkway and the incoming onslaught of 470 and the inevitable widening of Indiana and Rt 93).

Why can't city/county officials leave a perfectly fine field - a field? It may be one of the nicest creek trails in the country - I use it regularly and when I first resided in Arvada (now going on 10 years), I was thrilled and bragged of it. Now.....it will be walking/riding the Arvada-Amazon warehouse district.

When does this battle between the Arvada Harvest Grounds vs Amazon commence? I know (and now you know) where I stand when it comes to nature, owls, coyotes, hawks, walking the dog, peace and quite, etc., vs Amazon. It is NOT a fit (it's not even close).

I am very concerned - Rick Squires

Proposed Project Indiana

Renee Stark <[redacted]> Thu, Feb 25, 2021 at 10:36 AM
To: jbebo@arvada.org

Mr. Bebo,

This message is to voice my **OPPOSITION to all permits and applications related to Project Indiana!** The Amazon 24/7 Distribution center being considered is NO WAY a fit for our community. We have been voicing concern over the development the past few years that has been to build *multiple* Urgent Care clinics. senior living centers, banks and other development that is destroying this area and yet those oppositions have fallen on deaf ears.

Please **LISTEN** this time to the many Arvada residents and business owners who want something that will enhance the way of life in Arvada - not turn it in to another Commerce City or Aurora. There are SO MANY reasons that this is not a good fit for this area, which I know have been presented professionally and in detail by the Protect Maple Valley citizen group. This affects us all and it's time our planning board and elected officials do what is right for the community.

By OPPOSING this development Amazon can move on to find another location to destroy and Arvada can move forward with the "Town Square Village" proposal which is what we WANT and NEED for this area to prosper! Thank you.

Sincerely,

Renee L. Stark

An Arvada Citizen's STRONG Objection to the Proposed "Project Indiana"

Becky Wel [redacted] Tue, Feb 2, 2021 at 5:31 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Jeremiah Bebo,

I am writing to express my strong objection to "Project Indiana", which is to be built just around the corner from our home. I am baffled that a "project" of this size and scope is even being considered for the space. Not only will it destroy the wildlife aspects adjacent to the proposed site, it will also destroy the quality of living for every resident near this project. There is so much open space that is NOT near residential living that is available in Arvada where this monstrosity could be built. Not only will this be a visual blight on our community, but the degree of traffic, light, and noise pollution will destroy our home values and our quality of living. A 27/7 building with vans and trucks servicing it is insane to even consider for this location. Also, how is a building that will be 44' tall, which is clearly higher than the 35' height limit, even being considered?

If you truly care for the residents of Arvada, please do everything in your power to block this project. It can be built in an industrial area of Arvada, of which there are many now. Please care for the citizens of your city and the families that you are entrusted with from your position of power. Please don't let money be the bottom line. If we have learned anything during this time, please let it be that people matter more than profit. We are counting on your help.

Sincerely,

Rebecca Welch

Project Indiana & Maple Valley Park

Shannon Booth <[redacted]> Thu, Mar 11, 2021 at 12:10 PM
To: jbebo@arvada.org

Dear Jeremiah,

Early this morning I went on a run along the Ralston Creek bike path as I do most mornings. My route takes me past the site of the proposed Project Indiana. This is one of my favorite parts of the bike path as the natural area with the creek and large tress and abundant wildlife delights the senses. Just this week I have seen a great horned owl and a skunk! I always return from theses runs rejuvenated for the coming day. My morning runs are not the only way my family uses that section of the Ralston Creek bike path. We value and appreciate the unique accessibility to a peaceful natural area right from our neighborhood. The opportunity to have a relaxing walk after work, bike rides as a family, or just an escape from the hassles of city living will be sorely missed if the proposed development were to be approved by the Arvada City Council.

As a resident of west Arvada, I call on you to protect the families, the homes, and the neighborhoods of this area by opposing the building of an Amazon distribution center. Please understand that this site is not the right place for any kind of distribution center because of the surrounding neighborhoods! Such a development should be placed farther away from family homes for obvious reasons.

In your capacity as a leader of our city and community you have the opportunity to leave a legacy that blesses the lives of current *and* future residents of west Arvada or diminish our quality of life. I implore you to create a lasting and sustainable vision that is less intrusive to surrounding neighborhoods; protects the natural beauty of the Ralston Creek area; adds to residential property values; and supports local small businesses and agriculture.

Thank you for your service to our community,

Shannon Booth

Proposed Amazon Warehouse in Arvada

Suzi <[redacted]> Tue, Feb 16, 2021 at 9:13 PM
To: jbebo@arvada.org

Dear Jeremiah,

We are residents of Candelas, a neighborhood located north of 72, just east of 93, and are writing to express our opposition to Amazon's proposed Distribution Center in Arvada.

Why would Arvada or Jefferson County grant a variance for a large distribution center that does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

There are several major reasons why we believe Amazon's request for a zoning variance to build at this location should be denied:
*__Building Size:__ Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?
*__Light Pollution:__ The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area that is exclusively comprised of single-family homes.
*__Noise Pollution:__ Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.
*__Environmental Impact:__ The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old-growth trees, impacting local native species.
*__Traffic:__ Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will be entering and exiting the Distribution Center. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36, or C470? In addition, there will surely be a few hundred truck and van drivers as well as drone operators coming and going from their homes in other parts of town to the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community.

Residents are drawn to this part of Arvada and Jefferson County for its rural feel. We moved here from an area in Pennsylvania that began with one warehouse and has become overrun with them in the midst of several residential areas. One of the main attractions was the proximity to the mountains and the wide, open space, close to nature. A 24/7 distribution center, bringing with it noise and light pollution as well as a significant increase in traffic from the thousands of cars, trucks, vans, and drones is at odds with the rural feel of this area and will diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Susan & Patrick Campbell

A VERY Concerned Lifelong Arvada Resident

Sean Lovato <[redacted] Sat, Jan 30, 2021 at 10:36 AM
To: jbebo@arvada.org, cokeefe@jeffco.us, nford@arvada.org, lsimpson@arvada.org, jmarriott@arvada.org, djones@arvada.org, dmiller@arvada.org, bfiefer@arvada.org, mwilliams@arvada.org, brianna.titone.house@state.co.us
Cc: Protect Maple Valley [redacted] Susan Valero [redacted]

My Dear Arvada City Council, Mr. Keefe, State Representative Titone, and Mr. Mayor:

Hello my friends. My name is Sean Lovato. I am a nearly life-long Arvada resident and Colorado Native. Thanks to an Article in the Denver Post yesterday, (1/29/2021) I have been made aware of a development plan which is *literally* in my backyard.

I have been living at 6741 Coors Ct. since I was two years old. I love my home, I love Arvada, and I have no intention of seeing any more of this beautiful and peaceful place turned into a concrete jungle.

Therefore, I am **exceedingly concerned** by the fact that this Amazon project is even being considered. Are you willing to build another concrete monolith, on streets that don't have the capacity for a 7-11, let alone an Amazon Delivery Hub? What about all of the future drone traffic amazon is planning? Do we need a cloud of delivery drones over our homes?

Did you know in the woods right there that there is a little bike park? Yes, friends. Long before the Apex center with it's awesome skate-park was built, children were jumping their bikes back in that area. Where are those children going to play? Directly adjacent to an Amazon parking lot?

I like Amazon, in general. In general, I think Amazon building their delivery hubs in Colorado is a great idea — next to existing infrastructure with the capacity to handle them. And, if Amazon wanted to build an ultra-chic *corporate* hub, resplendent with beautiful architecture in my backyard, I would be all for it.

But, **I DO NOT WANT ANY MORE INDUSTRIAL DEVELOPMENT IN MY BACKYARD**. As it is, I am woken up every morning at 5:30 AM by the beeping sound large trucks make when they are in reverse, because of the other industries over there which have been developed in recent years. I do not want a cloud of drones coming and going day and night. I do not want the traffic which will come, not only from the services Amazon provides, but the daily influx of employees who have to commute from everywhere — because the surrounding region is too expensive for said employees to afford. What about Indiana? Who is going to pay for that? What about the small farmers up the road, like Kevin (who's last name I don't remember, but who I used to see at the gym every day)?

This region has remained undeveloped for a reason. The construction on Eldridge was stopped and not resumed — some 30 years ago — for a reason. This project is **wrong for Arvada**.

However, it IS unfair to think that this property and region will remain undeveloped. Therefore, I agree with the Protect Maple Valley group: If the area must be developed, let's use the space to strengthen our precious community — not drive a wedge further between us.

I think the idea of using that exact space to develop another one of Colorado's famous out-door mall experiences — a'la Olde Town Arvada and the Tennyson neighborhood — is exciting given the Amazon alternative. Small businesses, cheerful lamp posts, and an incentive to keep traffic elsewhere, and a beautiful stream for out-door patios to look out on. Perhaps we could encourage Das Meyer to build a small cafe, we could invite the creators of Linger to build a new ultra chic restaurant; and we could ask the owner of Recess to build a super fun bar right by that old bike park (He would know how to make that area fun for everyone), and I am certain we will be able to auction off spaces created for breweries to the highest bidder. Plus, of course, the ubiquitous cries of many citizens of West Arvada to build exactly this sort of project.... presumably so the poor home-owners of Westwoods need not drive allll the way to Olde Town or Downtown Golden (perish the thought). Hey! We could call it, *"Olde West."*

If it must happen, and I am sure it must, then let's do it right. This alternative makes us even more trendy than we already are. (And I will tell you, as a lifelong Arvada resident, it is super exciting to be "trendy.")

I will be reaching out to you all individually by phone. I will also personally go door-to-door to get the petition signed to stop this. If you want to reach me, the best way is through e-mail or text message. (I don't answer my phone if I don't

know the number.) Also feel free to connect with me on my social media accounts.

Concerned Citizen on Proposed Amazon Site in Arvada

Sophia M <[redacted]> Fri, Mar 5, 2021 at 10:33 AM
To: jbebo@arvada.org

Dear Jeremiah,

I am a resident of Spring Mesa, a neighborhood located at Quaker and 77th am writing to express my opposition to Amazon's proposed Distribution Center in Arvada.

Although Amazon has several warehouses and distribution centers in Colorado, this is the only facility that would be located in a primarily residential area. All other Amazon facilities are within heavily industrialized commercial developments, such as the location in Colorado Springs which is to be built in an industrial complex next to the airport and the Amazon Fulfillment Center in Thornton which is right next to I-25. Why would Arvada or Jefferson County grant a variance for a large distribution center which does not align with the residential and rural nature of the surrounding area and conflicts with Arvada's own 2018 Master plan for the location?

Here are several major reasons why I believe Amazon's request for a zoning variance to build at this location should be denied:
***Building Size:** Amazon's building will be +/- 112,000 square feet with a height of 45 feet. Did the Arvada City Council amend the long-standing code of 35 feet purely to accommodate Amazon or will we begin to see additional oversized commercial buildings in our residential/rural community?
***Light Pollution:** The proposed development's 24/7 operation will generate considerable light pollution. Lights from the 1,500 square foot parking lot will shine directly into homes on the north side of Ralston Creek, an area which is exclusively comprised of single-family homes.
***Noise Pollution:** Future 24/7 drone flights proposed by Amazon will create noise pollution and negatively affect property values for local homeowners.
***Environmental Impact:** The proposed site provides no buffer to the Ralston Creek Trail, which is a habitat for a variety of wildlife. Construction on the project will remove numerous old growth trees, impacting local native species. According to wildlife experts, the 24/7 lights in the parking lot will have a significant impact on insect populations, which will significantly impact bird populations who call the creek home. We're also very concerned about the **air quality** in the area being negatively affected from all the vehicle exhaust, emissions, and congestion, going in and out of the facility all day long.
***Traffic:** Amazon's initial traffic study suggests at least an additional 1,400 trucks per day will enter and exit the Distribution Center parking lot 24/7. Since there is no direct access to major highways from Indiana Street (as exists for all other Amazon facilities in Colorado) will these thousands of trucks travel on residential side streets to reach nearby Highways 93, 36 or C470? In addition, there will surely be a few hundred truck and van drivers as well as drone operators coming and going from their homes in other parts of town to work at the facility. This will add even more traffic to an already congested Indiana Street, in effect turning it into a "highway" within our residential community. Also, with the significant number of new homes going up in **Candelas, Whisper Creek, Five Parks, and Leyden Rock,** that are well underway, it is a guarantee that Indiana will be even more impacted than it is currently, as Indiana St. is the only major N-S road linking those neighborhoods to regions further south.

Residents are drawn to the western part of Arvada and Jefferson County for its rural feel. We chose to live here because of this reason as well, and that it was further away from the more industrial feel on the eastern and southern side of town. In addition, our very young children attend school within half a mile of the proposed location, and the proposed Amazon site will be detrimental to their outdoor recess/play time due to the above reasons, in particular, the noise and air pollution. I am concerned that my children's hearing will be negatively affected, and that their outdoor time will also increase exposure to the large amount of vehicle exhaust, which will be a risk factor for their pulmonary health later on.

A 24/7 distribution center, bringing with it noise and light pollution as well as a significant increase in traffic from the thousands of cars, trucks, vans and drones is at odds with the rural feel of this area and will definitely diminish our property values and quality of life. Therefore, we ask that you redirect Amazon to other heavy industrial developments and NOT build in our rural residential area.

Sincerely,

Sophia Murphy

Application #DA2020-01117 Opposition

shelagh peterson <[redacted]> Thu, Feb 4, 2021 at 11:01 AM
To: jbebo@arvada.org

I live in West woods Estates and am writing to let you know of my opposition to the proposed Amazon Distribution center located at 6700 Indiana Street. I do not believe the addition of a major distribution center in this space is a good fit for the community. I believe the additional traffic, lighting and noise will adversely affect the quality of livings well as the home values for miles from the proposed site. In addition to the hardship to the human neighbors this 24/7 operation will adversely affect the wild life within the greenbelt that abuts.

We moved to this area for the quiet feel and also understand that what we saw in West Arvada others would also find inviting. We are not opposed to development but let's find a better fit for this space. Something that will not be operating 24/7, something that Arvada really needs and wants such as shopping and dining . It would be a lovely space for restaurant with patio dining looking over the green space, boutique shops that invite a stroll down the Ralston Trail. Not a 24 hour 7 day a week warehouse operation.

Please vote to protect our quality of life, our home values, our wildlife.

Please vote against the Amazon Distribution center project

Vote against Project Indiana

Request a New traffic study - Project Indiana

1 message

Sarah R [redacted] Fri, Feb 26, 2021 at 2:40 PM
To: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>

Hello,

For the March 16th Public Hearing:

We live off Indiana St. and are very concerned about the proposed Project Indiana. I have read the traffic study and do not believe it is accurate or enough. An acceptable traffic study needs to include realistic estimates and the current study does not, here is an example;

The current traffic studies only estimate 1,352 daily trips and underestimates the daily trips by a factor of three, since it does not account for 292 building employees and the 896 van drivers–a total of 4,168 trips per day • 292 building employees making a trip in and a trip out = 584 daily trips • 896 van drivers making a trip into work and out of work = 1,792 daily trips • 896 van drivers making a delivery trip out of the premises and a delivery trip returning to the premises = 1,792 daily trips .

In addition, the current traffic study does not include the impact of traffic to/from Fig and the connector streets to Fig or the impact on nearby residential streets.

Even with Indiana being widened, we can't support this type of massive commercial development on Indiana not to mention the impact on Ralston Creek trail and the surrounding residential neighborhoods.

Sincerely,

Sarah Roth
Arvada Resident

Amazon Distribution Center in Arvada

TARA DEARD <itzatara@comcast.net> Mon, Apr 19, 2021 at 2:40 PM
To: "itzatara@comcast.net" <itzatara@comcast.net>

It is my understanding that Scannell Properties has withdrawn the minor variation adjustment applications from Jefferson County. Given this, where does Amazon plan to locate the main access driveway off Indiana? Please provide and make public all current information about the 68th Avenue and Indiana Street intersection plans and the access permit application with CDOT.

At the Neighborhood Meeting in March, Amazon said their trucks and vans would be entering and leaving the distribution center during "off hours" or not during morning and evening rush hours. Regardless, this is still a large increase in traffic in this area and will directly affect people living in the neighborhood entering and exiting their neighborhoods.

In addition, I would expect that the number of vans and trucks entering and exiting the distribution center will increase over time as development continues to increase in the distribution center's delivery area.

Given all this, I am very interested in where Amazon plans to put its main entrance and will be monitoring this and the overall Amazon development closely.

I hope you will oppose Amazon's development proposal at this stage at least until the distribution center's entrance location is solidified. I still feel strongly that a development of this type is not compatible with the area. I understand progress and development is inevitable, but a development of this size in the proposed location - especially its proximity to the Ralston Creek Trail - will have multiple adverse affects on the area.

Regards,

Tara Deard
Arvada Resident

Subject: Amazon Distribution Center
To: <rstachelski@arvada.org>

Dear Ryan,

I cannot believe that Arvada is even entertaining the idea of allowing Amazon to build a distribution center in the heart of a residential area bordering on a greenbelt teeming with wildlife. It is a residential land being turned into a warehouse district. Allowing a distribution center with it's beehive of activity will complete the ruin of our part of Arvada. I heard from the last meeting that th few" line-haul trucks would come in overnight and that delivery vans (200+) typically go out around 10am. Can you get Amazon to promise this in writing and pay fines if they break their agree Amazon is a young giant poised to get even bigger & busier. They are bullies and much bigger than Arvada. They get what they want. I imagine they are not far from 24 hour deliveries. That s into, not out of, at our expense.

Our roads system in Arvada already boasts to be some of the poorest in Colorado compared to Aurora, Colorado Springs, Loveland, etc. We have very few wide boulevards. Is it even an opt busy Amazon distribution center near the McIntyre/West 64th/Indiana clustered up intersections? Unless you plan to make Amazon pay to widen Indiana to 4 lanes from W.64th to Candelas problem, there should be no talk of a 24/7 Distribution center there.

Do you need more reasons to stop this proposed project? How about the green belt itself? We have great horned owls, coyotes, bobcats, foxes, ducks, herrons, and even the occasional deer it gets dark and quiet at night. This project threatens light pollution, major runoff into Ralston Creek from their oversized paved parking lot and Noise 24/7.

I would not mind seeing an Amazon distribution center come to Arvada but NOT in a residential area where homes and shops could potentially flourish. Take it further out Hwy72 west of town would be accessible from more directions.

Do any of you government officials even live in this area or are you just thankful that it is not in your backyard?

Respectfully,

Toby Derloshon [redacted]

Arvada Planning Meeting - April 20, 2021 - Protect Maple Valley Park and surrounding Arvada neighborhoods

1 message

Gary Tenhulzen [redacted] Fri, Mar 12, 2021 at 2:42 PM
To: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>

Dear Arvada Planning Commission:

I am writing in opposition to Scannell's Project Indiana to build an Amazon distribution center. After listening to the Zoom Conference call with representatives from Amazon and Scannell Properties last night, two major negative impacts have me very concerned about our Arvada neighborhood.

As my city council member representative for District 4, I ask for your help on this matter.

- I believe the traffic study is flawed and does not accurately reflect this business's impact on traffic. The current traffic study does not include the impact of traffic to and from the proposed distribution center on Fig Street, the connector streets to Fig, or the impact on nearby residential streets. The traffic engineer's explanations last night during the Zoom conference call did not address/answer these concerns. Limited access from Indiana and peak volumes in and out will force employees and delivery vans onto Fig and adjacent connector and residential streets. He stated this can be a controlled access street. I am not convinced. A realistic traffic study needs to include these streets and volumes.

- This proposed major industrial 24 hour a day, 7 day a week distribution center with 220 route trucks and 12 large semi-trailer deliveries during normal periods (in bound during the night hours, outbound during the day) and 530 route trucks and 42 large semi-trailer during holiday periods will be devastating to the quality of life, environment, and wildlife in this portion of Arvada. My house will be very close to the retention pond on the northeast corner of their development, near the Ralston Creek trail. The odor from this pond, the noise and unsightly views of the huge parking lot will be unwelcome.

I recognize the importance of commercial/light industrial businesses in Arvada to generate revenue for the City and provide good paying jobs for the community. However, this location for an Amazon logistics center is not the solution. Many other sites within the city limits offer a more suitable location for this around the clock, high volume traffic business that will be within 300 yards of neighborhood homes and their families.

I have lived in Arvada for almost 40 years and cherish the open spaces, wildlife, and quality of life this offers us. And I have been fortunate enough to live in Maple Valley for over 29 years and have been grateful to enjoy seeing the ducks, hawks, owls, foxes, bobcats, deer and even coyotes that have lived among us here along Ralston Creek and Maple Valley Park. All will be negatively impacted if this distribution center is approved.

Thank you.

tschaefer [redacted] <[redacted]> Sat, Apr 10, 2021 at 1:02 PM
To: jbebo@arvada.org

I would like to strongly oppose the project of the Amazon building project. The plan will severely damage the natural habitat and there is no plan to widen Indiana. I have been driving that stretch for over 20 years to work and the traffic is a major concern for me. It is 6 times what is was 20 years ago. I think the neighbors turned down the once proposed Walmart for a good reason. Since adding the kingsoopers at candelas traffic is out of control. I think Amazon should look up north by the new fed x building on Simms and 108 th easier access and room to expand the roads on the back side of the airport. Thank you for listening and I hope my voice is heard against the project.
Sincerely Teresa Hoke-Schaefer

As Scannell Properties has withdrawn the minor variation and adjustment applications from the county, where is Amazon locating the main access driveway off of Indiana? Please provide and make public all current information that you have about the 68th Avenue and Indiana Street intersection plans and the access permit application to CDOT.

April 19, 2021

City of Arvada
8101 Ralston Road
Arvada, Colorado 80003
Application: Project Indiana (DA2020-0132)
Address: 6730 Indiana St, Arvada, Colorado

Mr. Bebo and Planning Commission Members,

I am writing in on my support for Project Indiana (DA2020-0132), but not without concerns listed below. My wife and I have lived in Ralston Valley Filing #5 since 2001, approximately a block from this application, and commonly use Ralston Valley Trail, Maple Valley Park, and both walk and commute through Parkway Center Light Industrial Park. In reviewing the Report to the Planning Commission, dated April 20, 2021, by Jeremiah Bebo and agree that this application is compatible with current Arvada zoning and land use plans and documents.

We are also aware of the opposition to the development plan and disagree that it is an incompatible use. The opposition has raised the following issues:

- *"This industrial use with 24/7 operation will add noise, light, and air pollution that will be detrimental to nearby residents and the wildlife habitat in the adjacent open space."*

  Potential noise pollution can be easily mitigated, and recommend the applicant proposes the following solution if they haven't already. The applicant property will ensure that the maximum permissible continuous sound pressure levels will respect the adjacent properties' land use at the property line. For example, the northern property line will have a maximum Sound Pressure Level Limit of 55dB(A) during the day and 50dB(A) at night.

  The applicant has proposed the shielding of light fixtures and must meet the Maximum Spill Light Illumination Levels as specified in Arvada Municipal Code.

  Air pollution is a tough one. Does the added impact of the additional traffic offset the current Fugitive Dust Pollution already occurring on the Newsome property and vacant Parkway Center lots?

  The 24/7 operation is not limited to this property. There are other businesses and government facilities that operate 24/7 within the same area.

- *"Traffic congestion to the surrounding area will be substantial."*

  There will be more traffic congestion from the Candelas and surrounding developments than from this use. We do have traffic concerns that need to be addressed by both the city and the

applicant below.

- *"This development will have a negative impact on home values and quality of life."*

  A common concern from homeowners. The Parkway Center Light Industrial Park and Newsome property have been a host of Canadian Thistle and dumping grounds for adjacent property owners' lawn and construction waste. A Class C Recreational Vehicle was recently filled with garbage and abandoned on North Eldridge Street next to Parkway Center Light Industrial Park. This vacant and unmaintained land is not a positive for home values and quality of life either.

- *"An INCOMPATIBLE USE like this will FOREVER change the West Arvada community into a heavy industrial area with NON-STOP TRUCK, VAN & FLEX DRIVER TRAFFIC!"*

  This application for annexation and rezoning is a compatible use.

  It will also repurpose a nuisance property commonly covered in noxious weeds that spread through adjacent subdivisions and into Maple Valley Park. It will revitalize a shopping center and potentially add tertiary businesses to serve future employees of the facility.

We believe that the applicant can mitigate the concerns of impact to Maple Park, and the removal of noxious weeds that commonly infest Maple Park and surrounding properties will be beneficial to the community. Additionally, this application will bring additional tertiary businesses to support the employees of the light industrial park.

We do recommend that the applicant address several issues relating to the development application, not associated with the annexation and rezoning.

1. **Traffic issues with Gardenia Street to West 65th Way to Fig Street to North Eldridge Street**

   Gardenia St – W 65th Wy – Fig St – N Eldridge St is used as a "collector" for subdivisions around Parkway Center to access W 64th Ave because N Eldridge is not complete. While there is an agreement to complete the connection of N Eldridge St between W 64th Ave and W 72nd Ave upon complete infill of Parkway Center, the sooner, the better. If the applicant could financially support this completion, it would be an excellent improvement for the community and ease traffic concerns as local residents could bypass Parkway Center.

2. **Traffic issues with the McIntyre Parkway to West 64th Avenue to Indiana Street**

   The interchange between McIntyre Parkway – W 64th Ave – Indiana St will need to be addressed by the City. The existing configuration does not meet current traffic requirements, cannot meet traffic requirements when Candelas is completed, and the additional traffic from the applicant will not help. The turn radii are barely sufficient for commercial traffic, and there are insufficient turn lanes onto northbound Indiana Street from eastbound W 64th Ave.

   While an unpopular opinion, traffic would flow much more efficiently by replacing the lighted

intersections at McIntyre & W 64th, W 64th & Joyce Dr, and W 64th & Indiana with multi-lane roundabouts.

3. **Noise Mitigation**

   As noted above, we recommend the applicant meet maximum continuous sound pressure levels based on the adjacent property use, not the use of their property to be a good neighbor.

4. **Human Waste Mitigation**

   The applicant should address concerns about human waste deposited in inappropriate disposal containers (e.g., dumpsters). As an industry-wide issue, not limited to the applicant, it needs to be addressed so nothing "leaks" into Ralston Creek or is transferred from the water detention facility by waterfowl or other

Regardless of the applicant, the use is compatible location. It is a light industrial use surrounding by existing and planned light industrial and commercial uses. The existing Newsome property has been the leading community source of noxious weeds for decades. Not have clouds of dust and Canadian Thistle seeds blowing all over the surrounding properties improves home values and quality of life.

The biggest issue is the lack of road infrastructure to support existing and future uses, which is only enhanced by large developments like this since we rarely fund infrastructure projects as taxpayers. Any impact to Maple Valley Park can be mitigated with creative design and potentially enhanced through constructive community feedback. Let's use this as an opportunity to improve our surrounding communities rather than keep the status quo.

To: jbebo@arvada.org

We have been Arvada residents for 43 years now. Of course we have seen many, many changes over the years.
Next to forced trash service with opting out and still costing over $5.00/mo the Amazon facility is the worst decision ever.
We do NOT need this business so close to residential areas especially with the increased anticipated traffic and related noise.
Kindly do your part to veto Amazon at this particular location.
Thank you,
Terry & Sherri Shaffer

Ms. Baker,

The City of Arvada has created a dedicated webpage for this project, which can be found here. The webpage has links to all aspects of this project's applications and a link to the packet for the Planning Commission on April 20th. The documents include all of the information related to the proposed access drive off Indiana Street.

As Scannell Properties has withdrawn the minor variation and adjustment applications from the county, where is Amazon locating the main access driveway off of Indiana? Please provide and make public all current information that you have about the 68th Avenue and Indiana Street intersection plans and the access permit application to CDOT.

Because this development does not in any way fit the character or needs of Arvada, I am requesting that you vote against any actions that would allow it to proceed.

Regards,

Vic Ramey

Mr. Bebo;

The proposed Amazon project seems like a terrible location. We already have frequent accidents on 64th and the traffic cannot stand the additional load Amazon would produce. Please do not approve this!!!!

Mr Bebo,
Where is Amazon locating the main access driveway off Indiana? Please provide and make public all curren4 information you have concerning the 68th and Indiana intersection plans and the access permit application to CDOT.

Also, with Amazon's growth rate, truck traffic could be up 5 times over the next 10 years. What is being done to address this? Is Amazon being given a lid to allowable truck traffic? Or are you relying on their light estimates?

Thank you,
William McAndrew

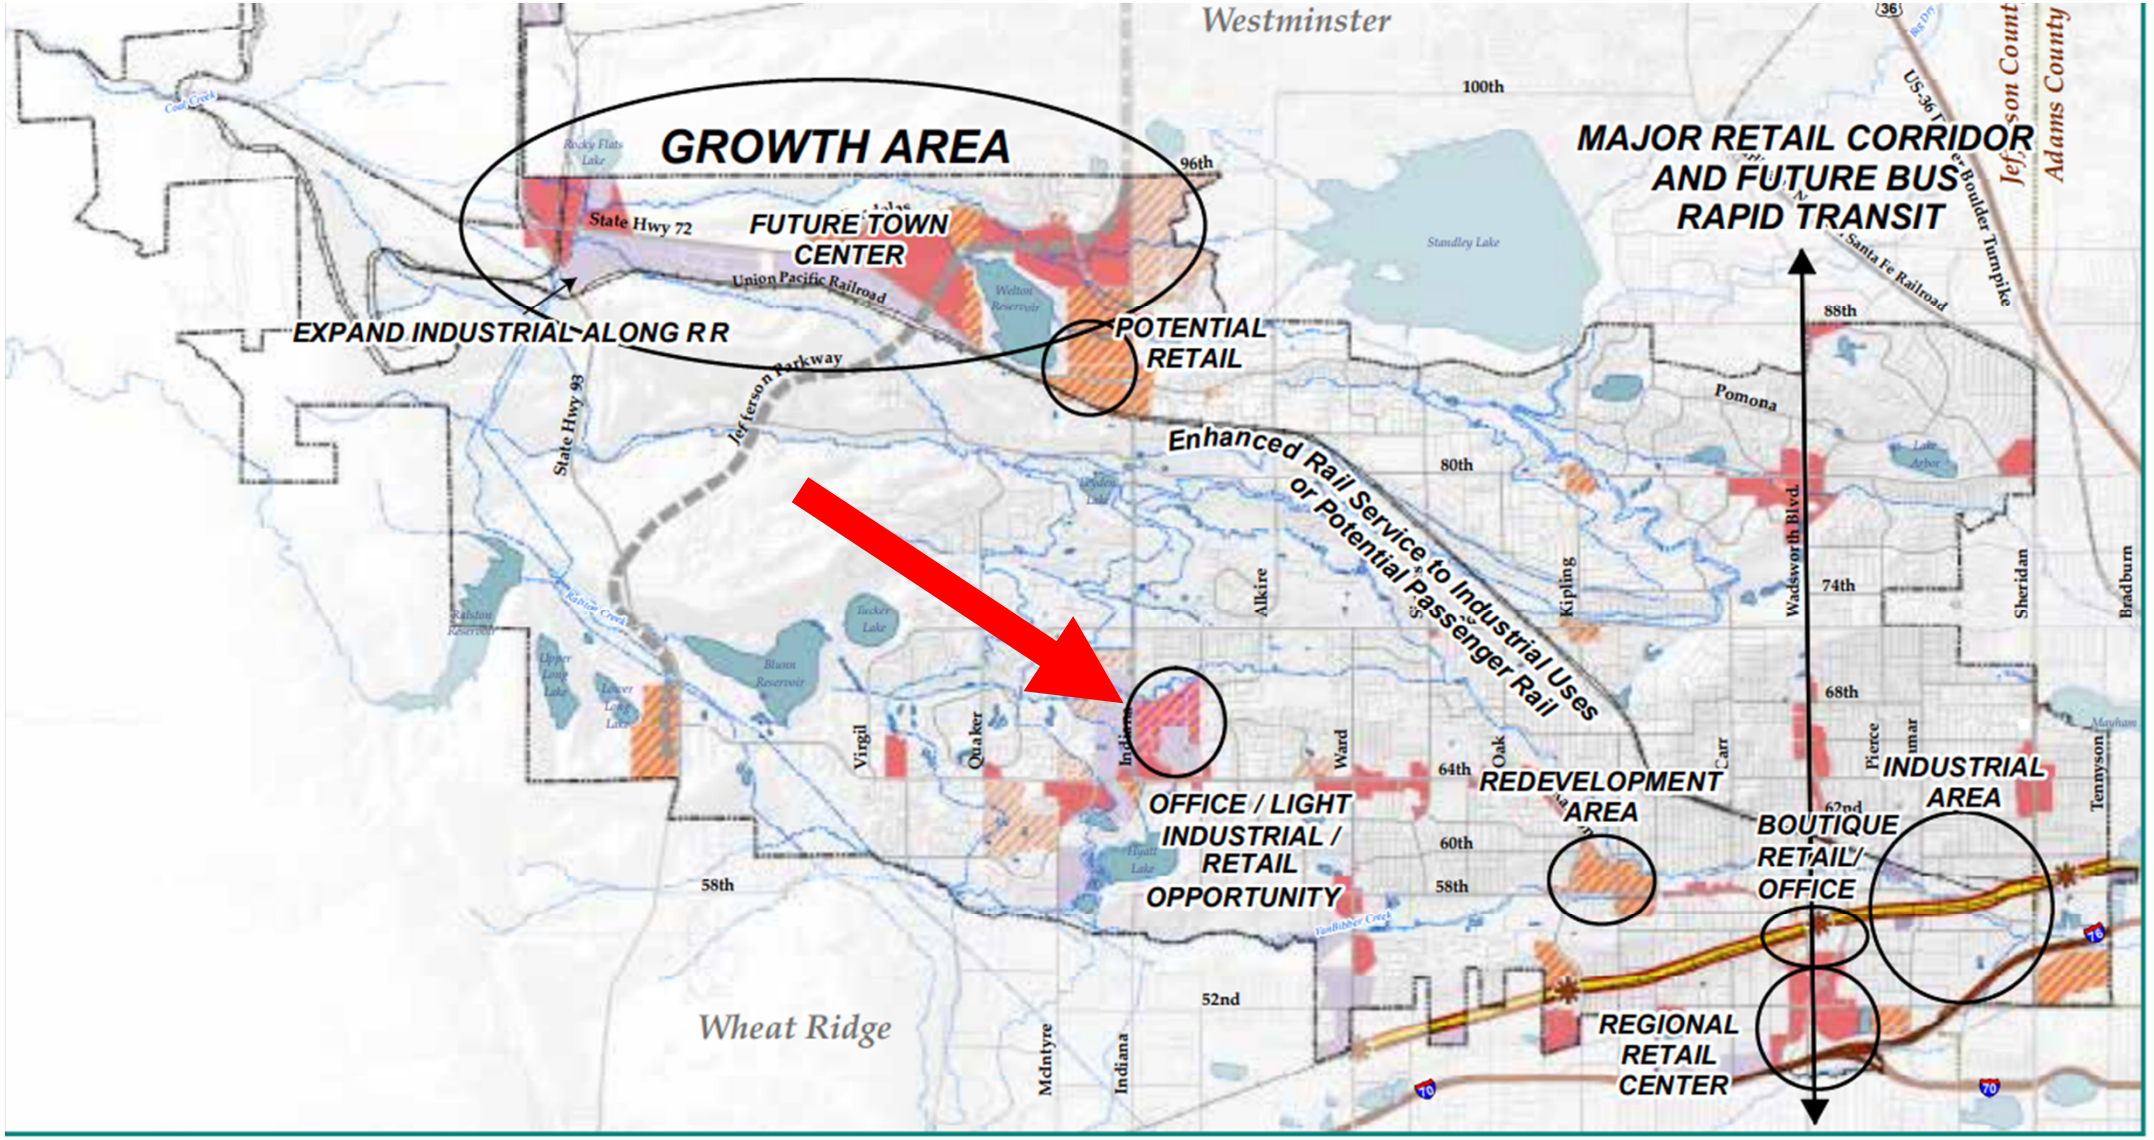
Comprehensive Plan



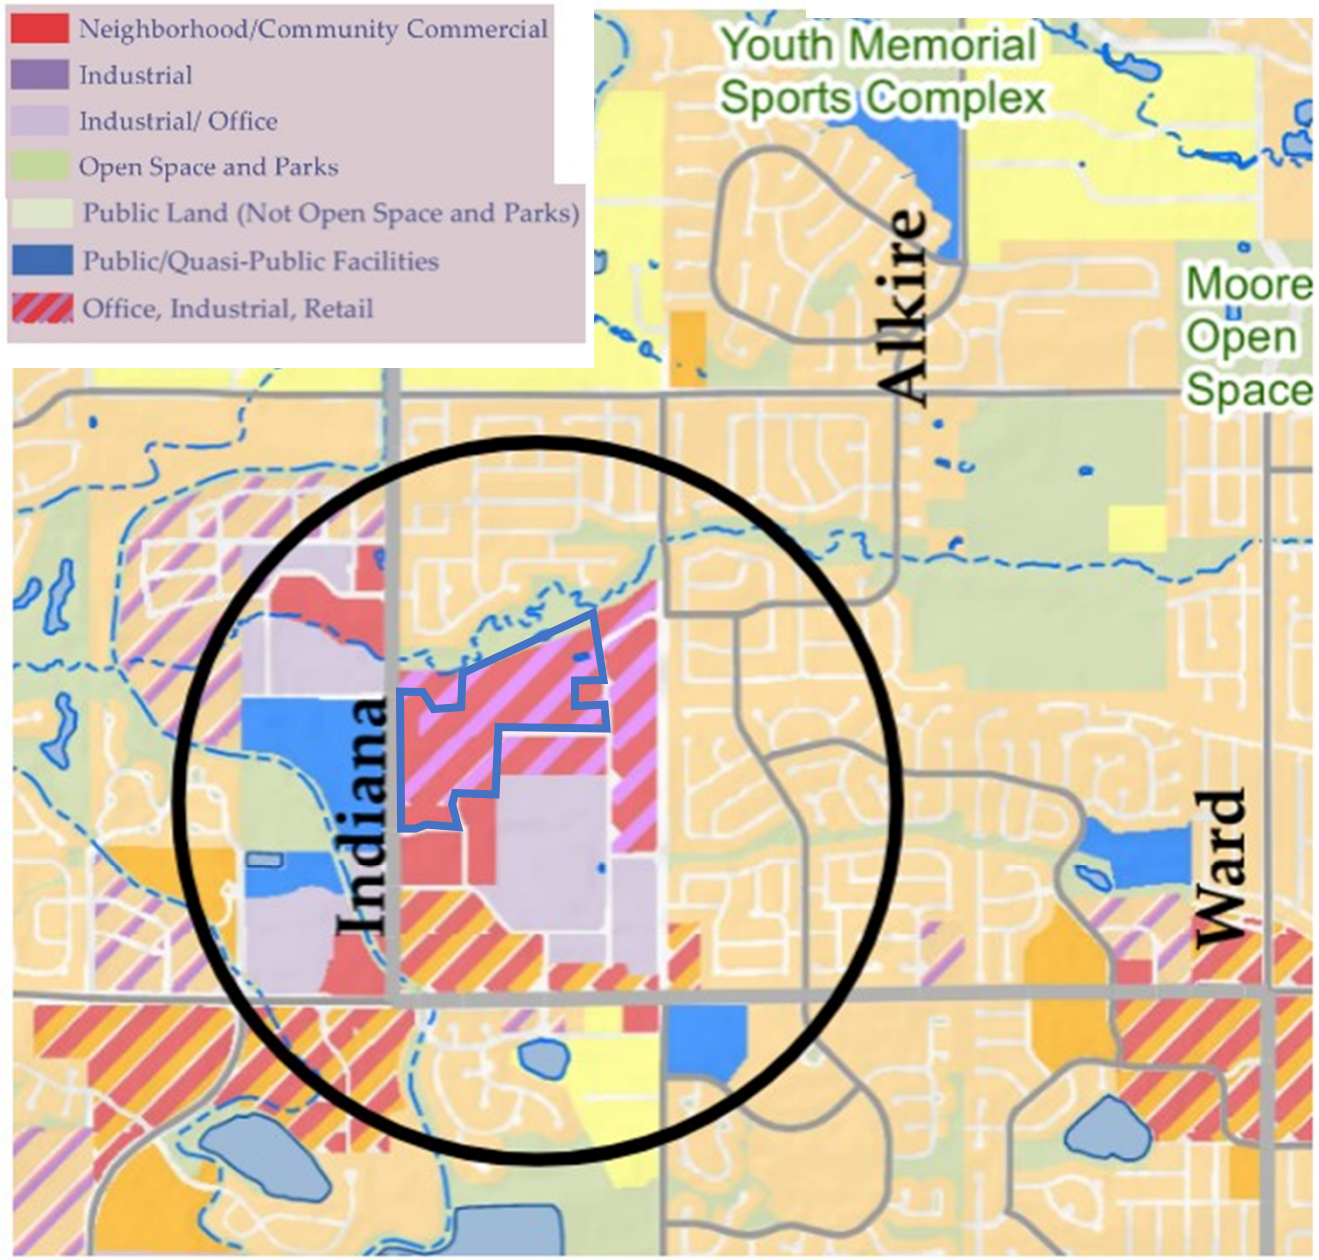


Figure 2-4. Growth and Economic Development Framework

Comprehensive Plan:

Primary Uses

- **Industrial and Office**

Secondary Uses

- Supporting retail
- Open space and Recreation
- Public facilities and uses

Characteristics and Location

- Encourages development of industrial and office uses that will minimally affect surrounding properties.
- Limited outdoor storage
- Generally located along arterial or collector streets

Zoning Districts

- **IL – Standard Industrial, Light***
- NC-I/OF – New Community Industrial and Office Sub-District

*Previously referenced as I-1.

Comprehensive Plan Goals

- *GOAL L-2:* Plan for a balanced mix of commercial and residential land uses in Arvada.
- *GOAL ED-1:* Expand and diversify the City's economic base to create primary jobs to increase the City's fiscal capacity to meet the needs of its citizens
- *GOAL ED-2:* Plan for new employment centers that will provide primary jobs in Arvada.
- *GOAL ED-4:* Redevelop and revitalize existing commercial and industrial areas.
- *GOAL ED-5:* Improve the City's economic base and its financial strength.
- *GOAL CC-1:* Plan Arvada as a City of different development character districts
- *GOAL CC-3:* Identify places and assets that are unique and important to the community and work to preserve them.

Annexation and Zoning: Criteria

Annexation: Approval Criteria

1. Consistent with Comprehensive Plan and best interests of the City;
2. Capable of being integrated into the City and developed in compliance with applicable Code;
3. Capacity to adequately serve residents of such area with utilities, facilities, and public services.

Rezoning: Approval Criteria

1. Consistent with Comprehensive Plan;
2. Land use consistent with intent of proposed zoning district;
3. Adequate facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire protection, and roads and transportation, as applicable) will be available while maintaining adequate levels of service to existing development;
4. Intended land use will not result in significant adverse impacts upon the natural environment (air, water, noise, stormwater management, wildlife, and vegetation), or such impacts will be substantially mitigated; and
5. Consistent with character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts

Project Overview

Intended Use

What is an Amazon Logistics Delivery Station?

At Amazon, we focus on being the most customer-centric company in the world. Amazon Logistics ("AMZL") specializes in delivery of customer orders from delivery stations, which power the last mile of our customer order process and help speed-up deliveries for customers.

5. Contacted all 79 Arvada neighborhood organizations offering presentations
6. Presentations to Jeffco EDC, podcast scheduled with Arvada Chamber
7. FAQ and Fact Sheet produced and distributed
8. One-on-one outreach to local businesses within 1 mile

PROJECT INDIANA
Frequently Asked Questions

1. What is Project Indiana?

A. Project Indiana is the proposed development of a new Amazon "last-mile" Delivery Station in Arvada. The proposed development will include a 112,485 sq. ft. warehouse facility, 862 van parking spaces, 291 employee parking spaces, and large areas of landscaping and buffering on approximately 33 acres.

2. Where is Project Indiana located?

A. The proposed Amazon Delivery Station is located at approximately 6730 Indiana St. between Indiana Street to the west, Fig Street to the east, 68th Avenue to the north and 66th Place to the south.

Summary of Criteria

Annexation Criteria are Met:

- Consistent with Comprehensive Plan and best interests of the City
  - The Comprehensive Plan notes this area as “Industrial/Office/Retail”
  - The Comprehensive Plan notes this as an area for light industrial growth potential
  - Project Indiana site is one of several designated opportunity areas.

- Supports several Comprehensive Plan Goals
  - GOAL ED-1: Expand and diversify the City’s economic base to create primary jobs to increase the City’s fiscal capacity to meet the needs of its citizens
  - GOAL ED-2: Plan for new employment centers that will provide primary jobs in Arvada.
    - POLICY ED-2.1: Future Employment centers include
      - Indiana Street and 66th Avenue (Parkway Business Center and environs)
  - GOAL ED-4: Redevelop and revitalize existing commercial and industrial areas.
  - GOAL ED-5: Improve the City’s economic base and its financial strength.

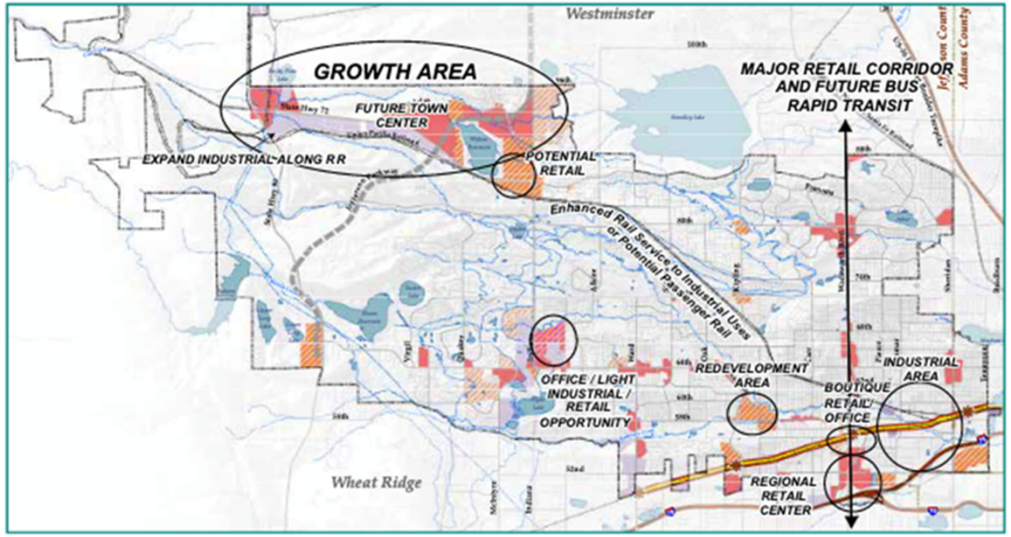

Figure 2-4. Growth and Economic Development Framework

Annexation Criteria is Met: 

- Capable of being integrated into the City and developed in compliance with applicable Code
  - Key question is whether a site plan can be developed in compliance with Code; analysis of actual site plan is a separate process.
  - Applicant has demonstrated that the project can be developed in compliance with Code and is not requesting any variances from Code

Annexation Criteria is Met: 

- Capacity to adequately serve residents of such area with utilities, facilities, and public services
  - Annexed area will not include residents, only commercial uses
  - City has confirmed that it has sufficient capacity to serve the area if annexed
  - Traffic study demonstrates that additional traffic will be within capacity of existing road network including improvements to be constructed with Project

Rezoning Criteria is Met: 

- Consistent with Comprehensive Plan
  - Previously addressed
  - Uses consistent with Comprehensive Plan designation
  - Supports numerous Comprehensive Plan goals
  - Designated Opportunity Area

Rezoning Criteria is Met 

- Land use consistent with intent of proposed zoning district (IL);
  - The purpose of the Industrial, Light (IL) zoning district is to provide areas for light manufacturing, assembly and fabrication uses, office, research, food and beverage processing, packaging, or bottling, and compatible recreational activities
  - Implements the Office, Industrial, Retail designation in Future Land Use Map

Rezoning Criteria is Met 

- Adequate facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire protection, and roads and transportation, as applicable) will be available while maintaining adequate levels of service to existing development
  - Traffic study demonstrates that additional traffic is within capacity of existing roadway, including improvements to be constructed with Project
  - Traffic levels will be timed to be off-peak, having minimal impacts on the peak traffic volumes for the adjacent roadway network. Indiana Street will be widened adjacent to the property
  - The facility is a low generator of water and sewage
  - Will Serve Letters have been provided by Arvada Fire
  - New detached sidewalk along Indiana St
  - Adequate/existing levels of service will be maintained

Rezoning Criteria is Met 

- Intended land use will not result in significant adverse impacts upon the natural environment (air, water, noise, stormwater management, wildlife, and vegetation), or such impacts will be substantially mitigated;
  - Noise: A 6’ high screening wall is proposed along the northern boundary to buffer the park
  - Stormwater will be detained and treated on-site, before being released into the public storm sewer system.
  - Project will plant more than 800 trees, dedicate additional 1.1 acres to City to expand park, and construct connecting trail

Rezoning Criteria is Met 

- Consistent with character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts
  - Properties to the west and south of the property generally fit the character of either light industrial or retail.
  - Closest residential lot more than 800 feet away
  - A significant landscape buffer and wall will be added to the northern boundary with Maple Valley Park
  - 1.1-ac of land will be dedicated to enhance Maple Valley Park.
  - Project will plant more than 800 trees
  - Low impact lighting (full cutoff)
  - Facility activity oriented away from residential

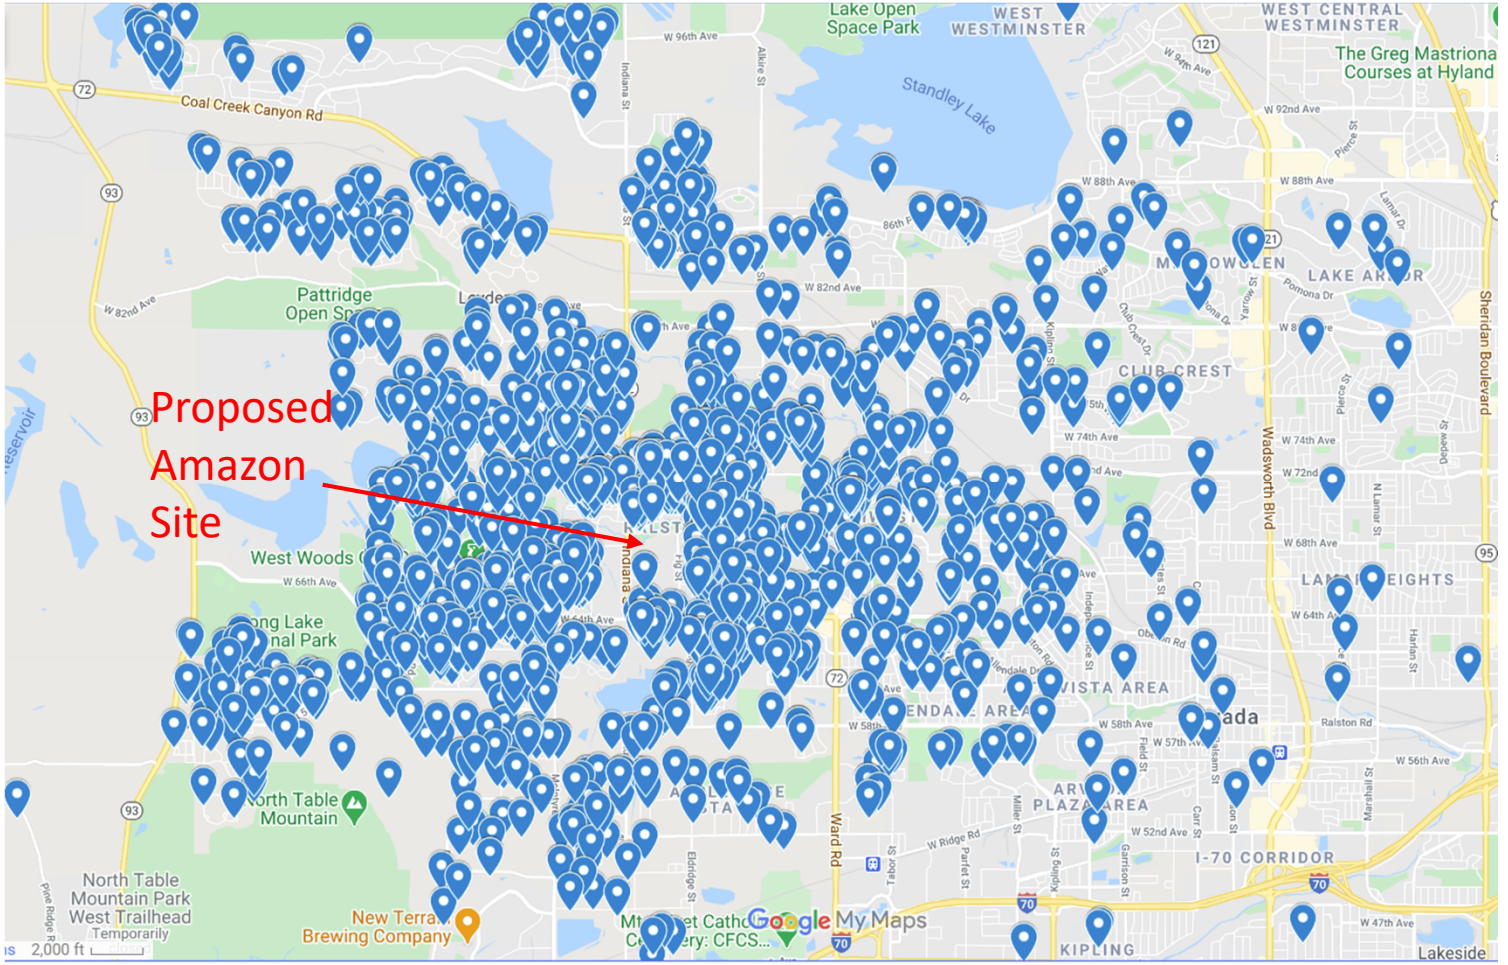
Thank you!

Exhibit C- Presentations to Planning Commission April 20

PROTECT
MAPLE VALLEY PARK

RALSTON CREEK TRAIL

Arvada Planning Commission Presentation
Tuesday, April 20, 2021



Who We Are…

- We are a concerned community of over **5700** Arvada citizens and Jeffco residents who desire to protect the Maple Valley Park and Ralston Creek Trail we all cherish and enjoy. We believe the proposed Project Indiana industrial development, with a 24/7 Amazon Distribution Center operation, **DOES NOT CONFORM** to the requested zoning, is an **INCOMPATIBLE USE** and will have a **NEGATIVE EFFECT** on the adjacent open space, nearby homes and community at large.

PROTECT MAPLE VALLEY PARK PETITION GROUP

- Total number in Petition Group as of April 19th is….

5704

TOP FOUR CONCERNS OF THE PETITION GROUP

ROADS ARE ALREADY CONGESTED AND WON'T BE ABLE TO HANDLE THE AMAZON TRAFFIC

24/7 LIGHT, NOISE AND AIR POLLUTION

INCOMPATIBLE USE IN CLOSE PROXIMITY TO OPEN SPACE AND HOMES

ENVIRONMENTAL IMPACT ON MAPLE VALLEY PARK AND THE RALSTON CREEK

This is what Arvada's 2014 Comp Plan says about infill development.

CC-1.3	**Compatible Infill** Encourage infill that is compatible with scale and		**CD**	Review and amend the LDC to support compatible infill. LDC					

POLICY NO.	COMPREHENSIVE PLAN POLICY	CITY STRATEGIC PLAN 2014 - 2019	LEAD DEP'T	IMPLEMENTATION PROGRAM	2015-2017	2018-2019	2020-2024	Ongoing	Status
	character of existing neighborhoods.			update in 2017-2019.					
CC-1.4	**Work with Stakeholders** Work with stakeholders, developers and the community to integrate development projects that enrich the district's character.		**CD**	Evaluate whether revisions are needed to LDC to emphasize or expand stakeholder/community involvement in project review. LDC update in 2017-2019.					

 Program is approximately 25 percent complete

Arvada Comprehensive Plan Redevelopment and Infill Principles

On page 2-33 of the Comp Plan it states the following:

- **The City recognizes that redevelopment and infill could negatively impact existing neighborhoods if not carefully designed or if impacts are not reasonably mitigated.** Therefore, this Plan includes the following principles for redevelopment and infill.

- Infill development and redevelopment that occurs in or adjacent to existing developed areas **should complement the character and visual qualities of the area and existing development**.

New developments should adhere to the following design principles: (Comp Plan Page 2-33)

- **The overall scale, size, and setbacks of new buildings should be similar to or compatible with those found on adjacent properties.** Transitions in building height may be appropriate (e.g., to provide a transition, the new building should not be more than two stories taller than an adjacent building).
- **Redevelopment and infill should preserve existing mature street trees and significant landscape features to the extent possible**.
- Redevelopment and infill **should incorporate pedestrian friendly mixed use design principles** where possible.
- **New landscaping materials should be mature enough to visually integrate the new infill with the existing neighborhood within ten years.**
- **Usable parks, trails, and open space should be incorporated** into infill and redevelopment projects to the extent possible.

BURDEN OF PROOF

Arvada Land Development Code (LDC) Section 8-2-3-2 Burden of Proof and Persuasion states…

"The burden of demonstrating that an application complies with applicable review and approval criteria is on the Applicant."

We Have Questions…

As Community Stakeholders, the Protect Maple Valley Park Petition Group has repeatedly asked for information from the Applicant via Arvada City Staff and has yet to receive answers for valid questions about this rezoning case in numerous areas of concern.

Here's What We Don't Know…

- The Applicant has not sufficiently answered the Petition Group's questions from the March 11th neighborhood meeting. Over 100 questions were asked by the community, yet only 26 highly filtered questions were recorded and made public by the Applicant.
- The Applicant has withdrawn the Minor Adjustment and Variance Request with Jeffco which was required for 68th Ave to be an access point. It hasn't been specified where the access point or the Hathaway access will be now that the MVR and MAA application has been withdrawn.

Here's What We Don't Know…

- At the Pre-Development meeting, the Applicant expressed having vehicle fueling, servicing, washing and repair on-site. We have asked the status of these items and still have not received an answer to date.

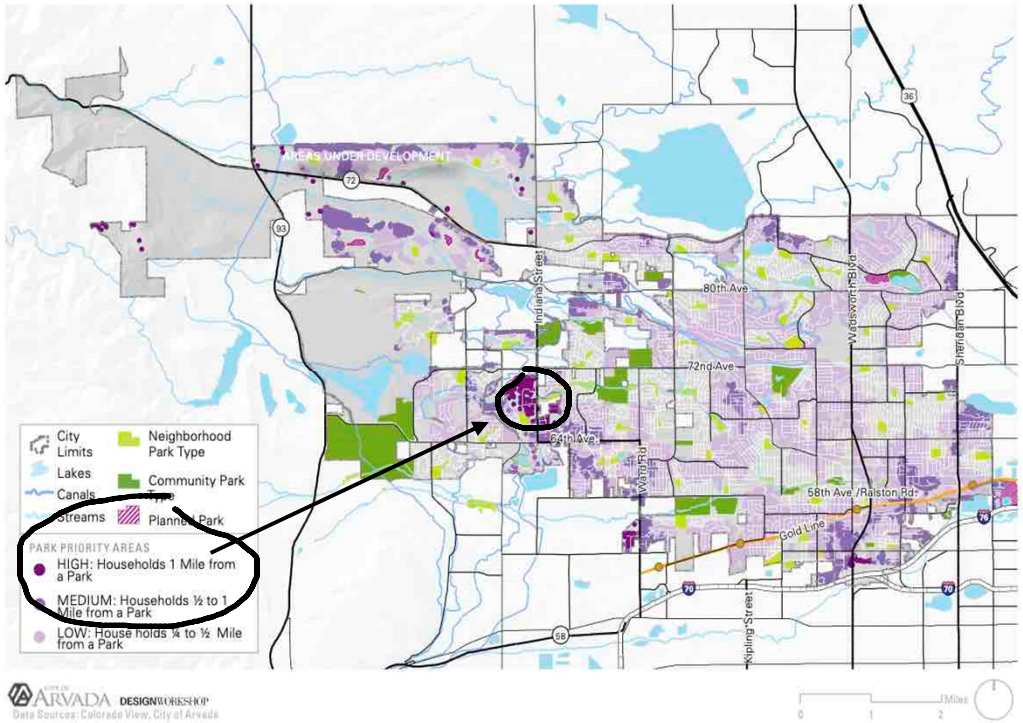
- Recent submittals by the Applicant have mentioned adding package pick-up and drop-off services for the public bringing more traffic to the area. This is a different type of use that now offers walk-in public services. We don't have a clear picture of the additional traffic this will bring.

Project Indiana contradicts the 2016 Arvada Parks, Trails & Open Space Master Plan

Exhibit C- Presentations to Planning Commission April 20

HIGH PRIORITY AREA

2 PROVIDE NEW PARKS AND IMPROVEMENTS TO EXISTING PARKS



Park Improvement Priority Areas

Arvada will continue to grow and add parks to maintain a high quality of life. Map 10 shows areas identified by the gap analysis (Map 8) that are priorities for new parks. New parks and improvements to existing parks can mean:

- Adding contemporary parks and amenities (i.e., bike parks, nature play areas)
- Supporting existing recreation district plans
- Supporting Arvada's community agriculture efforts
- Providing access to water recreation in Arvada's lakes, reservoirs and creeks
- Adding parks within appropriate service areas (see Table 6) to address contemporary recreation trends

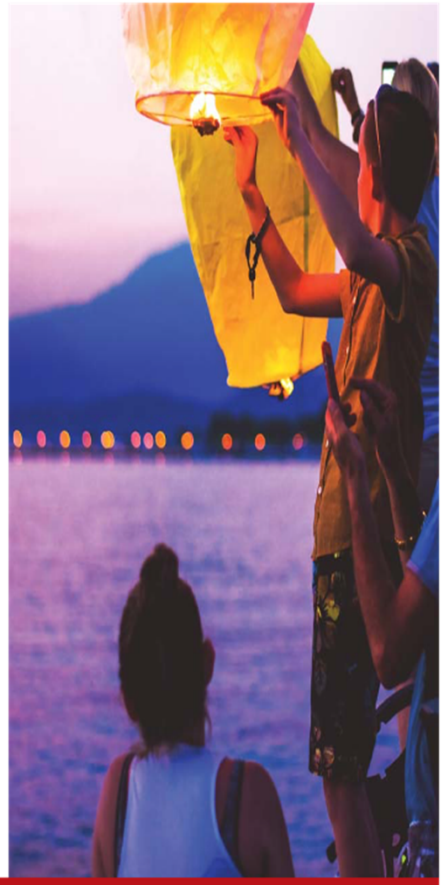
SEE IMPLEMENTATION CHAPTER For a list of priority park projects and funding opportunities.

Map 10: Park Priority Areas- Park Gaps

The area circled is Indiana between 64th and 72nd and is shown in the 2016 Arvada Parks, Trails & Open Space Master Plan as a High Priority area for Park expansion. Dark purple denotes a High Priority area where households are 1 mile from a Park.

Project Indiana contradicts the 2018 Arvada Arts & Cultural Master Plan

Centerpiece for Arts and Culture



66th and Indiana was proposed as a possible location for a Second Cultural Hub for the Arts in the 2018 Arvada Arts & Cultural Master Plan.

Goal - Create a Second Cultural Hub

The City and AACC will look for the opportunity to create a second cultural hub in Arvada. Where and when this can happen will depend on how Arvada's growth and development happens and how willing private developers and individual community members are to make cultural institutions and artistic pursuits a part of the future of their community.

Among the possible locations are these:

1. **Southeast Industrial Area -** Arvada may annex an industrial area in the southeast corner of the City. Should that possibility come to fruition, this area, with its commuter rail access, could serve as an ideal location for artist spaces, particularly those that are more industrial in nature (ceramics, metal work, sculpture, etc.). The area holds real promise for performance space, studio space, and mixed-use development that integrates housing and commercial uses.
2. **Gibbs West -** The skate park, the Apex Center, and the park make Gibbs West a prime candidate as a hub for arts and culture - recreation, education, history, festivals, music and more could find a place at Gibbs West.
3. **66th and Indiana or other green-field areas -** Though perhaps more of a blank canvas than some other areas, because it is still developing, the area at 66th and Indiana or another green-field development could become a centerpiece for arts and culture in the future.

ARVADA

Guiding Theme from the Arvada City Council Strategic Plan 2020-2025

"Prioritizes quality of life, which is defined by connected, safe neighborhoods where we care for our neighbors and enjoy access to an incredible network of parks, trails, and open space."

HOME VALUES AND QUALITY OF LIFE

The City of Arvada Land Development Code (LDC) 1-1-1-2 Purpose and Intent, states in #5

"Protect the quality and character of stable residential neighborhoods".

Locating an Amazon Distribution Center adjacent to homes will have a negative impact on property values and substantially diminish the character of the existing neighborhood by adding an invasive industrial use.

Residents will be negatively affected by traffic congestion, light, noise, air and visual pollution from the 24/7 operations.

COMPARISON TO AMAZON IN LOVELAND

Loveland Amazon is a 123,000 sf warehouse.

(same basic size as the proposed Project Indiana)

Loveland Amazon is located in an existing industrial area, close to I-25 and not near any residential uses or any parks.

COMPARISON TO AMAZON IN BROOMFIELD

Broomfield Amazon is a 200,000 sf warehouse.

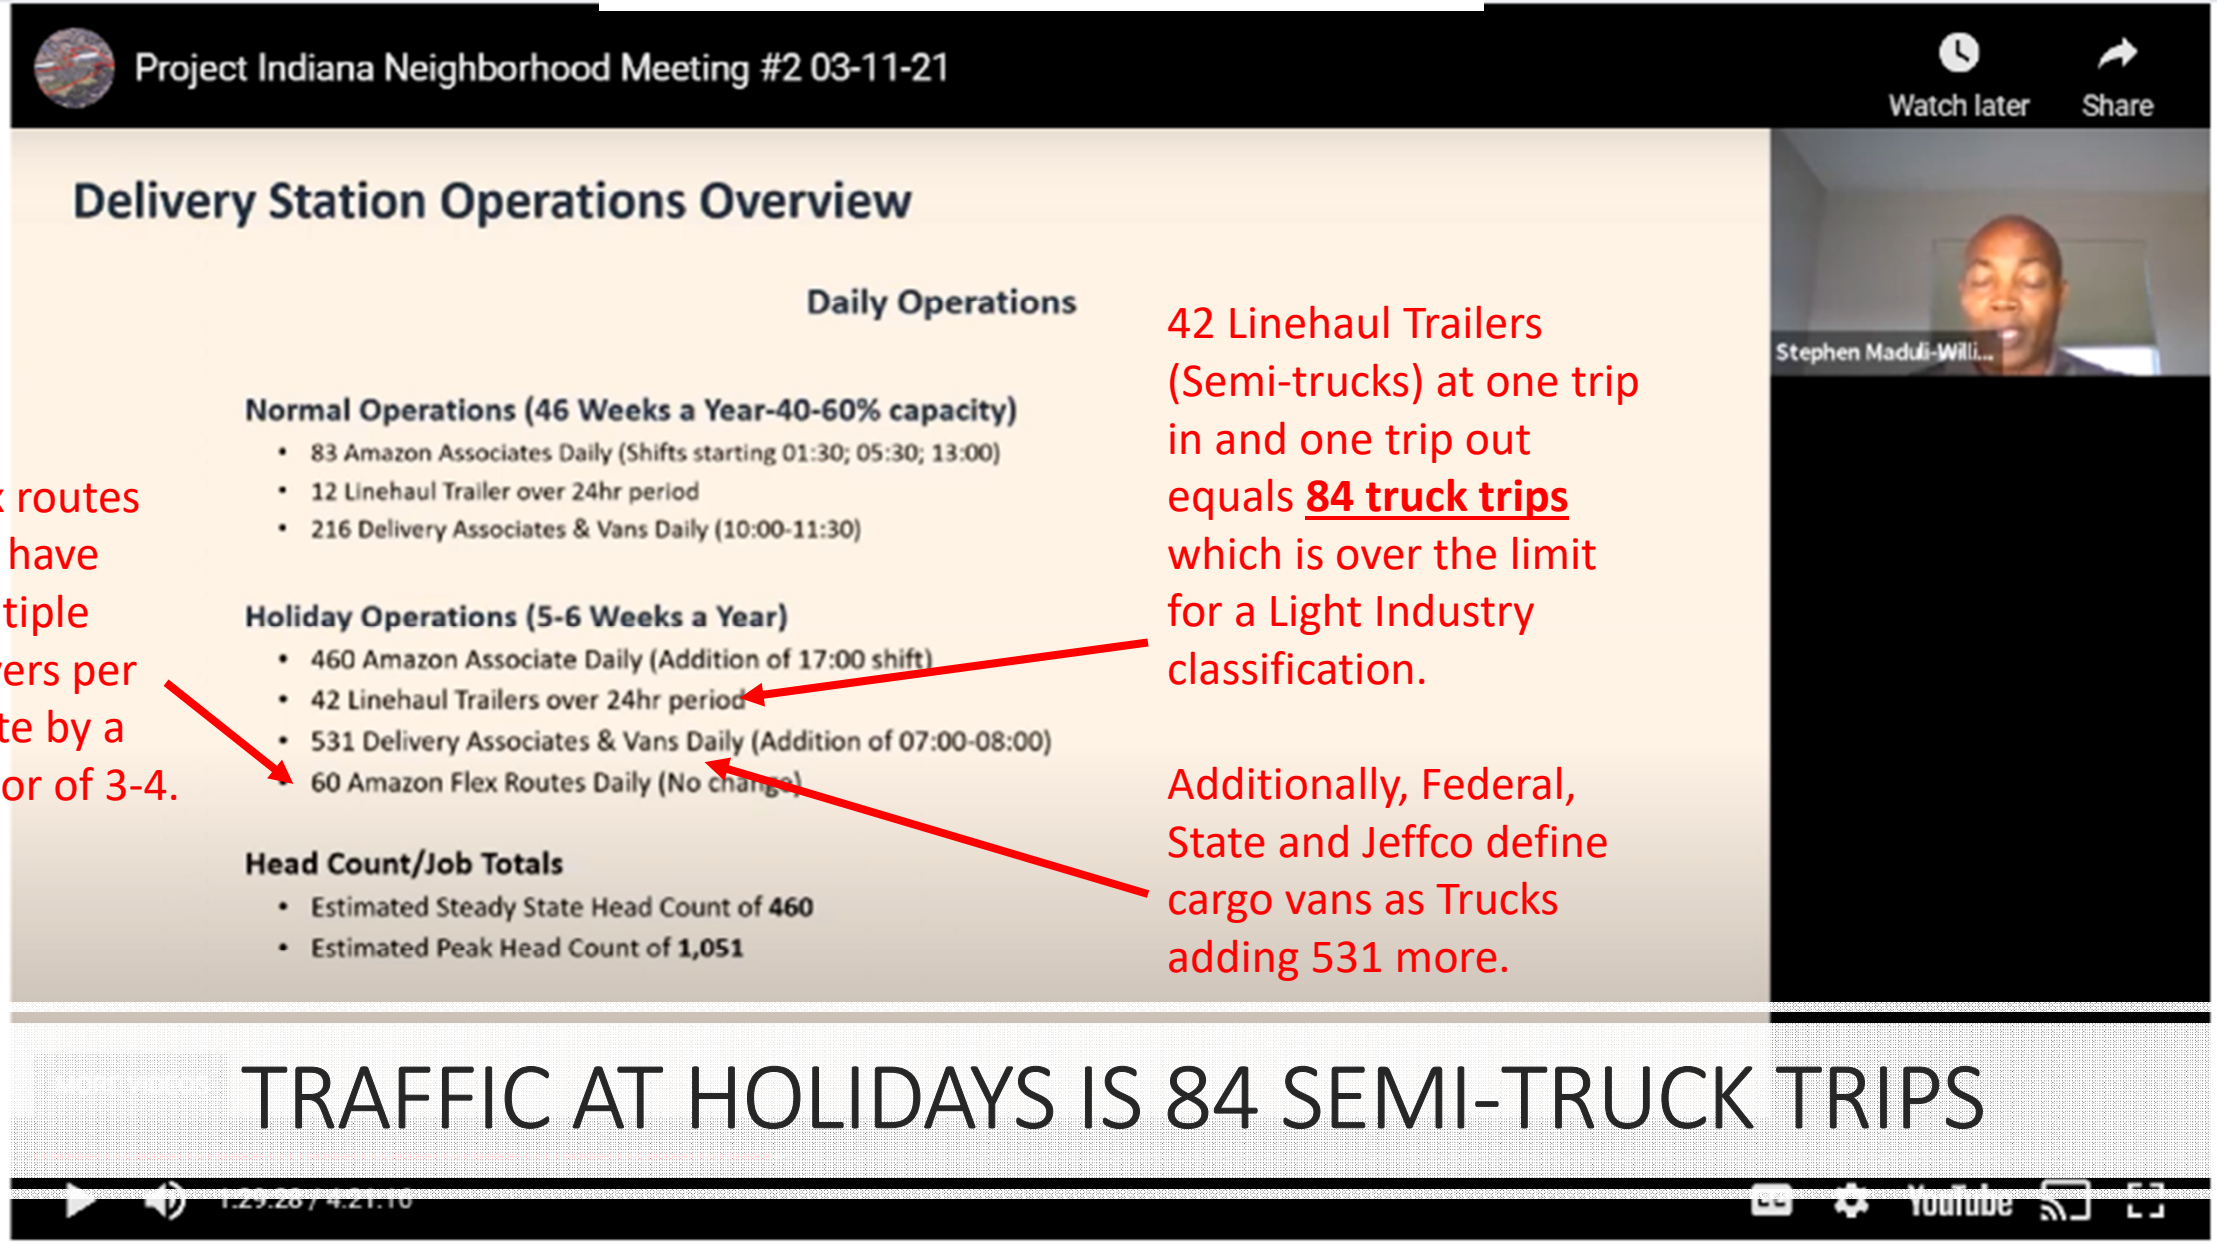
(considered a Last Mile similar to the proposed Project Indiana)

Broomfield Amazon is located immediately adjacent to I-25 and Northwest Parkway and not near any residential uses or parks.

Here's What We Don't Know…

TRAFFIC NEEDS FURTHER STUDIES TO DEMONSTRATE COMPATIBILITY WITH THE COMMUNITY

- The Applicant has not studied the traffic impacts to the Maple Valley, Westwoods Mesa, Geos, Ralston Estates, and Hill Crest communities. Other neighborhoods such as Wyndham and Wildflower will also be impacted and should be studied. You could argue that all the residential along 64th Ave, 72nd Ave, Ward Road and McIntyre will likely have substantial impacts from traffic and should be studied. The traffic study for the Project was crafted for a specific purpose and appears to be misleading. The Applicant's traffic study has not properly studied the impact on the area road system. The maximum traffic level for the Project as shown recently in the public meeting has not been examined.



Current Infrastructure is not Sufficient

- Indiana is already congested both northbound and southbound and is close to capacity.
- Intersections at 64th and Indiana and 64th and McIntyre already have issues with turn lanes.
- Intersection at 64th and Ward Road is tight for turning vehicles heading westbound on 64th and even more so for semi-trailers.
- Ward Road is already congested from 64th Avenue to 44th Avenue.
- The nearest highway access is nearly 5 miles from the proposed facility.
- Heavy truck traffic into this area will further deteriorate State and City roads that are currently in need of repair. One semi-truck can be the equivalent of 5000 cars regarding damage to roadways and some road planners say it would take 10,000 cars to equal the damage of 1 loaded semi-truck.
- In peak season, the 42 Amazon semi-truck trips coming into Arvada every day **fully loaded** equates to the damage of 420,000 cars per day on our road system, plus another 42 trips when the empty semi-trucks leave the site daily.

TRUCK TRAFFIC LIMITATIONS ARE EXCEEDED BY THE PROPOSED PROJECT

- The LDC definition clearly states Light Industry truck traffic must be **lower than 50 truck trips per day**.
- The City staff has on two occasions advised the Applicant that the truck traffic must conform to the 50-truck trip per day limit.
  - The first was at the Pre-Application meeting on 5/22/2020 where City staff recorded the following:
  - **“The use can be defined as Light Industrial so long as daily truck trips are under 50.”**
  - The second was recently in the City staff comment in the Applicant’s Traffic Impact Study where the following was stated:
  - **“In order to stay in conformance with the definition of Light Industry, truck trips must remain fewer than 50 per day.”**

The Applicant’s information on Holiday Operations (presented at Mar 11th meeting), shows 42 linehaul trailers which equates to 84 trips and exceeds the number of trucks allowed for Light Industrial zoning.

Project Indiana Neighborhood Meeting #2 03-11-21
Watch later
Share
Delivery Station Operations Overview
Daily Operations
Normal Operations (46 Weeks a Year-40-60% capacity)
83 Amazon Associates Daily (Shifts starting 01:30; 05:30; 13:00)
12 Linehaul Trailer over 24hr period
216 Delivery Associates & Vans Daily (10:00-11:30)
Holiday Operations (5-6 Weeks a Year)
460 Amazon Associate Daily (Addition of 17:00 shift)
42 Linehaul Trailers over 24hr period
531 Delivery Associates & Vans Daily (Addition of 07:00-08:00)
60 Amazon Flex Routes Daily (No change)
Head Count/Job Totals
Estimated Steady State Head Count of 460
Estimated Peak Head Count of 1,051
Stephen Maduli-Willi...
Flex routes can have multiple drivers per route by a factor of 3-4.
42 Linehaul Trailers (Semi-trucks) at one trip in and one trip out equals 84 truck trips which is over the limit for a Light Industry classification.
Additionally, Federal, State and Jeffco define cargo vans as Trucks adding 531 more.
TRAFFIC AT HOLIDAYS IS 84 SEMI-TRUCK TRIPS

INCONSISTENCIES IN APPLICATION

- There are numerous inconsistencies in the Application, especially regarding the number of semi-trucks and vans that Amazon will be operating.
- The community has a RIGHT TO KNOW what the USE AT CAPACITY will be, as the Arvada resident will ultimately pay the price of the traffic impacts of the Amazon facility on Arvada roadways.
- The residents in Arvada will suffer from the traffic congestion, the cost to repair roads, the health issues from air pollution, the annoyance of 24/7 noise and light pollution, and the negative impact on our property values and quality of life.

Key Considerations to Meet Land Development Code Approval Criteria

Section 8-3-4-2A.4 of the Arvada LDC

"The intended land use for which the rezoning is sought will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, or such impacts will be substantially mitigated;"

"The rezoning is consistent with the character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts."

Resource Conservation and the Environment

(page 4-12 of Comp Plan)

GOAL R-2: *"Promote improved water quality in stream corridors."*

- **POLICY R-2.1: Water Quality Features *"The City will require water quality features in new developments to minimize degradation of stream water quality."***
- **POLICY R-2.3: Best Management Practices for Storm water Conveyance *"The City will protect water quality through implementation of Best Management Practices in the design of storm water conveyance and detention facilities."***

The proposed property currently has many Recognized Environmental Conditions (REC) per the Phase I Environmental Site Assessment (Terracon Project No. 25207246) and these REC’s should be addressed and mitigated prior to any development or disturbance of the land.

Endangerment to human health, safety and the environment

Jeffco's Planning and Zoning referrals dated Jan 26 and Feb. 5, 2021, state the following:

- **The recommendations of the Phase I ESA should be followed, and a Phase II ESA should be conducted. Depending on the results of the Phase II ESA, a Phase III ESA may be warranted.** It is recommended that the County not accept any transfer of land interest to the County, such as Right-of-Way, during the annexation process without a Phase II or Phase III ESA. It would seem this advice would also be prudent for the City of Arvada to follow.

Endangerment to human health, safety and the environment

Jeffco's Planning and Zoning referrals dated Jan 26 and Feb. 5, 2021, state the following:

- **The applicant should also submit the Phase I ESA to CDPHE and reach out to the Colorado Division of Oil and Safety for guidance regarding waste oil.**
- If contaminated soils or trash debris are encountered during the construction phase of the potential development, construction activities must cease, and the developer must contact CDPHE for further instructions.

Endangerment to human health, safety and the environment

Jeffco's Planning and Zoning referrals dated Jan 26 and Feb. 5, 2021, state the following:

- The properties at 6702 and 6710 Indiana Street are within the vicinity of Ralston Creek which is a major drainageway located north of the subject properties. **The northern portion of 6710 Indiana Street is contained within a FEMA Zone AE 100-Year Floodplain. Any development within the 100-Year Floodplain will require a Floodplain Permit. Jefferson County Planning Engineering would like to review any Drainage Reports and/or flood studies resulting from the proposed development.**

Endangerment to human health, safety and the environment

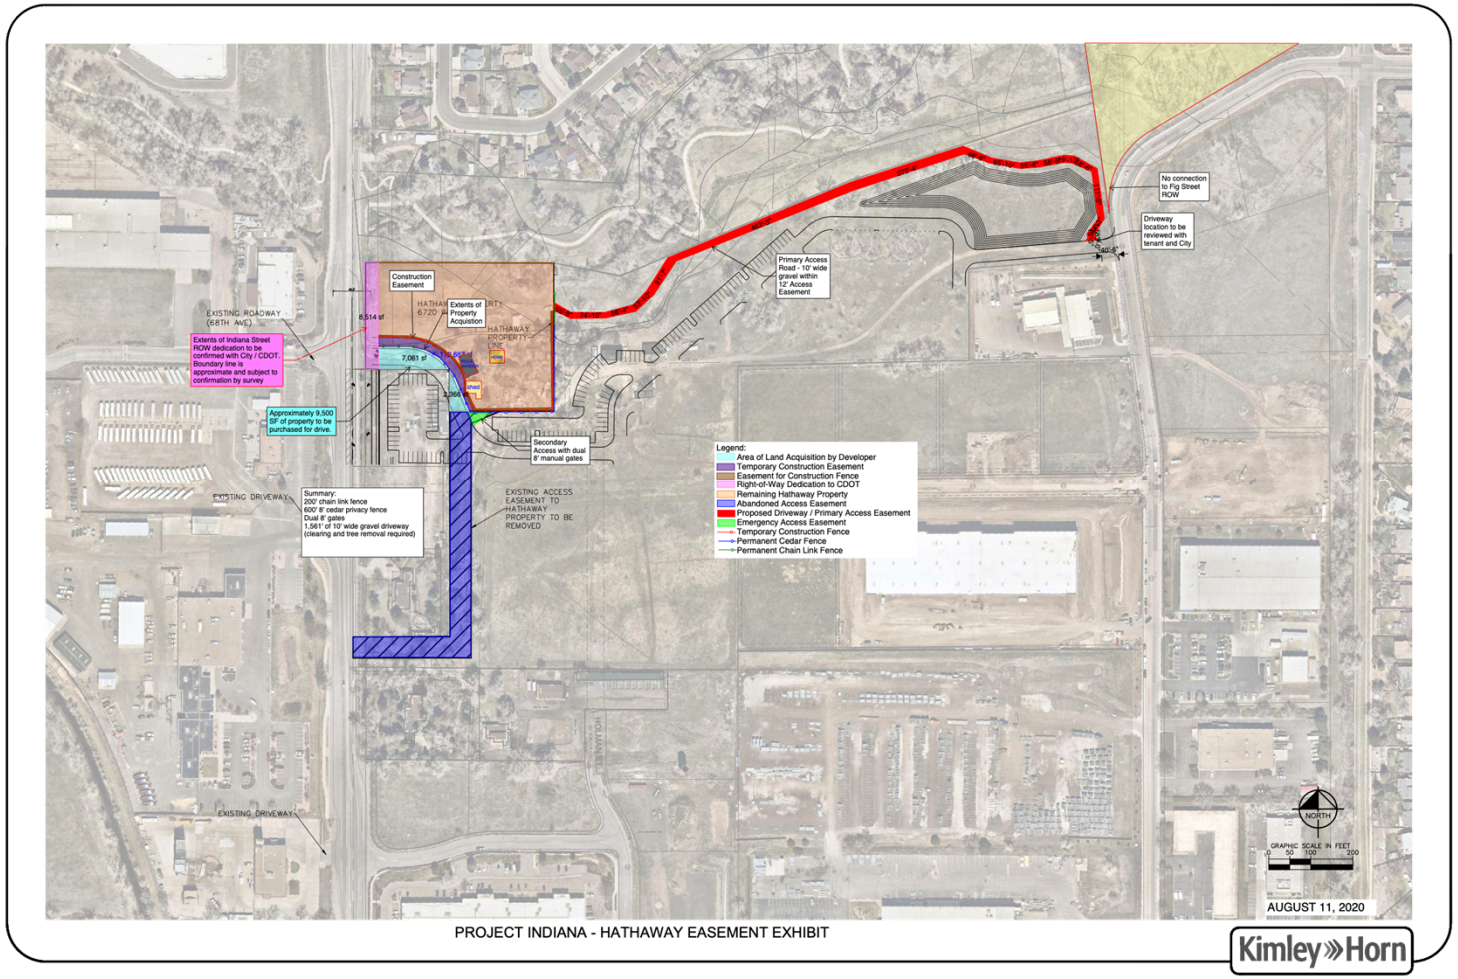
Jeffco's Planning and Zoning referrals dated Jan 26 and Feb. 5, 2021, state the following:

- A Phase III Drainage Report and Grading, Erosion and Sediment Control Plan will be reviewed for any subsequent Site Development Plan Process. **The Phase III Drainage Report should include a historic drainage plan and historic hydrological computations that describe historic drainage patterns for comparison with the proposed drainage computations and fully developed drainage plan.** See the Jefferson County Storm Drainage Design and Technical Criteria for requirements of a Phase III Drainage Report.

Endangerment to human health, safety and the environment

Jeffco's Planning and Zoning referrals dated Jan 26 and Feb. 5, 2021, state the following:

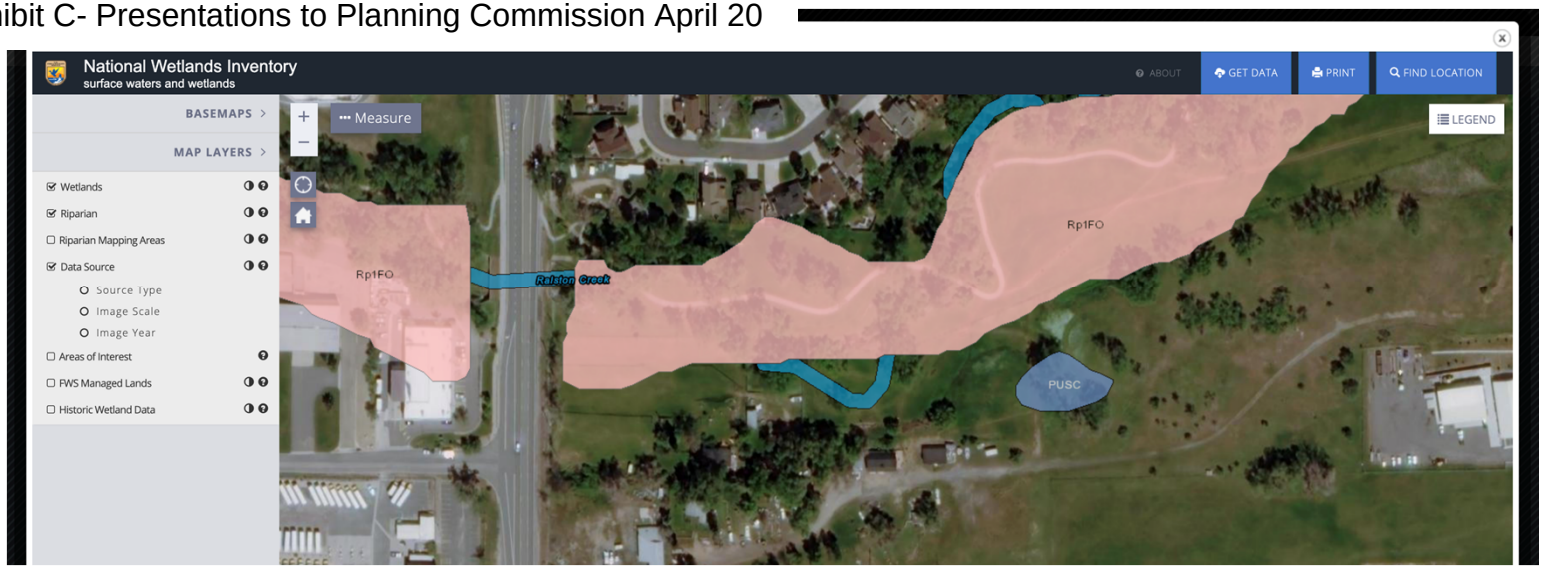
- **The developer should ensure that no outfall structures from the stormwater detention facility will be in Maple Valley Park and that there are adequate setbacks from the park for all development.**
- **The parking for the site seems excessive.** We request that the applicant provide a parking study at the time of site plan review to justify why so much parking is needed.
- **Water quality standards will need to be implemented with detention.** This is especially important due to the large amount of parking proposed for the site.



Endangerment to human health, safety and the environment

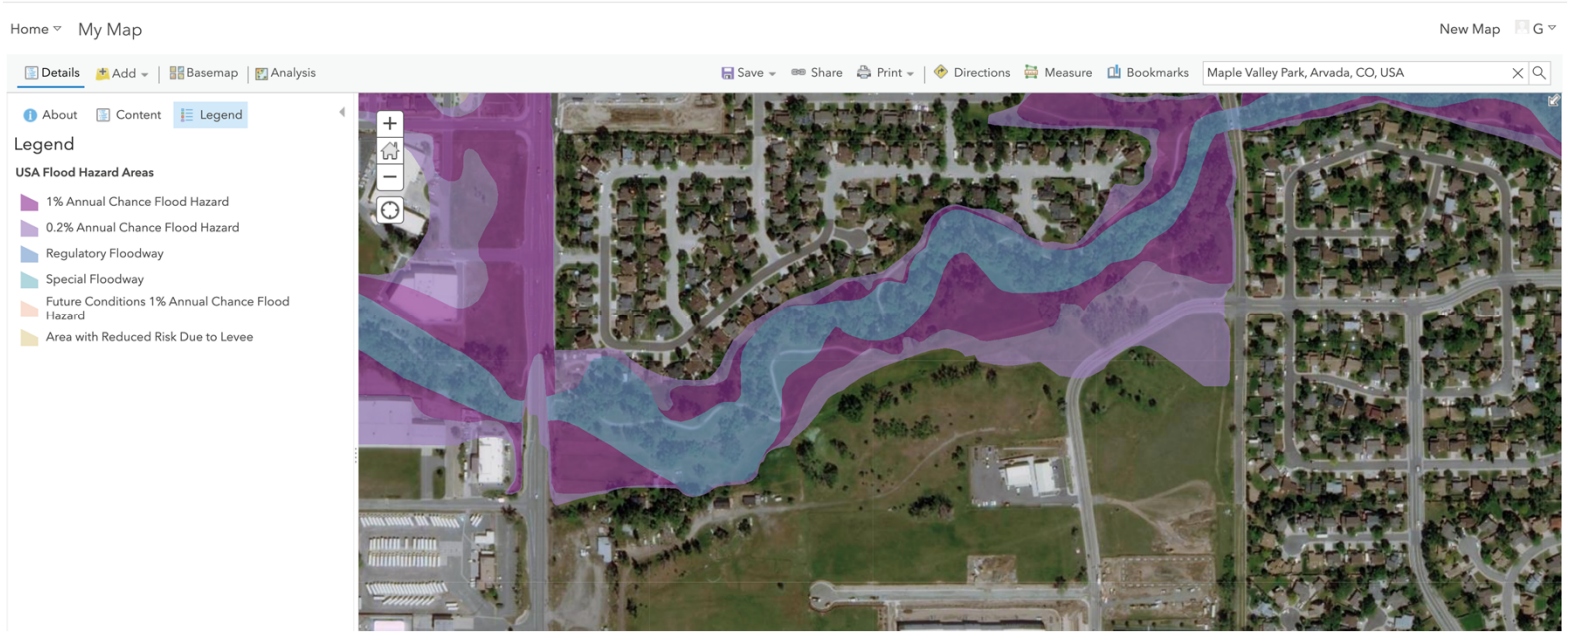
Jeffco's Planning and Zoning referrals dated Jan 26 and Feb. 5, 2021, state the following:

- **The proposal is near Ralston Creek, which is shown to be a riparian area.** The applicant will need to coordinate with the US Fish and Wildlife Service for any development plans in the riparian area.
- **Jefferson County Open Space holds a reverter on Maple Valley Park, which is still intact.**
- **Any use on this land other than for park and open space needs approval from JCOS.**



IMPERVIOUS SURFACE OF PROPOSED AMAZON PROJECT IS MASSIVE

- 25 acres of asphalt parking lots for:
  - 1,016 van parking spaces
  - 292 auto spaces
  - 15 semi-truck trailer docks
  - 12 semi-trailer parking spaces
- A large building covering 2.6 acres
- A fleet of at 531 Delivery Vans
- This will be by far the largest industrial operation in the vicinity of the proposed site.
- No other industrial operation adjacent to the proposed Project has any asphalt parking area rivaling the proposed Amazon lot.
- The Proposed Building will also be the largest in the area.



Proposed Amazon Access at 68th Ave onto Indiana and Hathaway Easement is Cause for Concern.

WETLANDS AND FLOODPLAIN CONCERNS

More studies need to be done on the proposed development in relation to floodplain/wetlands compliance and impacts to Maple Valley Park and the Ralston Creek Trail.

Here's What We Don't Know…

- **The Stormwater Detention Pond appears to be in the floodplain and the Water Treatment System specifies "sediment only".**
  - We have asked the Applicant for a Map of the Detention Pond with all the overlays (site plan, floodplain, wetlands, detention pond, contours, Hathaway access road and the Ralston Creek to see exactly where the pond is in relation to the floodplain and these other characteristics.
  - We have asked City Staff why there is no oil/grease/VOC separator required on the detention pond water system to protect Ralston Creek. **No response to date on either of these important items…**
- **STUDIES HAVE NOT BEEN DONE ON THE EFFECTS OF LIGHT, NOISE AND AIR POLLUTION ON WILDLIFE AND HUMANS FROM A 24/7 OPERATION WITHIN CLOSE PROXIMITY.**

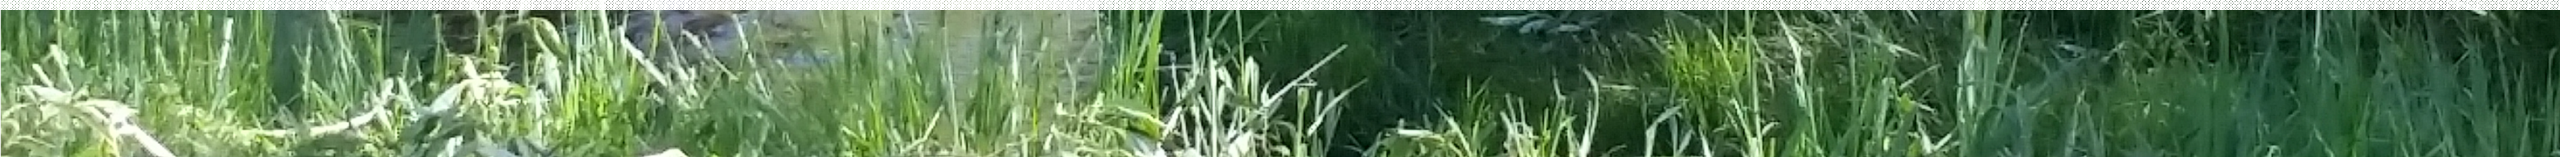
REQUESTED ACTION TO ADDRESS STORMWATER CONCERNS

- The stormwater design should include an appropriately sized oil/water separator(s) to capture the nuisance and stormwater flow(s) up to the five-year design runoff event(s) to improve the water quality constituents in the runoff flow(s) reaching Ralston Creek. Further, we request the project proponents and the City of Arvada cooperate on a tertiary stormwater treatment constructed wetland from the project's stormwater outfall point to a point within the floodway of Ralston Creek. The costs of installation of the constructed wetland, replanting, and maintenance should be carried by the project proponents.

Resource Conservation and the Environment

(page 4-12 of Comp Plan)

Key goals and policies of the Arvada Comp Plan are as follows:



GOAL R-1: "*Minimize the impact of new development on natural areas to allow continued cohabitation of people and wildlife.*"

- **POLICY R-1.1: Buffers and Setbacks.**

"The City will require new developments to provide buffers for creeks, water bodies, existing wetlands, riparian areas, and wildlife corridors to retain water quality and environmental integrity."

The Applicant's project has failed to demonstrate ”No Impact" on the water quality of Ralston Creek or the integrity of Maple Valley Park as a natural area.

DEVELOPER IS REQUIRED TO BUFFER MAPLE VALLEY PARK AND THE RALSTON CREEK

The Applicant, by proposing Maple Valley Park act as the buffer to homes implies the Park Property and Ralston Creek will incur the impacts of the Project Indiana development which is an UNACCEPTABLE USE of an open space park. To reiterate City Policy R1.1 mentioned…

The Community firmly believes this development is required to buffer the Park and the Creek. The Developer must use its *own property* to create a sufficient buffer to mitigate its impacts to Maple Valley Park and to the residents to the north and east.

Maple Valley Park as Open Space performs Critical Functions in Arvada's Urban Environment

- It provides important floodplain and riparian habitats that are home to numerous species of plants and animals.
- Large old, cottonwoods and thick undergrowth provide high quality habitat for nesting raptors (hawks and owls), songbirds, and various species of mammals.
- High quality native forbs, shrubs, and wetland species along Ralston Creek create a unique plant community that compares favorably to nearby wetland and riparian areas in the Denver area.
- All features combine to attract bird groups, photographers, and others who highly value its natural resources.

(see *Maple Valley Park Ecological Assessment*, CNHP, Feb. 2021)

RECOMMENDATION TO BUFFER PARK

"A buffer for the riparian area is important for the protection of this park in light of proposed adjacent development, including consideration of the hydrologic and chemical impacts of potential increased paved surfaces and nonpoint source pollutant runoff associated with vehicles and urban/commercial development (e.g., metals and hydrocarbons from vehicles, trash, sediment, and nutrients from fertilizers)."

***Excerpt from the Maple Valley Park Ecological Assessment*, CNHP, Feb. 2021**

Maple Valley Park is an Environmental Resource that the City says must be Preserved, Protected, and Improved.

- It is a Neighborhood Park, considered the “backbone of Arvada’s park system.” (*Parks, Trails, Open Space 2016 Master Plan*, p. 37)
- It is part of the Ralston Creek Green Spine Trail, a regional trail, and an important wildlife corridor (Maps 3 and 20)
- It is included in the City’s vision to focus “attention on improving the ecological health of our open space network and waterways to benefit wildlife habitat and outdoor recreation destinations.” (*Master Plan Vision*, p. 4)

The Inappropriate Use of Maple Valley Park as a buffer, will cause the Park to suffer these Disproportionate Impacts

- Construction Impacts to Park and Residents in the Park: Blown dust and dirt, blown trash, construction noise, removal of hundreds of trees, air pollution from diesel machinery, uncontrolled runoff, construction traffic.
- 24/7 Operational Impacts: Anthropogenic sources of light, noise, and air pollution, employee and truck traffic in and out of the facility, stormwater runoff, blown trash.
- Unmitigated impacts will result in further degradation of Ralston Creek due to runoff from impervious surfaces; adverse effects on nesting raptors and songbirds, and especially nocturnal species; decline in food sources for wildlife, including insect populations.

Light Pollution will negatively affect Nocturnal Birds in Maple Valley Park

- Great Horned Owl keeps watch over nest in Maple Valley Park

(Photo taken by Laura Plantell, April 11, 2021)

- Owlets depend on the rich habitat of Maple Valley Park

(Photo taken by Laura Plantell, April 11, 2021)

Impacts from Light Pollution

- Scientific research shows that **artificial light at night has negative effects on many creatures, including humans.** *(YourHub.com, April 8, 2021)*

- "Mitigate and minimize sources of anthropogenic light, especially artificial light at night (ALAN). **Anthropogenic light has been linked to catastrophic insect declines (Owens et al. 2020), and impacts to a wide variety of other wildlife species."** *(Maple Valley Park Ecological Assessment, CNHP, Feb. 2021)*

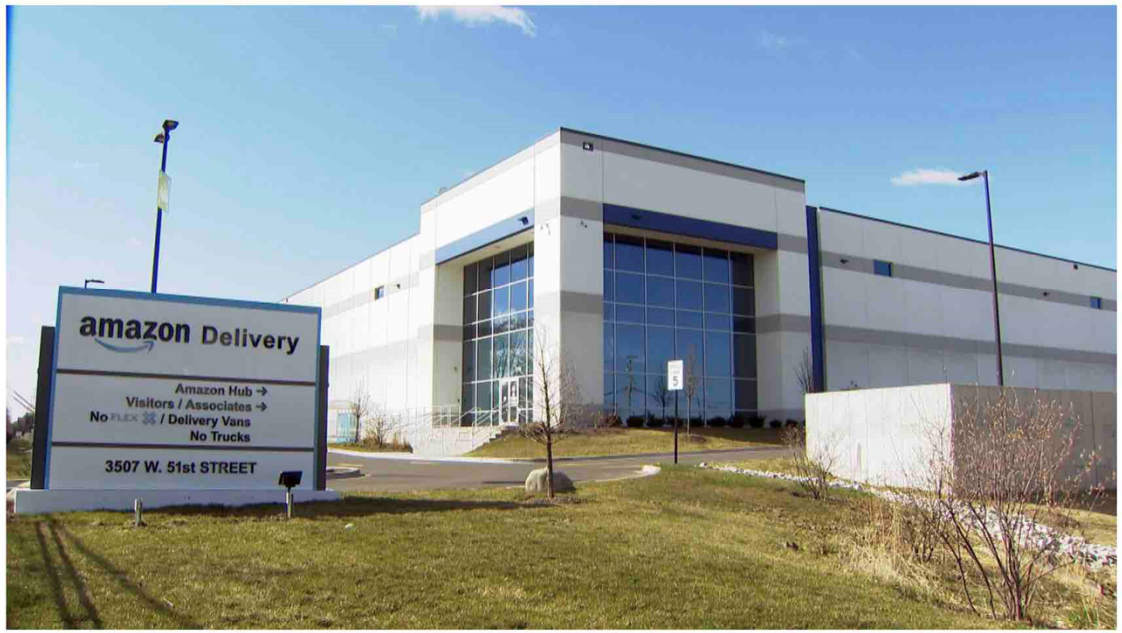
- The effect of bright parking lot lighting on residences and on wildlife was questioned at the first neighborhood meeting in November. **The Applicant said a photometric analysis would be provided as part of their application. This analysis has not been provided to date.**

Impacts of Noise Pollution

- Researchers have found that people who are exposed over long periods of time to **noise levels at 85 dBA or higher are at a much greater risk for hearing loss**.
- Noise pollution from a 24/7 operation will directly impact the quality of life for nearby residents and wildlife and is more in line with heavy industrial zoning rather than light industrial zoning as proposed.
- Light industrial zoning would likely have daytime business hours, not 24/7 use.

Will Amazon be a good employer and neighbor for Arvada?

Amazon medical staff in Thornton faced pressure to reduce care



(The Denver Post 9-29-20)

- In 2019, Amazon fulfillment centers recorded 14,000 serious injuries — those requiring days off or job restrictions. The rate of 7.7 serious injuries per 100 employees was 33% higher than in 2016 and nearly double the most recent industry standard.
- The issues with the 2-year-old Amazon warehouse in Thornton and other facilities around the country are highlighted in a new report by Reveal from The Center for Investigative Reporting.
- A cache of company records obtained by Reveal — including internal safety reports and weekly injury numbers from its nationwide network of fulfillment centers — shows that company officials have misled the public and lawmakers about its record on worker safety.

BUSINESS

Amazon Employees Stage Walkout at Distribution Center Over Working Conditions

Nick Blumberg | April 7, 2021 12:23 pm

The Amazon facility in Gage Park known as DIL3. (WTTW News)

A group of Amazon employees walked out of the mega-retailer's Gage Park distribution center Wednesday morning, calling on the company to stop understaffing the facility and to provide accommodations for people working a 10.5-hour overnight "megacycle" shift.

"We're tired of being used," said Rakyle Johnson of Amazonians United Chicagoland on a livestream. "We work so hard, we give so much to our company ... but they don't give anything back."

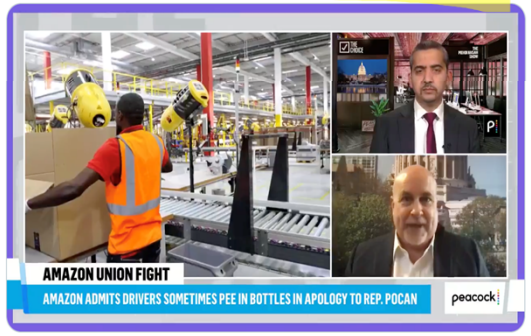
TRASH RECEPTACLES ARE USED IN AMAZON PARKING LOTS AND APPEAR TO BE OVERFLOWING.

- In the letter to Jeremiah Bebo dated January 29, 2021 from Kimley Horn this was the Applicant's comment regarding the City's question about trash:

How is trash being managed? Trash receptacle areas must be shown on the site plan and also be included in the architectural elevations if outdoor areas are proposed.



■ *Response: Outdoor trash receptacles are not requested or used by the tenant. All trash will be handled internal to the building, via a loading dock door.*

Bottles of Urine at nearby Amazon facility – 60th & Washington
Pictures taken April 1, 2021

What are current neighbors living near Amazon facilities saying?

George Nursement lives app. **300 feet** from the El Monte, CA facility shown.

Mr. Nursement has been complaining about the following Amazon facility nuisances that have been lowering his quality of life and that of his neighbors for five years:

- Truck traffic and noise all night long beginning around 7pm in the evening.
- Truck back-up beepers are disturbing. He can hear the air brakes/trailers dropping. Avg 90-110 dB(A)
- Drivers play loud music and disregard local noise ordinances. They continually throw urine bottles out around the neighborhood.
- Trucks idling noise goes on for long periods while drivers wait to back into a loading dock.
- Mr. Nursement and his neighbors have filed numerous complaints with Amazon, local code enforcement officials, and the police all to no avail.
- Mr. Nursement is a truck driver, so he's not predisposed to complain about truck noise.
- He said most of the trucks are diesel, which is a health concern.
- A nearby business (auto parts distributor) sued Amazon because the truck drivers were continually blocking the driveway to their business.

8-10' Wall

Arvada Code of Ordinances Chapter 38 - ENVIRONMENT

Sec. 38-34. - Definitions and standards.

- Noise means any sound which is unwanted or which causes or tends to cause an adverse psychological or physiological effect on human beings.
- Noise *disturbance* means any sound which annoys, disturbs, or perturbs reasonable persons with normal sensitivities; or which injures or endangers the comfort, repose, health, hearing, peace or safety of other persons.

- **Sec. 38-91. – Maximum permissible continuous sound pressure level - General.**

	Day	**Night**

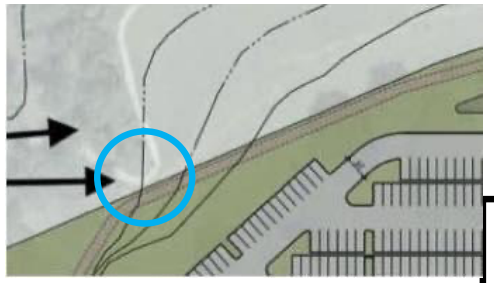
Light industrial	70	65
Heavy industrial	75	75



Site Proximity to Surrounding Neighborhoods

Each red line on the map represents only 500 ft from the Amazon site into the surrounding neighborhoods. Several homes will be in the 250-300 foot range from the proposed site. Open space is directly adjacent and will suffer disproportionate impacts. At this short of a distance, we anticipate light, noise, air and visual pollution will place a substantial negative impact on the open space and residential uses.

Amazon Site Nearly Touches the Ralston Creek Trail

Only 20 ft separates the Amazon site property line from the Ralston Creek Trail. Parking lot proximity is very close to Park.

Noise and air pollution will infringe on the open space, wildlife, and families that enjoy the Park and Trail.

three families living independently of each other. *(Duluth, Ga.)*

A building designed exclusively for or occupied exclusively by no more than three families living independently of each other in three separate dwelling units. *(St. Paul, Minn.)*

A building designed as a single structure, containing three separate living and housekeeping units, each of which is designed to be occupied as a separate permanent residence for one family. *(Santa Rosa, Calif.)*

A dwelling containing three dwelling units, each of which has direct access to the outside or to a common wall. *(Lake Elsinore, Calif.)*

■ **truck** Every motor vehicle, except trailers and semitrailers, designed and used to carry property. *(Norton, Ohio)*

■ **truck, heavy** Trucks, including truck tractors, and similar vehicles with two or more rear axles. *(Portland, Ore.)*

Any truck exceeding a gross vehicle weight rating of 18,500 pounds or any truck-tractor or semitrailer. *(Loveland, Colo.)*

■ **truck, light** Trucks and similar vehicles with single rear axles and single rear wheels. *(Portland, Ore.)*

■ **truck, medium** Trucks and similar vehicles, other than truck tractors, with single rear axles and dual rear wheels. *(Portland, Ore.)*

■ **truck route** A path of circulation required for all vehicles exceeding set weight or axle limits; a truck route follows major arterials through commercial or industrial areas and avoids sensitive areas. *(California Planning Roundtable)*

■ **truck stop** A facility intended to provide services to the trucking industry, including but not limited to the following activities: dispensing of fuel, repair shops, automated washes, restaurants, and motels; all as part of the facility. *(Temecula, Calif.)*

A site in excess of two acres providing specialized facilities for retail fueling services for large trucks; the site may include related facilities including but not limited to restaurants and overnight parking. *(Bernalillo County, N.Mex.)*

Any retail establishment that is greater than 3,500 square feet in gross floor area which offers for sale prepackaged food products, household items, newspapers and magazines, and sandwiches and other freshly prepared foods for off-site consumption. A gasoline or service station may be an accessory use to a truck stop. *(Hot Springs, Ark.)*

An establishment engaged primarily in the fueling, servicing, repair, or parking of tractor trucks or similar heavy commercial vehicles, including the sale of accessories and equipment for such vehicles. A truck stop may also include overnight accommodations, showers, or restaurant facilities primarily for the use of truck crews. *(Loveland, Colo.)*

Any area of land, with adequate parking, maneuvering, and access for at least three combination tractor trailer vehicles, that may provide for retail sale of diesel fuel and gasoline, restaurant facilities, sleeping quarters, and minor repair facilities. *(Campbell County, Va.)*

truck stop

■ **truck terminal** *(See terminal, truck)*

■ **turning circle** *(See also street, cul-de-sac)* A street segment forming a circle at the closed end of a cul-de-sac street, with a curve radius of 100 feet as measured to the outside line of the right-of-way. *(Gorham, Maine)*

DEFINITION OF A TRUCK

- Planners Dictionary definition as shown in graphic:
  - truck… Every motor vehicle, except trailers and semitrailers, designed and used to carry property.
- Regulatory consistency would appear to require the Amazon Vans be counted as Trucks based on the following:
- Under the Arvada Land Development Code, a “truck” is clearly different and distinguished from a semi-truck, in that the definition of “heavy industry” references trips by “semi-trailer trucks.” (page 11.21)
- As such, a mere “truck” as mentioned in the Light Industry definition (page 11.24) is something different from and less than a semi-truck under the LDC.

VANS ARE TRUCKS

According to the Jeffco DMV, **cargo vans are considered trucks** when registered.

This page from their employee manual is taken from Colorado Statute definitions.

Truck Van is the classification that Jeffco uses. Two seats in the front is still considered 'one seat' and the only way it can be classified as a passenger van is to have seats behind the driver.

Return to Chapter Contents

VEHICLE BODY STYLE ABBREVIATIONS

These descriptions were derived from the Second College Edition of the American Dictionary, the Standard Catalog of American Cars and Colorado Revised Statutes. Use the one that best describes the vehicle.

AC- Autocycle
AM- Ambulance
AT- ATV
BU- Bus
CP- Coupe/2D A two-door passenger vehicle
CT- Camper Trailer
CV- Convertible A passenger car with a lowerable or removable top
HB- Hatchback/Liftback/3D A passenger car with a rear lift-gate
LM- Limousine
MC- Motorcycle
MP- Multi Purpose Trailer
MH- Manufactured Home
MT- Motorhome
PK- Pickup
PV- Passenger Van
RD- Roadster An open type passenger vehicle with a single seat
SD- Sedan/4D A four-door passenger vehicle
SMM- Special Mobile Machinery
SN- Snowmobile
SW- Station Wagon/5D A passenger vehicle with an extended interior, a seat that can be lifted out or folded down, no separate luggage compartment, and has a rear lift gate
TC- Trailer Coach
TK- Truck
TL- Trailer
TR- Tractor *
TT- Truck Tractor
TU- Trailer Utility
UP- Utility Passenger
UT- Utility Truck
VN- Truck Van *****A fully enclosed vehicle (built on a truck chassis) to transport cargo. Usually has only one seat and generally does not have a window in the rear compartment.

Single Fuel Types

B = Bio-Diesel*
D = Diesel*
E = Electric
G = Gas*
M = Methanol*

DEFINITION OF A TRUCK

- Federal Regulation 49 CFR 571.3 defines a Truck as a motor vehicle with motive power, except a trailer, designed primarily for the transportation of property or special purpose equipment.
- State of Colo statutory definition of a truck in CRS 42-1-102(108) and the Model Traffic Code would include a cargo van, such as the vans used by Amazon.
- Arvada Municipal Code has adopted the definitions of the Model Traffic Code. (Arvada, Colorado Code of Ordinances Sec. 54-31)
- Jeffco Dept. of Motor Vehicle registers cargo vans (such as those used by Amazon) as Trucks.
- City Staff has taken the unique position ***opposite of ALL the above*** definitions and considers a truck definition as ***only*** semi-trucks.

DISCRETIONARY ABUSE

Department of Transportation, State of Colorado and Jefferson County recognize cargo vans as a truck. The City of Arvada doesn't have a written definition of a truck.

In the absence of their own definition of a truck, the City of Arvada in this case has disregarded the accepted definitions of a truck in the U.S, State and County and insist a truck is *only* a semi-truck.

The lack of clarity and definition on trucks and not answering the community's concerns around the truck trip totals is cause for concern. This discretion on the truck definition from City staff seems abusive and may require judicial review.

IS THIS SPOT ZONING?

Applicant has not addressed valid community concerns and questions about the intended use ‘at capacity’ to sufficiently prove compatibility with the current community and character. The 24/7 operations appears to be closer to a heavy logistics center requiring a conditional use and not a light industrial warehouse use as requested.

Staff recommending approval given the lack of community impact studies, the inconsistent info on actual operations and use at capacity, and the number of trucks not sufficiently defined or specified by the Applicant, appears as possible spot zoning which is problematic for the City.

APPLICATION IS INCOMPLETE

Application needs to go back to Staff, and the Applicant needs to comply with the missing items to demonstrate the use is compatible with the surrounding community.

The Petition Group is in OPPOSITION to an INCOMPATIBLE LAND USE and the burden of proof that this use IS compatible falls on the Applicant and thus far compatibility has not been demonstrated.

The 5700+ citizens in the Petition Group are in opposition of adding a 24/7 industrial use in our community adjacent to open space and homes. We are demanding the Applicant Prove Compatibility by Providing the Required Studies and demonstrate how their use will benefit the community and not change the area into a heavy industrial area.

REQUESTED ACTION

If a Motion for approval is not tabled because of the incomplete information, we would urge the Commission to identify the following findings of fact as the basis for Denial of the Rezoning of the Project Indiana Application.

FINDINGS OF FACT

- **FINDING #1:** Undisputed traffic information indicates that Truck traffic for the project is in excess of the limits imposed by *Arvada, Colorado Code of Ordinances Sec. 11-3-3-1.*

- **FINDING #2:** The Applicant has not satisfied the burden of proof, as required by code, that the activity at the site will comply with 8-3-4-2A.4 (code articles 1, 3, 4, 5) of the LDC due to its significant adverse impacts on the natural environment and the impacts to neighborhoods surrounding the proposed project site.

- **FINDING #3:** The Rezoning is not consistent with the Arvada Comprehensive Plan because the use proposed will have significant adverse effects on surrounding properties.

CITY OF ARVADA

Jeremiah Bebo <jbebo@arvada.org>

Fw: Amazon Project

Alison Lively [redacted] Mon, May 10, 2021 at 8:08 AM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Mr. Bebo,

I am writing to strongly disagree with the proposed development of Maple Valley Park to turn it into an Amazon Distribution Center.

According to the Arvada press stated April 29 and an article by Ryan Dunn

Over 25 public commenters taking part in the first discussion and over 35 taking part in the second. All public, nurse spoke out in opposition of the proposal, with none voice in their support.

Doesn't the planning commission work for the residence of Arvada? The residents of Arvada do not want the Amazon warehouse. They do not want any of the changes you continue to push through.

I do not understand why you continue to move forward with this planned development! The citizens have spoken and yet no one is listening. This will greatly affect our area and Arvada at large.

We do not need any more traffic into this congested city. The roads are in horrible condition and adding all the Amazon delivery trucks will only make the roads worse and traffic congestion increase. I thought Arvada was concerned with all the traffic and that's why you chose to go to a single server trash company - but really it was so you could push this Amazon project through.

The impact for Arvada will be all negative - roads torn up, increased air pollution, increased noise pollution, destruction of natural land for wild life and making the overall life of Arvada residents worse.

Do what your citizens want and stop this project immediately.

Sincerely,
Vic & Alison Lively

Amazon/Scannell Properties Project Indiana/Maple Valley

1 message

Annette McGuire [redacted] Wed, May 26, 2021 at 5:46 PM
To: jbebo@arvada.org, rstachelski@arvada.org, mwilliams@arvada.org, nford@arvada.org, lsimpson@arvada.org, djones@arvada.org, dmiller@arvada.org, bfifer@arvada.org, jmarriott@arvada.org, ldahlkem@jeffco.us, tkharp@jeffco.us, akerr@jeffco.us

When City Council and the Jeffco Commissioners meet June 14th to discuss the proposed Scannell Properties/Amazon project on Indiana Street, I hope the participants will be more respectful of the citizens it represents than was the case when the Planning Commission met on April 20th, 2021.

The planning meeting was a shameful failure of leadership by the Chairman of that committee, T.O. Owens. Not only does Mr. Owens not have a clue about how to run a meeting, but he was obnoxiously rude to the people who tried to use their alloted two minutes to voice concerns and objections to the plan. Many of his interruptions were to say that the issue was annexation and rezoning. I don't agree that comments should have been limited to this one issue, but he could have said this once before public comment began instead of shutting down important comments. I hope he has, or soon will be, removed from any responsibility in the City of Arvada. He is an embarassment to the entire city.

I was also disappointed with the other members of the planning committee for not insisting that speakers be allowed an attentive hearing of public comments. Mr Owens, representing the planning committee, owed the citizens speaking respect and the right to use their alloted two minutes without interruption and to be able to finish their sentence or thought even if it ran a few seconds over their two minutes. It was clear that the decision to recommend approval of the annexation and rezoning had been decided before the meeting even started. The opinion of that committee should be totally discounted.

Another farce that concerns me greatly is the totally inadequate traffic study that was conducted by Curtis Rowe, who described in the planning commission meeting the boundries of the study, which amounted to only about one square mile around the Amazon facility. Do they think the semi trucks and delivery vans will simply vanish into thin air when they get a few blocks away from the building? Insane! Also the study was done in the midst of the pandemic when most businesses were either closed or had employees working at home. When that was questioned, he said an adjustment was made for the pandemic. How do you adjust for something that has never happened before? Ridiculous! The traffic study should have included all the arterial roadways to major highways, east to Wadsworth and west to Hwy 93, South to 32nd Avenue and North to at least 80th Ave. The study should also have included an estimate of increased traffic as a result of all the multi-family housing developments currently in process or planned. Our roads are already very busy and in desparate need of maintanance. To add substantial traffic is crazy and completely unfair to the impacted Arvada citizens.

Please listen to your constituants! We are not naieve about politics and know that anticipated tax money and other concessions are probably considerations that we will never be priviledged to hear about. Don't let money override good sense in this instance. We would rather continue to enjoy our quality of life and preserve our property values. There are more suitable locations for Amazon's facility. They will not be welcome in the Maple Valley location.

Annette McGuire

6372 Cole Ln - Arvada 80004

May 28, 2021

Dear Arvada City Leaders,

On April 28, 2021 the Arvada Chamber of Commerce Board of Directors reviewed the proposal for the development of the land from Indiana Street East to Eldridge, and 64th Avenue North to Maple Valley Park (PROJECT INDIANA). The Chamber's role in Arvada is to ensure that our local economy and businesses are thriving. For the reasons outlined below the Arvada Chamber of Commerce Board of Directors is in favor of the proposal for Project Indiana as we have identified a variety of positive impacts on the economy.

- As outlined in the City of Arvada's Comprehensive Plan the vision for this land is to be utilized for light industrial and / or advanced industry development. This is in alignment with other developments in this area in recent years including Prescient, Micro Spaces at Industrial Business Center, Easter Owens and more. To be a community of choice for developers and businesses it is critical that our community adheres to the documented and approved plans and policies. A lack of consistency in this space will lead to declining investment and opportunity.
- We respect and trust the processes and expertise of the City of Arvada planning staff and their ability to mitigate any traffic and environmental concerns related to this proposed development.
- Retail businesses surrounding Project Indiana will benefit from increased employee counts in the area driving revenue growth and increasing the business tax base in Arvada.
- For our community to thrive we need a mix of types of businesses, with a variety of industries, sizes and employment opportunities represented. Project Indiana allows for continued diversification of our business make-up in Arvada. This diversification is critical in times of economic downturn.
- We recognize that the proposed use of Project Indiana has the potential to create employment opportunities for hundreds of people in our community.

We appreciate your thoughtful consideration and evaluation of the many perspectives and opportunities associated with this project.

Sincerely,

Larry Barker
Chairman
Arvada Chamber of Commerce Board of Directions

Indiana St. Amazon Development

Brittany Flesher <[redacted]> Tue, Apr 27, 2021 at 1:15 PM
Bcc: jbebo@arvada.org

Dear Arvada + JeffCo Officials,

I am writing as a concerned citizen to express my strong opposition to the proposed Amazon development.

Arvada's green spaces and small businesses are at the very heart of what makes Arvada special. This development threatens to harm both of those, in addition to supporting a company who has a strong history of aggressive, unfair and unethical business practices. Amazon has proven that they do not align with our community values.

Let's keep our community support and investment with local entrepreneurs and businesses that will keep money circulating within the local economy. These are the people who will make decisions with our community, rather than shareholders, in mind.

Let's be real... no one needs an egg slicer delivered to them within 24 hours. This development will not improve the quality of life for Arvadans in any way significant enough to justify the harm it will cause.

With respect,
Brittany Flesher
Arvada Resident (80002)

Subject: Amazon Distribution Center Proposal

Hello,

There must be a City of Arvada monetary component to considering an Amazon facility in a highly populated area. I doubt the positives outweigh the negatives when you consider thousands of residents will be negatively impacted.

I question the wisdom of offering this location to Amazon or any large industrial business along an already busy thoroughfare which continues to get busier with every new housing development. The light pollution from the vehicles and the facility, noise pollution and air pollution will increase dramatically. Please consider another Arvada location which will not negatively impact tens of thousands of Arvada citizens and those that frequent the businesses in the area.

I understand consideration for rezoning the area to accommodate Amazon was apparently open to public comment in November. However, the agenda item was under the developer's name not Amazon. Had Amazon been in the 'title" I suspect push back would have occured much sooner.

Thank you for your consideration,

Celeste McDowell
Arvada, CO

Amazon

Coleen Evans [redacted]> Fri, May 7, 2021 at 1:29 PM
To: "jbebo@arvada.org" <jbebo@arvada.org>

Sir:

I am against Amazon's Project Indiana and am following the developments. Project Indiana is not an acceptable use of the land as those of us who live near, and appreciate the current state of the land. I am disappointed in Arvada Planning Commission approval on April 20th. I was also disappointed to see how the commission worked and their obvious distain, disinterest and just plain rude treatment of those who spoke against the project.

Following are a few notions I have not seen addressed.

** Amazon promotes that they will bring 350 jobs to the area. Where are the people for those jobs? King Soopers and other local merchants can't get enough employees to fill positions even now. Customer's must be prepared to sack their own groceries and you can see that they are always behind on stocking and often depend on vendors to stock their own products. Fast food merchants poach employees from other merchants because they are always short on staff. $15 per hour is not going to be enough to staff Amazon unless people come from some distance, which will add to even more traffic as employees of Amazon commute from distance.*

** Amazon van and semi trips are stated but the traffic of 350 employees in and out of the area will add traffic too. Those of us that live and travel for basic needs in the area of Project Indiana know that your traffic predictions are incorrect. Traffic is much worse now than stated in the support of Project Indiana. 350 additional people working at Amazon are going to be driving through our neighborhood to get to and from this distribution center in order to avoid waiting through the nearby traffic lights.*

**Ecologically, Project Indiana is a disaster. Acres of asphalt will increase air temperatures and increase water run off into Ralston Creek, which already has constant suds as a result of current run off. Many, including myself, have enjoyed the wild life and the trails through the Ralston Creek area. Both will be impacted by Amazon's Project Indiana.*

Additionally, as Scannell Properties has withdrawn the minor variation and adjustment applications from the county, where is Amazon locating the main access driveway off of Indiana? Please provide and make public all current information that you have about the 68th Avenue and Indiana Street intersection plans and the access permit application to CDOT.

Sincerely,

Coleen A Evans

Amazon !!

Colleen Miller [redacted] Sat, May 8, 2021 at 1:59 PM
To: "mwilliams@arvada.org" <mwilliams@arvada.org>, "kristen@arvada.org" <kristen@arvada.org>
Cc: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>, "jbebo@arvada.org" <jbebo@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "nford@arvada.org" <nford@arvada.org>

Again, I will lodge my disagreement with Project Indiana actually AMAZON.

First - are you driving Arvada to be the Aurora of the west side of Denver? It seems so. At the rate of current development of crammed housing and 24/7 warehouse operations, Arvada will loose it's character and become just another non-descript suburb.

Aside from the fact that the Traffic Study is flawed and bias and does not look at routes to be used by the daily semi's bringing loads into this place (I-70/Ward Rd OR I-70/Highway 58/McIntyre) and aside from the fact that TO Owens did not conduct the Planning meeting as a non-biased Chair should, this project is just plain WRONG for this area.

It's time to listen to the community input - the input of the citizens of Arvada - your constituents and neighbors. There is huge opposition to Amazon/Project Indiana - Listen.

Arvada **roads** are already bad with little on going maintenance of pot holes etc.
How can our already bad streets support additional semis, all of the delivery vans and all of the employees all coming and going on our streets and roads with Amazon in 24/7/365 business? Amazon says ONLY either 12x2 semi trips in one Scannell comment then 42x2 semi trips in another comment due to holidays, that amount will creep and creep until semi's and all that goes with that is constant. Any given constraint of traffic can not be enforced.

You changed trash hauling in part to reduce the multiple trucks on the streets - Stick to that theory when it comes to all of the traffic Amazon trucks and vans will create.

The City talks a lot about **SMALL BUSINESS** and welcomes and promotes such. Amazon is a killer of small businesses. You can't have it both ways.

While Amazon may pay $15 per hour, that is not a **living wage** for Arvada. That amounts to $30,000 per year for a 40 hour week for 50 weeks per year Before taxes. Who could live in Arvada while making that amount? Consider renting an apartment in Arvada while making $2,400 per month before taxes. Can't happen. Eventually, those Amazon jobs will disappear with robots and drones of the future anyway then we are left with the growing amount of Semi's bringing junk into the facility 24/7 on top of the run off from those trucks by Paving close to 30 acres too near Ralston Creek.

Please, this is not right for our city!

Description

I attended the April 20th Planning Commission Public Hearing about the issues on the agenda. #1 request for annexation rezoning for Maple Valley Park and # 2 request for annexation and rezoning of Project Indiana (Amazon). It's very sad to see the city sees these are separate because you cannot do the second one without the first one. Numerous people tried to point this out but again, again the commission stated they are separate and shut those comment down. You're a planning commission and should be looking at the overall situation. There were numerous things that were very concerning and disheartening about the meeting (you would answer our questions in the 2 mins where were given, you didn't see the correlation between the 2 requests, you didn't ask any follow up questions, and you seem to be just looking at the small area and not the overall impact that would have on the roads). There have already been studies about Ward road which are way over capacity and I assume 64th going West is well, which is where all the large trailers that will service the new Amazon center will be traveling. There was no reason to pass #1 (request for annexation rezoning for Maple Valley Park) because there was no benefit to the city and the current care of the area is very well done. The city continues to allow more and more development without any major infrastructure upgrades especially on the West side, which make no sense. The roads in and around this area are a complete mess, Ward road if overcrowded and needs serious repair but nothing is being done to address this via long term planning. Thank you for your time and hard work with this difficult challenges.

Ms. Nyre,

The City of Arvada has created a dedicated webpage for this project, which can be found here. The webpage has links to all aspects of this project's applications and a link to the packet for the Planning Commission on April 20th. The documents include all of the information related to the proposed access drive off Indiana Street.

Subject: Project Indiana aka Amazon

All,

We ask you, what is the purpose or benefit in this project to Arvada? It will increase traffic congestion on Indiana at 64th, and 64th at Ward and most likely Indiana at 72nd. You haven't worked out potential traffic issues impacting Ward, 64th and Indiana. Also, you have a new development at 72nd and Indiana, you have a new development at 80th and Indiana and custom homes going in on Indiana just north of 80th.

If this project is approved you will not only have Amazon trucks but their suppliers' trucks trying to get to the Amazon distribution center and out. I am sure they will try taking the shortest routes possible through neighborhoods. So why not place this project closer to I-70 or Highway 93?

Looking at the site plan this is right next to Maple Valley neighborhood, Maple Valley Park and Ralston Creek Trail. Arvada is always talking about "community". You encourage block parties, getting to know your neighbors. You even have a neighborhood truck with games and gift cards for food for the block parties. The Maple Valley Neighborhood was established long before your project Indiana aka Amazon

We advocate placing this project on the ballot this November to let Arvada voters decide whether your project Indiana aka Amazon should proceed.

Dexter and Kathy Ashley

Arvada Residents

EASTER OWENS

"IF YOU CAN THINK IT, WE CAN BUILD IT..."

CITY OF ARVADA

To: Mayor Marc Williams,

Marc,
I wanted to let you know that I have full support for the new Amazon distribution center. Having built our first building for our company (Easter-Owens) in 1983 I have watched the area grow.
When we expand into our new building that will be the sixth project I have built in Parkway Center.
There have been other businesses that have looked in this Parkway such as Home Depot and Walmart which would be much more disruptive to this area.
The Amazon facility fits right into all the other businesses that have been developed in the area over the past years.
Not only does the project fit into this area it will have a huge impact for the City of Arvada and lasting economic impact.
I ask you to please support this rezoning and annexation application so Arvada can continue to leverage important economic development opportunities that provide a direct benefit to our neighborhoods!

Respectfully,
David Easter, CEO

Serious Concerns and Questions Regarding Project Indiana

emdenver@gmail.com [redacted] Thu, May 13, 2021 at 2:18 PM
Reply-To: emdenver@gmail.com
To: jbebo@arvada.org
Cc: cokeefe@jeffco.us

Dear Mr. Bebo,

As a homeowner in Arvada District 4 I am very concerned about the inevitable impact of Project Indiana on our homes if this project is approved.

1. Arvadans – including our family -- chose Arvada for its natural setting, parks, and emphasis on outdoor activities. My walking and biking trail goes through Maple Valley Park and I cannot imagine the shocking difference in the experience of walking after a huge commercial warehouse with trucks and vans – lights and activity – 24/7 is immediately adjacent to the trail. It will change the very nature of this protected space. While I appreciate the zoning change to OS, this would be much more effective if the change include the undeveloped areas surrounding the park, or at least ensuring a good distance from the hiking trail.

2. The impact of light, noise, and traffic on our neighborhood and – selfishly -- close to my home, which is off of S Beech and risks a large increase in Amazon van and other vehicle traffic. While it is stated that all traffic to the location will be routed from 64th to Indiana and that traffic leaving will go north on Fig street to 64th, I do not believe this can be asserted as a fact. Amazon drivers are often contractors and they are incentivized to deliver quickly. They will quickly find shortcuts through our residential neighborhood and change its very nature into loud and intrusive.

3. The traffic alone risks worsening an already very congested area surrounding Indiana & 64th. We have not yet accommodated all the recent residential developments.

I have some questions and expect that you can answer them as the Arvada Planner for Project Indiana.

1. Has Arvada offered any tax or other incentives to develop on this land?
2. What is the anticipated revenue to Arvada for this distribution center? Will this money go to Arvada? Colorado? Federal Government?
3. Will the developers of this commercial warehouse compensate the local government for upgrades required of the infrastructure to support so many people and so much activity – including roads, water, sewer, etc?
4. How will the neighborhood(s) be protected from 24/7 lights and noise in our backyards and on our streets?
5. Are there any members of Arvada Government who stand to benefit financially from this development project (I do not know if this is a question that is always asked in the case of any new development.)?

Because this planning and development activity has been very inconspicuous, particularly in the bland naming of the project, I feel that I have only recently become aware of these significant planning and zoning changes that seem to be getting “pushed through” committees.

Exhibit D - Public Comment

My most important question: Is there a way to prevent the City Council from approving this development project and changing forever the environment, ambience, and live-ability of our pastoral parks and green spaces?

Sincerely,

Emily Ward

Subject: Maple Valley Park - Amazon Warehouse
To:

Hello,

Over the last year or so we have been hearing plans to change the Maple Valley Park area into an Amazon distribution site. This location will add significate noise, traffic, congestion, ruining the peaceful location we moved into many years ago. It also has the potential to block the beautiful mountain view from our backyard. We are also worried about our home value, having a massive warehouse in our backyard that can be seen and heard. Please reconsider your vote to allow this to happen. We walk in the area, have bike rides with our kids, they drive their remote controls cars in the 'dirt jumps', and the kids catch crawdads in the stream area among other things.

If we are looking to improve the area, several options have been mentioned. A few are to create a small business zone where we can walk over to restaurants, possible play at a tennis court, or a park to enjoy the area. We all know this part of Arvada definitely needs more restaurants as we only have a few at 64th and Indiana that are close. Having a footprint of this size give quite a few options to consider. Please reconsider your vote allowing Amazon to move into this area and for many, our backyards.

Thanks
Erik

Project Indiana Annexation - DA2020-0117 Case Number

Gary Tenhulzen <[redacted]> Thu, Apr 22, 2021 at 3:41 PM
To: "nford@arvada.org" <nford@arvada.org>, "lsimpson@arvada.org" <lsimpson@arvada.org>, "jmarriott@arvada.org" <jmarriott@arvada.org>, "djones@arvada.org" <djones@arvada.org>, "dmiller@arvada.org" <dmiller@arvada.org>, "bfifer@arvada.org" <bfifer@arvada.org>, "mwilliams@arvada.org" <mwilliams@arvada.org>
Cc: "jbebo@arvada.org" <jbebo@arvada.org>, Protect Maple Valley Park <protectmaplevalleypark@gmail.com>

Dear Arvada City Council Members:

I attended via Zoom the Arvada City Planning Commission's meeting on Tuesday, April 21, 2021. My email dated March 12, 2021 was included in the email public opinion group, which each of you also received.

The discussions and eventual decision to approve Case Number DA2020-0117 - Project Indiana is in direct conflict with two of your own directives for the City and there is another major concern, of many that I have, to share with you.

1. Guiding Theme from the Arvada City Council Strategic Plan 2020-2025:
   a. “Prioritizes quality of life, which is defined by connected, safe neighborhoods where we care for our neighbors and enjoy access to an incredible network of parks, trails, and open space.”
2. The City of Arvada Land Development Code (LDC) 1-1-1-2 Purpose and Intent
   a. states in #5 “Protect the quality and character of stable residential neighborhoods”.

Most of the Arvada City's Planning Commission ignored these two City mandates and disrespectfully failed to acknowledge an understanding of the citizen's concerns, and in many instances lacked showing any genuine interest in hearing what their community had to present, especially the Committee Chair. The majority blatantly moved forward with the approval of the Project Indiana Annexation. Commissioners Andrew Gay and Michael McCarren are to be recognized and thanked for understanding and acknowledging the significant negative impacts this Annexation and Project Indiana would have to the City, and for having the common sense, thoughtfulness, and courage to say No to Amazon.

Observation of Concern:

The traffic study completed by the Applicant looks flawed and another study needs to be completed. The engineer reported that his study was for main intersections from McIntyre Street to Eldridge Street, from 64th Avenue to 72nd Avenue and was done in July and August 2020. This is too limited of a traffic study pattern, no consideration is given for the additional amount of traffic from an Amazon distribution center for routes north of 72nd on Indiana, south of 64th on McIntyre Street, east of Gardenia Street on 64th Avenue or east of Indiana Street on 72nd Street and related intersections. Also, a traffic study conducted during the summer of our Covid Pandemic lacks actual traffic flow volumes during normal business conditions and during the school year for the buses and traffic for Ralston Valley High School and other schools in West Arvada. Their calculations of increased volume to represent actual volume during normal peak periods while schools are in session are flawed.

I can't understand why only one Planning Commissioner - Mr. McCarren, inquired about the traffic issues during the meeting Tuesday night. That was an appalling display of concern for safety and quality of life (transportation issues) by the majority of the Planning Commission for their citizens in West Arvada.

I hope you will acknowledge your mandates and City directions, recognizing what is best for your citizens and their neighborhoods and not approve this Project Indiana proposal in your June Council hearing.

Respectfully,

Gary Tenhulzen

Hi - I wanted to provide a public comment on the Project Indiana.

We live less than a mile from this proposed project. I do not feel it represents the best interests of the community. I am an avid cyclist and I often ride Fig St to get to the Ralston Creek trail at Maple Valley.

Having this proposed project will decrease safety with the expectation of an increase in vehicle traffic along the surrounding roads. In addition it will impact and impair the sliver of tranquility that is Maple Valley Park.

Please don't approve the annexation and rezoning to accommodate this proposed project development.

Sincerely,

Glenn Norwicke

JEFFERSON COUNTY
ECONOMIC DEVELOPMENT CORPORATION

Opening the Future for Business in Jefferson County, Colorado

May 24, 2021

City of Arvada
8101 Ralston Road
Arvada, Colorado

RE: Project Indiana Annexation & Rezone

Dear City of Arvada Council:

The Jefferson County Economic Development Corporation (EDC) serves as the county wide economic leader for the attraction, retention, and expansion of primary employers. As a public / private partnership, we work with our city and county leaders for the creation of economic opportunity for all our residents. One of our core functions is to review of projects for scope, scale, and fit. On Friday, May 14th, 2021, our Develop Jeffco committee reviewed the information as approved by the City of Arvada Planning Commission in reference to Project Indiana:

1. Approval of annexation and rezoning of 24.93 acres as Light Industrial.
2. Approval of rezoning 5.36 acres to Light Industrial.

In both these requests, we agree that the desired use aligns with Arvada's Comprehensive Plan and the efforts of AEDA for this area; and we believe that the positive job creation and capital investment into our community are aligned with the overall economic goals of our community.

For these reasons, the EDC and its Develop Jeffco committee support this project for approval of annexation and rezoning.

Sincerely,

Jansen K. Tidmore
President | CEO

CC: Arvada City Council, Arvada Planning Commission, AEDA

Indiana St. Amazon Development

Karissa Devore <[redacted]> Tue, Apr 27, 2021 at 12:54 PM
Bcc: jbebo@arvada.org

Dear Arvada + JeffCo Officials,

I am writing as a concerned citizen to express my strong opposition to the proposed Amazon development.

Arvada's green spaces and small businesses are at the very heart of what makes Arvada special. This development threatens to harm both of those, in addition to supporting a company who has a strong history of aggressive, unfair and unethical business practices.

Let's keep our community support and investment with local entrepreneurs and businesses that will keep money circulating within the local economy. These are the people who will make decisions with our community, rather than shareholders, in mind.

Let's be real... no one needs an egg slicer delivered to them within 24 hours. This development will not improve the quality of life for Arvadans in any way significant enough to justify the harm it will cause.

With respect,
Karissa Devore
Arvada Resident (80004)

To: kristen@arvada.org <kristen@arvada.org>

Greetings Kristen,
I am grateful you are there to express our concern and EXTREME disappointment that the Arvada city planners think adding a huge Amazon warehouse off Indiana Street is a good idea. I, like many of my neighbors, have grave concerns about the traffic, noise, pollution and general disregard Amazon has for its own workers let alone the community it sits in. Amazon is there to make a profit and don't be fooled into thinking anything else. Please represent our wishes and do anything you possibly can to keep Amazon from setting up shop in Arvada. We are counting on you and your support as our representative voice.
Abundant thanks,
Kenzie Johnston
Arvada resident and neighbor

Memorandum to:

City Manager, Mark Deven

CC:
Councilmember Bob Fifer
Councilmember Dot Miller
Councilmember John Marriott
Councilmember David Jones
Councilmember Nancy Ford
Councilmember Lauren Simpson

Re: Development Application #DA2020-0117 and Project #DA2020-0132 – Project Indiana

Mr. Deven,

I am writing to you because I am concerned with information provided at the Planning Commission hearing as well as at the informational meeting with the developer regarding the traffic study that was done for this project. We watched all 3 hours of the developer meeting and the 5 hours of the Planning Commission hearing. During the discussion with the representative of the company that conducted the traffic study for primarily Indiana Street, the consultant was asked why he only studied Indiana Street to 64th. He said that he conducted the study according to the parameters given to him by the City Staff.

My major concern is why wasn't a traffic study done for 64th both West and East to at least Ward Road? Also a study for Ward Road? What about all the cars and van trucks that will be exiting by Gardenia to 64th Street? What happens with the daily cars and vans (896 vans and 292 associates' cars twice a day) as they need to get to I-70? They could travel via Eldridge to 58th and then Ward ? What about a study that looks at the various other routes? What about the 12-15 semi-trucks coming to the site nightly? What impact is that on 64th and Ward? The developer said during "peak" delivery time, October – December, the number cars and vans could be triple the number during the normal time. One reason the company said they needed so much parking space is to accommodate the increase during the "peak" period.

I am also concerned with assumptions that the traffic study used in looking at the proposed impact of the parking and traffic use by other types of projects. He said it could be much worse if the City chose to put a big recreation center or a super mall.

Really!!! Neither of those uses fit either the sustainability plan nor the comp plan. I have worked for four different California cities and the tactic of suggesting a worse case scenario, although fairly impossible, is somewhat common. I would like to think that the City of Arvada doesn't need to resort to such a tactic to draw in a developer.

The City needs to consider the impact of this additional amount of traffic adding into what already exists in the City, especially in the part of the city where the project is proposed. That would include considering how all the traffic gets to I-70. Are there any other big highways that semi-trucks would use? Van trucks could go to Hwy 36 or Hwy 93, but can local roads needed to get to these highways take all the additional traffic?

The City needs to answer these issues. We would recommend that further traffic studies be conducted before the City Council has to make decisions at their hearing.

Sincerely,

Subject: IN FAVOR of the proposed AMAZON Distribution Center
To: <POD@arvada.org>

To whom it may concern-I'm writing to express my **approval** of the **proposed Amazon Distribution Center in Arvada**. I am an Arvada resident and have been for more than 40 years. There seems to be lots of opposition to the proposed Amazon distribution center and I felt like the City of Arvada should know there are also numerous residents in favor of it.

It is my experience that Arvada residents have a history of opposing just about any kind of development even when it brings, jobs, convenience and numerous advantages and when those projects are shut down, what we end up with is more high density housing which the vast majority of residents, including those who opposed the original development are against. The squeaky wheel gets the oil and while there are residents who oppose the Amazon Distribution Center, there is also a huge number in favor of it. I encourage the City of Arvada to listen to ALL it's residents, not just the "squeaky wheels." For every signature of someone opposed, think about how many residents have driven by a "No Amazon" petition signing site and didn't sign because they are in favor of it.

Thank you for your time and service!
Rebecca Quinn

Amazon warehouse

Robert Slay <[redacted]> Tue, Apr 27, 2021 at 8:27 PM
To: jbebo@arvada.org

My wife and I constantly walk the Ralston Creek trail between Ward Road and Indiana We love the open space feel, the wildlife etc. I am dismayed to hear that the city is considering rezoning the area south of Maple Valley Park south of the trail to accommodate a huge Amazon facility that will operate 24/7. This is wrong. There will be a lot of traffic on streets not intended for a facility of this type causing noise pollution and degrading safety in the surrounding neighborhoods. I believe it will also impact the serenity of the trail and the wildlife there as well. I understand there is an alternative proposal of shops and other businesses for the site and I support that. This is the wrong place for Amazon. There is plenty of open land in the city or outside the city for an Amazon facility with better access to highways and major roads. Send them there. Please forward this to the City Council. Thanks.

Amazon could be greener

1 message

Ross Parrent [redacted] Thu, Apr 29, 2021 at 8:43 PM
To: "cedboardsandcommission@arvada.org" <cedboardsandcommission@arvada.org>

I attended the meeting on April 20th. Please consider my following suggestion:
Amazon should cover the warehouse roof and parking lot with photo voltaic solar collectors.
There are several significant benefits to going green & solar. Perhaps the city could provide policy incentives to do the right thing.
The obvious benefit is cheap, carbon free energy. This warehouse structure will most certainly carry a depreciable life span of at least 20 years, possibly more. During the present global commitment - read “imperative” - to reach a zero carbon footprint by year 2050, this real estate could make a sizable contribution and an excellent proving ground.
Along with the clean electricity, a huge 60 acre warehouse rooftop and parking lot is fraught with risks that could be mitigated. Look only as far as Whole Foods in BelMar to see a tangible example. People could park in the shade, keeping their vehicles cool while they work.
A covered lot could capture precipitation like snow and rain before it hits the oily lot and leaches its contaminants to the holding pond. This drainage could be managed. Less money will be spent keeping clean water clean than attempting to sanitize contaminated water later.
The parking structure could be lighted at night, but the panels angled to have minimal impact on the wildlife in the parkway. The lighting could be motion sensitive to light only the spaces needed, for only the time required. The structure could be better secured with cameras and surveillance, making it safer for all the employees using it.
I’d like to see Arvada consider solar collectors at every possible opportunity. The Amazon project could be an excellent green field proving ground, where experience would be easier to learn, and implementing a project like this the right way would create a model for future endeavors.
Thanks,

--

Dear County and City Commissioners, Council Members, and Planners,

When we bought a house in Arvada in 2009, we chose the location not in small part for the significant undeveloped open space scattered around. Over the past 12 years, we witnessed an incredible amount of development, and loss of open space. At the same time, as the West Arvada population has grown substantially, we are missing a place for the community to connect. While Olde Town is a great and characterful location, it is too far to fully serve the needs of West Arvada.

The last thing West Arvada needs is an Amazon distribution center, with it's traffic, noise, pollution, and inadequately paying jobs. This is not who we are. It will deteriorate the quality of life in West Arvada, and property values along with it. No doubt, Amazon has seen enormous growth over the past decade, but frankly, I doubt that Amazon's future growth projections will come to pass (as a scientist, I can tell you a thing or two about the sustainability of exponential growth). I myself am already reducing Amazon purchases, being disappointed by low-quality, fake and counterfeit products that are misleadingly advertised with Amazon's knowledge and tacit toleration. With Amazon, we are setting us up for environmental, social, cultural, and even economic failure.

I am fully supporting alternative development ideas, preferentially the Town Square concept with focus on small businesses, a creative arts district, small plaza, and a weekly farmers market. This concept would provide the much needed splash of urbanity in West Arvada, a place for community and connection, transpiring a sense of belonging.

Looking into the future, I can only urge you to preserve open space and create community space. As West Arvada's population has grown, designated and permanent park areas and community areas have not kept pace. We can and we have to do better.

Sincerely,
Stephan Lany

Proposed Amazon Center 67th & Indiana

Theresa McKinney <[redacted]> Thu, Apr 29, 2021 at 9:23 AM
To: JaneAnn Griffin <j[redacted]>, "Yost, Donna (FAA)" <[redacted]>, "bfifer@arvada.org" <bfifer@arvada.org>, jbebo@arvada.org, "nford@arvada.org" <nford@arvada.org>, "protectmaplevalleypatk@gmail.com" <protectmaplevalleypatk@gmail.com>

Hello Jeremiah -

I am an almost 19-year resident of Village of Five Parks, and a 34-year resident of Jefferson County. I'm also a 9-year key contributor and leader of produce collection & food bank donations for Rose Roots Garden, located at 84th & Alkire. We are part of Denver Urban Gardens. Over the last 9 years, with my guidance, our gardeners have donated nearly 15,000 lbs of fresh produce to The Community Table and other local non-profits distributing food to the community. Similar to Maple Valley, we have numerous owls and other birds in the area of the community gardens.

I'm very concerned about the proposed use of land at 67th & Indiana. I echo the concerns of others on the community re: impact on wildlife, quality of life, overall environmental impacts and the impact to small privately owned local businesses. To pull from Nancy Fords information on the City Councils website, I cannot comprehend how the proposed use meets the definition of "wise resource stewardship".

The review provided by the Colorado Division of Wildlife recommends that the City of Arvada consult further with the U.S. Fish & Wildlife Service. Do you have feedback and/or an assessment from them to share with the public? Also, if Amazons proposal includes the use of drones, do you have FAA's assessment and the required approved permits?l for commercial drone use?

Regarding any proposed drone use in the Arvada/Broomfield area:

1. There is, of course, the local airport, to consider and any potential impacts of using drones within a specified area.

2. The Bald Eagles nesting at Standley Lake are protected by the National Bald and Golden Eagle Protection Act - no disruption to the birds is allowed, including flying drones within a specified area. We've seen the Bald Eagles flying over Five Parks and Rose Roots Community Gardens.

3. A few years ago, visitors from all over Colorado and Wyoming fled to the Standley Lake area to enjoy seeing a young Snowy Owl. As a migratory bird, the Snowy Owl is protected by the Migratory Bird Act.

So again, in addition to FAA reports/approvals, I'd like to see a full report from the U.S. Fish & Wildlife Service re: any proposed use of drones as related to these special birds, with these two protection acts taken into consideration. As you obtain the information, please share it with the public.

I look forward to your reply,

Theresa McKinney

Subject: Project Indiana

Dear Ms. Rush,

Please include the following comments as part of the City Council Public Hearing on Monday June 14th, 2021 regarding Project Indiana (AKA Amazon Distribution Center):

Project Indiana will result in unrecompensed takings for the surrounding community whom the City Council and Mayor are duty bound to protect. These include, but are not limited to:

The large scale building and excavation in the well-documented lead plume resulting from Rocky Flats will invariably lead to long term health effects for the surrounding community.

The reduction of a significant area of ground water recharge lowering water table and resulting in greater runoff and its associated pollution during storm events. This will negatively impact riparian wildlife which adds to the quality of life for all downstream residents. Pat Megonigal of the Smithsonian Environmental Research Center states that, “Even after pavement has been removed, it can take hundreds of years for the soil’s ecosystem to recover.”

The reduction of wildlife habitat including that of raptors, hoofed ungulates and apex predator species.

Increased air pollution – baseline measurements as well as monitoring for particulate as well as hydrocarbon emissions is the only way to ensure the safety of neighbors. However, this has not been required.

Increased noise pollution – General noise requirements must be enforced including during building and construction. Historical precedent for smaller projects suggests that this is not locally enforced. Engine braking regulations must also be applied.

Increased light pollution – Parking lot lighting will diminish the aesthetic value and hence real monetary value of the surrounding community. Additionally, a 44-foot-high structure will turn mountain views into those of an industrial back alley.

Increased crowding – There have been no significant infrastructure improvements to relieve the pressures this will cause and this will only add to the stresses of the present nearby construction.

Such a massive building and parking area as proposed will create an urban heat island reducing the quality of life in the area.

Please note that with little to no federal taxes paid by Amazon, this project should, functionally, be considered to be government funded and subject to Environmental Assessment/Environmental Impact Statement requirements.

In light of the unified waste initiative (Arvada Waste Collection Program) this huge increase in truck traffic is antithetical to your stated goals.

I have been a proud citizen of Arvada for over a quarter century and have never been as disappointed in a proposed project as I am in this. Please let us know what the council and mayor plan to do to mitigate these takings while you are still in office. Please also remember that voters will remember the decisions you make.

Sincerely,

Thomas Frietsche

Subject: Just say “No” to Amazon

Hi there,

I am a homeowner, with my property backing directly to the Ralston Creek Trail. I am vehemently against Amazon’s plan to build a warehouse abutting the trail. It will absolutely desecrate the wildlife in the area and the beauty of the trail.

Arvada City Council-members: do the right thing. Please preserve our trail, its wildlife and keep Arvada as a great place to call home.

Sincerely,

Tracy Sanner

PROJECT INDIANA ANNEXATION
TO THE CITY OF ARVADA

LOCATED IN THE WEST 1/2 OF SECTION 6, TOWNSHIP 3 SOUTH,
RANGE 69 WEST, OF THE SIXTH PRINCIPAL MERIDIAN,
COUNTY OF JEFFERSON, STATE OF COLORADO

LEGAL DESCRIPTION

A TRACT OR PARCEL OF LAND LOCATED IN THE WEST ONE-HALF OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST, OF THE 6TH PRINCIPAL MERIDIAN, COUNTY OF JEFFERSON, STATE OF COLORADO, BEING ALL OF THOSE PARCELS OF LAND DESCRIBED BY DEED RECORDED WITH THE JEFFERSON COUNTY CLERK AND RECORDER UNDER RECEPTION NO. 2017111129, 20147016997, AND 2015126759 AND A PORTION OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017119140, AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHEASTERLY MOST CORNER OF A PARCEL OF LAND DESCRIBED IN RECEPTION NUMBER 2017111129, AS RECORDED WITH THE CLERK AND RECORDER OF JEFFERSON COUNTY, COLORADO, WHENCE THE CENTER OF SAID SECTION 6 BEARS S46°18'37"E, 852.84 FEET;

THENCE S08°06'50"E, 368.50 FEET TO THE NORTHEASTERLY CORNER OF LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF A PORTION OF COBE LABORATORIES ARVADA BUILDING SITE, RECEPTION NUMBER 81024687;

THENCE S85°17'41"W, 349.19 FEET TO THE NORTHWESTERLY CORNER OF LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF A PORTION OF COBE LABORATORIES ARVADA BUILDING SITE, RECEPTION NUMBER 81024687;

THENCE S00°01'19"E, 217.46 FEET TO THE SOUTHWESTERLY CORNER OF LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF A PORTION OF COBE LABORATORIES ARVADA BUILDING SITE, RECEPTION NUMBER 81024687;

THENCE S88°36'14"W, 549.78 FEET TO THE NORTHWESTERLY CORNER OF LOT 1A, PARKWAY CENTER SUBDIVISION FILING NO. 6, MINOR SUBDIVISION, RECEPTION NUMBER 2019043406;

THENCE S00°01'35"E, 724.00 FEET TO THE NORTHEASTERLY CORNER OF LOT 1, INDIANA BUSINESS CENTER, MINOR SUBDIVISION, RECEPTION NUMBER 83023441;

THENCE N89°35'58"W, 167.53 FEET TO A CORNER OF LOT 1, INDIANA BUSINESS CENTER, RECEPTION NUMBER 83023441;

THENCE S00°03'05"E, 95.39 FEET TO A CORNER OF LOT 1, INDIANA BUSINESS CENTER, RECEPTION NUMBER 83023441;

THENCE N89°36'05"W, 196.75 FEET TO A POINT ON THE WESTERLY RIGHT-OF-WAY LINE OF HOLMAN STREET;

THENCE S00°07'46"E, 123.85 FEET TO THE NORTHEASTERLY CORNER OF LOT 10 INDIANA BUSINESS CENTER, RECEPTION NUMBER 83023441;

THENCE N89°35'35"W, 522.06 FEET TO THE SOUTHWESTERLY CORNER OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2015126759;

THENCE N00°02'58"W, 291.32 FEET TO A POINT ON THE SOUTHERLY LINE OF THAT PARCEL DESCRIBED UNDER RECEPTION NO. 90066231;

THENCE ALONG THE EXTERIOR OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231, N89°57'02"E, 181.00 FEET TO A NON-TANGENT CURVE TO THE LEFT HAVING A RADIUS OF 20.00 FEET, AND A LONG CHORD OF N44°54'24"E, 28.28 FEET;

THENCE NORTHEASTERLY ALONG THE EXTERIOR OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231, A DISTANCE OF 31.42 FEET ALONG SAID NON-TANGENT CURVE TO THE LEFT THROUGH A CENTRAL ANGLE OF 90°00'00";

THENCE ALONG THE EXTERIOR OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231, N00°05'36"W, 517.89 FEET TO A NORTHWESTERLY CORNER OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129;

THENCE CONTINUE NORTHERLY ALONG THE EXTERIOR OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231, A DISTANCE OF 99.54 FEET TO THE NORTHEASTERLY CORNER OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 90066231;

THENCE N89°57'02"W, 230.51 FEET TO THE SOUTHWESTERLY CORNER OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017119140;

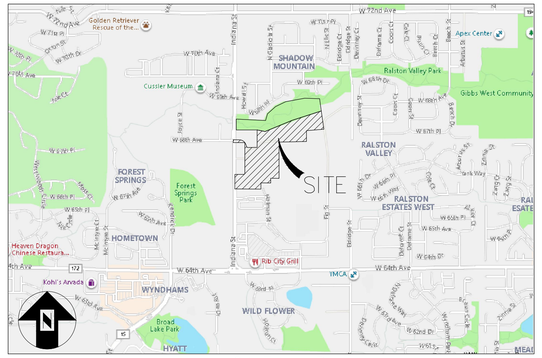
THENCE ALONG THE WESTERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017119140, N00°02'36"W, 56.64 FEET;

THENCE S89°07'58"E, 124.28 FEET TO A CURVE TO THE RIGHT HAVING A RADIUS OF 135.50 FEET AND A LONG CHORD OF S55°37'16"E, 149.62 FEET;

THENCE SOUTHEASTERLY, A DISTANCE OF 158.51 FEET ALONG SAID CURVE TO THE RIGHT THROUGH A CENTRAL ANGLE OF 67°01'24";

THENCE S22°06'34"E, 74.99 FEET TO A POINT ON THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129;

THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, N89°49'10"E, 201.76 FEET;



THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, N00°00'55"E, 351.26 FEET;

THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, S78°41'24"E, 161.57 FEET;

THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, N67°31'37"E, 590.00 FEET;

THENCE ALONG THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129, N72°13'57"E, 609.63 FEET TO THE POINT OF BEGINNING.

CONTAINING 1,085,635 SQUARE FEET OR 24.923 ACRES, MORE OR LESS.

VICINITY MAP
NOT TO SCALE

GENERAL NOTES

1. NOTICE: ACCORDING TO COLORADO LAW YOU MUST COMMENCE ANY LEGAL ACTION BASED UPON ANY DEFECT IN THIS SURVEY WITHIN THREE YEARS AFTER YOU DISCOVER SUCH DEFECT. IN NO EVENT MAY LEGAL ACTION BASED UPON ANY DEFECT IN THIS SURVEY BE COMMENCED MORE THAN TEN YEARS FROM THE DATE CERTIFICATION SHOWN HEREON.

2. THIS SURVEY DOES NOT CONSTITUTE A TITLE SEARCH BY WILSON AND COMPANY TO DETERMINE TITLE OR EASEMENTS OF RECORD. RESEARCH FOR THIS SURVEY WAS PERFORMED IN ACCORDANCE WITH CRS 38-51-106 AND THE RULES OF PROCEDURE AND BOARD POLICY STATEMENTS OF THE STATE BOARD OF LICENSURE FOR PROFESSIONAL ENGINEERS AND PROFESSIONAL LAND SURVEYORS, SPECIFICALLY THOSE BOARD RULES AND POLICY STATEMENTS RELATING TO THE DEPICTION OF EASEMENTS AND RIGHTS OF WAY ON SUBDIVISION PLATS. THE FOLLOWING TITLE COMMITMENTS WERE PREPARED BY FIRST AMERICAN TITLE INSURANCE COMPANY AND WERE RELIED UPON FOR ALL INFORMATION REGARDING EASEMENTS OF RECORD, RIGHTS OF WAY, TITLE OF RECORD AND CIVIL COURT ACTIONS OF RECORD.

COMMITMENT NO. NCS-1005589-5-CHI2, DATED 11-30-2020 (DYMOND PROPERTY - 6702 INDIANA STREET)
COMMITMENT NO. NCS-1005589-1-CHI2, DATED 11-30-2020 (NEWSOME PROPERTY - 6710 INDIANA STREET)
COMMITMENT NO. NCS-1005589-3-CHI2, DATED 11-30-2020 (FOSTER PROPERTY - 6700 INDIANA STREET)

3. BASIS OF BEARINGS: BEARINGS USED HEREIN ARE BASED ON THE EAST-WEST CENTERLINE OF THE WEST HALF OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST, OF THE 6TH P.M., BEING N88°58'53"E USING THE COLORADO STATE PLANE COORDINATES - CENTRAL ZONE, AS MONUMENTED ON THE WEST BY A FOUND ILLEGIBLE 2.0" ALUMINUM CAP, ACCEPTED AS THE WEST 1/4 CORNER OF SECTION 6,PER MONUMENT RECORD BY PLS 12405 DATED 8/16/00, AND AS MONUMENTED ON THE EAST BY A FOUND 2.5" ALUMINUM CAP PLS 5112, ACCEPTED AS THE CENTER CORNER OF SECTION 6, PER MONUMENT RECORD BY PLS 5112, DATED 6/11/97.

SURVEYOR'S CERTIFICATE:

I, DOUGLAS H. ORT III, A PROFESSIONAL LAND SURVEYOR IN THE STATE OF COLORADO, ON THE BASIS OF MY KNOWLEDGE, INFORMATION AND BELIEF, DO HEREBY CERTIFY THAT IN JUNE 2020, A ANNEXATION MAP WAS MADE UNDER MY SUPERVISION, IN ACCORDANCE WITH THE STANDARD OF CARE FOR THE STATE OF COLORADO, AND THAT THIS ANNEXATION MAP AND ALL NOTES SHOWN HEREON IS AN ACCURATE REPRESENTATION OF THE PROPERTY AS DETERMINED BY THIS SURVEY. ENCROACHMENTS, EASEMENTS, RIGHTS OF WAY OR PASSAGEWAYS ACROSS SAID PROPERTY THAT ARE IN EVIDENCE OR KNOWN TO ME, ARE AS SHOWN TO THE BEST OF MY KNOWLEDGE, INFORMATION AND BELIEF. THIS SURVEY, AND THE INFORMATION SHOWN HEREON ARE NOT A GUARANTY OR WARRANTY, EITHER EXPRESSED OR IMPLIED.

THE ABOVE DESCRIBED LAND IS CONTIGUOUS TO THE CITY OF ARVADA AND MEETS THE REQUIREMENTS SET FORTH IN COLORADO REVISED STATUTES 1973, 31-12-104-(1)(A) THAT ONE-SIXTH OR MORE OF THE PERIMETER TO BE ANNEXED IS CONTIGUOUS WITH THE ANNEXING MUNICIPALITY.

CONTIGUITY STATEMENT:

- TOTAL PERIMETER OF AREA CONSIDERED FOR ANNEXATION=6994.83'
- ONE-SIXTH OF TOTAL PERIMETER OF AREA=1165.81'
- PERIMETER OF THE AREA CONTIGUOUS WITH EXISTING CITY LIMITS=4722.83'
- THE TOTAL CONTIGUOUS PERIMETER IS 67.5%, WHICH EXCEEDS THE 1/6 AREA REQUIRED

LEGAL DESCRIPTION:

A TRACT OR PARCEL OF LAND LOCATED IN THE WEST ½ OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST, OF THE 6TH PRINCIPAL MERIDIAN, CITY OF ARVADA, COUNTY OF JEFFERSON, STATE OF COLORADO, BEING ALL OF THOSE PARCELS OF LAND DESCRIBED BY DEED RECORDED WITH THE JEFFERSON COUNTY CLERK AND RECORDER UNDER RECEPTION NO. 2017111129, 20147016997, 2015126759 AND 90066231, AND A PORTION OF THAT PARCEL DESCRIBED UNDER RECEPTION NO. 2017119140, ALONG WITH LOTS 1A, 2A, 3A AND 4A, BLOCK 5A, PARKWAY CENTER SUBDIVISION FILING NO. 6, MINOR SUBDIVISION, RECORDED UNDER RECEPTION NO. 2019043406, AND LOTS 9 AND 10, INDIANA BUSINESS CENTER RECORDED UNDER RECEPTION NO. 2019043406, AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:
BEGINNING AT THE NORTHEASTERLY MOST CORNER OF A PARCEL OF LAND DESCRIBED IN RECEPTION NUMBER 2017111129, AS RECORDED WITH THE CLERK AND RECORDER OF JEFFERSON COUNTY, COLORADO, HENCE THE CENTER ¼ CORNER OF SAID SECTION 6 BEARS S46°18'37"E, 852.84 FEET;
THENCE ALONG THE EASTERLY LINE OF THE PARCEL RECORDED UNDER RECEPTION NO. 2017111129, S08°06'50"E, 368.50 FEET TO THE NORTHEASTERLY CORNER OF LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF PORTION OF COBE LABORATORIES ARVADA BUILDING SITE RECORDED UNDER RECEPTION NO. 81024687;
THENCE S85°17'41"W, 349.19 FEET TO THE NORTHWESTERLY CORNER OF SAID LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF A PORTION OF COBE LABORATORIES ARVADA BUILDING SITE RECORDED UNDER RECEPTION NO. 81024687;
THENCE S00°01'19"E, 217.46 FEET TO THE SOUTHWESTERLY CORNER OF SAID LOT 5, BLOCK 5, PARKWAY CENTER SUBDIVISION, FINAL PLAT AND REPLAT OF A PORTION OF COBE LABORATORIES ARVADA BUILDING SITE RECORDED UNDER RECEPTION NO. 81024687;
THENCE ALONG THE EXTERIOR OF BLOCK A, PARKWAY CENTER SUBDIVISION, FILING NO. 6, MINOR SUBDIVISION RECORDED UNDER RECEPTION NO. 2019043406, FOR THE NEXT NINE (9) COURSES;
1. THENCE N88°36'14"E, 382.03 FEET;
2. THENCE S08°06'50"E, 197.34 FEET TO A NON–TANGENT CURVE TO THE RIGHT HAVING A RADIUS OF 350.00 FEET, AND A LONG CHORD OF S04°07'28"E, 48.93 FEET;
3. THENCE SOUTHERLY, A DISTANCE OF 48.97 FEET ALONG SAID NON–TANGENT CURVE TO THE RIGHT THROUGH A CENTRAL ANGLE OF 08°01'00";
4. THENCE SOUTHERLY, S00°06'58"E, 9.37 FEET TO A CURVE TO THE RIGHT HAVING A RADIUS OF 25.00 FEET AND A LONG CHORD OF S44°39'17"W, 35.21 FEET;
5. THENCE SOUTHWESTERLY, A DISTANCE OF 39.07 FEET ALONG SAID CURVE TO THE RIGHT THROUGH A CENTRAL ANGLE OF 89°32'30";
6. THENCE S89°25'32"W, 848.77 FEET TO A CURVE TO THE RIGHT HAVING A RADIUS OF 15.00 FEET AND A LONG CHORD OF N66°28'46"W, 12.25 FEET;
7. THENCE NORTHWESTERLY, A DISTANCE OF 12.62 FEET ALONG SAID CURVE TO THE RIGHT THROUGH A CENTRAL ANGLE OF 48°11'23" TO A REVERSE CURVE TO THE LEFT HAVING A RADIUS OF 45.00 FEET, AND A LONG CHORD OF S85°23'42"W, 71.13 FEET;
8. THENCE WESTERLY, A DISTANCE OF 82.03 FEET ALONG A REVERSE CURVE TO THE LEFT THROUGH A CENTRAL ANGLE OF 104°26'27";
9. THENCE S89°25'32"W, 7.19 FEET;

THENCE ALONG AN EASTERLY LINE OF THE PARCEL OF LAND RECORDED UNDER RECEPTION NO. 2017111129, S00°01'34"E, 485.71 FEET TO THE NORTHEASTERLY CORNER OF LOT 1, INDIANA BUSINESS CENTER RECORDED UNDER RECEPTION NO. 88023441;
THENCE ALONG A NORTHERLY LINE OF SAID LOT 1, INDIANA BUSINESS CENTER RECORDED UNDER RECEPTION NO. 88023441, N89°35'58"W, 167.53 FEET;
THENCE ALONG A WESTERLY LINE OF SAID LOT 1, INDIANA BUSINESS CENTER RECORDED UNDER RECEPTION NO 88023441, S00°03'05"E, 95.39 FEET;
THENCE ALONG A NORTHERLY LINE OF SAID LOT 1, INDIANA BUSINESS CENTER RECORDED UNDER RECEPTION NO. 88023441, N89°36'05"W, 196.75 FEET TO THE NORTHWESTERLY CORNER OF HOLMAN STREET, AS DEDICATED ON THE PLAT OF INDIANA BUSINESS CENTER RECORDED UNDER RECEPTION NO. 88023.441;
THENCE ALONG THE EXTERIOR OF LOT 9 AND 10, INDIANA BUSINESS CENTER RECORDED UNDER RECEPTION NO. 88023441, FOR THE NEXT SEVEN (7) COURSES;
1. THENCE SOUTHERLY, A DISTANCE OF 132.93 FEET ALONG SAID NON–TANGENT CURVE TO THE LEFT THROUGH A CENTRAL ANGLE OF 29°43'58" TO A CURVE TO THE RIGHT HAVING A RADIUS OF 25.00 FEET, AND A LONG CHORD OF S30°02'35"W, 43.26 FEET;
2. THENCE SOUTHWESTERLY, A DISTANCE OF 52.28 FEET ALONG SAID CURVE TO THE RIGHT THROUGH A CENTRAL ANGLE OF 119°48'38";
3. THENCE S89°56'55"W, 219.96 FEET TO A CURVE TO THE LEFT HAVING A RADIUS OF 365.00 FEET, AND A LONG CHORD OF S79°56'53"W, 126.76 FEET;
4. THENCE WESTERLY, A DISTANCE OF 127.41 FEET ALONG SAID CURVE TO THE LEFT THROUGH A CENTRAL ANGLE OF 20°00'00" TO A COMPOUND CURVE TO THE RIGHT HAVING A RADIUS OF 50.00 FEET, AND A LONG CHORD OF N44°59'14"W, 116.35 FEET;
5. THENCE WESTERLY, A DISTANCE OF 116.94 FEET ALONG A REVERSE CURVE TO THE RIGHT THROUGH A CENTRAL ANGLE OF 20°00'02" TO A COMPOUND CURVE TO THE RIGHT HAVING A RADIUS OF 50.00 FEET, AND A LONG CHORD OF N44°59'14"W, 70.65 FEET;
6. THENCE NORTHWESTERLY, A DISTANCE OF 78.46 FEET ALONG A COMPOUND CURVE TO THE RIGHT THROUGH A CENTRAL ANGLE OF 89°54'31";
7. THENCE N00°02'01"W, 162.20 FEET TO THE NORTHWESTERLY CORNER OF SAID LOT 9, INDIANA BUSINESS CENTER RECORDED UNDER RECEPTION NO. 88023441;

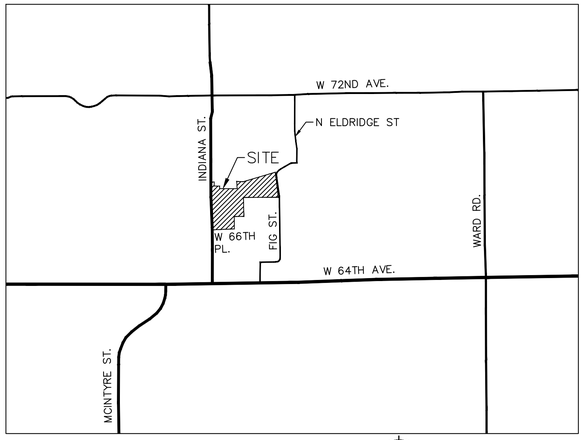
THENCE N89°35'35"W, 25.00 FEET TO THE SOUTHWESTERLY CORNER OF THE PARCEL OF LAND RECORDED UNDER RECEPTION NO. 2015126759;
THENCE ALONG THE WESTERLY LINE OF THE PARCELS OF LAND DESCRIBED UNDER RECEPTION NO. 2015126759 AND 2017111129, N00°02'58"W, 219.19 FEET TO THE SOUTHWESTERLY CORNER OF THE PARCEL OF LAND DESCRIBED UNDER RECEPTION NO. 2017111129;
THENCE N00°02'58"W, 72.13 FEET TO A POINT ON THE SOUTHERLY LINE OF THE PARCEL OF LAND DESCRIBED UNDER RECEPTION NO. 90066231;
THENCE N89°57'02"W, 30.00 FEET TO THE SOUTHWESTERLY CORNER OF THE PARCEL OF LAND DESCRIBED UNDER RECEPTION NO. 90066231;
THENCE ALONG THE EXTERIOR OF THE PARCEL OF LAND DESCRIBED UNDER RECEPTION NO. 90066231 FOR THE NEXT THREE (3) COURSES;
1. THENCE N00°02'58"W, 406.72 FEET;
2. THENCE N89°57'02"E, 30.00 FEET;
3. THENCE N00°02'58"W, 230.00 FEET TO THE NORTHWESTERLY CORNER OF SAID PARCEL DESCRIBED UNDER RECEPTION NO. 90066231;

THENCE N89°57'02"E, 30.00 FEET TO THE SOUTHWESTERLY CORNER OF A PARCEL OF LAND DESCRIBED UNDER RECEPTION NO. 2017119140;
THENCE ALONG THE WESTERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017119140, N00°02'36"W, 56.64 FEET;
THENCE S89°07'58"E, 124.28 FEET TO A CURVE TO THE RIGHT HAVING A RADIUS OF 135.50 FEET AND A LONG CHORD OF S55°37'16"E, 149.62 FEET;
THENCE S22°06'34"E, 74.99 FEET TO A POINT ON THE NORTHERLY LINE OF THE PARCEL DESCRIBED UNDER RECEPTION NO. 2017111129;
THENCE ALONG THE EXTERIOR OF THE PARCEL OF LAND DESCRIBED UNDER RECEPTION NO. 2017111129 FOR THE NEXT FIVE (5) COURSES:
1. THENCE N89°49'10"E, 201.76 FEET;
2. THENCE N00°00'55"E, 351.26 FEET;
3. THENCE S78°41'24"E, 161.57 FEET;
4. THENCE N67°31'57"E, 590.00 FEET
5. THENCE N72°13'57"E, 609.63 FEET TO THE POINT OF BEGINNING.

CONTAINING 1,575,846 SQUARE FEET OR 36.176 ACRES, MORE OR LESS.

BASIS OF BEARING DATA:

BEARINGS USED HEREIN ARE BASED ON THE EAST–WEST CENTER LINE OF THE WEST HALF OF SECTION 6, TOWNSHIP 3 SOUTH, RANGE 69 WEST, OF THE 6TH P.M., BEING N88°58'53"E USING THE COLORADO STATE PLANE COORDINATES – CENTRAL ZONE, AS MONUMENTED AT THE WEST ¼ CORNER OF SECTION 6, FOUND ILLEGIBLE 2.0" ALUMINUM CAP, PER MONUMENT RECORD BY PLS 12405 DATED 8/16/00, AND AS MONUMENTED AT THE CENTER ¼ CORNER OF SECTION 6, BY A FOUND 2.5" ALUMINUM CAP PLS 5112, PER MONUMENT RECORD BY PLS 5112, DATED 6/11/97.



BENCHMARK DATA:

NGS DOVER WAS USED AS THE REFERENCE BENCHMARK FOR THIS PROJECT, BEING A SURFACE DISK SET IN A 12 – INCH MOUND OF CONCRETE STAMPED "DOVER 1977" 44 FEET NORTH OF THE CENTERLINE OF 68TH PLACE AND 36 FEET WEST OF THE CURB OF DOVER WAY.

ELEVATION = 5635.54 FEET (NAVD 88 DATUM)

GENERAL NOTES

1. DRIVE AISLE DIMENSIONS SHOWN ARE MEASURED FROM FACE OF CURB TO FACE OF CURB, OR BACK OF PARKING STALL TO BACK OF PARKING STALL.
2. SITE PLAN LAYOUT TO GRAPHICALLY ILLUSTRATE INTENT ONLY. DEVELOPERS AND DESIGN TEAMS ARE RESPONSIBLE FOR RECONCILING WITH SITE SPECIFIC CONSTRAINTS AND JURISDICTIONAL REQUIREMENTS.
3. ANY PROPOSED FENCES, WALLS, SIGNS AND ACCESSORY STRUCTURES SHOWN ON THIS PLAN ARE ILLUSTRATIVE ONLY AND SUBJECT TO SEPARATE REVIEWS AND PERMITS.
4. FIRE APPARATUS ROADS SHALL BE PROVIDED WITH AN APPROVED ALL–WEATHER SURFACE (CONCRETE OR ASPHALT) AND SHALL BE CAPABLE OF SUPPORTING AN IMPOSED LOAD OF 85,000 POUNDS.
5. THE APPROVED FIRE APPARATUS ACCESS ROADS SHALL BE PROVIDED DURING CONSTRUCTION UNLESS OTHERWISE APPROVED BY THE AFPD. THE FIRE APPARATUS ACCESS ROADS SHALL CONSIST OF THE FIRST LIFT OF ASPHALT OR CONCRETE AND SHALL BE PROVIDED PRIOR TO COMMENCING VERTICAL CONSTRUCTION. ALTERNATIVE TEMPORARY FIRE APPARATUS ACCESS ROAD MATERIALS AND/OR DESIGNS SHALL BE APPROVED AND PERMITTED BY THE AFPD. THE PRIVATE ROADS THROUGH THE SITE SHALL BE DEDICATED ON THE FINAL PLAT AS "FIRE APPARATUS ACCESS ROADS" OR OTHER SIMILAR LANGUAGE AS REQUIRED BY THE CITY OF ARVADA.
6. A 3'–0" CLEAR SPACE SHALL BE MAINTAINED AROUND ALL FIRE HYDRANTS AND NOT OBSTRUCTED.
7. TREES AND LANDSCAPING WITHIN DEVELOPMENTS, WHEN FULLY MATURE, SHALL PROVIDE AN UNOBSTRUCTED VERTICAL CLEARANCE OF 13'–6" AND PROVIDE THE MINIMUM UNOBSTRUCTED FIRE APPARATUS ACCESS ROAD WIDTH AS REQUIRED BASED ON THE HEIGHT OF THE BUILDING.
8. FIRE HYDRANTS SHALL BE INSTALLED AND OPERATIONAL TO PROVIDE THE MINIMUM REQUIRED FIRE FLOW PRIOR TO COMMENCING VERTICAL CONSTRUCTION.
9. DURING CONSTRUCTION AND UPON COMPLETION THERE SHALL BE BUILDING SIGNANGE PROVIDED, A MINIMUM OF 0'–4" HIGH WITH A 0.5" STROKE AND VISIBLE FROM THE STREET OR ROAD FRONTING THAT BUILDING.
10. SITE(S) SHALL BE LANDSCAPED PRIOR TO ISSUANCE OF FINAL CERTIFICATE OF OCCUPANCY (CO) DURING THE GROWING SEASON OF APRIL 1ST TO OCTOBER 1ST, AT ALL OTHER TIMES THE INDIVIDUAL SITES SHALL BE LANDSCAPED WITHIN 45 (FORTY–FIVE) DAYS OF THE START OF THE FOLLOWING GROWING SEASON.
11. AS PER THE ARVADA LAND DEVELOPMENT CODE, THE NUMBER OF LARGE TRUCK TRIPS PER DAY SHALL BE FEWER THAN 50.

Re: Ralston Valley Coalition – Opposition to Project Indiana

Dear City Council:

This law firm represents the Ralston Valley Coalition ("**RVC**") in connection with its opposition to what the City of Arvada refers to as "Project Indiana" and the many related land use applications submitted by the developer, Scannell Properties, LLC ("**Scannell**"), to ultimately allow for the construction and operation of a 36-acre "Amazon Delivery Station" on the east side of Indiana Street between 66th Avenue and 68th Avenue (the "**Site**").

RVC is a Colorado non-profit that is dedicated to protecting Maple Valley Park (to the immediate north of the Site) as well as the surrounding community. RVC was formed out of the community organization known as "Protect Maple Valley Park" and has brought together the voices of more than 8,500 neighbors who have signed on to petitions in opposition to Project Indiana, including scores of homeowners who live adjacent to Maple Valley Park and within just a few hundred feet of the Site.[1] In addition to these thousands of homeowners, business owners, and Arvada voters, RVC is supported by all of the surrounding residential subdivisions, including the Maple Valley Homeowners Association, the Wildflower Ponds Property Owners Association, the West Wood Links Homeowners Association, the Westwood Ranch Homeowners Association, and the GEOS neighborhood.

[1] RVC is continuing to collect petition signatures and expects to submit the final petition to the City in advance of the June 14, 2021 hearing on Project Indiana. A map depicting the home addresses of the residents that have already signed RVC's petition in opposition to Project Indiana is attached hereto as **Exhibit 1**.

Exhibit E

Public comment received
June 2- June 10

This letter specifically addresses Scannell's annexation and rezoning application, denoted by the City as Project No. DA2020-0117 (the "**Annexation and Rezoning Application**"), and sets forth the many reasons that the City Council should deny this application at the June 14, 2021 hearing (the "**Hearing**"). RVC is also opposed to the other land use approvals that Scannell has sought in connection with "Project Indiana," including the Site Plan/Minor Subdivision application pending before the City as Project No. DA2020-0132 (the "**Site Plan Application**") and Scannell's requests for new CDOT entrance and exit permits onto Indiana Street (SH-72), which will permanently alter existing traffic patterns near the Site.

As discussed herein, RVC believes that the Annexation and Rezoning Application should be rejected because Scannell cannot meet its burden of proof with respect to *any* of the approval criteria. **But the most obvious and automatic basis for denial is Scannell's own admission that the proposed use will generate a volume of truck traffic that cannot exist within the requested IL (Industrial, Light) Zone**. Scannell has filed the Annexation and Rezoning Application as part of its proposal to construct what Arvada classifies as a "Heavy Logistics Center." Because this heavy industrial use cannot lawfully exist within the requested IL Zone, Scannell cannot meet its burden to demonstrate that the proposed use will conform to the requested zoning. **Accordingly, the City has no discretion and Scannell's Annexation and Rezoning Application must be denied as a matter of law**.

Thank you in advance for your time and careful consideration of this important matter. Scannell's proposal for the Site would forever change the Indiana Street Corridor, the Ralston Valley, and all of west Arvada for the worse. The proposal includes multiple different land use approvals and many, many unanswered questions. Again, we deeply appreciate the City's careful consideration of these complex and significant issues.

Background

Project Indiana seeks to fundamentally reimagine the Site by paving over a 36-acre[2] collection of largely agricultural properties that have served for decades as greenspace and critical buffer between existing light industrial and commercial development to the south and west of Maple Valley Park, Ralston Creek and the Ralston Creek Trail, and the hundreds of single-family homes to the immediate north and east of the Site.

[2] Scannell has at times claimed that the proposed development will only be 33 acres, but a more careful review of Scannell's application materials confirms that its Site Plan Application seeks approval to develop and replat approximately 36 acres, including approximately 24.943 acres to be annexed into Arvada, approximately 5.349 acres within Arvada to be rezoned, and approximately 5.91 acres within Arvada that are already zoned within the IL (Industrial, Light) Zone.

Exhibit E

Public comment received
June 2- June 10

In place of this longstanding buffer, Scannell intends to construct a new "Amazon Delivery Station" complete with a 112,000 square foot warehouse—that is a new industrial building that will itself occupy more than 2.5 acres—and more than 1,165 new parking spaces[3]—or at least 954 more parking spaces than the City would otherwise require for the proposed use. If approved, Scannell will destroy approximately 450 mature trees and construct approximately 23 acres of new parking lots.

[3] At times, Scannell has suggested that the final site could have more than 1,500 parking spaces for semi-trailers, semi-trail trucks, delivery vans, and personal vehicles. To date, Scannell has refused to comply with the City's request to complete a parking study/plan to clarify the many unanswered questions surrounding its need for such a massive amount of parking.

Exhibit E

Public comment received
June 2- June 10

Of the 36-acre Site, Scannell claims that less than 30 percent will be left as open space. The majority of this "open space" will be a new 10+ acre detention pond to collect the surface runoff that will be generated by the 23 acres of new parking lots before being discharged into Maple Valley Park and Ralston Creek.

The proposed Amazon Delivery Station will operate around the clock—24 hours per day and 7 days per week. Based on Scannell's own estimates the facility will generate more than 1,300 new vehicle trips on Indiana Street each and every day. In addition to the new traffic that will be generated by deliveries and employees, the proposed Amazon Delivery Station is also going to be used as a retail and customer service hub to accept package drop-offs and pickups from the general public. Scannell has not provided any estimate as to what amount of traffic might result from this retail use.

These traffic loads will be even higher during busier times of year when Scannell estimates that the number of semi-trailer truck deliveries will double and the facility will rely on employees' personal vehicles (so-called "Amazon Flex" deliveries) to supplement Amazon's year-round fleet of more than 500 delivery vans. During the holidays, Scannell estimates that every day the facility will generate the arrival and departure of: (1) 42 semi-trailer truck deliveries; (2) 460 warehouse workers; (3) 531 delivery van drivers; (4) 531 delivery vans; and (5) 60 Amazon Flex drivers (working multiple shifts per day) as well as (7) an unknown number of retail customers. During these peak times, Scannell's traffic estimates for the facility will triple as each of these vehicles comes and goes from the Site and generates more than 3,200 new vehicle trips along the Indiana Street corridor. Scannell's Traffic Impact Study does not even attempt to account for the likely traffic impacts that Scannell itself expects on an annual basis for five to six weeks during "holiday operations."

Rather than seeking to establish a new Amazon Delivery Station near an interstate highway, Scannell is seeking to develop a location that is almost five miles from the nearest interstate and involves several turns through some of Arvada's busiest intersections. If approved, the selection of this Site means that every day dozens of fully loaded semi-trailer trucks will roll through Arvada between the Site and I-70—back and forth along Indiana Street, W. 64th Avenue, McIntyre Street, and Ward Road.

The 23 acres of new parking lots that will be installed to accommodate these thousands of new vehicles will be illuminated all night long by 182 exterior lights and 22-foot tall street lamps. The proposed 24-hour operations will ensure that traffic and associated noise occurs all throughout the night. Scannell has also previously stated that the Site may be used to fuel, maintain, and wash the more than 500 delivery vans that will be stored onsite.

Current zoning at the Site is predominantly within Jefferson County's agricultural zone, which allows for "limited farming, ranching and agriculturally related uses while protecting the surrounding land from any harmful effects." (Jefferson County Zoning Resolution (last rev. Feb. 9, 2021), § 33(A) (attached hereto as **Exhibit 2**).) Another 5.349 acres are already located within the City but zoned in Arvada's CG (Commercial, General) Zone, which is intended "to

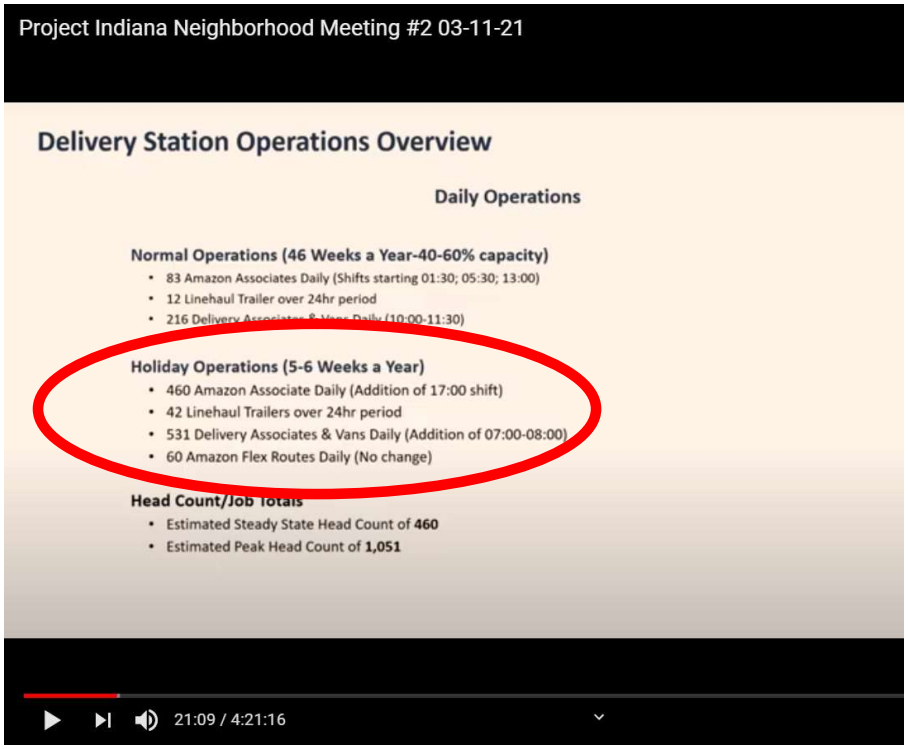
Exhibit E

Public comment received
June 2- June 10

accommodate a wide variety of general retail and service uses, as well as professional and business offices serving both neighborhood and area-wide needs." City of Arvada Land Development Code (hereinafter, the "**L.D.C.**") Div. 2-1-6-1(A). Thus, in addition to annexing the unincorporated area, Scannell is seeking to rezone the Site as IL (Industrial, Light).[4]

In doing so, however, **Scannell has requested the wrong type of rezoning for the proposed Amazon Delivery Station**. Scannell has confirmed that the proposed Amazon Delivery Station will operate as a "Heavy Logistics Center," which is a heavy industrial use that can only lawfully exist within Arvada's IG (Industrial, General) Zone. While the IL Zone that Scannell has requested can support certain light processing and logistics uses, the L.D.C. expressly provides that a so-called "Heavy Logistics Center" can only be sited within Arvada's more intensive IG (Industrial, General) Zone. L.D.C. Div. 2-1-6-3(A).

The L.D.C. defines a "Heavy Logistics Center" as "[a] wholesaling, warehousing, and/or distribution use that provides a central location for receiving, storing and distributing raw materials, semi-finished goods, or finished goods . . . . **Heavy logistics centers are expected to generate at least 50 truck trips per day. Warehousing and distribution uses that involve fewer than 50 truck trips per day are classified as light industry**." L.D.C. Div. 11-3-3-1 (emphasis added).[5] Based on Scannell's own representations, the Amazon Delivery Station will be a Heavy Logistics Center because it will regularly generate more than 50 truck trips per day.



Scannell's traffic study estimates that "[b]ased on user specific data" (presumably from other similar Amazon facilities) the Amazon Delivery Station will receive daily deliveries from 21 semi-trailer trucks accounting for 42 daily truck trips. ("Traffic Impact, Project Indiana" (Sept. 2020), at 18, Appdx. D.) However, as confirmed by the following screenshot taken from Scannell's March 11, 2021 Neighborhood Meeting, Scannell has also confirmed that for *at least* five to six weeks per year, the Amazon Delivery Station will receive deliveries from 42 semi-trailer trucks every 24 hour and thus generate at least 84 daily semi-trailer truck trips:

[4] The L.D.C. provides that the IL Zone is intended to "provide areas for light manufacturing, assembly and fabrications uses, office, research, food and beverage processing, packaging, or bottling, and compatible recreational activities." L.D.C. Div. 2-1-6-2(A).

[5] The L.D.C. conversely defines "Light Industry" uses that are permitted within the IL Zone as "[u]ses that involve research and development, assembly, remanufacturing, compounding, packaging, testing, or treatment of products, generally from previously prepared materials or components, with limited outside storage and limited external impacts or risks **such that the use is not defined as heavy industry or heavy logistics center**. Light industry also includes wholesaling, warehousing, and distribution uses that involve fewer than 50 truck trips per day." L.D.C. Div. 11-3-3-1.

Exhibit E

Public comment received
June 2- June 10

("Project Indiana Neighborhood Meeting #2 03-11-21," *available at* https://www.youtube.com/watch?v=JUKWUIgIpBk (last visited May 27, 2021).)

Scannell's attorney has likewise acknowledged that the facility will generate "**up to 42 trucks—84 trips—per day**." (Apr. 19, 2021 Letter from C. White to City of Arvada, at 2 (attached hereto as **Exhibit 3**) (emphasis added).) Scannell's attorney claims that this heavier industrial use will be "infrequent" but does not dispute Scannell's representation that the proposed Amazon Delivery Station will generate semi-trailer truck traffic equal to a Heavy Logistics Center at least five to six weeks per year. (*Id.*)

By Scannell's own admission, the proposed Amazon Delivery Station will exceed the limits of the IL Zone at least 10 percent of the time. Scannell's attorney claims that this reality can be disregarded because "[l]and use decisions are not properly made on the basis of rare occurrences which might sometimes occur; rather, the impact of uses is determined based on their average, or typical, characteristics." (*Id.*) While this is arguably one way to measure the "impact" of a proposed use, that is not how zoning works. Just as someone in a residential zone cannot periodically engage in "infrequent" commercial or industrial uses, a land user within the IL Zone cannot engage in a use that is only permitted within the IG Zone *for any period of time*. *See* L.D.C. Div. 10-1-2-1(A)(1) (providing that it is a violation of the L.D.C. to "use any building . . . in contravention of any zoning . . . or other regulation of this LDC, including all required approvals"); L.D.C. Div. 10-1-2-1(A)(2) (providing that it is a violation of the L.D.C. to "[i]ncrease the intensity of use of any land or structure, except in accordance with the procedural

Exhibit E

Public comment received
June 2- June 10

and substantive standards of this LDC"); *see also* L.D.C. Div. 1-1-2-1 ("The provisions of this Code shall be considered the minimum requirements necessary for the promotion of the public health, safety, convenience, comfort, prosperity, and general welfare.")

Of course, in this case, Scannell is not merely proposing to violate the proposed zoning on an "infrequent" basis. Rather, Scannell has confirmed that for at least five to six weeks every single year, the proposed Amazon Delivery Station will generate semi-trailer truck volumes that unquestionably meet the definition of a Heavy Logistics Center in violation of the proposed IL Zone. Moreover, this facility will need to be designed and built as a Heavy Logistics Center with sufficient peak capacity (including acres upon acres of parking lots and their associated light pollution, noise, surface runoff, and habitat loss) to accommodate the annual holiday surge.[6] Even if this peak capacity is only used 10 percent of the time, the facility will be the size and intensity of a Heavy Logistics Center at all times.

Separate from Scannell's admission that the facility will regularly generate semi-trailer truck traffic that can only be accommodated by a Heavy Logistics Center in the IG Zone, Arvada's zoning rules also confirm that even non-holiday operations will exceed what is allowed within the IL Zone. Specifically, Arvada's zoning rules do not define "truck" and do not explain whether delivery vans are included within the definition of "truck" when determining whether a facility is a Heavy Logistics Center. Arvada's zoning rules do, however, appear to distinguish between "trucks" generally and "semi-trailer trucks" specifically. Whereas the L.D.C. defines a Heavy Logistics Center as a warehouse with more than "50 **trucks** per day," the L.D.C. more generally defines "Heavy Industry as any manufacturing facility that generates "more than 30 trips by **semi-trailer trucks** per day." L.D.C. Div. 11-3-3-1 (emphasis added). In other words, the L.D.C. recognizes that semi-trailer trucks constitute just one type of truck traffic.

This distinction is critical because Colorado state law broadly defines "truck" as a technical term that includes delivery vans that are "designed to carry property and which [are] generally and commonly used to carry and transport property over the public highways." C.R.S. § 42-1-102(108); *see also* L.D.C. Div. 1-1-3-1(H)(4) ("[T]echnical words and phrases not otherwise defined in this Code that may have acquired a peculiar and appropriate meaning in law shall be construed and understood according to such meaning."). This definition of "truck" as including delivery vans is similarly recognized by Arvada's own traffic laws, which expressly

[6] Scannell has not identified when this five to six week holiday rush is expected to occur. RVC presumes that the deluge will likely be centered around year-end holidays in December, but it also seems reasonable to expect that Amazon might typically deal with higher than normal delivery volumes during other periods of the year (e.g., back-to-school shopping, Valentine's Day, Easter, Mother's Day, and Father's Day) in addition to Prime Day and other periodic Amazon sales promotions. It would also stand to reason that additional delivery volumes would precede all of these holidays as Amazon works to build up inventory at the facility in advance of the holiday rush.

Exhibit E

Public comment received
June 2- June 10

incorporate the definitions included in the State's Model Traffic Code. Arvada City Code Div. 54-31.[7] The L.D.C. does not define "delivery vans" or "vans" and does nothing to suggest that these vehicles fall outside of the State of Colorado's technical definition of "truck" as adopted within Arvada's own traffic rules. Accordingly, delivery vans must be classified as "trucks" when determining whether a facility is a Heavy Logistics Center.

Here, it is undisputed that the proposed Amazon Delivery Station will generate far in excess of 50 semi-trailer truck and van delivery trips *every single day*. During non-holiday operations, Scannell estimates that the volume of this truck traffic will be 446 truck trips per day. ("Traffic Impact, Project Indiana" (Sept. 2020), at 18, Appdx. D (estimating 42 daily semi-trailer truck trips and 404 daily delivery van trips during normal operations).) Accordingly, even the regular operation of the proposed facility will result in a volume of truck traffic that is only permitted at a Heavy Logistics Center within the IG Zone.

Scannell has requested the wrong rezoning. The proposed Amazon Delivery Station will be a Heavy Logistics Center that cannot operate within the requested IL Zone.

Argument

Although the City has permitted Scannell to combine its annexation and rezoning requests into a single land use application, Arvada's L.D.C. treats these requests as separate approvals with distinct approval criteria. Accordingly, RVC will separately address the many independent reasons to deny the requested annexation and the requested rezoning. Because Scannell bears the burden of proof to show that the Annexation and Rezoning Application meets all approval criteria (L.D.C. Div. 8-2-3-2), any *one* of these issues provides a sufficient basis to deny the application.

A. The City Should Deny the Annexation Request Because Amazon's Proposed Heavy Logistics Center Is Too Intense for this Site, the Existing Surrounding Uses, and the Already Overtaxed Transportation Infrastructure.

Scannell cannot meet its burden of proof with respect to any of the three approval criteria required for annexation as set forth in L.D.C. Div. 8-3-3-3: (1) whether the annexation is in accord with the comprehensive plan; (2) whether the subject property is capable of being integrated into the City; and (3) whether the City has sufficient infrastructure capacity to support the proposed development of the annexed property. The annexation must also be denied because Scannell's annexation agreement does not meet the requirements of L.D.C. Div. 8-3-3-4. Finally, even if the City believes that the proposed annexation might be appropriate, the City

[7] The U.S. Department of Transportation similarly defines "truck" to include any "motor vehicle with motive power, except a trail, designed primarily for the transportation of property." 49 C.F.R. § 571.3.

Exhibit E

Public comment received
June 2- June 10

should let the voters decide whether this proposal is in Arvada's best interests by referring the issue for a referendum pursuant to Section 5.17 of the City's Charter. Each of these issues is addressed in turn below.

1. **The Proposed Annexation Will Result in a New Heavy Industrial Use at the Site that Is Inconsistent with Arvada's Comprehensive Plan.**

Under L.D.C. Div. 8-3-3-3(A)(1), the proposed annexation may only be approved if it "is in accord with the Comprehensive Plan and the best interests of the City." Arvada's Comprehensive Plan provides that the Site should be developed as an "Office/Light Industrial/Retail Opportunity:

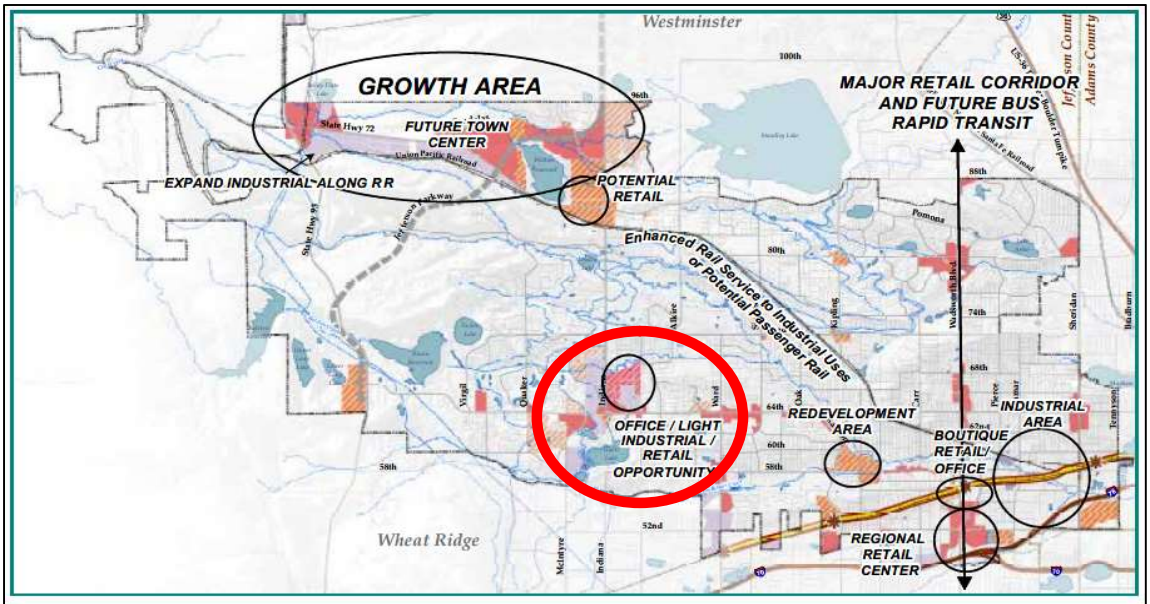


Figure 2-4. Growth and Economic Development Framework

(City of Arvada, Comprehensive Plan 2014 (adopted Sept. 16, 2014) (hereinafter, the "2014 Comprehensive Plan"), at 2-4 (available at https://arvada.org/business/development-in-arvada/2014-comprehensive-plan).) The Comprehensive Plan describes the "Indiana Street" corridor as "a commercial focal point in western Arvada" without any suggestion that new heavy industrial uses might be appropriate at the Site. (2014 Comprehensive Plan, at C-7.)

As such, the Site stands in stark contrast to the so-called "Clear Creek sub-area" on the far east side of Arvada around I-76 between Wadsworth Blvd. and Sheridan Blvd., which the Comprehensive Plan explicitly designates as an "Industrial Area." *See also id.* at 2-27 ("Most of the City's heavy industry is located in the Clear Creek sub-area."). Unlike the Site which is

Exhibit E

Public comment received
June 2- June 10

surrounded by residential subdivisions and miles from the nearest highway,[8] the "Clear Creek sub-area" has immediate access to two different interstate highways and numerous existing heavy industrial uses.

The Comprehensive Plan further delineates these uses by explaining that the "Industrial/Office" classification "encourages development of industrial and office uses that will minimally affect surrounding properties" and involves uses where "[o]utdoor storage is limited." (2014 Comprehensive Plan, at 2-28.) In contrast, the "Industrial" classification "encompasses Arvada's heavier industrial areas" where "[o]utdoor storage is allowed." (*Id.* at 2-27.) Amazon's proposed Heavy Logistics Center will involve significant outdoor storage, including more than 500 delivery vans on 23 acres of new parking lots.

This distinction is also recognized by the L.D.C. Specifically, L.D.C. Div. 2-1-6-2(B) provides that "[t]he IL zoning district generally implements the 'Industrial/Office' land use category stated in the Comprehensive Plan." In contrast, "[t]he IG zoning district generally implements the 'Industrial' land use category stated in the Comprehensive Plan." L.D.C. Div. 2-1-6-3(B). Thus, the Comprehensive Plan confirms that the Site should only be used for "Industrial/Office" uses that fit within the IL Zone and is not a suitable location for heavier industrial uses that can only be sited within the IG Zone. Because Amazon's proposed Heavy Logistics Center is not a lawful use within the IL Zone, it is inconsistent with the Comprehensive Plan and Scannell's request for annexation must be denied.

The fundamental incompatibility between the Comprehensive Plan's designation for the Site and Amazon's proposed Heavy Logistics Center is further confirmed by the broader development principles found throughout the Comprehensive Plan. In particular, the Comprehensive Plan requires infill development "to consider and be sensitive to the character of existing neighborhoods. Considerations shall include building scale, placement, size, height transitions, landscape, streetscape, and other design measures." (2014 Comprehensive Plan, at 2-11 (Policy CC-1.3).) To this end, the Comprehensive Plan recognizes that appropriate infill "means the development of new housing or commercial buildings on vacant sites in a largely built up area" with no suggestion that heavy industrial uses may be appropriate infill. (*Id.* at 2-33 (Redevelopment and Infill Principals).) The Comprehensive Plan also encourages infill that preserves "existing mature street trees and significant landscape features" and incorporates "pedestrian friendly mixed use design principles" as well as "[u]sable parks, trails, and open space." (*Id.* (Redevelopment and Infill Principals).) Finally, the Comprehensive Plan provides that "[t]he City **will require** new developments to provide buffers for creeks, water bodies, existing wetlands, riparian areas, and wildlife corridors to retain water quality and environmental integrity." (*Id.* at 4-12 (Policy R-1.1) (emphasis added).)

[8] The Comprehensive Plan recognizes that "Indiana Street does not directly connect to any of the region's major arterials (e.g. I-70, US-36 and US-6) and as a result the corridor is somewhat cut off from exterior communities." (2014 Comprehensive Plan, at C-7.)

Exhibit E

Public comment received
June 2- June 10

Amazon's proposed Heavy Logistics Center would insert the heaviest possible industrial use into an existing neighborhood which has built up over the course of decades in reliance upon the buffer that the Site provides between: (1) Maple Valley Park, Ralston Creek, the Ralston Creek Trail, and multiple residential subdivisions to the north and east of the Site; and (2) the existing light industrial and retail development closer to 64th Avenue and on the west side of Indiana Street. While RVC acknowledges that the Site should be allowed to be developed, any infill at the Site must maintain some of the existing buffer between development and Ralston Creek and should step down the intensity of uses moving from the southwest to the northeast across the site. Amazon's proposed Heavy Logistics Center will put a heavy industrial use immediately adjacent to the Ralston Creek floodplain while destroying approximately 450 mature trees and wildlife habitat and ensuring that the negative impacts (including 24/7 noise and traffic as well as surface water runoff and light pollution from 23 acres of new parking lots) will be felt in the park and in the surrounding residential areas.

This proposed heavy industrial infill is fundamentally inconsistent with the Comprehensive Plan. Scannell cannot meet its burden to satisfy L.D.C. Div. 8-3-3-3(A)(1), and the annexation should be denied.

2. Amazon's Proposed Heavy Logistics Center Cannot Be Integrated Into the City at this Site and Will Violate the L.D.C.

For many of the same reasons, the annexation request should be denied because Scannell cannot meet its burden to demonstrate that Amazon's proposed Heavy Logistics Center is "capable of being integrated into the City and developed in compliance with all applicable provisions of [the L.D.C.]." L.D.C. Div. 8-3-3-3(A(2).

The best way to determine whether proposed infill can be "integrated into the City" is to look to the "Redevelopment and Infill Principals" included within the Comprehensive Plan. As explained above, Arvada has previously decided that infill should be "new housing or commercial buildings" that can blend in with the existing neighborhood while also enhancing parks and buffering creeks and wildlife corridors. The Indiana Street corridor has been specifically designated as a commercial corridor, and the Site has been identified for possible light industrial and office uses—and not the heavy industrial uses that are mostly confined to the "Clear Creek sub-area." The Comprehensive Plan provides conclusive evidence that Amazon's proposed Heavy Logistics Center cannot be integrated into the City at this Site.

More importantly, by Scannell's own admission, the Site cannot be annexed as Scannell proposes "in compliance with all provisions of" the L.D.C. As discussed above and in more detail below (in Section B.2), if the Site is annexed and rezoned within the IL Zone, then the proposed use will necessarily violate the L.D.C. by placing a heavy industrial use in the light industrial zone. Accordingly, and as a matter of law, it is impossible for Scannell to show that "the subject property is capable of being . . . developed in compliance with all applicable

Exhibit E

Public comment received
June 2- June 10

provisions of [the L.D.C.]" and the proposed annexation must be denied under L.D.C. Div. 8-3-3-3(A)(2).

3. Indiana Street Is Already Over Capacity, and There Is Insufficient Transportation Infrastructure to Support a Heavy Logistics Center.

Scannell similarly cannot meet its burden to demonstrate that following the proposed development of the Site "there will be capacity to adequately serve residents of such area with all necessary utilities, facilities, and public services." L.D.C. Div. 8-3-3-3(A)(3). Specifically, the transportation infrastructure surrounding the Site cannot accommodate Amazon's proposal to increase daily traffic counts by more than 1,300 vehicles and likely many, many more during the holidays and other peak delivery times.

Per the Comprehensive Plan, Arvada already considered Indiana Street to be at its "traffic carrying capacity" in 2014. (2014 Comprehensive Plan, at 3-35.) These traffic issues have only become more acute as more development has come online in the past seven years, including the continued buildout of the Candelas and Leyden Rock subdivisions to the north of the Site. Arvada's Chief of Police recently reported that the police receive "frequent complaints from residents and commuters about traffic volume and the lack of capacity for Indiana to handle the traffic volume" and further expressed concern about the impact that "the heavy volume of traffic" on Indiana Street has on emergency response times in west Arvada. (Letter from D. Wick to U.S. Dept. of Transportation (attached hereto as **Exhibit 4**).) In 2017, the Executive Director of Arvada's Economic Development Association reported to the U.S. Department of Transportation that "daily traffic on Indiana Street has increased nearly 400% since the year 2000." (Oct. 13, 2017 Letter from R. Stachelski to E. Chao (attached hereto as **Exhibit 5**).) The City's own website confirms that Indiana Street is currently operating over capacity, and the City has published a litany of citizen comments which confirm that "Indiana is backed up at almost all times of the day" and that "Indiana is a disaster." ("Indiana Street at UPRR Widening Project," https://arvada.org/explore/transportation/cone-zone-impacting-your-drive/indiana-street-at-uprr-widening-project (last visited June 4, 2021) (attached hereto as **Exhibit 6**).)

Indiana Street is already unable to provide the necessary transportation infrastructure for the existing surrounding uses and users. Accordingly, there is no practical way to add a new Heavy Logistics Center that will only add more vehicles to the current mess. The transportation infrastructure surrounding the Site was not designed to handle this volume of use.

For its part, Scannell has submitted a traffic impact study that is fatally flawed in several obvious respects:

- First, the traffic counts that make up the background conditions and assumptions within the report were conducted during the height of the COVID-19 pandemic and the resulting reduction in all types of vehicle traffic, including most notably a large percentage of daily commuters. Scannell's traffic engineer claimed to adjust

Exhibit E

Public comment received
June 2- June 10

for this by looking to historic traffic counts from 2017, but there has been significant development and additional traffic in this area in the last four years.

- Second, although the traffic study claims to be based upon "user specific data," the study does not actually do anything to substantiate the accuracy of this information. For example, the study does not attempt to measure actual traffic counts generated by other similar Amazon facilities. As explained by the traffic engineer that RVC retained to review Scannell's report, "[d]ata should be generated using similar facilities within Colorado, where existing use can be used to establish trip generation factors for this study." (May 24, 2021 Memo from R. Kenny to RVC (attached hereto as **Exhibit 7**).) Scannell has not provided any transparency into the "user specific data" that serves as the foundation of its traffic impact study. As such, it is impossible to rely upon this "study."

- Third, the traffic impact study only claims to measure the purported traffic impact of Amazon's proposed Heavy Logistics Center during non-holiday periods when Scannell itself has claimed that the facility will generate approximately one-third of the traffic that will be generated during peak times. As explained by RVC's traffic engineer, "'[p]eak traffic' is not defined as the absolute highest day of the year, but with a known higher seasonable use, the holiday operations should be used for identifying the impact to the area roadways." (*Id.*) Amazon operates these facilities throughout the country, and there is no reason that this study cannot be based upon actual observed traffic counts during these peak times.

- Fourth, as explained by RVC's traffic engineer, Scannell's study ignores standard assumptions regarding peak traffic flows. (*Id.*) Scannell's study claims that this extraordinary assumption is based upon Amazon's use of non-standard delivery shifts, but nothing in any of Scannell's land use proposals would obligate Amazon to actually operate in this atypical manner. If Amazon does utilize normal shift schedules once operational, then Scannell's study is worthless. Again, this issue could potentially be resolved if the study were based upon real-world observations from other similar facilities and not unexplained assumptions.

- Finally, RVC's traffic engineer strongly believes that the amount of proposed parking[9] and the number of estimated van trips suggest that Scannell is

[9] City Staff has similarly questioned why Amazon needs the amount of parking that is proposed for the Site and specifically asked Scannell to provide a "parking study" in connection with the Site Plan. (*See* Apr. 16, 2021 Letter from S. Litsas to J. Bebo, at p. 2 (attached hereto as **Exhibit 8**).) In response, Scannell has produced a "parking memo" which explains the different types of parking spots that are proposed but does nothing to satisfy the City's request that Scannell conduct a study to justify more than 23 acres of new parking lots.

Exhibit E

Public comment received
June 2- June 10

> significantly underestimating the number of semi-trailer trucks that will be needed to resupply the proposed Heavy Logistics Center on a daily basis. (*Id.*) The amount of parking that Scannell is proposing strongly implies that the Heavy Logistics Center may generate more than 50 semi-trailer truck trips at all times of the year and not just 10 percent of the year during the holidays as Scannell claims.

Ultimately, Scannell's traffic impact study leaves more questions than answers.

What is known, however, is that even before this Site is developed with any use, Indiana Street is already operating well over capacity and frequently gridlocked. Indiana Street cannot absorb a minimum of 1,300 additional vehicle trips per day, including dozens of new semi-trailer truck trips and hundreds of new delivery van trips. During the holidays, when Scannell estimates that these volumes will triple, it is not hyperbole to assume that all transportation in west Arvada will regularly come to a standstill.

The City does not have sufficient transportation infrastructure to accommodate Amazon's proposed Heavy Logistics Center at this Site, and the annexation request must be denied in accordance with L.D.C. Div. 8-3-3-3(A)(3).

4. The Proposed Annexation Agreement Is Insufficient to Satisfy the Legal Requirements for Annexation.

Separate from the approval criteria for annexation under L.D.C. Div. 8-3-3-3, the annexation request must also be denied because Scannell's request is not accompanied by an annexation agreement that meets the requirements of L.D.C. Div. 8-3-3-4. Although it does not yet appear that it has been publicly posted on the Project Indiana website, RVC obtained a copy of Scannell's signed Annexation Agreement through a Colorado Open Records Act request. A copy of this Annexation Agreement is attached hereto as **Exhibit 9**. A review of the Annexation Agreement confirms that it is legally deficient in several respects.

First, pursuant to L.D.C. Div. 8-3-3-4(A)(1), an annexation agreement must be signed by all landowners of the property that is to be annexed. Scannell's Annexation Agreement is signed by one such landowner—Scannell Properties #456, LLC—but it is not signed by any of the landowners within the annexation area—Gary Dymond, Michell Dymond, Troy Newsome, Kenneth F. Hathaway Jr., and Nancy J. Hathaway.

Second, pursuant to L.D.C. Div. 8-3-3-4(B), Scannell must dedicate the portion of the Site that sits within the 100-year floodplain for Ralston Creek to the City. Scannell has acknowledged that approximately 1.1 acres of the Site sits within the 100-year floodplain. However, it does not appear that Scannell has taken any steps to dedicate this area to the City, including a formal conveyance to the City such that it might be added to Maple Valley Park and opened for public recreational use. Under L.D.C. Div. 8-3-3-4(A)(1), the annexation agreement must satisfy all of the "requirements" of L.D.C. Div. 8-3-3-4, which includes the requirement that floodplain areas be dedicated to the City consistent with L.D.C. Div. 8-3-3-4(B). The

Exhibit E

Public comment received
June 2- June 10

Annexation Agreement is incomplete because it does not include any dedication of the Site's floodplain area to the City.

Finally, L.D.C. Div. 8-3-3-4(A)(1) provides that the Annexation Agreement must include "any additional requirements determined by the City Council." The Annexation Agreement does include a number of such requirements and specifically requires Scannell to complete a number of public and private improvements to ensure that the proposed development will not place any additional burden on the City. These requirements, however, are based upon a number of "Final Plans" related to the Site Plan, which are not yet "final." Because the Site Plan process is not being completed in conjunction with Scannell's Annexation and Rezoning Application, it is impossible for the City or anyone else to know what the "Final Plans" might entail such that the Annexation Agreement may not actually be enforceable.

The untenable nature of this arrangement is perhaps best exemplified by Scannell's April 19, 2021 letter in response to the opposition comments submitted by Patrick Tobin on March 30, 2021. (Ex. 3.) In response to numerous legitimate questions about the scope and impact of Amazon's proposed Heavy Logistics Center, Scannell's attorney repeatedly claims that such issues are not before the City Council and will eventually be worked out through the administrative Site Plan process. (*Id.* at 4-8 (claiming, among other issues, that questions about the location of the detention, access permits, traffic control measures, landscaping and screening issues, the amount of parking, surface runoff issues, light pollution, and heavy truck routing will all be addressed later through the Site Plan approval). While the City does not explicitly require that final Site Plan approval be processed as part of an annexation, there is simply no way for the City to know what is actually being proposed and to apply the approval criteria for annexation without Scannell's "Final Plans" having actually been made final. Accordingly, the proposed Annexation Agreement fails to provide the City with the certainty and the protection needed to ensure that the City and its existing residents will not be unduly burdened by the proposed annexation for the benefit of one private party.

In light of these legal deficiencies in the Annexation Agreement, L.D.C. Div. 8-3-3-4 provides that the annexation must be denied.

5. Even If the City Council Finds that Annexation Might Be Appropriate, This Is a Significant and Intensely Controversial Issue that Should Be Decided by the People of Arvada through a Referendum.

RVC steadfastly believes that Scannell's annexation request must be denied for each of the reasons discussed above. If, however, the City believes that Scannell's annexation proposal ultimately comes down to a policy judgment, then this decision should be entrusted to the voters who will be directly impacted by the proposal.

Because annexation is a legislative function, Colorado law is clear that questions regarding annexation can be put to a popular vote. *See Leach & Arnold Homes, Inc. v. City of Boulder*, 507 P.2d 476 (Colo. App. 1973) (confirming that a Home Rule City's referendum

Exhibit E

Public comment received
June 2- June 10

procedure may be used to determine the fate of an annexation ordinance); *McKee v. City of Louisville*, 616 P.2d 969, 975 (Colo. 1980) (same); *see also Meadows at Buena Vista, Inc. v. Arkansas Valley Pub. Co.*, No. 10-cv-02871-MSK-KMT, 2012 WL 502688, at *1 (D. Colo. Feb. 15, 2012) (acknowledging Buena Vista's decision to put a proposed annexation "on the November 2008 ballot for public rejection or ratification"); *Margolis v. Dist. Ct., In & For Arapahoe Cty.*, 638 P.2d 297, 303 (Colo. 1981) ("We conclude that under the Colorado Constitution, art. V, sec. 1, only those acts of a city council which are legislative in character are subject to the referendum and initiative powers."). As a home rule city, Arvada has empowered its City Council "to submit any proposed or adopted ordinance or any question to a vote of the registered electors of the City without receipt of a petition." Charter of the City of Arvada, § 5.17.

Scannell's annexation proposal has generated significant interest throughout the City and it's easy to understand why: the proposal would fundamentally transform west Arvada for at least a generation. RVC and Protect Maple Valley Park alone have collected more than 8,500 petition signatures in opposition to the proposal, and the "Project Indiana" website established by the City now includes thousands upon thousands of pages discussing the development and its potential impacts. The referendum process exists to ensure that Arvadans have a say in how their City grows and changes. If the City Council believes that Scannell has satisfied the minimal legal requirements for annexation, then the final decision as to whether this proposal is in Arvada's best interests should be entrusted to the citizens of Arvada through a referendum.

B. <u>The City Must Deny the Rezoning Request Because the Use Will Violate the Proposed Zoning and Result in a Fundamentally Incompatible Land Use.</u>

Completely separate from the proposed annexation, the City Council must also decide the proposed rezoning. Although Scannell's Annexation and Rezoning application only seeks to rezone 5.349 acres that are currently incorporated within the City from the CG Zone to the IL Zone, if the City approves the annexation, the City will also need to rezone all of the land within the annexed area. *See* L.D.C. Div. 2-1-2-4(A) ("The standards and procedures that apply to zoning of annexed land are the same as those applied to a rezoning of property within the City limits."). The portion of the Site that is proposed for annexation totals 24.943 acres of land zoned within Jefferson County's agricultural zone, which only allows for "limited farming, ranching and agriculturally related uses while protecting the surrounding land from any harmful effects." (*See* Ex. 2.)

Accordingly, Scannell's application can only be approved if the City Council finds that Scannell has met its burden of proof with respect to all five of the necessary criteria for approving a rezoning under L.D.C. Div. 8-3-4-2 with respect to both the 5.349 acres that is proposed to be rezoned from the CG Zone to the IL Zone and the 24.943 acres that is proposed to be rezoned as part of the annexation from Jefferson County's agricultural zone to the IL Zone: (1) whether the rezoning is consistent with the City's Comprehensive Plan; (2) whether the proposed use is consistent with the proposed zoning district; (3) whether there is sufficient

Exhibit E

Public comment received
June 2- June 10

infrastructure to support the proposed development while maintaining adequate levels of service to existing development; (4) whether the proposed rezoning will result in significant adverse impacts to the natural environment; and (5) whether the rezoning is consistent with the character of existing development in the surrounding area. Scannell cannot meet its burden with respect to any of these required elements. Each is addressed in turn below.

1. The Proposed Rezoning Is Inconsistent with Arvada's Comprehensive Plan.

L.D.C. Div. 8-3-4-2(A)(1) provides that a rezoning may only be approved if Scannell meets its burden to demonstrate that "[t]here rezoning is consistent with the Arvada Comprehensive Plan." As explained above, Amazon's proposed Heavy Logistics Center is a heavy industrial use that is inconsistent with the Site's designation as an "Office/Light Industrial/Retail Opportunity" under Arvada's 2014 Comprehensive Plan. The Comprehensive Plan also repeatedly stresses the importance of infill that is sensitive to the surrounding context and the need for buffers to protect waterways like Ralston Creek and natural amenities like Maple Valley Park. Lastly, the Comprehensive Plan confirms that Indiana Street cannot accommodate any additional vehicle traffic and that the Site is not appropriate for heavy industrial use given how far it is from the interstate.

For the same reasons set forth above, Amazon's proposed Heavy Logistics Center is inconsistent with the Comprehensive Plan. The rezoning must be denied in accordance with L.D.C. Div. 8-3-4-2(A)(1).

2. Based on Scannell's Own Traffic Estimate, Amazon's Proposed Heavy Logistics Center Is Not Permitted in the Proposed IL Zone and the Rezoning Must Be Denied as a Matter of Law.

Under L.D.C. Div. 8-3-4-2(A)(2), the rezoning may only be approved if Scannell can demonstrate that "[t]he intended land use is consistent with the stated intent of the proposed zoning district." Here, there is no question that Scannell cannot satisfy this element as a matter of law. Both Scannell and its attorney have confirmed that the proposed Amazon Delivery Station will operate as a Heavy Logistics Center more than 10 percent of the year with at least 84 semi-trailer truck trips per day—far in excess of the limit of 50 truck trips per day within the IL Zone. The L.D.C. is explicit that this proposed use will be a Heavy Logistics Center that cannot possibly exist within the IL Zone. Scannell's attorney has claimed that the five to six weeks of excessive semi-trailer traffic that is planned for the facility every year can be considered "infrequent." But however this planned, regular use might be characterized, there is no changing Scannell's own admission that the proposed facility will be designed as a heavy industrial use that regularly operates as a heavy industrial use in violation of the proposed IL Zone.

Moreover, it also appears that the proposed Amazon Delivery Station will in fact operate as a Heavy Logistics Center at all times of the year. The L.D.C. does not define or classify delivery vans, but it does refer to "semi-trailer trucks" as a mere subset of "trucks." Accordingly, the "truck" traffic threshold that is used to determine whether a facility is a Heavy

Exhibit E

Public comment received
June 2- June 10

Logistics Center must be interpreted more broadly than to include just semi-trailer trucks. Critically, through its adoption of Colorado's Model Traffic Code, Arvada has specifically recognized that "truck" is a technical term, which includes any commercial vehicle that is used to transport property. Arvada City Code Div. 54-31 (adopting Colorado's Model Traffic Code including the definition of "truck" in C.R.S. § 42-1-102(108)).

Even setting aside the annual "holiday rush," Scannell and Amazon are proposing to construct and operate a 112,000 square foot industrial warehouse with 23 acres of new parking lots that—in Scannell's own estimation—will generate 42 daily semi-trailer truck trips and 404 daily delivery van trips. ("Traffic Impact, Project Indiana" (Sept. 2020), at 18, Appdx. D.) The warehouse will be supported by up to 21 loading docks, 12 semi-trailer parking spaces, 60 delivery van loading spaces, and another 60 delivery van staging spaces:

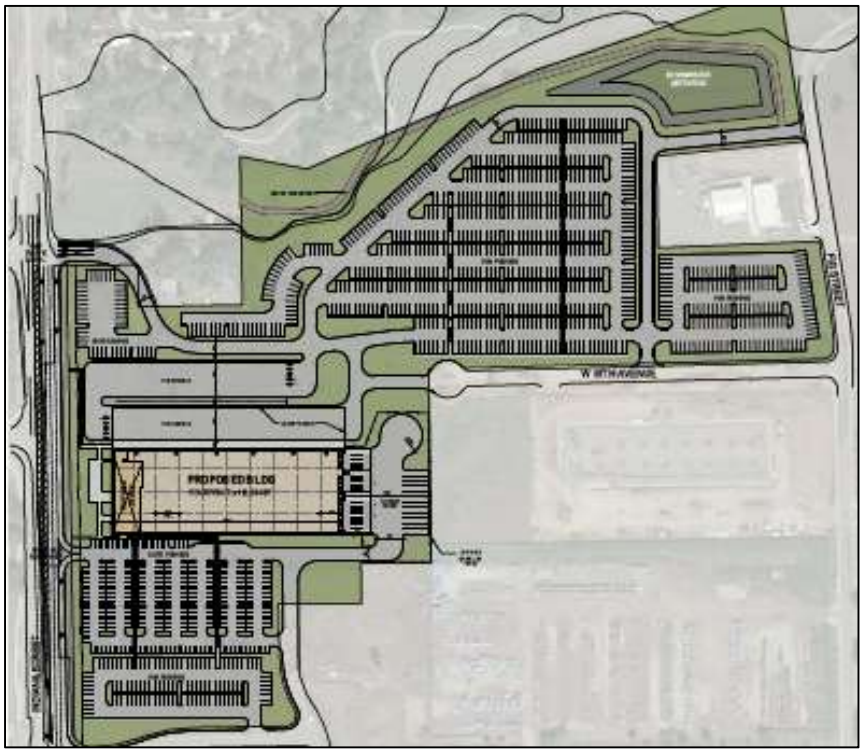

Exhibit E

Public comment received
June 2- June 10

What will the proposed Amazon Delivery Station do? There can be no doubt that the answer is heavy logistics. Frankly, it is difficult to imagine a bigger and more intensive logistics facility than what Scannell is proposing. Under either theory (relating to holiday semi-truck traffic or everyday van traffic), it is clear that the facility will operate as a heavy industrial use in violation of the proposed IL Zone.

Although the City Council sits in a quasi-judicial capacity when considering rezoning applications, its discretion to apply the rezoning criteria set forth in L.D.C. Div. 8-3-4-2 is not unlimited. If the City misconstrues or misapplies its own law, any resulting decision may be subject to reversal on appeal. *Canyon Area Residents for the Environment v. Bd. of Cnty. Comm'rs*, 172 P.3d 905, 907 (Colo. App. 2006).

Here, Scannell's own admissions confirm that the proposed Amazon Delivery Station will exceed what is actually allowed within the requested zoning. Accordingly, it is not possible for the City Council to find that Scannell has met its burden to show that the intended use is consistent with the proposed zone district. **The City Council has no discretion with respect to this issue, and Scannell's rezoning request must be denied as a matter of law**. More than anything else, this single issue should result in the immediate denial of Scannell's Annexation and Rezoning Application. Any other decision is destined for reversal on appeal.

3. The Proposed Rezoning Will Further Overtax Indiana Street, Which Is Already Over Capacity and Insufficient to Meet the Needs of Existing Users.

L.D.C. Div. 8-3-4-2(A)(3) provides that the rezoning may only be approved if Scannell can demonstrate that there are sufficient transportation facilities to "serve the subject property while maintaining adequate levels of service to existing development." As discussed above, the City itself has repeatedly confirmed that Indiana Street is already over capacity and there is no way to allow Amazon's proposed Heavy Logistics Center at this Site without creating further gridlock and a further degradation of service.

Moreover, Scannell's application confirms that approval of this facility will directly impact the existing level of transportation service for neighboring users. Specifically, Scannell and City Staff have apparently agreed that Amazon's proposed Heavy Logistics Center can only operate at the Site if a new traffic signal is constructed at the intersection of Indiana Street and 68th Avenue. But the placement of a new signal at this intersection will: (1) permanently preclude the installation of a traffic signal at 69th Avenue; and (2) require that the intersection of 69th Avenue be "restricted to three-quarter movements" such that residents of the Maple Valley neighborhood will no longer be able to turn south onto Indiana Street when exiting their neighborhood (as they have done for decades). (Jan. 29, 2021 Letter from J. Planck to J. Wolfschlag, at 2 (attached hereto as **Exhibit 10**).) This will necessarily result in additional traffic being routed through residential streets and make the intersection of 69th Avenue and Indiana Street even more dangerous as development continues to occur. Despite repeated requests from neighboring land owners, Scannell has refused to complete a traffic study that assesses the likely traffic impacts that will occur in surrounding neighborhoods as a result of the

Exhibit E

Public comment received
June 2- June 10

substantially increased traffic volumes that will be generated by the Site. The proposed reconfiguration of traffic along Indiana Street will degrade traffic safety area residents and existing users of Indiana Street solely for the commercial use by Amazon.

The proposed rezoning of the Site will adversely impact the already overburdened transportation infrastructure in this area. As with the annexation request, Scannell cannot meet its burden to demonstrate that the transportation infrastructure is sufficient to accommodate a more intensive land use at the Site. The rezoning request must be denied.

4. The Proposed Rezoning Will Have Significant Adverse Impacts on the Natural Environment by Placing a Heavy Logistics Center Immediately Adjacent to Ralston Creek and Maple Valley Park.

The fourth criteria for rezoning requires Scannell to prove that the proposed rezoning of the Site to the IL Zone "will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, or such impacts will be substantially mitigated." L.D.C. Div. 8-3-4-2(A)(4). Scannell has not made any such showing, and given the history of the Site and its proximity to Ralston Creek and Maple Valley Park, Scannell cannot possibly do so.

Scannell has obviously devoted substantial resources to pursue these land use approvals, but when it came time to study the environmental impact of Amazon's proposed Heavy Logistics Center at this Site, Scannell elected to do the absolute bare minimum. Specifically, Scannell has only commissioned a "Phase I" environmental site assessment for the Site, which did not involve any sampling or subsurface investigation to follow up on potential environmental concerns. Scannell's Phase I identifies four potential environmental concerns with the existing condition of the Site: (1) the former presence of leaking underground fuel storage tanks at the Site; (2) the presence of a historic landfill upgradient and south of the Site; (3) the long-term use of the property to the immediate west and upgradient of the Site as a vehicle repair facility that contains underground storage tanks and generated waste oil; and (4) the presence of a fire training facility to the west and upgradient of the Site, which is assumed to have used aqueous film forming foam (AFFF) which contains per- and polyfluoroalkyl substances (PFAS) that the EPA has designated as an "emerging contaminant of concern." (*See generally* Terracon Consultants, Inc., "Phase I Environmental Assessment, Proposed DDV1" (last rev. Sept. 4, 2020).) After Scannell's environmental consultant completed this Phase I assessment, the consultant specifically recommended that Scannell conduct "additional investigation to evaluate" each of the foregoing issues. Scannell has refused to follow this recommendation and has not conducted any environmental sampling at the Site. Accordingly, it is presently unknown what environmental contaminants might be unearthed during construction if Amazon's Heavy Logistics Center is approved.

The potential and unknown environmental contamination at the Site is especially problematic given the Site's proximity to Ralston Creek. For decades, the largely vacant Site has served as critical wildlife habitat adjacent to Ralston Creek and has provided a buffer from the

Exhibit E

Public comment received
June 2- June 10

light industrial and commercial uses that have developed closer to 64th Avenue. Unfortunately, because Scannell has refused to comply with the recommendation of Colorado Parks and Wildlife to perform a "biological survey" at the Site, it is currently unknown what wildlife currently inhabit the Site, including potentially endangered species, protected birds of prey, and/or established prairie dog colonies. (*See* Jan. 5, 2021 Email from J. Likes to J. Bebo (attached hereto as **Exhibit 11**).) What is known is that if Scannell's rezoning is approved, this longstanding habitat and natural buffer will be completely destroyed.

Moreover, Amazon's proposed Heavy Logistics Center will generate significant light pollution and surface runoff from 23 acres of new parking lots. In total, the proposed use will create 25.5 acres of new impervious surfaces that will discharge into Ralston Creek.

The proposed facility will operate 24/7 and, if the requested light industrial zoning is approved, will be permitted to generate noise of up to 70 decibels during the day and 65 decibels at night in areas that are immediately adjacent to Maple Valley Park. Arvada City Code Div. 38-91. This is akin to the noise generated by a vacuum cleaner being generated 24 hours per day next to the park.[10] Industrial noise at the Site at all hours of the day will unquestionably impact existing wildlife habitat and recreational amenities within the park.

There is simply no way to mitigate the environmental impact of plowing up nearly 36-acres of undeveloped agricultural land that has served for decades as a natural buffer between Ralston Creek and light industrial and commercial development to the south and east of the Site. Scannell has proposed that it will construct a six-foot wall between portions of Amazon's proposed Heavy Logistics Center and Maple Valley Park, but this will do nothing to limit surface runoff, light pollution, and habitat loss and will do little if anything to reduce the noise from thousands of vehicles at the Site.

While RVC understands that the Site might one day be developed, any development must be done in a manner that conforms to the existing context and steps down development from the intersection of Indiana Street and 64th Avenue as it moves toward Maple Valley Park. The proposal to put a heavy industrial site immediately adjacent to the park is completely out of character with this critical environmental and recreational resource. Scannell's proposal will

[10] While it is certainly possible that Amazon may not operate the facility in a manner that will reach the permitted noise threshold, there is no way of knowing whether or not that will be the case since Scannell has not commissioned a noise study for the proposed use. Scannell has only claimed that Amazon's proposed Heavy Logistics Center "will operate within the applicable noise limits of the City Code." ("Project Indiana – Frequently Asked Questions," https://projectindianaarvada.com/faq/ (last visited May 27, 2021.) What is known is that if the City agrees to rezone the Site within the IL Zone, then any operator of the Site will have a vested right to engage in industrial operations that create industrial noise within the permitted limits.

Exhibit E

Public comment received
June 2- June 10

result in significant adverse impacts to the environment at the Site and surrounding areas. Accordingly, the rezoning must be denied.

5. The Proposed Rezoning Is Incompatible With Existing Surrounding Uses and Will Eliminate a Necessary Buffer Between Incompatible Uses that Has Been in Place for Decades.

Finally, the proposed rezoning can only be approved if Scannell can demonstrate that the new zone designation is "consistent with the character of existing or planned development on adjacent properties in the surrounding area or neighborhood or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts." L.D.C. Div. 8-3-4-2(A)(5). As with the environmental impacts discussed above, there is simply no way to mitigate the obvious adverse impact that Amazon's proposed Heavy Logistics Center will have on surrounding land users.

Scannell claims that rezoning the Site within the IL Zone is consistent with the existing light industrial uses to the south and west of the Site. This argument, however, ignores that Arvada previously zoned the incorporated portion of the Site in the CG (Commercial, General) Zone precisely because this Site was always meant to serve as a buffer between the more intense land uses to the south and west and the open space and residential uses to the north. In addition to Maple Valley Park and Ralston Creek, there are dozens of single-family homes within eyesight of the Site and beyond that there are hundreds of single-family homes in multiple subdivisions within the immediate vicinity. If the Site is converted to industrial use, this longstanding buffer will be lost forever, and the natural amenities within Maple Valley Park and along Ralston Creek will be permanently degraded.

All of the existing land users within the surrounding neighborhood will be adversely impacted by the traffic, light pollution, and noise that will be generated from the 24/7 operations of Amazon's proposed Heavy Logistics Center. As discussed above, even if the City believes—despite its obvious flaws—that Scannell's traffic study is credible, the proposed use will put more than 1,300 additional vehicles on the already overburdened Indiana Street corridor. During Amazon's holiday rush, this traffic volume will triple and all vehicle traffic around the Site will grind to a halt. Again, Scannell has made no effort to study the spillover traffic effects into surrounding neighborhoods. Moreover, by selecting a Site that is almost five miles from the nearest interstate highway, Scannell has guaranteed that the proposed use will put dozens upon dozens of additional fully loaded semi-trailer trucks on Arvada's suburban roadways resulting in untold additional wear and tear on infrastructure as well as increased risk to public safety.

Amazon's proposed Heavy Logistics Center is fundamentally incompatible with the Site and with the existing surrounding uses. Scannell has not met its burden to demonstrate that the rezoning will be consistent with the character of the surrounding neighborhood, and the rezoning must be denied.

Exhibit E

Public comment received
June 2- June 10

Conclusion

RVC respectfully requests that the City Council deny the Annexation and Rezoning Application. Although Scannell's own traffic estimates confirm that the proposed Amazon Delivery Facility will be a heavy industrial Heavy Logistics Center, Scannell has attempted to downplay the obvious incongruity of this proposed use by seeking to misclassify it within Arvada's IL Zone. In doing so, however, Scannell has presented the City with an application that it cannot possibly grant. Because Amazon's proposed Heavy Logistics Center is inconsistent with the proposed IL zoning, the Annexation and Rezoning Application must be denied as a matter of law under L.D.C. Div. 8-3-4-2(A)(2). Similarly, because this proposed Heavy Logistics Center can only exist within Arvada's IG zone, Scannell's proposal contravenes Arvada's Comprehensive Plan, which explicitly provides that the Site should be appropriately developed as "Office/Light Industrial/Retail" and not as heavy industrial. The reason for this classification of the Site within the Comprehensive Plan is obvious—Indiana Street is already well over its traffic capacity, and the transportation infrastructure surrounding the Site is insufficient to support a new Heavy Logistics Center almost five miles from the nearest interstate highway. The fact that the Site is immediately adjacent to Maple Valley Park and Ralston Creek and within the immediate vicinity of hundreds of established single-family homes only serves to further confirm the fundamental incompatibility of what Scannell is proposing.

RVC remains committed to ensuring that any land use decisions made in connection with Project Indiana comply with all applicable laws and regulations. To that end, we respectfully request that any land use decisions by the City Council be memorialized in writing with detailed findings of fact addressing each of the required elements for approval or denial. Please also ensure that all materials that the City Council refers to or relies upon in making these decisions, including a complete copy of the current L.D.C., all relevant City ordinances and regulations, and all current comprehensive planning documents, are included in the administrative record in the event of any subsequent appeal.

On behalf of RVC and the thousands of Arvadans who have signed petitions in opposition to Project Indiana, we look forward to the opportunity to present at the June 14, 2021 City Council Hearing to explain why Project Indiana is not in the best interests of the City and why the Annexation and Rezoning Application should be denied. Please let us know if the City Council requires any further information or documentation in advance of the Hearing.

Section 33 - Agricultural District

(orig. 3-26-13)

A. Intent and Purpose

1. The Agricultural Zone Districts are intended to provide for limited farming, ranching and agriculturally related uses while protecting the surrounding land from any harmful effects. (orig.3-26-13)

2. Contained in this section are the allowed land uses, building and lot standards (including minimum setbacks) and other general requirements for each specific agricultural zone district. (orig.3-26-13)

3. The Agricultural Zone Districts are divided as follows: (orig.3-26-13)

   a. Agricultural-One (A-1)

   b. Agricultural-Two (A-2)

   c. Agricultural-Thirty-Five (A-35)

4. A revision in March, 1972, increased the minimum land area for the Agricultural-One district to 5 acres. (orig.3-26-13)

5. A revision in March, 1972, increased the minimum land area for the Agricultural-Two district to 10 acres. (orig.3-26-13)

B. Permitted Uses (orig. 3-26-13; am. 7-17-18)

Uses	A-1	A-2	A-35
Single Family Dwelling, Barn, Stable, Silo, Corral, Pens, and Runs.	X	X	X
General Farming, including grains, fruit, vegetables, grasses, hay, livestock raising, and the keeping and boarding of horses. See general requirements below.	X	X	X
Poultry hatcheries and farms, fish hatcheries and dairy farms.	X	X	X
Greenhouse and nursery, including both wholesale and retail, provided products sold are raised on the premises.	X	X	X
Forestry farming, including the raising of trees for any purpose.	X	X	X
Fur farm and raising of rabbits, chinchillas and other similar animals.	X	X	X
Public Park, Class I public recreation facilities, Class II public recreation facilities are permitted only if the site is in compliance with the current minimum lot size requirement.	X	X	X
Veterinary hospital	X	X	X
Cemetery, mausoleum, mortuary and related uses.	X	X	X
Beekeeping operations	X	X	X
Oil and gas drilling and production subject to the Drilling and Production of Oil and Gas Section of this Zoning Resolution, except where located within a subdivision platted and recorded in the records of the Clerk and Recorder.	X	X	X
Telecommunications Land Uses shall comply with the provisions of the Telecommunications Uses Section of this Zoning Resolution.	X	X	X
Energy Conversion Systems (ECS) land uses shall comply with the provisions of the Alternative Energy Resources Section of the Zoning Resolution.	X	X	X
Water supply reservoir and irrigation canal	X	X	X

Exhibit E

Public comment received
June 2- June 10

C. Accessory Uses (orig. 3-26-13; am. 7-17-18)

Uses	A-1	A-2	A-35
Accessory structures including private garage, and storage sheds	X	X	X
Roadside stand for operation during not more than 6 months in each year for the sale of farm products raised or produced on the premises, provided such stands are located no less than 30 feet distance from any street, highway, or right-of-way line.	X	X	X
Private building and kennels for housing dogs, cats or similar domestic pets. On legal non-conforming lots or parcels smaller than the minimum lot size, the maximum total number of dogs, cats and similar domesticated pets which may be kept shall be 3. Litters of puppies or kittens may be kept until weaned.	X	X	X
Temporary storage of defensible space equipment and debris associated fuel break and forest management thinning in accordance with defensible space, fuel break and forest management programs as specified in this Zoning Resolution and Land Development Regulation.	X	X	X
Home Occupations provided the requirements and conditions of the Board of Adjustment or the Home Occupations Section of this Zoning Resolution are met.	X	X	X
Accessory uses per the Accessory Use Section of the Zoning Resolution.	X	X	X

D. Special Uses (orig. 3-26-13; am. 7-17-18)

Uses	A-1	A-2	A-35
Sewage treatment plant	X	X	X
Religious Assemblies and related uses, rectory, parish house and schools.	X	X	X
Radio, television and microwave transmission and relay towers and equipment; meteorological data collection towers and equipment; low power, micro-cell and repeater telecommunications facilities, including antenna and towers.	X	X	X
Cable television reception station	X	X	X
A group living facility, other than homes for social rehabilitation, or a home where up to 6 unrelated individuals are living together, that is occupied by more than one registered sex offender.	X	X	X
Group, foster or communal home, residential treatment center, community residential home, home for social rehabilitation, assisted living residence, personal case boarding home, specialized group facility, receiving home for more than 4 foster home residents, residential child care facility or shelter from domestic violence, licensed or certified by state if applicable, in which 7 or more residents who are not legally related live and cook together as a single housekeeper unit not located within 750 ft of another similar type home or shelter.	X	X	X
State licensed daycare center or preschool or nursery.	X	X	X
Arborist or tree service	X	X	X
Natural resource transportation and conveyance systems	X	X	X
Public Kennel or cattery	X	X	X
Public riding academy or stable	X	X	X
Camps, campgrounds, picnic grounds, and lodges or other similar facilities. Specific conditions and limitations for use, including maximum periods of visitor occupancy and types or maximum numbers of occupied vehicles or sites, will be established as terms of the Special Use approval.	X	X	X
Oil and gas drilling and production, where located within a subdivision platted and recorded in the records of the Clerk and Recorder. Such operations shall conform to the standards contained in the Drilling and Production of Oil and Gas Section of the Zoning Resolution, except as modified in the resolution approving the Special Use.	X	X	X
Class I, II, III Commercial Recreational Facilities. Class II public recreational facilities on sites which do not meet the current minimum lot size requirement. Class III public recreational facilities.	X	X	X

Uses	A-1	A-2	A-35
Limited sawmill operation use in support of defensible space, associated, fuel break, forest insect and disease control, and forest management programs as required under the Zoning Resolution and Land Development Regulations.	X	X	X
Trap, skeet or rifle range		X	X
Recycling transfer station, Type I or Type II: the facility shall only accept trees and slash generated from local efforts associated with regulatory/ voluntary defensible space, fuel break and forest management plans, and Pine Beetle control programs.		X	X
Dangerous and wild animal ranching, training, sales and exhibition provided that the property is 10 acres or greater and such use is in compliance with the General Provisions and Regulations Section of this Zoning Resolution.		X	X

E. Lot and Building Standards (orig. 3-26-13; am. 7-17-18)

Districts	Front Setback		
	Primary Structure/All Garages		All Other Accessory Structures
A-1, A-2, A-35	50 ft.		Livestock – 75 ft. Pens/Runs/Structures[1] – 100 ft. All Other Accessory Building – 50 ft.
	Side Setback		
	Primary Structure/All Garages		All Other Accessory Structures
	Side	Side to Street	
A-1, A-2, A-35	30 ft.	50 ft.	Livestock – 75 ft. Pens/Runs/Structures[1] – 100 ft. All Other Accessory Building – 50 ft.
	Rear Setback		
	Primary Structure/All Garages		All Other Accessory Structures
A-1, A-2, A-35	50 ft.		50 ft.

[1] Applied to all pens, runs, and structures utilized for fur farms, poultry farms, kennels and catteries.

Districts	Building Height	Lot Size (see a & b below)
A-1	35 ft.	5 Acre (217,800 s.f.)
A-2	35 ft.	10 Acre (435,600 s.f.)
A-35	35 ft.	35 Acre (1,524,600 s.f.)

1. Lot Standards

   a. The minimum lot area for any use permitted in this district shall be the lot size stated above unless the lot falls within the provisions set forth in the Non-Conforming Lot Size provision below. (orig.3-26-13; am. 7-17-18)

   b. The minimum lot area for a lot developed through the rural cluster process shall be as set forth in the Land Development Regulation. (orig.3-26-13)

F. Fences

1. Maximum Fence Height: 7 feet. (orig.3-26-13)

2. Fences over 42 inches in height are allowed within the front setback. (orig. 7-17-18)

3. Electric fences are permitted provided the electrical fence device is in compliance with Colorado State Department of Agriculture specifications. No electric fence is allowed as boundary or perimeter fence on lot lines abutting residential zone districts. (orig.3-26-13)

4. On adjacent lots where allowed fence heights differ, the lower height restriction shall govern. (orig.3-26-13)

G. General Requirements

1. Corner lots must comply with the vision clearance triangle requirements as specified in the Definitions Section of this Zoning Resolution. (orig.3-26-13)

2. No structure may be erected placed upon or extend over any easement unless approved in writing by the agency or agencies having jurisdiction over such easement. (orig.3-26-13)

H. Animals

1. Manure shall not be allowed to accumulate so as to cause a hazard to the health, safety or welfare of humans and/or animals. The outside storage of manure in piles shall not be permitted within 100 feet of the front lot line and 50 feet of the side and rear lot lines. (orig.3-26-13)

2. Stallions shall be kept in a pen, corral or run area enclosed by a 6 foot chain link fence, or material equal or greater in strength, except when it is necessary to remove them for training, breeding or other similar purposes. (orig.3-26-13)

3. On legal non-conforming lots or parcels smaller than the minimum lot size, the following is the density per acre limitation for horses, mules, donkeys, sheep, cattle, goats, swine, buffalo, and other large domesticated animals: (orig.3-26-13; am. 7-17-18)

   a. The minimum square footage of open lot area, available to animals, shall be 9,000 square feet for the first animal and 6,000 square feet for each additional animal. The total number of such animals that may be kept shall not exceed 4 per 1 acre. (orig.3-26-13; am. 7-17-18)

   b. Offspring of animals on the property may be kept until weaned. (orig.3-26-13)

I. Non-conforming Lot Size

1. Planning and Zoning shall only permit the use of any unplatted Agricultural-One, Agricultural-Two, or Agricultural-Thirty-Five zoned tract or parcel that is less than 5 acres, 10 acres, or 35 acres respectively, provided that all of the following provisions are met. (orig. 9-6-77; am. 11-6-79; am. 6-16-80; am. 7-2-97; am. 12-17-02; am. 3-3-15; reloc. & am. 7-17-18)

   a. The parcel, tract or lot existed in its current configuration prior to March 6, 1972. (orig. 9-6-77; am. 6-16-80; reloc. & am. 7-17-18)

   b. The property is 1 acre in size or greater. (orig. 6-16-80; reloc. 7-17-18)

   c. Use of the property shall conform with current use regulations in effect for the respective Agricultural-One, Agricultural-Two, and Agricultural-Thirty-Five Zone Districts. (orig. 9-6-77; am. 7-2-97; reloc. & am. 7-17-18)

   d. Any new construction or structural alteration shall conform with current setback and height regulations in effect for the respective Agricultural-One, Agricultural-Two, and Agricultural-Thirty-Five Zone Districts. (orig. 9-6-77; am. 7-2-97; reloc. 7-17-18)

   e. Requirements of Public Health for water and sanitation shall be complied with prior to the Building Permit being issued. (orig. 9-6-77; am. 12-17-02; am. 4-20-10; reloc. 7-17-18)

2. Planning and Zoning shall only permit the use of any Agricultural-One, Agricultural-Two, or Agricultural-Thirty-Five zoned lot which was platted without County approval provided that the provisions of paragraphs I.1.a through I.1.e above, are complied with. (orig. 6-16-80; am. 7-2-97; am. 12-17-02; am. 3-26-13; am. 3-3-15; reloc. & am. 7-17-18)

3. Planning and Zoning shall only permit the use of any Agricultural-One, Agricultural-Two, or Agricultural-Thirty-Five zoned lot which was platted with County approval prior to time said lot was zoned, provided that the provisions of paragraphs I.1.b. through I.1.e. above, are complied with. (orig. 6-16-80; am. 7-2-97; am. 12-17-02; am 3-26-13; am. 3-3-15; reloc. & am. 7-17-18)

4. Planning and Zoning shall only permit the use of any zoned lot which was platted with County approval subsequent to the date it was zoned provided that the provisions of paragraphs I.1.c. through I.1.e. above, are complied with. (orig. 6-16-80; am. 7-2-97; am. 12-17-02; am 3-26-13; am. 3-3-15; reloc. & am. 7-17-18)

City of Arvada
Community and Economic Development
Attn: Ryan Stachelski, Director
8101 Ralston Road
Arvada, CO 80002

Re: Response to Mr. Patrick J. Tobin's Letter dated March 30, 2021 concerning Project #DA2020-0117 – Development Application (Annexation and Zoning) and Related Applications: Project #DA2020-0132 – Site plan, Project #PA2020-0067 – Project Pre-Application (the "Petition Group Letter")

Dear Mr. Stachelski:

We represent Scannell Properties, LLC (the "**Developer**") with respect to its annexation, zoning, and rezoning application (collectively, the "**Application**") for the proposed development of an Amazon last mile delivery station ("**Project Indiana**") to be constructed in the City of Arvada (the "**City**"). The Application will be considered at a public hearing before the Planning Commission on April 20, 2021 (the "**Public Hearing**"). We understand that Mr. Patrick J. Tobin has submitted the Petition Group Letter to document his clients' questions, concerns and requests for action with respect to the Application in advance of the Public Hearing, and on behalf of the Developer, we appreciate the opportunity to submit this letter in response to the Petition Group Letter for the record and to assist the Planning Commission in its deliberations.

As you are aware, the Application concerns the development of approximately 34 acres of land located at 6700 Indiana Street (the "**6700 Property**"), 6702 Indiana Street (the "**6702 Property**"), 6710 Indiana Street (the "**6710 Property**"), a portion of 6720 Indiana Street (the "**6720 Property**"), 6730 Indiana Street (the "**6730 Property**"), 14725 West 66th Place (the "**14725 Property**"), and 14785 West 66th Place (the "**14785 Property**") (collectively, the "**Property**"). It also concerns the annexation of Maple Valley Park (the "**Park Property**") into the City. The 6700 Property, the 6702 Property, the 6710 Property, and the 6720 Property are located in unincorporated Jefferson County, Colorado (the "**County**") (collectively, the "**County Property**"), and the 6730 Property, the 14725 Property, and the 14785 Property are located in the City (collectively, the "**City Property**"). The Developer owns the 6700 Property and is the contract purchaser of the other properties. The Developer desires to annex the County Property into the City and zone such property as Industrial, Light ("**IL**"), and to rezone the City Property from its current Commercial, General designation to IL.

As a preliminary matter, we would like to clarify that the purpose of the Public Hearing is for the Planning Commission to consider the Application, not the application for a site plan/minor subdivision for the Property (the "**Site Plan Application**"), which is under review by City Staff. Most of the issues raised by the Petition Group Letter deal with specific components of how the Project might be laid out on the site, and therefore are related to the Site Plan Application, rather than the Application.

EXHIBIT
3

410 Seventeenth Street, Suite 2200
Denver, CO 80202
main 303.223.1100

To the Developer's knowledge, the public information in the City's eTRAKiT files with respect to the Application and related applications is complete and up-to-date. No responses from Developer are missing.

Despite the Petition Group Letter's assertion that the Application is incomplete, the Developer has submitted a complete application, as demonstrated in the responses below to the specific concerns raised in the Petition Group Letter. The Land Development Code (the "**LDC**") contains a list of required submittal items that an applicant must provide in order for an application to be accepted for review by City Staff. The Application has met those requirements and the Developer has completed the rigorous review process required by Section 8-2-3-11 of the LDC and has made numerous revisions to address comments and issues raised by Staff during that process. Only applications that appropriately respond to issues raised during the review process are deemed complete and forwarded by the Planning Director to the Planning Commission for review. *LDC § 8-2-3-11.H*.

The Developer appreciates the Petition Group Letter's commitment to a full community perspective, which is consistent with its own commitment to a full community perspective, as evidenced by the amount of community outreach in which the Developer has engaged. The Developer has exceeded the amount of community outreach required by the LDC by hosting two virtual neighborhood meetings, including a five-hour meeting during which the Developer answered more than 500 questions posed by attendees. Moreover, members of the public will have the opportunity to present their perspective at the Public Hearing and the subsequent City Council meeting.

The materials that accompany the Application provide a complete record demonstrating fulfillment of the criteria for an annexation, zoning and rezoning as well as the Developer's commitment to community outreach. In this letter, we address the other specific questions, concerns and requests for action raised in the Petition Group Letter.

A. Pre-Development Items

1. Truck Traffic

The Petition Group Letter states that the truck traffic anticipated to be generated by Project Indiana is in excess of what is permitted by the LDC. We address this comment and the requested action below.

i. *Truck Traffic in Excess of Light Industrial Zoning Limitations*.

The Petition Group Letter states that because the statutory definition of a "truck" in C.R.S. § 41-1-102(108) and the Model Traffic Code is applied to the cargo vans intended to serve Project Indiana, the number of estimated truck trips will regularly exceed the limit of 50 daily truck trips allowed in the IL zoning. However, while cargo vans may qualify as a "truck" under those authorities, the City has adopted those authorities for the limited purposes of the City's traffic enforcement ordinance, not for land use decisions such as the decisions at issue in the Application. For land use decisions, the City instead properly relies on the traffic engineering-specific definitions and methodologies promulgated by the Institute of Transportation Engineers (ITE). One of those references is the ITE Trip General Manual, which does not include cargo vans within the definition of a "truck" for purposes of analyzing traffic generation associated with various use types. Therefore, using the definition of what constitutes a "truck" for land use decisions such as those at issue in the Application, the number of daily truck trips will not typically exceed the 50 daily truck trip limit for IL zoning. The Developer acknowledges that on infrequent occasions, such as holidays, there may be up to 42 trucks—84 trips—per day. However, the proposed development satisfies the requirements for IL zoning because the typical number of daily truck trips will not exceed 50. *LDC § 11-3-3*. Land use decisions are not properly made on the basis of rare occurrences which might occur sometimes; rather, the impact of uses is determined based on their average, or typical, characteristics.

ii. *Action requested by Petition Group: Discontinue processing the Applications for Light Industrial Zoning*.

The City should not discontinue processing the Application. First, as described above, the Developer has demonstrated that the projected number of daily truck trips is compatible with the requested IL zoning. Second, even if the Developer had proposed a level of truck traffic inconsistent with zoning district standards, the proper process pursuant to Section 8-2-2-2 of the LDC is for Planning Commission to make this determination after a public hearing and not for City Staff or Planning Commission to preemptively discontinue the application before any of the relevant decision makers have reviewed it. It would be improper to discontinue processing an application for a rezoning based on a finding that has not yet been made or based upon the opponents' opinion of what the Planning Commission may find.

2. Comprehensive Plan Amendment

The Petition Group Letter noted that the City initially stated that an amendment to the 2014 Comprehensive Plan (the "**Comp Plan**") would be needed for the portions of the Property designated as Neighborhood/Community Commercial. The Petition Group Letter further noted that no proposed amendment to the Comp Plan can be located and set forth some questions and requested actions with respect to the same. We address these questions and the requested action below.

i. *Questions: Is this in process? When will a draft be circulated?*

City Staff review has subsequently concluded that the Application is consistent with the existing Comp Plan and therefore not required the Developer to amend the Comp Plan. Therefore, to the Developer's knowledge, an amendment to the Comp Plan with respect to the Property is not in process and there is no draft of such amendment to circulate.

ii. *Actions requested by Petition Group: Enforce the existing Comprehensive Plan, particularly the requirements that the development "minimally affect surrounding properties" and will not have "significant adverse impacts upon the natural environment"*

As described in detail in the Developer's two letters to the City accompanying the Application dated December 11, 2020 (the "**Developer's Letters**"), the Developer has submitted the Application in which it demonstrates that the proposed annexation, zoning, and rezoning is consistent with the Comp Plan. The Comp Plan designates a majority of the Property as "Industrial/Office/Retail," with a small portion designated as "Neighborhood/Community Commercial." The Property also is designated as a future employment center. As discussed in the Developer's Letters, the proposed uses for Project Indiana are compatible with this designation. Similarly, the Comp Plan designates the Park Property as "Open Space," which is compatible with the proposed uses for the Park Property.

As further described in the Developer's Letters, the Application also complies with the Comp Plan provisions that require development to "minimally affect surrounding properties" by proposing a design for Project Indiana that includes ample buffers between the proposed development and the surrounding uses. The buffers between Project Indiana and residential development will be further enhanced by the Park Property.

The LDC requires that a proposed zoning or rezoning shall not result in a land use with "significant adverse impacts on the natural environment", *LDC § 8-3-4-2.A.4*, and the Comp Plan sets a goal to "minimize the impact of new development on natural areas to allow continued co-habitation of people and wildlife," *Comp Plan, Goal R-1*. Project Indiana will not have "significant adverse impacts upon the natural environment" because, as detailed in the Developer's Letters, the Developer intends to construct large retention ponds

and work with the City to address any additional mitigation measures deemed necessary during review of the Site Plan Application. Therefore, the Application is in compliance with the LDC and consistent with the Comp Plan.

As an aside, it should be noted that, unlike zoning, the Comprehensive Plan is not a document which can be "enforced." Rather, the Comprehensive Plan is an advisory document, which sets forth guiding principles for making certain decisions pursuant to the LDC. The Application demonstrates numerous ways in which it is consistent with and in furtherance of the Comprehensive Plan. If the Petition Group has a different opinion, the Public Hearing is one of several fora provided by the LDC for them to express that opinion.

3. Floodplain and Detention Pond Area

The Petition Group Letter states that the Petition Group has located sketches and contour overlays demonstrating that portions of the Developer's proposed detention pond area overlay the 100-year floodplain. The Petition Group Letter sets forth the following requested action with respect to the proposed detention pond area, which we will address below:

i. *Action requested by Petition Group: Require a modified Detention Pond located completely outside the Floodplain.*

This comment is not relevant to the Application or the Public Hearing because approval of the requested annexation, zoning, and rezoning does not include approval of the placement of detention ponds within a proposed development. To the extent that any modified detention ponds are required for approval of the Site Plan Application, the Developer will address such requirements in conjunction with City staff at the appropriate time in the review process.

4. 68th Avenue Access

The Petition Group Letter states that the City has commented that approval from the Colorado Department of Transportation ("**CDOT**") will be required for approval of Project Indiana. The Petition Group Letter further states that no documents with respect to an access permit have been located and an access permit has not been issued. The Petition Group Letter sets forth the following requested actions, which we will address below:

i. *Actions requested by Petition Group: (1) Obtain a copy of the Access Permit application and make it available to the Planning Commission and the Public. (2) Require an issued State Highway Access Permit in advance of any action by the Planning Commission.*

This comment is not relevant to the Application at issue because, pursuant to Divisions 8-3-3 and 8-3-4 of the LDC, none of the criteria for approval of a requested annexation or zoning address the approval of access permits by CDOT. No requirement exists that access permits must be obtained, or even submitted, prior to submittal of other applications, such as the Application at issue here. In fact, an applicant could apply for annexation, zoning, and site plan review and not apply for an access permit for a year or more after such applications are approved. Additionally, the Developer has completed and submitted to CDOT its access permit applications.

5. Eldritch Street and East on W 68th Ave.

The Petition Group Letter sets forth a concern and the following requested action with respect to access and traffic at the intersection of Eldritch Street and W 68th Avenue:

i. *Action requested by Petition Group: Applicant's plans should strictly comply with § Sec. 4-4-2-3 of the LDC, which would require a permanent mechanism, using either physical barriers or using regulatory signaling and signage to specifically prohibit Van and Truck access from the Applicants developed property through the intersection.*

Although it should be noted that this is really a Site Plan issue and is not related to the Application, the Developer is committed to complying strictly with Section 4-4-2-3 of the LDC in any manner the City directs. The Developer does not anticipate traffic, including delivery van traffic, at the intersection of Eldritch Street and W 68th Avenue to be an issue, but if traffic becomes an issue after the last mile delivery station opens, the City will evaluate and implement measures as necessary, which may or may not include a physical barrier.

6. Traffic North on Fig Street.

Similar to Item 5 above, the Petition Group Letter sets forth a concern with respect to traffic on Fig Street along with the following requested action:

i. *Action requested by Petition Group: Applicant's plans should strictly comply with § Sec. 4-4-2-3 of the LDC. Require a permanent mechanism, using either physical barriers or using regulatory signaling and signage to prohibit Van and Truck Traffic traveling north on Fig into the Eldridge and W 68th Avenue intersection.*

The Developer's response is the same as to Item 5 immediately above. While this is a Site Plan issue, and not related to the Application, to the extent that the City wishes to restrict the use of Fig Street or require some other type of mechanism to restrict traffic, the Developer has no objection.

7. Tree Planting

The Petition Group Letter raised multiple concerns with respect to tree planting for the Property and the Park Property. Again, this issue relates principally to the Site Plan, rather than the Application. However, the Developer's plans for tree planting fully comply with the City's requirements and avoid adverse impacts upon the natural environment in compliance with the LDC.

The Developer will plant approximately 830 trees on the Property and is dedicating 1.1 acres of land to the City where the City may plant additional trees. Additionally, the Developer is also making an additional cash payment to the City for the purposes of tree mitigation, which the City can use to plant additional trees within the Park, or anywhere else in the City that it sees fit.

It is also the Developer's understanding that the City does not currently wish the Developer to plant additional trees in Maple Valley Park based on the City's evaluation. The Developer will continue to follow the City's direction with respect to this issue. Additionally, although the Assessment completed by Colorado State University suggests that planting trees would reduce the impacts on Maple Valley Park, the Developer is not permitted to plant trees in the floodplain that is adjacent to the Park Property. To the extent that the City desires trees in Maple Valley Park and the planting of trees does not violate the prohibition on planting trees in the floodplain, the Developer is willing and happy to cooperate in planting trees.

8. Screening

The Petition Group Letter states that, because the Property is approximately 10-20 feet higher than the residences to the north, the Developer should provide as much screening of Project Indiana from the neighborhood as possible. The Petition Group Letter sets forth the following requested actions, which we will address below:

i. *Actions requested by Petition Group: Require a visibly solid fence high enough to fully block direct view of the Parking Lot Lighting from the residences to the north. The Wall needs to be across the entire north property line. Also, a wall should be required on the Fig street side to block vehicle lights from Ralston Valley and Hill Crest neighborhood residences.*

Once again, it must be noted that this issue pertains to the Site Plan not the Application. However, in the Site Plan, the Developer has designed screening for the Property using a variety of techniques, including a screening wall, additional buffer area, and landscaping in different areas along the northern boundary of the Property. According to the Developer's analysis, a screening wall across the entire northern border of the Property would not be as effective as the variety of techniques the Developer has proposed. The Developer has proposed a screening wall for portions of the northern border of the Property where a screening wall would most effectively screen Project Indiana from surrounding properties and where there was no room for other buffering techniques that would provide more effective screening than a wall. Overall, the Developer has designed Project Indiana to minimize any impacts vehicle lights may have on the Ralston Valley and Hill Crest neighborhood residences to the east of the Property. To the extent that the Petition Group Letter presents concerns about the screening of parking lot lighting, the Developer has designed the parking lot lighting specifically to minimize impact on nearby properties, including the use of shorter light poles and cut-off lights. The photometric plan submitted as part of the Site Plan approval will demonstrate that it meets all the applicable criteria as it relates to lighting.

9. Excessive Parking

The Petition Group Letter raised multiple concerns with respect to parking on the Property. The Petition Group Letter sets forth the following requested questions, concerns, and actions, which we will address in turn below:

i. *Question: Why are the Applications being allowed to proceed without the Parking Plan that was initially requested in May of 2020*?

A parking plan is not required for an application for an annexation, zoning or rezoning and is appropriately considered as part of a site plan. Therefore, the requested parking for Project Indiana is not at issue in the Application to be considered at the Public Hearing.

However, even if parking were at issue in the Application, the Petition Group Letter misinterprets the City's May 2020 request. City Staff was not requesting that the Developer produce a formal parking plan. Rather, City Staff was merely seeking detailed information clarifying why the requested amount of parking was being sought for Project Indiana. During the rigorous review process, the Developer provided this information to the City, which the City accepted as part of the complete Application.

Even if the City were ultimately to determine that a formal parking plan were required for approval of the Application, the proper process pursuant to Section 8-2-2-2 of the LDC is for Planning Commission to make this determination after a public hearing and not for City Staff or Planning Commission to preemptively halt the processing of an application. As noted above, it would be improper to discontinue processing an application for an annexation or rezoning based on a finding that has not yet been made or based upon the opponents' prediction of what the Planning Commission may find.

ii. *Concern No. 1: Jefferson County in its review of DA2020-0132, dated February 22, 2021, specifically noted "The parking for the site seems excessive. We request that the applicant provide a parking study to justify why so much parking is needed."*

The Developer's response to this concern is the same as to the Petition Group Letter's question about parking above. The City's question about the amount of parking for Project Indiana was addressed during the Application review, and the City determined no parking study was necessary. More importantly, a parking study is not required for an annexation, zoning or rezoning and is appropriately considered as part of a site plan.

iii. *Concern No. 2: The excessive parking area adds unnecessary impervious surfaces that will adversely affect Ralston Creek which is already very close to being an impaired waterway.*

The Petition Group Letter's concern about impervious surfaces is irrelevant to the Planning Commission's review of the Application. The impact of parking areas on impervious surfaces and potential mitigation measures will be analyzed during review of the Site Plan Application and is not at issue for the Public Hearing.

iv. *Concern No. 3: The excessive parking will add artificial light at night too close to Maple Valley Park impacting the wildlife, particularly the nesting birds and nocturnal animals that populate the Park and surrounding areas.*

The Petition Group Letter's concern about artificial lighting is irrelevant to the Planning Commission's review of the Application. Lighting will be analyzed during review of the Site Plan Application. However, the Developer is committed to using cut-off lights and shorter light poles in the parking areas, which will alleviate potential lighting impacts.

v. *Actions requested by Petition Group: (1) Require the Applicant to strictly justify the parking based upon the representations made about the number of on-site employees and Van Drivers that it has asserted will be parking at the facility when developed and remove all unjustified parking areas on the north side of the building and minimize impervious area impacting Ralston Creek. (2) Limit Parking to encourage use of Mass Transit and Car Pooling. (3) Require applicant to strictly enforce prohibitions on litter and human waste from Van and Van Drivers being left in the parking area or dumped into the Park or Ralston Creek.*

As discussed above, the Developer has adequately justified the amount of parking for Project Indiana as part of the Application review process. Similarly, the site design incorporates the Developer's parking needs. Although Amazon strongly encourages its employees to use mass transit, carpooling and other measures, this is not an appropriate reason to reduce parking to a level that could negatively impact operation of the last mile delivery station. In response to the rather provocative claim regarding "litter and human waste," the City already has all the authority it needs to enforce its existing code provisions regarding such matters, whether on public or private property.

B. Heavy Truck Routing Plan

The Petition Group Letter states that a heavy truck routing plan is required for the use of certain vehicles at a frequency of more than 25 heavy truck trips per week but has not yet been provided. *LDC § 8-2-6-2*. The Petition Group Letter sets forth the following requested action, which we will address below:

1. *Actions requested by Petition Group: Require this Study to be completed and provide to the public when it is available.*

The Petition Group Letter's concern about the heavy truck routing plan is irrelevant to the Application because, when required, the heavy truck routing plan is part of the Site Plan Application. Moreover, heavy trucks will not be routed through residential neighborhoods.

The Developer has provided all information that will comprise the heavy truck routing plan within the traffic study and other components of its application. The Developer would be happy to compile this information into a single document entitled "Heavy Truck Routing Plan. However, it is important to note that this routing plan would become part of the Site Plan Application and is not a prerequisite to or condition of the Public Hearing.

C. **Communication Problems, Confusing Information**

The Petition Group Letter expressed its belief that the public has been "removed" from the Application consideration process as a result of communication problems and confusing information available to the public. Nothing could be further from the truth. Rather, the Developer has undertaken significant efforts above and beyond what is required by the LDC to ensure that the public can be actively involved in the review process. The Developer not only conducted the required neighborhood meeting required by the LDC in November of 2020 but responded to additional citizen interest in Project Indiana by coordinating an additional virtual neighborhood meeting (the "**Supplemental Meeting**") in an effort to hear and respond to public comment. The Developer also provided the neighborhood opposition group with an official time on the Supplemental Meeting agenda of to express its concerns.

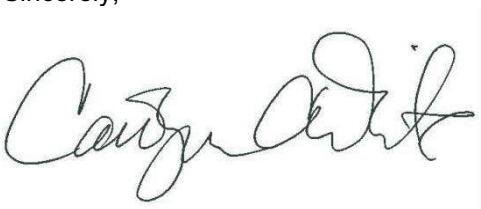
The Developer acknowledges that shortly before the Supplemental Meeting, the Developer modified the meeting platform, leading to some confusion. However, this change in meeting platform was in an effort to accommodate the large number of participants, all of whom would not have been able to join the original meeting platform due to the platform's limit in the number of allowed participants. As soon as the Developer determined that there was some confusion about the change in meeting platform, and in an effort to ensure that all who wished to join had the opportunity and information to do so, the Developer rescheduled the Supplemental Meeting for two weeks after it had initially been scheduled. Despite this change and any confusion caused by the communication, more than 370 citizens ultimately attended the Supplemental Meeting, indicating that notice of this Supplemental Meeting was adequate. Additionally, in an effort to be responsive to citizen concerns, the Developer has offered to meet with members of Project Maple Valley Park. Thus far, no group members or representatives have accepted the invitation, although the invitation stands. Therefore, as this letter demonstrates, the Developer has not only fully complied with, but has exceeded the public outreach requirements of the LDC.

D. **Unanswered Questions from Public Meetings**

The Developer understands that a small number of the more than 500 questions presented during the recent five-hour long neighborhood meeting may not have been answered. The Petition Group Letter's request that the Director suspend the processing of the Application pursuant to Section 8-2-4-1.D of the LDC is outside of the Director's purview because Section 8-2-4-1.D of the LDC addresses instances where applicants fail to provide notice or where the notice is defective and is therefore not relevant to an instance such as this in which the Developer provided proper notice of the November 2020 neighborhood meeting required by the LDC and of the Public Hearing. Because the Supplemental Meeting was not required by the LDC, the notice requirements of the LDC did not apply. Nevertheless, the Developer made every effort to comply with the notice requirements of the LDC for the Supplemental Meeting as though those requirements did apply.

Exhibit E

Public comment received
June 2- June 10



Additionally, in an effort to continue to be responsive to citizen concerns, the Developer has provided answers to all questions in Exhibit A to the Petition Group Letter in an Exhibit A to this letter.

No other matters with respect to the Application are identified as incomplete in the Petition Group Letter. The Application is complete and is properly scheduled for the Public Hearing. No basis exists for discontinuing processing of the Application or any other such preemptive action.

We understand that the Petition Group opposes the Project. They will have the opportunity to continue to express their opposition and concerns at the Public Hearing, and we look forward to hearing this information so that we may respond.

Thank you for your consideration.

Sincerely,

Carolynne C. White

CITY OF ARVADA

POLICE DEPARTMENT

FACSIMILE: 720-898-6661 ▲ TDD: 720-898-7869

ADMINISTRATION: 720-898-6650 ▲ PATROL: 720-898-6800

TIGER grant review team
United States Department of Transportation

Dear TIGER grant review team,

I am writing to support the City of Arvada's TIGER grant application for the proposed roadway widening project along Indiana Street between 82nd Avenue and 86th Parkway located in Arvada, Colorado.

In years past, Indiana Street between 82nd Avenue and 86th Parkway was a roadway that saw moderate levels of traffic. For years, Indiana as it is currently configured was capable of handling the traffic volume. However, several years ago, major development began all around the area of Indiana Street between 82nd Avenue and 86th Parkway and points north and west of 86th Parkway that have now placed significant volume demands on Indiana. The main issue with Indiana in this area is the fact that the roadway is a narrow, two lane roadway. Additionally, there is a railroad bridge that is old, narrow, and dangerous for the current volume of traffic traveling through this area.

The Arvada Police Department receives frequent complaints from residents and commuters about the traffic volume and the lack of capacity for Indiana to handle the traffic volume, and they seek solutions from the police department to address the traffic volume issues. In addition to these complaints, Arvada Police officers use Indiana to traverse the area north and south as Indiana is one of a few roadways that allow travel through the west portion of the city to points north and south. Due to the heavy volume of traffic and the narrow travel lanes, emergency response is impacted because officers cannot pass on the left of traffic due to oncoming traffic. Additionally, there is so little shoulder that drivers cannot move to the right to clear the roadway for emergency vehicles. This creates a situation where officers cannot use emergency equipment to get through this area because doing so creates a greater hazard for motorists. Emergency response suffers as a result.

This project will allow Indiana to be widened to a four lane roadway separated by a median, as well as, reconstruct the railroad bridge which is narrow, old, and dangerous to motorists. This project will create the opportunity for motorists, public transportation, and public safety to more easily and safely drive this area of the city, and will provide space for motorists to safely yield to public safety emergency vehicles. In addition, the 4 lane roadway will improve the volume capacity of the roadway making Indiana a much safer route for motorists who drive and live in this area.

I am fully supportive of this project, and strongly recommend to the grant review committee that they approve the funding for this project and fix this problematic and dangerous roadway. Should you have any questions for me about this project, please do not hesitate to contact me.

Sincerely,

Don A. Wick

ARVADA
ECONOMIC DEVELOPMENT ASSOCIATION

October 13, 2017

Secretary of Transportation Elaine Chao
US Department of Transportation
1200 New Jersey Ave, SE
Washington, DC 20590

RE: City of Arvada TIGER Grant Application – Highway 72 (Indiana Street) improvements

Dear Secretary Chao,

I support for the City of Arvada's TIGER grant application for $20 million to improve Indiana Street (State Highway 72). The project will eliminate a crucial constriction by rebuilding the Union Pacific railroad underpass allowing for widening the road for a 3/4mile stretch between West 80th Avenue to West 86th Avenue. The City in partnership with the private sector and the Colorado Department of Transportation brings $5 million in matching funds. Of this amount, $2 million is from developer impact fees, an estimated $500,000 is from right-of-way and developer improvements, and CDOT has pledged a $750,000 contribution.

The City has long supported improvements in the area in projects ranging from the Jefferson Parkway to intersection improvements at Indiana Street and West 72nd Avenue. This area in Arvada and Jefferson County is growing rapidly; daily traffic on Indiana Street has increased nearly 400% since the year 2000. Removing the bottleneck caused by the railroad underpass will significantly improve capacity and materially improve safety along this stretch of the Indiana Street Corridor. This project has the support of area residents and Jefferson County. Thank you for your consideration of Arvada's request for funds.

Sincerely,

Ryan Stachelski
Executive Director
Arvada Economic Development Association

Indiana Street at UPRR Widening Project

June 2020 Update

The City of Arvada is pursuing a Federal grant for the SH-72 (Indiana St) at Union Pacific Railroad (UPRR) Widening Project. The grant opportunity known as Consolidated Rail Infrastructure and Safety Improvements (CRISI) was advertised by the Federal Railroad Administration. Similar to previous efforts, City of Arvada is submitting the application with interest from partnering agencies and committment to a 20% local match towards the $39M project. The City of Arvada is appreciative of the community and partners that have provided support throughout the application process. An update will be posted when the City is informed about the grant selection from the Federal government.

March 2018 Update

The following "project webpage" was developed in response to the Transportation Improvements Generating Economic Recovery (TIGER) 2017 grant solicitation. The City of Arvada completed the application process with the support of the Arvada community, Jefferson County, and the Colorado State Department of Transportation. Unfortunately, the project was not selected for funding by the Federal Highway Administration. The City of Arvada thanks the community and partners that provided support throughout the process. The project is a priority for the City and will be submitted for future grant opportunities.

Overview

The City of Arvada in partnership with the Colorado Department of Transportation (CDOT) is in the process of applying for a grant program known as Transportation Improvements Generating Economic Recovery (TIGER). The purpose of the grant is to provide one-time discretionary funds to transportation projects that benefit the national, regional, and local economy. The City of Arvada is excited to participate in this collaborative opportunity and is applying for a $20,000,000.00 project to widen the State Highway 72 (Indiana St) between W. 80th Ave. and W. 86th Pkwy. The project involves reconstruction of a Union Pacific Railroad (UPRR) bridge that then allows widening of SH-72 (Indiana St.) from a narrow 2-lane highway to a 4-lane median separated roadway with bike lanes and sidepath trails.

Project Purpose

The project is intended to reconstruct an antiquated railroad bridge and address congestion on SH-72 (Indiana Street) from W. 80th Ave. to W. 86th Pkwy. by adding travel lanes (capacity). While reconstructing the roadway, the project will also add bicycle lanes for cyclists and trails for pedestrians and novice cyclists traveling along the corridor.

The project is coordinated with multiple planning documents:

- City of Arvada Comprehensive (Transportation) Plan (PDF)
- 2017 Arvada Bicycle Master - Draft (PDF)
- Arvada 10-year Unfunded Capital Improvement Projects Plan (Appendix E) (PDF)
- Jefferson County Transportation Plan
- Denver Regional Council of Governments Regional Transportation Plan

Benefits and Impacts

The SH-72 (Indiana St.) at UPRR Multimodal Widening Project is intended to benefit the freight rail transportation system as well as the regional highway and local street network. By reconstructing an antiquated railroad bridge, the project keeps over 20 freight rail trips on-track and ensures reliability of goods and raw materials that impact our nation's economy. The reconstruction of the bridge provides an opportunity to widen the bridge span, which would then allow widening of the SH-72 (Indiana St.) from a narrow 2-lane road with small shoulder areas to the planned 4-lane highway with bike lanes, landscaping, and sidepaths.

EXHIBIT
6

The 4-lane median separated roadway will accommodate the existing traffic volume (23,000 Average Daily Trips) as well as anticipated future growth and development. By keeping regional traffic on regional roadways, Jefferson County and Arvada resident concerns about cut-through traffic through Local Streets will also be addressed. The project will also widen the SH-72 (Indiana St.) intersections at W. 80th Ave. and W. 86th Pkwy., which will reduce congestion and delays on the City streets.

Community Support

Although the current congestion affects emergency response and operational safety, the efficient movement of people and goods on the regional transportation networks is ultimately in the best interest of our businesses, residents, and visitors.

The following are public survey statements regarding the current traffic conditions on SH-72 (Indiana St.) at the vicinity of the proposed project site:

- "Indiana is backed up at almost all times of the day, being only one lane each direction; traffic from new housing developments is causing congestion which is getting worse each day."
- "I am an Arvada native. Around 5 p.m., a drive that used to take 15-20 minutes can now take 30-45 minutes."
- "Indiana is a disaster. Last Tuesday at 5:40 pm I had to sit through five red light cycles on Indiana at 72nd going north."
- "We live off of Indiana and W. 77th Drive and it is very dangerous turning into or out of our street. Widening that portion of the road, or even adding turn lanes will help tremendously. Also, there is no sidewalk on Indiana , making it very dangerous to bike or walk."

The project application is being submitted with the support of public representatives, governmental organizations, and advocacy groups. The following are letters of support:

- City of Arvada Mayor and City Council (PDF)
- Colorado Department of Transportation (PDF)
- Jefferson County Commissioners (PDF)
- Colorado State Senator Michael Bennet (PDF)
- Colorado State Senator Cory Gardner (PDF)
- Colorado State Representative Ed Perlmutter (PDF)
- Arvada Chamber of Commerce (PDF)
- City of Arvada Police Chief (PDF)
- Jefferson County Sheriff (PDF)

Application and Results

TIGER applications were due to the United State Department of Transportation (USDOT) on October 16, 2017. USDOT evaluated all applications received and compare the merit of the project to the intent of the TIGER grant program. In March 2018, the TIGER 2017 program announced the results of the TIGER grant solicitation. Unfortunately, the City of Arvada was not selected as a recipient of the grant. The City of Arvada will continue to pursue funding efforts to support the
Indiana Street (SH-72) Widening, including local efforts to eliminate bottlenecks at signalized intersections as well as development projects that can contribute right-of- way and infrastructure improvements.

RE: Amazon Proposal – Project Indiana May 24, 2021

Dear Gina:

My brief analysis of the TIS by Kimley Horn & Associates has resulted in a few questions / clarifications that should be addressed prior to the final approval. Since the impact to the surrounding neighborhood is really dependent upon the traffic generated by the full development of the site, the assumptions made for the TIS must have a solid basis. The following are items that should be clarified:

1. The consultant correctly used data for Land Use Code 156 in the ITE Trip Generation Manual. However, the manual does not have a lot of studies of peak hour of use, or variations by time of year. Data should be generated using similar facilities within Colorado, where existing use can be used to establish trip generation factors for this study.
2. ITE has published data in August of 2018 that reviews hourly data for High-Cube Parcel Hub Warehouse for entering and exiting during the peak traffic generated by the use, not necessarily related to the peak hour of the adjacent street. This data shows that the peak hours of usage are typically from 8 – 9AM with 10.6% of the ADT inbound and 12.1% outbound, and 9 – 10AM when the inbound is low at just 2.3%, but the volume exiting is 13.9% of the ADT. The PM peaks of the generator occur from 5 – 6PM with 13.5% entering and 6.8% exiting, and 6 – 7PM with 9.2% entering and 10.0% exiting the site. The assumed peak hours shown in the TIS should be adjusted to reflect these peak percentages.
3. Since Amazon orders, and therefore deliveries will be much higher during approximately 5 – 6 weeks per year, that use should be the basis for any peak traffic studies. "Peak traffic" is not defined as the absolute highest day of the year, but with a known higher seasonal use that makes up of at least 10% of the year, the holiday operations should be used for identifying the impact to the area.
4. The site plan shows parking for 655 delivery vans in one lot, 105 in another, and additional van parking in other areas. Amazon also uses private parties in both vans and cars for their deliveries, plus the U S Post Office. One chart in the TIS shows 404 vans delivering materials apparently delivered to the site by 21 large trucks (42 large truck trips). This implies that one truck, which is apparently a semi-trailer as shown on the site plan, brings packages that require 9.62 vans to deliver. With that ratio, the 760 van spaces are needed for 79 large truck trips per day. If the private vehicles, vans, and postal deliveries are also counted, it appears truck trips will exceed 79. Since the zoning only allows 50 truck trips / day, justification for the 42 trucks/day and the delivery vehicle parking is needed.

I have not had time to review many of the items that should be further discussed – such as volumes for a proposed signal vs trip generation data in the report. I hope the items I have noted will be a basis for further discussion with the Arvada city staff.

Sincerely,

COLORADO REGISTERED ROBERT L. KENNY 24775 PROFESSIONAL ENGINEER

RE: Project Indiana Site Plan/Minor Subdivision
DA2020-0132

Dear Mr Bebo,

Thank you for the comments on March 4, 2021 for the above-mentioned project. In an effort to address your comments concisely and simplify your review of these plans, we have summarized your comments and our responses below.

COMMENT RESPONSE LETTER

PLANNING DEPARTMENT
JEREMIAH BEBO / 720-898-7438

1. The next review will be a four week long 3rd Review. Please ensure that all documents required with the first submittal are resubmitted even if changes/corrections/etc. were not needed. Please also ensure that all designers provide responses. Various sheets and plans were missing responses from the previous review.

   Please ensure that the site plan sheets are consistent between the Site Plan set and CD set.

   As the Site Plan continues to evolve, as will the Annexation & Development Agreement.
   - *Response: Acknowledged. We have tried to address all comments as redlines.*

2. In order to provide additional screening and protection to the park and neighborhood to the north, provide a masonry wall along the perimeter of the northern property line. The wall should be set into the property with large trees in front of it nearest the park. Coordinate with Shane Greenberg (Landscaping) with the species and size of these trees.
   Provide an illustration, rendering or detail of this buffer and show it on the landscape plan. Show the wall on the site plan sheets as well.
   - *Response: A 6' high masonry wall has been provided along the northern boundary, and has been coordinate with the City.*

3. There are still concerns that there will be roof mounted mechanical equipment or air conditioning compressors, etc. Please provide a roof plan or other form of illustration demonstrating that the parapet provided will provide the screening necessary to adhere to this requirement in LDC 5-1-2-

3-C-10. The responses indicated a Site Line Study, but I was unable to find it. Please include as a sheet in the Site Plan set with the architectural plans.
- *Response: A Site Section / Roof Plan has been included with this set.*

4. In order to better understand the parking, please provide us a parking study with a detailed description and definition of each classification of parking types (van, personal van, auto, etc.) and how operations of the site and business dictate the use of each vehicle type.
   - *Response: A parking memo has been provided, describing the purpose of the various parking zones around the site, and their purpose for the facility.*

5. How is fueling the fleet of vans and trucks being managed since no on-site fueling station is proposed? How and where is the maintenance, repair and washing of vans being done?
   - *Response: Fueling, maintenance, etc occur off-site. The vans are leased by the contractor who is working for the end tenant; therefore, maintenance would be conducted at the contractors preferred mechanic and not on-site.*

6. Private access easement for the Hathaway Property will need to be recorded prior to recording the plat.
   - *Response: Acknowledged, separate legal exhibits are being prepared to submit ahead of the plat.*

7. Per the Amended Parkway Center Subdivider's Agreement, the roadway impact fees collected (for the eventual build out of Eldridge Street and W. 67th Avenue) for Lots 1-4, Block 5 which total $157,037.79 will be required to be paid prior to the approval of a building permit..
   - *Response: Acknowledged.*

8. Per the response to the previous comment on Sheet 6 of the site plan in the last review, it was noted that the hatching representing the 4-foot concrete pads for EV charging station would be used as such. This needs to be called out more specifically. In addition, we will need cut sheets showing the EV charging equipment and all transformers. These need to be located internal to the site and away from public streets including Indiana, Hollman, W. 67th, etc.
   - *Response: EV charging pads have been removed on parking stalls that front public right-of-way.*

Additional Items to Include with Next Submittal:

1. To better understand the fencing plan for the project, please provide separate sheets showing the proposed fencing and include details of the proposed fences. please also ensure to include existing and proposed easements. Yard perimeter and chain link seem to be used in different areas of the site. Please differentiate. These can be sheets included in the Site Plan set after the landscape plan.
   - *Response: These have been included within the Site Plan (Sheet 6 – Site Details)*

2. Parking study as described above.
   - *Response: This has been included.*

LANDSCAPE REVIEW

SHANE GREENBURG / 720-898-7441 / SGREENBURG@ARVADA.ORG
Additional Comments Not Identified by Mark-up:

1. Reference the Arvada Plant List for recommended and prohibited plant species. https://arvada.org/city-hall/city-code/plant-list.
   - *Response: Acknowledged.*

2. Final landscape plans must be stamped, signed and dated by a State of Colorado Registered Landscape Architect.
   - *Response: This will be provided at signature set review.*

FLOODPLAIN
ANDY STEWART / 720-898-7644 / ASTEWART@ARVADA.ORG
Comments on No Rise Anylysis:

1. 2004 Ralston Creek FHAD model is the effective model and should be used to create the duplicate effective. The Merrick Model could be used as the starting point point for the corrective effective/existing condition model. Then you can put together your proposed model and no rise certification.
   - *Response: The no-rise analysis has been updated to account for various conversations that have occurred between Kimley-Horn, Arvada, and MHFD.*

2. Set up a meeting between the MHFD, Jefferson County, and Arvada (Andy Stewart) to discuss the whether a LOMR would be necessary. I would like to understand why there is
   - *Response: Two meetings occurred. Jefferson County floodplain engineer declined to attend the event; therefore, it was between MHFD, Arvada, and Kimley-Horn.*

LAND DIVISION
KARI AYERS / 720-898-7657 / KAYERS@ARVADA.ORG
Additional Comments Not Identified by a Mark-up:

1. It appears that some boundary information has changed since the 1st Review (namely curve information in the SW corner of the parcel). Please provide the most recent CAD file so that all information can be compared and verified.
   - *Response: This will be provided.*

2. If possible, please consider vacating easements by this Plat rather than by separate document
   - *Response: Acknowledged.*

ARVADA FIRE PROTECTION DISTRICT
STEVEN PARKER / 303-403-0477 / STEVEN.PARKER@ARVADAFIRE.COM

1. Unless otherwise specified, all comments apply to both the construction documents and the development plans. Provide the minimum required fire flow prior to commencing vertical construction.
   - *Response: Acknowledged.*

DEVELOPMENT ENGINEERING/TRAFFIC
EMILEY YOSHIHARA / 720-898-7676 / EYOSHIHARA@ARVADA.ORG

Additional Comments Not Specifically Identified by a Mark-up:

1. Comments on signal plans and the traffic study will be emailed to the applicant and attached to the DA case.
   - *Response: Thank you, these have been received.*

2. No comments were addressed on the Cost Estimate – please ensure all items and quantities match the Materials Quantities table on the cover page of the CDs.
   - *Response: This should now be updated.*

3. The utility profiles indicate several conflicts. Please see sheets for comments. The minimum vertical clearance is 18".
   - *Response: Conflicts should now be removed.*

Additional Items to Include with Next Submittal:

1. Profile and cross sections for Holman St
   - *Response: This has now been included. We note that the Microspaces construction on the opposite side of Holman St includes some overlapping construction on Holman St as well; however, we have kept it in our Construction Documentation in the event the Microspaces construction is not completed ahead of this project.*

2. Mill & Overlay plan for W 67th Ave
   - *Response: This has now been included.*

General Conditions of Approval:

1. The developer is required to provide either a LOC or escrow check in the amount of 100% of the estimated cost of the public improvements. When the project is accepted into initial warranty, the City will retain 20% of the actual public improvement costs to ensure that the public improvements meet the City standards through the two-year warranty period. Following final acceptance of the public improvements, the City will return the remaining 20% of the surety back to the developer.
   - *Response: Acknowledged.*

2. The contractor must obtain a State of Colorado Stormwater Discharge Permit for construction sites of 1.0 acre or larger. Prior to issuing a permit for public improvements on this project, the developer must supply the City of Arvada a copy of the approved Stormwater Construction Permit. A City of Arvada Site Development Permit (grading permit) is also required by Article III, Chapter 50 of the Municipal Code for disturbance of any area 10,000 square feet or greater. Permit requirements include a permit fee and cash escrow or letter of credit (amounts vary with the size of project) and submission of a Stormwater Management Plan.
   - *Response: Acknowledged.*

3. The City of Arvada Engineering Division reserves the right to provide additional comments for subsequent submittals.
   - *Response: Acknowledged.*

We appreciate your review and approval of these plans. Please contact me at [redacted] or [redacted] should you have any questions.

Sincerely,

KIMLEY-HORN AND ASSOCIATES, INC.

Stephen Litsas, PE

CITY OF ARVADA

PROJECT INDIANA
ANNEXATION AGREEMENT

THIS ANNEXATION AGREEMENT ("Agreement") between Scannell Properties #456, an Indiana limited liability company ("Annexor"), and the City of Arvada, Colorado, a Colorado municipal corporation ("City"), shall be effective upon execution by all applicable parties and immediately upon approval by the City of Arvada as evidence by the approval signature where indicated below.

RECITALS AND REPRESENTATIONS:

WHEREAS, the Annexor represents that it is the sole annexor of the following described property generally located at the Northeast Corner of Indiana St and W 66th Pl, to the Southeast Corner of Indiana St and W 68th Ave, to the Western side of the Fig St / W 68th Ave intersection, to the Northwest Corner of Fig St and W 67th Ave, to the Northeast Corner of Holman St and W 66th Pl. in the City of Arvada, County of Jefferson, State of Colorado ("Property"), more fully described as follows:

[See attached Legal Description as Exhibit A]

WHEREAS, the Annexor desires to annex the Property to the City, and to that end has filed a Petition for Annexation of the Property into the City, pursuant to the Colorado Municipal annexation Act, C.R.S. 31-12-101, et seq.; and

WHEREAS, the City wishes to control its growth in a planned and orderly fashion, maintaining the improvements and the quality of life and the City's ability to provide and enhance environmental amenities, services, and local opportunities for its citizens; and

WHEREAS, the Annexor is planning development of the Property as an approximately 112,000 square-foot warehouse and distribution center which is generally located at Northeast Corner of Indiana St and W 66th Pl, to the Southeast Corner of Indiana St and W 68th Ave, to the Western side of the Fig St / W 68th Ave intersection, to the Northwest Corner of Fig St and W 67th Ave, to the Northeast Corner of Holman St and W 66th Pl. The Annexor's development and construction plans include the installation of certain public infrastructure including, but not necessarily limited to, sanitary sewer facilities, water line facilities, storm drainage facilities, roadways and emergency access improvements, walks, and landscape improvements which will be addressed in a subsequent Development Agreement associated with the Site Plan.

WHEREAS, the Annexor has submitted or will submit to the City a proposed Site Plan and

EXHIBIT
9

construction plans for the Property, which include a final site plan, final landscape plan, final drainage plans, and other supporting documentation for the development thereof. The plat, construction plans, and other supporting documents are public records on file and available for review at the City of Arvada City Hall, 8101 Ralston Road, Arvada, Colorado. These approved plans and associated documents, will be deemed incorporated into this Agreement for all purposes including illustration and interpretation of the terms and conditions of this Agreement, and may herein be referred to collectively as the "Final Plans."

WHEREAS, the parties hereto understand and agree that the intent of this Agreement is to establish obligations and responsibilities with respect to the development of the Property in accordance with the Final Plans, said obligations and responsibilities being covenants that run with the Property, encumbering such and governing the development thereof. The Annexor shall be affirmatively bound to satisfy all of the obligations and responsibilities set forth herein (including the construction of Public Improvements).

NOW, THEREFORE, in consideration of the mutual promises, covenants, and agreements of the parties, the approval by the City of Arvada of the Final Plans for the Property, the dedication of certain land and/or easements to the City and other good and valuable consideration, the sufficiency and adequacy of which are hereby acknowledged by the parties, the parties hereto agree as follows:

1. PLAN AND AGREEMENT APPROVALS: The Annexor, upon approval of the Final Plans for the Property by the City, shall immediately submit three copies of the approved Site Plan to the Director of Community and Economic Development. No construction may occur on or associated with the Property and no building permits may be issued until construction documents for all required improvements are submitted and approved by the City Engineer. Upon approval, the Annexor shall provide the City Engineer the approved final construction plans for the construction of emergency access lanes, water lines, sanitary sewer services, storm drains and storm drainage structures and streets associated with development of the Property, as required by the City. Said Construction Plans shall meet the approval of the City and the proposed development shall be constructed according to the Final Plans. No approval of the Public Improvements as referenced in the Construction Plans is conferred by this Agreement and any approval shall be independently made by the City Engineer following the City Engineer's determination that the plans meet the applicable City engineering specifications, commonly accepted engineering practices, and all applicable codes, ordinances, and State, Federal and local laws.

2. CODE COMPLIANCE: The Annexor shall comply with all applicable codes, ordinances, and rules and regulations of the City. Development of the Property shall also be in conformance with all aspects of the Final Plans and shall be completed prior to issuance of the final certificate of occupancy within the Property. This shall include, but not be limited to, street and parking lot paving and striping, landscaping, trash enclosures, rooftop and wall mounted equipment, building elevations, and all other requirements of the Final Plans and applicable City codes, ordinances, and rules and regulations.

3. PAYMENT OF FEES: The Annexor shall pay all required fees and other charges in a timely manner as required by the City, including but not limited to building permits, inspection fees,

tap fees, drainage fees, park and school dedication and development fees, and departmental review fees imposed by the City by ordinance, rule, resolution, motion, or by the terms and conditions of this Agreement. Unless otherwise agreed to by the City, the Annexor's payment of fees and charges specified by this Agreement shall be made in the form of certified funds, cashier's check, or cash delivered to the City of Arvada, Municipal Building, 8101 Ralston Road, Arvada, Colorado 80002. The City shall not accept personal or business checks or drafts not certified by a financial institution as payable.

4. FIRE DISTRICT APPROVALS: The Annexor shall address all of the comments noted in the referral responses, including any requirements for fire hydrants, emergency access lanes, and fire lane signage, and shall obtain approval from the Fire Protection District having jurisdiction prior to issuance of each building permit and certificate of occupancy (as applicable) for the Property.

5. CONTRACTOR LICENSING: Before proceeding with work contemplated herein, the Annexor shall ensure that all contractors and/or subcontractors it employs be licensed by the City before the contractor and/or subcontractor may commence work on any improvements associated with development of the Property. The Annexor shall be responsible for ascertaining the status of any contractor or subcontractor to be utilized in the development of the Property, with respect to any uncorrected deficiencies in that entity's previous, unrelated work within the City or its outstanding omissions related to such work including, but not limited to, failure to: (i) submit as-built construction plans, (ii) complete the process of placing Public Improvements under warranty (iii) submit tax certifications, (iv) submit test records.

6. DEVELOPMENT IMPROVEMENTS: The Annexor shall, at its own expense, design, furnish, construct, and install the public and private improvements in accordance with Final Plans approved by the City. These improvements shall include, but not be limited to, construction of all public/private streets, alleys, driveways, parking areas, water lines and mains, sewer lines and mains, drainage facilities, and landscaping within and adjacent to the Property in accordance with the approved Final Plans for the Property and with the requirements of the Arvada Land Development Code ("the LDC"). "Private Improvements" includes any of the above listed infrastructure which will be constructed to support the Development but will not be dedicated to the City. "Private Improvements" does not include vertical construction of the warehouse structure or other privately owned vertical construction. "Public Improvements" includes any of the aforementioned infrastructure which will be constructed to support the Development but which will be dedicated to the City. Public Improvements must be completed prior to issuance of the final certificate of occupancy.

All Public Improvements constructed by the Annexor in public rights-of-way, easements, streets or alleys shall become the property of the City immediately upon acceptance of said improvements by the City and the Annexor shall warrant said improvements for 2 years from the date of acceptance by the City. The Annexor shall complete the process of placing completed Public Improvements under warranty promptly upon completion. Failure to place such improvements under warranty may, in the City's discretion, result in the withholding or denial of subsequent building permits or certificates of occupancy.

The City may request, and the Annexor shall provide at the Annexor's cost, documentary evidence in the form of an updated title commitment satisfactory to the City that any public right-of-way, easement, or other real property dedicated, conveyed, acquired, devised, or granted to the City are free and clear of encumbrances which, in the sole opinion of the City, defeat, limit, or impede the City's ability to use the relevant property as intended. The Annexor acknowledges that no construction may occur and no building permits may be issued until construction documents for all required improvements are submitted and approved by the City Engineer.

7. FUGITIVE DUST AND EROSION CONTROL: The Annexor shall meet all requirements and obligations imposed by the State of Colorado, County of Jefferson, and the City concerning management of stormwater runoff and fugitive dust, and shall comply with all Federal, State, County, and City requirements governing the stormwater conveyances, detention ponds, fugitive dust, and requirements associated with permits issued for erosion and sediment control on the Property. The Annexor shall provide a copy of all State and County permits acquired to Arvada's Stormwater Program prior to commencement of any earth disturbance work associated with the Property. Further, the Annexor shall fully comply with the applicable sections of the City's Site Development Permit Ordinance, Chapter 50, Sections 50-70 through and including 50-79 of the Arvada City Code, including the requirement to install and maintain best management practices to reduce soil erosion and control sediment generated by development of the Property. Compliance by the Annexor with such ordinance shall be a pre-condition of obtaining building permits or final certificates of occupancy. The City may deny or revoke any permit issued to the Annexor, in strict compliance with the applicable provisions of the LDC, in the event that the Annexor is non-compliant with City requirements.

8. RIGHTS-OF-WAY: The Annexor shall comply with all applicable provisions of Chapter 78, Article V of the Arvada City Code, entitled "Rights-of-Way." This article contains requirements including, but not limited to, Annexor escrow for improvements in public rights-of-way and street surface restoration for public streets.

9. SUBDIVISION MONUMENTATION: In accordance with the applicable Colorado Revised Statutes as amended, and in accordance with the LDC, the Annexor shall establish all subdivision monumentation and have the monumentation approved by the City prior to issuance of the final certificate of occupancy within the Property.

10. STREET IMPROVEMENTS AND MAINTENANCE: The Annexor shall maintain, in a reasonable, suitable and proper condition for travel, ingress and egress, all streets and access ways included within the Final Plans for the Property until they are completed and accepted for maintenance by the City. The Annexor shall take all steps necessary to limit and prevent the accumulation of, and to remove mud, sediment, dirt, trash, and other debris that is tracked, blown, or otherwise carried onto public property or off-site onto private property during development. Such obligation shall continue until all development associated with the Property is complete and the Public Improvements are accepted by the City for maintenance. The Annexor shall also replace any broken, damaged, or settled concrete that fronts any lot associated with this development as deemed necessary by the City, prior to the issuance of the final certificate of occupancy on the Property. The City may enforce these obligations pursuant to its enforcement powers and procedures as set forth in

the LDC.

11. W.68TH AVENUE AND INDIANA STREET SIGNAL: The Annexor shall design, furnish, and construct a traffic signal and related improvements at the intersection of W. 68th Avenue and Indiana Street and the same shall be included in the Final Plans. The Annexor shall pay for the cost of all activities associated with the design, installation, and construction of the signal. The signal shall be constructed, inspected, and placed under warranty prior to the issuance of a final certificate of occupancy for a building. Further details and specifications of the traffic signal will be included in the Site Plan application and accompanying Development Agreement.

12. INSTALLATION OF PARKING AND HARD SURFACE ACCESS: The Annexor shall install, sign and stripe all parking and hard surface areas within the Property, as illustrated on the Final Plans and in conformance with the LDC prior to the issuance of any final certificate of occupancy for the Property. The Annexor shall comply with "Interpretation of Hard Surface Areas," Arvada City Code, Chapter 94, Section 94-64 and with the LDC.

13. UNDERGROUNDING OVERHEAD UTILITIES: The Annexor shall be responsible for undergrounding existing overhead utilities in conformance with the LDC. Any required improvements must be completed prior to the issuance of any temporary certificate of occupancy within the Property and shall be completed at no cost to the City.

14. PUBLIC UTILITY FEES: The Annexor shall pay all installation charges for lighting, electric and gas required by Public Service Company/Xcel Energy for development of the Property.

15. LIGHTING RESTRICTIONS: Cut-off type fixtures with flush-mounted, flat lenses that cast light downward, and not out toward adjacent properties, must be used. All exterior lighting specifications must comply with the LDC. All exterior lighting plans must be approved by the Director of Community and Economic Development prior to issuance of the first building permit within the Property. Following construction, Annexor shall ensure that the operation of the lighting system complies with the plans as designed, and meets all applicable requirements of the LDC and the City's adopted Building Codes. Annexor acknowledges that failure to do so could result in enforcement action pursuant to the Arvada City Code.

16. STORMWATER APPURTENANCE CONSTRUCTION AND MAINTENANCE: The Annexor shall obtain approval from the City Engineer of the final drainage plan for this development prior to approval of the associated Construction Plans/Final Plans. The Annexor shall install stormwater conveyances, detention ponds, swales, infiltrations beds, underground best management practices, or any other stormwater feature as detailed on the approved construction drawings unless prior written approval is obtained from the City Engineer. The Annexor shall meet all requirements, obligations, and best engineering principles imposed by the State of Colorado, County of Jefferson, City, and Urban Drainage and Flood Control District governing the construction of stormwater conveyances, detention ponds, swales, infiltration beds, underground best management practices, or any other water quality feature, all as determined by approval from the City Engineer.

Drainage easements are required for all detention areas and drainage channels, which shall be

privately maintained by the Annexor, its successors or assigns. The Annexor shall include language to this effect in any covenants for the Property. Maintenance of stormwater appurtenances must be conducted on a routine basis and in response to the Annexor or its successors' or assigns' annual inspection and evaluation of the stormwater conveyances' condition. Should ownership of stormwater appurtenances or maintenance responsibilities change, the City of Arvada Stormwater Program must be notified in writing of all new contact information within 30 days of changes taking effect. The City will enforce stormwater installation and maintenance provisions throughout the construction of the Property and beyond as required by law. In no event shall the City be responsible for constructing or maintaining the drainage/detention facilities or maintaining the easements within the Property.

17. WATER RIGHTS: Chapter 102, Article II, of the Arvada City Code requires that all Property annexed into the City, must convey any tributary water rights appurtenant thereto to the City of Arvada. The Annexor of the Property has declared that no water rights are associated with the Property. Should it be determined otherwise, the Annexor shall be required to comply with the conveyance requirements of the Arvada City Code. In addition, the City, upon annexation, will not acquire, or require conveyance of, existing well water rights, but shall have a right of first refusal to have such rights conveyed to the City, pursuant to the LDC, in the event the Annexor, or its successors or assigns, desires to convey such rights to any party other than a subsequent purchaser of the landowner's lot(s) upon which the well is situated.

18. INSTALLATION OF LANDSCAPING AND RECREATIONAL AMENITIES: The Annexor acknowledges that the City has adopted in the past, and may in the future, adopt water restrictions which impact the viability of installing and maintaining the landscaping as illustrated on the approved landscape plans for the Property. Those watering restrictions may prohibit or qualify the installation of trees, shrubs, new seed, and/or sod for irrigated turf areas. In the event of such prohibition prior to the issuance of a final Certificate of Occupancy for the Property, the Annexor shall deposit funds with the City for escrow in an amount equal to 110% of the estimated cost of improvements not installed due to the prohibition, including, but not limited to irrigated turf areas, trees, shrubs, mulch, edger, and weed barrier. Upon expiration of water restrictions, the Annexor shall complete installation of the remaining improvements in accordance with the Final Plans for the Property, within 90 days, or such longer period of time as is reasonably necessary due to the completion of such installation being of a seasonal nature. During any restrictions, the City may encourage, but will not require, the installation of trees and shrubs, if they are drip irrigated or hand watered. However, the City may not have any water available for the irrigation of these landscape materials installed at that time. If the Annexor proceeds with the installation of any plantings at that time, it is done at the Annexor's sole risk.

Installation of irrigation systems and other hard surface areas (such as fencing, playground equipment, covered shelters, or other such amenities) shall be completed by the Annexor, at its sole expense, prior to the issuance of the final certificates of occupancy within the Property, unless the improvements have been delayed due to reasons beyond the Annexor's control, such as adverse weather conditions. The Annexor shall deposit funds with the City for escrow in an amount equal to 150% of the estimated cost of the remaining hard surface site elements (including irrigation systems, fencing and other elements as noted above) that are not installed prior to issuance of final certificates

of occupancy. During periods of time when no water restrictions are in effect, the Annexor shall deposit funds with the City for escrow in an amount equal to 150% for all improvements not completed prior to issuance of a final certificate of occupancy. A landscape contractor, acceptable to the City, shall make a determination of the estimated cost of improvements. The City, at its sole discretion and upon the City's rejection of an estimate provided by the Annexor, may obtain an estimate of the costs of landscaping. Such estimate shall be binding upon the Annexor in determining the amount of funds to be escrowed for purposes of this paragraph.

The City shall release its interest in the escrowed funds only upon completion of all landscaping obligations by the Annexor and approval of such by the City. In the event that the Annexor defaults upon its obligations as specified in this paragraph, following the escrow of funds, the City may apply all funds toward the completion of the Annexor's landscaping obligations. For the purpose of applying such funds toward the completion of the Annexor's landscaping obligations, "completion" shall mean and include the cost of labor, materials, contract management, and administration. The City shall refund the escrowed funds not applied to completion of landscaping required by the final landscape plan upon application and verification of entitlement. The method and manner in which the City elects to undertake and complete the landscaping obligations of the defaulting Annexor shall be within the sole discretion of the City; provided, however, that nothing herein shall obligate the City to install or complete the landscaping improvements and nothing herein shall prevent, prohibit, or limit the remedies available to the City to enforce the Annexor's obligations under this paragraph.

19. INSTALLATION OF BUFFER ALONG NORTHERN BOUNDARY: In order to mitigate visual impact of the Development along its northern boundary towards Maple Valley Park and beyond, the Annexor shall construct a landscaped buffer area on its Property where the Property borders the park. The design of the landscaped buffer area shall be proposed by the Annexor and approved by the City, but, at a minimum, shall include large deciduous, columnar or other tree species of the City's choosing, spaced at a distance at the discretion of the City, planted on the Property, all generally as approved by the City in accordance with the Landscape Plan submitted with the Site Plan. Additionally, Annexor shall construct , and include a six-foot-tall masonry wall along a portion of the northern boundary as depicted in the Site Plan. The Annexor shall work in good faith to ensure that the buffer is constructed at the earliest point possible in the phasing of construction. The entire landscaped buffer area shall be installed prior to the issuance of a final certificate of occupancy for the building, except that, if seasonal restrictions prevent the immediate installation of all or part of the landscaping in this area, a certificate of occupancy may nonetheless be issued in accordance with the provisions of Section 18.

20. INSTALLATION OF FENCING: The Annexor shall ensure that all fencing for the Property conforms to the Final Plans and the requirements of the LDC. Fencing shall require separate permits and approvals from the City prior to construction/installation. Installation of the fencing must be completed prior to the issuance of the final certificate of occupancy within the Property.

21. LANDSCAPING AND FENCING MAINTENANCE: The Annexor or its successors, or assigns, including any property owner's association, shall maintain in perpetuity (at its sole expense) all landscaping, fencing, and any other amenities (collectively referred to herein as "Landscaping")

installed within or associated with the Property pursuant to the Final Plans, regardless of whether the landscaping, as actually installed, fails to specifically conform to the requirements of the Final Plans and regardless of whether the Annexor or the City installs the landscaping. However, if the City adopts watering restrictions as referenced in Paragraph 18 which impair the ability of Annexor to replace or maintain installed landscaping, the Annexor shall be relieved of the obligations set forth in this paragraph for the duration of such restrictions.

22. SCREENING OF MECHANICAL EQUIPMENT: The Annexor shall screen all roof mounted and wall mounted equipment from view pursuant to the LDC to the satisfaction of the Director of Community and Economic Development prior to issuance of each certificate of occupancy within the Property.

23. TRASH ENCLOSURES: The Annexor shall construct all trash enclosures in conformance with the Final Plans and the requirements of the LDC, prior to issuance of a certificate of occupancy for the Property. The trash enclosures, including the gates, must be constructed of non-combustible materials, and have an architectural design compatible with the primary structure, using matching materials and colors. The Annexor or its successors or assigns shall keep the trash enclosure gates closed at all times, except for the periodic moments when access is needed to place trash within the containers, or empty or replace the trash receptacles themselves.

24. SIGNAGE: The Annexor shall ensure that all signage for the Property conforms to the Final Plans and the requirements of the LDC. No signage illustrated on the Final Plans is deemed approved by the City as part of the Final Plans approval. Signage shall require separate permits and approvals from the City prior to construction or installation.

25. AS-BUILT CONSTRUCTION PLANS: The Annexor shall file, or cause to be filed, with the City an original or reproducible copy of the as-built construction plans of all Public Improvements promptly upon the completion of the Public Improvements. Failure to do so will delay commencement of the two-year warranty for said Public Improvements, in which case the Annexor agrees to hold harmless and indemnify the City for any and all actions, claims, damages, injuries, and liabilities resulting from, or in any way related to, such Public Improvements or the failure to submit such as-built plans. The Annexor further understands and agrees that, as a result of its failure to promptly submit such as-built plans, the City may withhold or deny subsequent building permits or certificates of occupancy, either related to the Property or any subsequent development by the Annexor, until such failure is remedied. This section shall survive the expiration or earlier termination of this Agreement.

26. FORCE MAJEURE: Any delays in or failure of performance by any party of their respective obligations under this Agreement shall be excused if such delays or failure are a result of acts of God, fires, floods, pandemics, strikes, labor disputes, accidents, regulations or orders of civil or military authorities, shortages of labor or materials, or other causes, similar or dissimilar, which are beyond the control of such party, and which are agreed to by the parties as justifying delay.

27. WAIVER: A waiver by any party to this Agreement of the breach of any term or

provision of this Agreement shall not operate or be construed as a waiver of any subsequent breach by either party.

28. BINDING EFFECT: The parties hereto agree that this Agreement, by its terms, shall be binding upon the successors, heirs, legal representatives, and assigns thereof and shall constitute covenants running with the Property. In the event that all or part of the Property is sold, transferred, or otherwise conveyed to additional or multiple parties, all owners and developers shall be jointly and severally responsible for the obligations of the Annexor as set forth in this Agreement.

29. SEVERABILITY/AMENDMENT: Invalidation of any of the provisions of this Agreement or any paragraph sentence, clause, phrase, or word herein or the application thereof in any given circumstance shall not affect the validity of any other provision of this Agreement. This Agreement may be amended only by an instrument in writing signed by all parties.

30. NO THIRD PARTY BENEFICIARIES: It is expressly understood and agreed that enforcement of the terms and conditions of this Agreement, and all rights of action relating to such enforcement, shall be strictly reserved to the City and the Annexor, and nothing contained in this Agreement shall give or allow any such claim or right of action by any other third person on such Agreement.

31. GOVERNING LAW AND ENFORCEMENT: The laws of the State of Colorado shall govern this Agreement. The parties agree and acknowledge that this Agreement may be enforced at law or in equity. In addition to any other available remedies, it is understood and agreed that, to the extent permitted by the LDC, the City may withhold or revoke any permits or certificates, including but not limited to building permits and certificates of occupancy, for the Property or for any structure or lot within this development in the event of a breach of this Agreement by the Annexor; in doing so, however, the City will act in strict compliance with the applicable provisions of the LDC.

32. ATTORNEYS' FEES: If the Annexor breach(es) this Agreement, then they shall pay the City's reasonable costs and attorneys' fees incurred in the enforcement of the terms, conditions, and obligations of this Agreement.

33. PARAGRAPH CAPTIONS: The captions of the paragraphs are set forth only for the convenience and reference of the parties and are not intended in any way to define, limit or describe the scope or intent of this Agreement.

34. RECORDATION FEES: The City of Arvada shall record this Agreement and any approved subdivision plat for the Property (as applicable) with the Clerk and Recorder's office of the appropriate county per the provisions of the LDC. Prior to recordation, the Annexor shall provide the City with an updated title commitment to ensure that all appropriate parties in interest sign this Agreement. Prior to recordation, the Annexor shall also pay all costs associated with recordation of these items with the County Clerk and Recorder.

35. INCORPORATION OF EXHIBITS: Unless otherwise stated in this Agreement, exhibits referenced in this Agreement shall be incorporated into this Agreement for all purposes. Reference to

"Job Numbers" or "Project Numbers" in this Agreement is a reference to Final Plans and documentation which is retained as a public record on file and available for public inspection and review upon request at the City of Arvada, Municpal Building, 8101 Ralston Road, Arvada, Colorado. Such Final Plans and documentation filed with the City, approved by the City and noted within this Agreement are hereby incorporated into this Agreement for all purposes.

36. REVIEW OF REFERENCED DOCUMENTS: The Annexor hereby understand and acknowledge that the public documents referenced in this Agreement, including but not limited to the Arvada City Code, LDC, Engineering Specifications, and Design Guidelines were, prior to the execution of this Agreement, and are presently, available for review and inspection at the Arvada Municipal Building, 8101 Ralston Road, Arvada, Colorado, from 8:00 a.m. through 5:00 p.m., Monday through Friday. Any capitalized defined terms used in this Agreement which are not defined here in shall be as defined in the Arvada City Code or LDC.

37. FAILURE OR DELAY OF THE PROJECT: The parties agree that the Annexor's remedies in the event of an alleged or actual breach by the City are expressly limited to specific performance or injunctive relief. Notwithstanding anything to the contrary, neither City nor Annexor will be liable to the other for consequential damages, such as lost profits or interruption of either party's business. This section shall survive the expiration or earlier termination of this Agreement.

38. INDEMNIFICATION AND HOLD HARMLESS: The Annexor shall indemnify, hold harmless, release and discharge the City of Arvada and the City's officers, employees, agents, and contractors from all liability, claims, and demands, including reasonable attorneys' fees and court costs, which arise out of or are in any manner connected with or related to the approval of the Final Plans for the Property. This section shall survive the expiration or earlier termination of this Agreement.

39. NOTICES: Any notice or communication required or permitted by this Agreement shall be in writing and shall be deemed to have been sufficiently given for all purposes if sent by certified mail or registered mail, postage and fees prepaid, addressed to the party to whom such notice is to be given at the address set forth on the signature page below, or at such other address as has been previously furnished in writing, to the other party or parties. Such notice shall be deemed to have been given when deposited in the United States Mail or mail service such as Federal Express, United Parcel Service, etc. Such notice or communications shall be given to the parties at their addresses set forth below:

Ms. Jenny Wolfschlag
City of Arvada
Manager of Development Engineering
8101 Ralston Road
Arvada, CO 80002

Re: Project Indiana – NEC 66th Place and Indiana Street
Traffic Impact Study Comment Response Letter
Arvada, CO

Dear Ms. Wolfschlag:

We received comments from the City of Arvada to the Project Indiana Traffic Impact Study dated September 15, 2020. The purpose of this letter is to provide responses to the comments to assist with the review of the finalized traffic study. In addition, Colorado Department of Transportation comments have also been included for reference.

City of Arvada Comments:

Comment #1: Add additional project access discussion for W 67th Avenue, W 66th Place, and Holman Street.

Response: Project accesses along W 67th Avenue, W 66th Place, and Holman Street have been included in the project access descriptions in the revised traffic study.

CDOT Comments:

Comment #2: You state that "user specific" information was used to determine daily trips. What information is this, and why did you not use the ITE Trip Generation Manual? Show the ITE Trip Generation values for this development and provide explanation on why user-specified data was used instead. What other comparable developments by the developer are in the Denver area?

Response: As requested, we included trip generation based on the ITE Trip Manual for the most applicable use. User-specific trip generation is expected to generate more trips than ITE equations. As such, client data was utilized in this analysis due to the higher trips resulting in a more conservative analysis. Further, the user specific data traffic generation will align closer to what will actually occur on the external street network.

The end user is not being disclosed at this time but a high volume of these facilities currently exist nationwide and are being proposed and constructed in other locations. The user-specific trip generation data has been collected and used in their development traffic studies because they generate more trips than ITE equations. As such, the user wants to ensure the surrounding street infrastructure can adequately accommodate project traffic.

Comment #3:
Signalization at 68th Ave would preclude installing a signal at 69th Ave - look into modifying the 69th Ave intersection to 3/4 movement.

Response: It is understood that the intersection of 69th Avenue and Indiana Street will no longer be a candidate for signalization and that this intersection will likely be restricted to three-quarter movements upon signalization of the 68th Avenue and Indiana Street intersection.

Comment #4: Also restrict the 66th Pl intersection to 3/4 movement. However, full movement must still be available to the fire station on the west side of Indiana (SH 72).

Response: It is understood that the intersection of 66th Place and Indiana Street will be restricted to three-quarter movements on the east leg while maintaining full turning movements on the west leg to serve the fire station. The updated traffic study has been modified to reflect this change.

Comment #5: Site circulation is inadequate because the "employee" lot south of the building is not connected to the north lot. Provide a connection.

Response: With these package delivery station facilities, it is not ideal to have associate and truck operations cross paths with the delivery station operations. Through coordination and site planning processes with the City of Arvada, it has been agreed upon that the north and south parking lots should not interconnect.

Comment #6: In the operations analysis, show the peak hour of the generator at the same time as the peak hour of SH 72/local streets. Delivery schedules may vary and therefore the generator's peak hour may vary as well.

Response: When this project was originally scoped with the City of Arvada, it was agreed upon to evaluate the peak hour of the generator as the project is expected to generate one (1) trip during the peak hour of the adjacent street. As many of these facilities exist today, the user specifically avoids staffing shifts and delivery vehicle operations during the morning peak hour of the adjacent street. This is to maximum efficiency with delivery of packages.

Comment #7: A projected peak hour signal warrant is insufficient for the construction of a new traffic signal at 68th Ave. The applicant should apply for an additional permit when this intersection meets either MUTCD Warrant 1 or 2 under existing conditions.

Response: It should be noted that the peak hour warrant was developed specifically for access parameters and volume projections similar to what is proposed and projected at the intersection of 68th Avenue and Indiana Street. This facility will generate large employee numbers that will trigger the need for a traffic signal during the afternoon peak hour.

Comment #8: Per the Traffic Study State Highway access permits are required for the proposed full movement access at 68th Ave. and Indiana St. and the proposed Right-in, Right-out access to Indiana St. If these are private drives, then the property owner will be the Permittee. If either of them are City Streets, then Arvada would be the Permittee. Contact for permitting is Steve Loeffler who can be reached at 303-757-9891 or steven.loeffler@state.co.us.

Response: Thank you for this information. Access permits will be prepared with the property owner as the Permittee at the east leg private access intersection with 68th Avenue and Indiana Street, as well as at the proposed right-in/right-out access along Indiana Street. In addition, as 66th Place will now be restricted to three-quarter movements on the east leg at Indiana Street, an access permit with City of Arvada as the Permittee will be prepared at this intersection.

Comment #9: Any signing for the development visible to the state highway must be on-premise and cannot be either partly or wholly in the state highway right-of-way. It must also comply with all other rules governing outdoor advertising in Colorado per the state rules, **2 CCR 601-3**.

Response: Understood, signage for the development will occur onsite and outside of the state highway right-of-way.

Sincerely,

KIMLEY-HORN AND ASSOCIATES, INC.

Project Indiana Wildlife Questions

EXHIBIT
11

Likes - DNR, Jordan <jordan.likes@state.co.us> Tue, Jan 5, 2021 at 8:56 PM
To: Jeremiah Bebo <jbebo@arvada.org>

Hi Jeremiah,

Thank you for the opportunity to discuss the development of a distribution facility and associated parking on approximately 36-acres of agricultural property. The project site will be annexed by the City of Arvada from Jefferson County and currently consists of several parcels of private property. The project site is bounded on the north by Maple Valley Park, on the west by Indiana Street, on the south by private property and east by Fig Street.

The mission of Colorado Parks and Wildlife (CPW) is to perpetuate the wildlife resources of the state, to provide a quality state parks system, and to provide enjoyable and sustainable outdoor recreation opportunities that educate and inspire current and future generations to serve as active stewards of Colorado's natural resources. Our goal in responding to land use proposals such as this is to provide complete, consistent, and timely information to all entities who request comment on matters within our statutory authority. Current CPW policy directs our efforts towards proposals that will potentially have high impacts to wildlife and wildlife habitat. The emphasis of CPW's concerns is on large acreages, critical habitats, wildlife diversity, and impacts to species of special concern, or those that are state or federally endangered.

On a vast majority of the parcels, CPW would expect to find small ground dwelling mammals and passerine birds. Due to the low availability of undeveloped habitat surrounding those parcels, impacts of the development, as proposed, may be characterized as minimal. CPW recommends that the developer conduct a biological survey on the site and on the nearby parcels of land to determine the presence of prairie dogs dens, active raptor nests or other specific species of wildlife that would be impacted by the development. CPW also recommends that intrusion into Ralston Creek be minimized and that any equipment used in Ralston Creek be cleaned using the best management practices, which are outlined below.

If prairie dog towns are present on the sites or if prairie dogs establish themselves on the property prior to development, CPW recommends that a burrowing owl survey be conducted prior to earth moving. Burrowing owls live on flat, treeless land with short vegetation, and nest underground in burrows dug by prairie dogs, badgers, and foxes. These raptors are classified as a state threatened species and are protected by state and federal laws, including the Migratory Bird Treaty Act. These laws prohibit the killing of burrowing owls or disturbance of their nests. Therefore, if any earth-moving will occur between March 15th and October 31st, a burrowing owl survey should be performed. Guidelines for performing a burrowing owl survey are attached to this email.

If prairie dogs are present at the site or if prairie dogs establish themselves on the property prior to any development and the developer wants to relocate the prairie dogs, CPW requires the developer to obtain a relocation permit prior to starting any relocation efforts. CPW allows prairie dogs to be relocated to another suitable wild habitat, a license raptor rehabilitation center or to the United States Fish and Wildlife Service Black-footed Ferret Recovery Program. The developer is not allowed to relocate prairie dogs without obtaining a relocation permit. Relocation requirements and an application for a prairie dog relocation can be obtained from CPW.

CPW recommends that land within the project area be restored to native habitat if possible. To improve wildlife habitat after construction, CPW recommends using native plant species along the project area. CPW also recommends planting trees, shrubs, and grasses so that they are mixed within the landscape. A landscape that has a good mix of trees, grasses, and shrubs is more beneficial to wildlife than a landscape with all trees in one area and all grasses and shrubs in others.

If heavy equipment is used near any water source (that was used in another stream, river, lake, reservoir, pond, or wetland) one of the following disinfection practices is necessary prior to construction to prevent the spread of New Zealand mud snails, zebra mussels, quagga mussels, whirling disease, and any other aquatic invasive species into this drainage. These practices are also necessary after project completion, prior to this equipment being used in another stream, river, lake, reservoir, pond, or wetland:

- Remove all mud, plants, debris from equipment (tracks, turrets, buckets, drags, teeth, etc.) and spray/soak equipment in a 1:15 solution of Quat 4 or Super HDQ Neutral institutional cleaner and water. Keep equipment

moist for at least 10 minutes OR

- Remove all mud, plants and debris from equipment (tracks, turrets, buckets, drags, teeth, etc.) and spray/soak equipment with water greater than 140 degrees F for at least 10 minutes.
- Clean hand tools, boots, and any other equipment that will be used in the water with one of the above options as well. Do not move water from one water body to another. Be sure equipment is dry before use.

If there are any active raptor nests found within the project area or in the vicinity of the project area, CPW recommends that the developer adhere to the appropriate seasonal closures and minimize human encroachment of the active nests. Disturbance of active nests can result in nest failure. Some raptor species require larger buffer zones to minimize human encroachment than other raptor species. Seasonal closures also vary by raptor species. If the developer is unable to adhere to the appropriate seasonal closures or the development will unavoidable encroach on any active raptor nests, CPW recommends that the developer consult with the United States Fish and Wildlife Service to obtain the appropriate permit prior to beginning construction. USFWS can be reached at https://fwsepermits.servicenowservices.com/fws?id=fws_index or at (303) 236-8171.

Please do not hesitate to contact me if there are any questions or concerns.

Subject: Project Indiana comments

For the record, I have over 20 years of senior corporate facility operations and management experience. This includes managing many site evaluation, selection and construction projects in the metro area as well as managing their ongoing operations. Based on my years of experience I feel confident in saying that the proposed site is not suitable for the 24/7, high traffic operation as is being proposed.

I can relay this cautionary tale- some years ago I was involved with a somewhat similar project where my company built a facility on what was former horse property next to an existing residential area. The facility operated 24/7, as would the proposed facility, although at about 1/2 the square footage and without the high truck usage. The first summer of operation we were inundated with complaints from the adjoining homes that the non-stop noise of the rooftop air conditioning compressors were seriously impacting their ability to sleep at night. (Running 24/7 there is no ability for night time air conditioning setback, even with the state of the art systems we were using.) Some of the neighbors started legal actions to halt our operation or force us to seriously limit the noise levels they were experiencing. After many thousands of dollars and much disruption from noise abatement studies, adding larger screen walls and making expensive equipment modifications we ended up with a solution that really benefited no one. The air conditioning noise was somewhat lessened but still troubling to the surrounding neighborhood. In the end a number of homeowners put their homes up for sale and my company lived through well over a year of considerable disruption and expense.

Had our CEO paid more attention to understanding the surrounding environment and our potential impact on it's residents rather than just focusing on the developer's promises of inexpensive land and building cost, this all could have been avoided.

Don't make the same mistake.

Good Afternoon everyone.
It's getting close to the June 14th city council meeting where Amazon will be discussed.

TO Owens and the Planning Commission did not acknowledge, respect or value the input of the 60+ Arvada citizens who commented at that meeting in opposition of re-zoning and annexation for the purpose of Amazon.

Hopefully, the City Council will listen to the voices of Arvada citizens and the presentations that will be given at the meeting on the 14th. **Amazon is not a fit for our community!**
Arvada city voices talk about SMALL BUSINESS a lot. Amazon is a small business killer.

Some citizens of Arvada are upset about the changes to trash pick up. One of the reasons you all went to a Republic was "less trucks on the roads". Amazon semi-trucks, delivery vans and employees will clog the streets more than any trash trucks!! More citizens will be even more upset should the City Council not hear their input and thus deny Amazon!

The info Amazon has given does not make sense. Holidays are longer than 5-6 weeks (6 weeks means it begins in mid-November). Nope - they will be gearing up for holidays BEFORE that!
Their traffic study is FLAWED! It did not consider covid or getting to and from the highways (I-70, Ward Rd, McIntyre ect) and Indiana is at MAX traffic capacity currently.
Paving 21+ acres and the run off from truck messes is wrong. Noise and light pollution will be a constant nuisance. The list goes on and is long and gross!

Say NO. NO AMAZON!

To: kristen@arvada.org
Subject: City Council Public Hearing - Amazon Distribution Center (Oppose Project Indiana)

Ms. Rush,

Please pass along these comments to all member of the City Council and Mayor. I don't support a construction and operating a new Amazon distribution center. There are a number of reasons for not supporting the project.

- Indiana can't adequately support traffic at its current level. Adding a distribution center will exacerbate the issue.
- The distribution center in not easily accessible and will only cause/exacerbate other traffic issues for Ward Road or McIntyre.
- Traffic issues already exist for Ward Road or McIntyre are only going to increase with this distribution center.
- Arvada needs to stop developing every inch of open area.
- Site is better suited for other things or better left as undeveloped and open space. The city could purchase the area.
- What happens to the rest of the land along Indiana. Presumably more development would be offered only increasing issues with traffic.
- Life quality would be affected by adding the distribution center and future development. Sometimes not developing improves the quality of life.
- There are better suited areas for a distribution center and not one that is not easily accessible from a highway.
- My kids consistently complain about the massive development everywhere in Arvada. The like the open space areas and want them to stay.
- There are many unintended consequences to this project that won't be known. Don't assume that you know all the consequences of allowing this project to go forward.
- Arvada prides itself with open space, but that open space continues to decrease.
- It's discouraging to ride or walk Ralston Creek trail only to see new development. Our family missing seeing open areas as we walk the trail. Adding a distribution center will

increase traffic noise, add more light pollution and disrupt an area not built to handle this type of business.

- If something has to be built/development, have it something more family & community friendly.
- When does the development end? One of the reasons for living in Arvada was the open space, being able to walk to a park within 10 minutes and not having homes, businesses developed everywhere. That life style seems to be less each year.
- The environment can't support endless development.
- Can the city support all the things that come with this center? Added traffic, housing and increased population are only a few of the consequences of adding this center.
- This project continues the reduction in wild life habitat. With so much development in Arvada, wild life becomes less and less prominent. Mange and lack of habitat for foxes has led to a huge increases and issue with rabbits. Now more habitat will be taken away from birds and mammals. When does that stop?

Please consider that not developing a distribution center as a positive and not a negative because the city loses revenue. Quality of life is more important.

Thank you,

David Catalfamo

June 2- June 10

As 11-year Arvada residents, we are writing to state our opposition to the annexation and rezoning of Project Indiana.

We do not agree with the City of Arvada in annexing Maple Valley Park to benefit this development. There is no need for the City of Arvada to annex the park from Jeffco other than to benefit the 1/6 contiguity requirement of the development and to use a public park as Scannell Property's buffer zone to nearby residential. As Arvada and Jeffco residents we are STRONGLY OPPOSED to the annexing of Maple Valley Park for the purpose of benefitting one party. On page 8 of the Cover Letter dated December 11, 2020 RE: Application for Annexation, Initial Zoning to Mr. Ryan Stachelski, Community and Economic Development Director for the City of Arvada, it specifically states the developers intention to use Maple Valley Park as a 7 buffer to the industrial use and this is NOT ACCEPTABLE "….Moreover, industrial uses on the Scannell Property will not impact the residential uses located to the north and east of the Scannell Property because the Park Property acts as a buffer between the Project and the residential homes to the north of the Scannell Property and the undeveloped area to the east of Fig Street acts as a buffer along between the Project and the residential homes to the east of the Scannell Property. The initial zoning of the Park Property as OS also is consistent with the character of the existing and planned development on adjacent properties and in the surrounding area. The Park Property will be nestled between a residential development and the Scannell Property, acting as a buffer between the two uses". Since 1850, the Ralston Creek Trail, Arvada's longest and most complete trail, has served the community as a source of recreation by increasing the quality of life for Arvada residents, allowing them to get outside to recreate and enjoy nature. Allowing the "People's Park" to be utilized in this development annexation is detrimental to the neighboring community and does not benefit the citizens of Arvada or Jeffco, it only benefits the developer, as such the annexation of Maple Valley Park and Project Indiana should be DENIED.

Additional reasons for the opposition:

- The property values and quality of life of nearby homeowners will be negatively impacted by a 24/7 distribution center operations and a development of this type. As taxpayers in Arvada and Jefferson County we are counting on our elected officials to act responsibly on our behalf and 8 protect our properties from adverse negative impacts due to incompatible development and land use.

- The Minor Adjustment of the lot line and Variance Request for relief of the 50' setback on 6720 Indiana doesn't meet the requirements of Jeffco Section 33 – Agricultural District (orig. 3-26-13).

- Annexing Maple Valley into Arvada to be utilized as the buffer zone is an unacceptable use of a public park and only benefits the developer.

- An Amazon "Last Mile" distribution center with 24/7 operations is not compatible with the adjacent open space and residential use and will have a negative impact on wildlife, residents and property values in the area. How would you personally like to live just blocks from a large industrial building/24-7 operation? Such a development in this location will have horrific consequences to West Arvada.

- The Scannell Properties have several Recognized Environmental Conditions per the Phase I Environmental Assessment (Terracon Project No. 25207246) that should be mitigated prior to any disturbance of the land.

- The traffic congestion from 400+ warehouse workers daily, nearly 1,000 vans in and out several times a day and 42+ semi-trucks delivering throughout the day and overnight will negatively impact the surround area and quality of life for nearby residents and wildlife.

- The storm drainage from a high use 24/7 industrial property will be substantial and more student should be done regarding EPA regulations, floodplain and wetlands issues as it relates to the negative effect on the riparian habitat on the Ralston Creek corridor.

- The light and noise pollution from a 24/7 operation will have a huge negative effect on the nocturnal wildlife that use Maple Valley Park as their habitat, especially the Great Horn Owls that nest in the large growth trees in the area.

- There are a multitude of wildlife species that use Maple Valley Park and the surrounding area as habitat that need to be protected as well as the water quality of Ralston Creek. The proposed plan does not have a buffer in place to protect the open space. There will be a negative impact from a 24/7 operation for the numerous nearby wildlife that rely on the Ralston Creek and Maple Valley Park as their habitat. Habitants include bobcats, coyotes, rabbits, raccoons, owls, hawks, bats, snakes, squirrels, mice (possibly Preble's Meadow jumping mouse), mallard ducks, and heron to mention just some of the numerous wildlife that rely on the habitat. This is also a migratory route and other birds (some endangered) have been sighted in this area such as the Great Horn Owl, Bald Eagle, Red-tail Hawk, Falcon, Hummingbirds, Wren, and numerous types of Sparrows.

- The old growth trees in the park and on the proposed development need to be protected and preserved per the Arvada Land Development Code. Removing any of these large trees will diminish the air quality in the area and substantially decrease the habitat of the numerous nesting birds in the area. Maple Valley Park is a hotspot for birds with 97 species reported.

Bottom line, we strongly encourage the Arvada City Council to consider both the environmental impacts mentioned and the negative impact for nearby residents. We suggest finding a less intrusive use for this property that supports the culture and character of this community. The current Arvada 9 Future Land Use Plan shows the area as industrial, office or retail yet that is in direct contradiction to the Arvada Comprehensive Plan, The Arvada Arts and Culture Master Plan, and the Arvada Parks, Trails and Open Space Plan which shows the area as a high priority area to utilize for increasing or improving the park system or as a possible Second Arts and Culture Hub for the City. We understand the City's need for tax base and that the current property owners wish to sell and move on., but as residents who live here we also have needs and would experience firsthand the unintended long-term negative effects of such a poorly planned industrial encroaching on the surrounding residential in this community.

We are not against development but this property is not the right place for the proposed Scannell Properties Project Indiana! Arvada is a lovely please to live and play right now. **Please don't let that change and please don't let tax dollars alone drive your decision making!!!!**

Subject: Subject: Deny Amazon annexation and rezoning

The numbers don't add up. The proponent's traffic study (Appendix A, Base Assumption Table) states that we should expect 42 semi truck trips each day in our neighborhood. The number 42 is critical as 50 daily truck trips is the cap on light industry. Further, the traffic study states that 202 delivery vans would be needed each day to distribute the truck loads.

Yet the parking lot is planned to hold approximately 900 delivery vans, far exceeding the stated need. One explanation I've heard is that some delivery drivers may park their personal cars in this same lot. OK, great, 202 drivers with a personal vehicle and their delivery van would need 404 parking spaces, not 900.

My concern is that Amazon is building a parking lot that will meet their future need. And the only reason they need 900 van parking spaces is if they need more vans to distribute more material, which means more semi truck loads**. If you follow the math, the planned parking lot would be needed if there were more than 80 semi truck loads each day, far exceeding the light industry cap.**

The traffic study assumes 42 truck trips and 202 vans. The parking lot size indicates a higher level of use. It can't be both ways; either the size of the parking lot needs to be reduced to help mitigate the adverse

environmental effects of this project, or the traffic study numbers need to be adjusted upward, and the real issue revealed**:** This is a heavy industry project proposal trying to hide itself as light industry.

Which begs the question: what is the monitoring and enforcement plan for this project? If Amazon exceeds 50 truck trips a day, what are the consequences? Is Arvada already planning to issue a variance to allow for more than 50 truck trips during high volume times, such as holidays? What is the truth here?

Clearly concerned,

Denise Bohon

To the above people listed:

Why you want to disrupt the peacefulness of Arvada is beyond me, and all of those listed below.

What happened to the 2014 Comprehensive Plan and the **2017 This is Arvada Study Report?** Just thrown in the trash? Have you read about the hugely negative impact an Amazon center will have in Arvada and the fact that other localities are **SORRY** that they let Amazon in?

EVERYTHING will be worse, including roads, traffic, property values, the lack of Open Space which Jefferson County prides itself in and was a leader in Colorado in developing, quality of life, and peace of mind (anxiety).

You strongly need to consider a development in the spirit of a "Walkable Village" that is a smaller "Town Square" type development that supports both the "commercial tax base" and the "open space" uses and is a transitional development to the light industrial beyond. It would be an environment-friendly design that is patterned from a "traditional development pattern" which history has revealed to be resilient and financially productive.

You have the **"VISION" STATEMENT** from those opposing Amazon in Arvada**,** which is a reminder of the Arts and Culture Mission and Arvada's Comprehensive Plan: **PLEASE READ IT!**

My wife, Joyce, and I have lived in western Arvada for approximately 25 years. This is our home and our retirement location. Our future is in western Arvada. There are many reasons that we love living here. While population density and traffic have increased significantly during our years here, we continue to love the mix of recreation, commercial and residential opportunities. We are deeply concerned about the proposed Amazon “last mile” project. Certainly the scope of this project will change the character of our neighborhood. Regardless of who is correct about the increase in traffic, the fact is the traffic will increase dramatically. The City Council has a difficult decision to make. We hope they will vote to maintain the beauty and neighborhood feel of our community and not get pulled into an endless cycle of growth. Please keep western Arvada a great place to live and not a massive warehouse district.

Judy Bohling <[redacted] Wed, Jun 2, 2021 at 9:25 AM
To: jbebo@arvada.org, "[redacted]>, Rich [redacted]

I am opposed to the Amazon Distribution Center because of
Increased traffic on Indiana.

I live in Westwood Mesa subdivision and we are seeing 90
More homes being built at the back of our subdivision.

See picture

90 homes + 2 cars per home = 180 more vehicles coming out on
69th & Indiana. Having no other exit from our subdivision there
Will be approximately 400 vehicles from Westwood Mesa
To Indiana.

A heavy vehicle Warehouse with 1,300 or more vehicles a day
Is to much for Indiana. Especially with added local traffic
increasing.

“The night-mare will begin for West Arvada neighborhood”

Common sense would tell you that Indiana is over capacity
Now!!

Thanks For Consideration
Judy Bohling

Subject: Oppose rezoning and development application at Project Indiana (Amazon)
To: <kristen@arvada.org>

Hello Ms. Rush,

If you would, please pass along my comments to the City Councilmembers and Mayor. Thank you!

Councilmembers,

I ask that you deny the application proposed by Amazon's developer. **The proposed plan does not qualify as "light industrial" zoning**; for example, the LDC definition clearly states Light Industry truck traffic must be lower than 50 truck trips per day. Amazon proposes adding semi-trucks and at least 530 delivery vans. These vans seem to be considered trucks within Arvada Land Development Code, which defines trucks as those carrying property, and distinguishes trucks from "semi-trailers".

25 acres of parking lot is unheard of in this area of light industrial development. As an environmental scientist, I believe that turning a grassy open field into this much impervious surface will impact Ralston creek.

This rezoning is not consistent with the character of the existing adjacent area, which borders a beloved park and a waterbody that is already considered "impaired" under Clean Water Act Section 303(d) due to development. As strange as this may sound, we human beings are responsible for making decisions that impact all other beings that live here -- and they don't have a seat at the table or a vote on a council.

Please use your seat to advocate for the health and wellbeing of our *entire* community and listen to Arvadans: we clearly oppose this development application!

Thank you,
Katie Connolly

Hello,
I hope you are having a great Tuesday. As the time approaches on the Amazon vs Maple Park decision, I would like to voice my opinion to you as a 22 year old that has grown up in this city. My entire life I have wanted to grow up and grow old here, have my children catch crawdads, bike to Wendy's, and ride the dirt jumps like I did with my brothers growing up. Approving the Amazon warehouse over other options that would benefit the local people and local economy of Arvada, would be tragic. Not many of us that grew up here want to stay here anymore, even if it seems unrelated, the Amazon warehouse is a big contributor to this. Arvada is a great place, and Jeff Bezos should not get to ruin this.
Thank you,
Lauren Gaston

To: kristen@arvada.org
Subject: Support For Project Indiana and Maple Valley Park Annexation

Dear Mr. Mayor and Members of Council,

I live in the Hillcrest Neighborhood less than a mile from this proposed development. My family and I also clean up trash on Fig Street adjacent to this proposed development from 65th Way to 68th Ave/Eldridge Street through the Adopt-A-Street Program. This stretch of Fig Street experiences significant levels of littering and dumping of trash and most of the issues occur on the undeveloped properties.

I am in support of the Annexation of Maple Valley Park. The city already owns and maintains the property and It only makes sense that the city will have full jurisdictional control over the property.

I am also in full support of the Annexation and Rezoning of Project Indiana. The parcels in unincorporated Jefferson County are designated in the 2014 comprehensive plan as Office/Industrial and the other properties that have already been annexed are zoned Neighborhood/Community Commercial. The proposed Amazon Last Mile Facility conforms with the vision set forth in the Comprehensive Plan.

This project will benefit Arvada and the Community by

1) Creating primary jobs in Arvada
2) Generating Millions in use taxes and development fees
3) Allowing for faster Amazon Deliveries (The future of retail)
4) Enhancing the buffer for Maple Valley Park and a screening wall
5) Improving Indiana Street (traffic signal, sidewalks, acceleration lane)
6) Helping to discourage littering & dumping on the property (security cameras, lights etc)

Thank you for all you do for the Arvada Community.

Sincerely,
Nick Kuehn

Sent: 6/9/2021 5:27:24 PM Mountain Standard Time
Subject: Vote no on upcoming Amazon Distribution Facility decision - my reasons are many

Dear Arvada City Council Members,

Let me add my vehement opposition to the Amazon distribution warehouse near the Ralston Creek Trail/Maple Valley. My reasons are many:

1. Respect the voice of the people. I don't even live near the proposed site, but I, along with many others of this community, have signed the petition and have spoken, we don't want the Amazon distribution facility. If you approve it, I can't trust you to do right by my neighborhood. This would send a very disturbing message that you DON'T listen to anyone.

2. The TRAFFIC PLAN that was reported to the planning commission was INCOMPLETE. I listened to the planning commission session and the traffic report did not include Ward Road. If you put the proposed facility into Google Maps and Apple Maps from I-70n east of Wadsworth (where the major warehouses are located) both GPSs said to take Ward Road. I live off Ward road, traffic is bad enough already, I gave up on turning left years ago, in recent years the light rail and construction along the road continues to grow. Resupplying the distribution center will add to that traffic making it intolerable. But ignorance is bliss (and IRRESPONSIBLE) since it wasn't considered in the traffic plan.

3. The planning commission said this type of light industrial business was approved by the local neighborhood. I say NO WAY could anyone have envisioned this type of business. When I think light industrial, I think a plumbing company, landscape business, or some parts store. That plan was approved in 2014, Amazon has changed dramatically since then. https://pattern.cosom/blog/amazon-prime-a-timeline-from-2005-to-2020 Many of the services that Amazon offers now was just a twinkle in executives' eyes back in 2014. Had residents known then what they know now, they would have voted this down, just as they are speaking out now.

4. You are deluding yourself if you think Amazon will be bringing good jobs and that all the employees will be good "citizens." I personally know of two ex-Amazon employees, it was a miserable experience for them. Read this: Delivery Drivers Are Using Grey Market Apps to Make Their Jobs Suck Less - https://www.vice.com/en/article/7kvpng/delivery-drivers-are-using-grey-market-apps-to-make-their-jobs-suck-less

5. The facility not only doesn't meet the character of the neighborhood, it is incompatible with the adjacent Ralston Creek trail. It would impact the wildlife that call that wonderful, beautiful mature-tree filled, riparian area home. You may not care about wildlife, but I do.

6. One of the things I used to love about living in Arvada was the semi-rural feel and "elbow room" that I had. Now construction seems to be filling in every single open square inch. This is unhealthy for humans. Here's search results on research papers that address the negative effects of lack of greenspace on health: https://pubmed.ncbi.nlm.nih.gov/?term=greenspace

Bottom line: Have the resolve to vote NO!

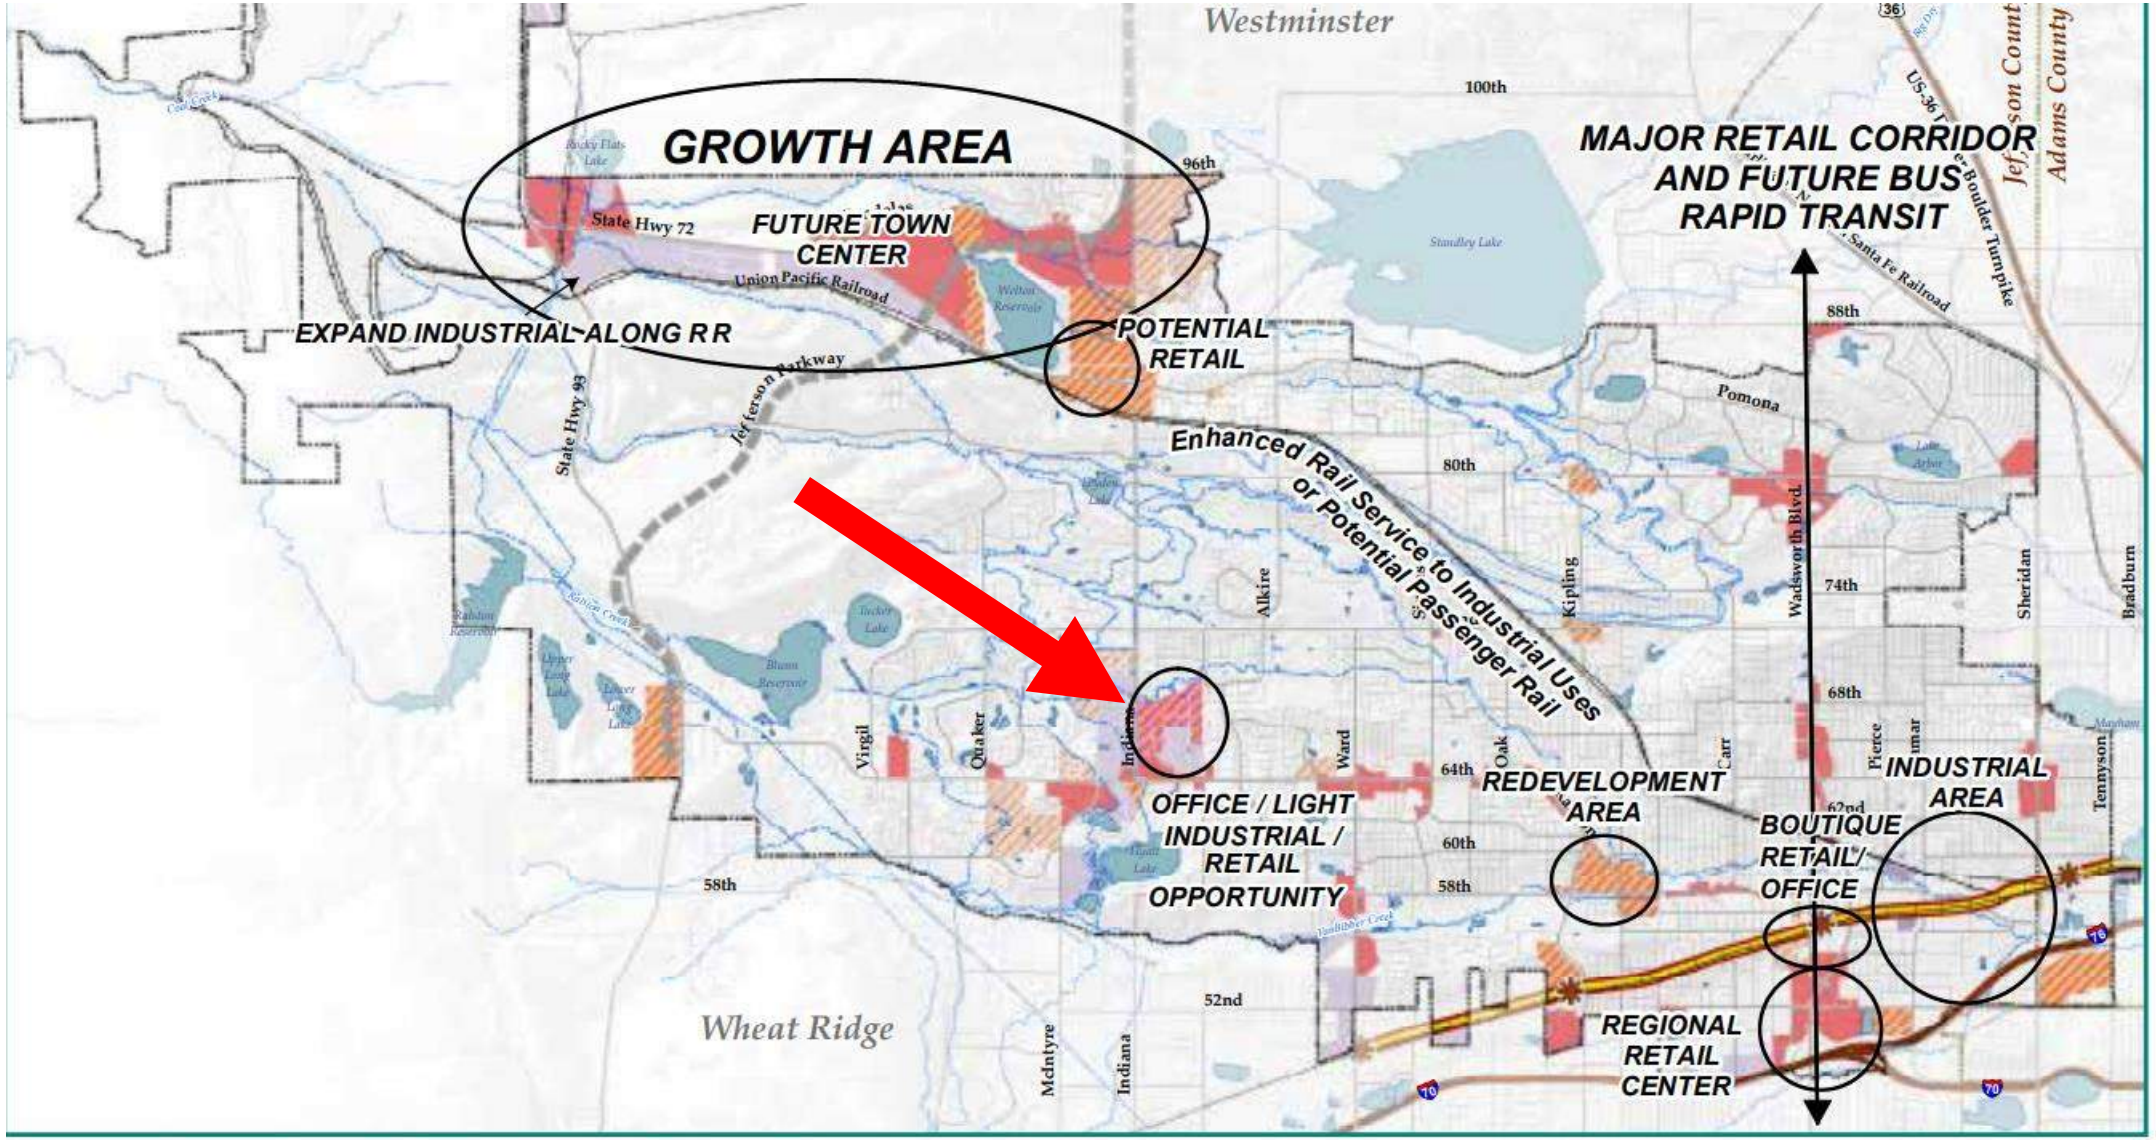
Comprehensive Plan

Comprehensive Plan



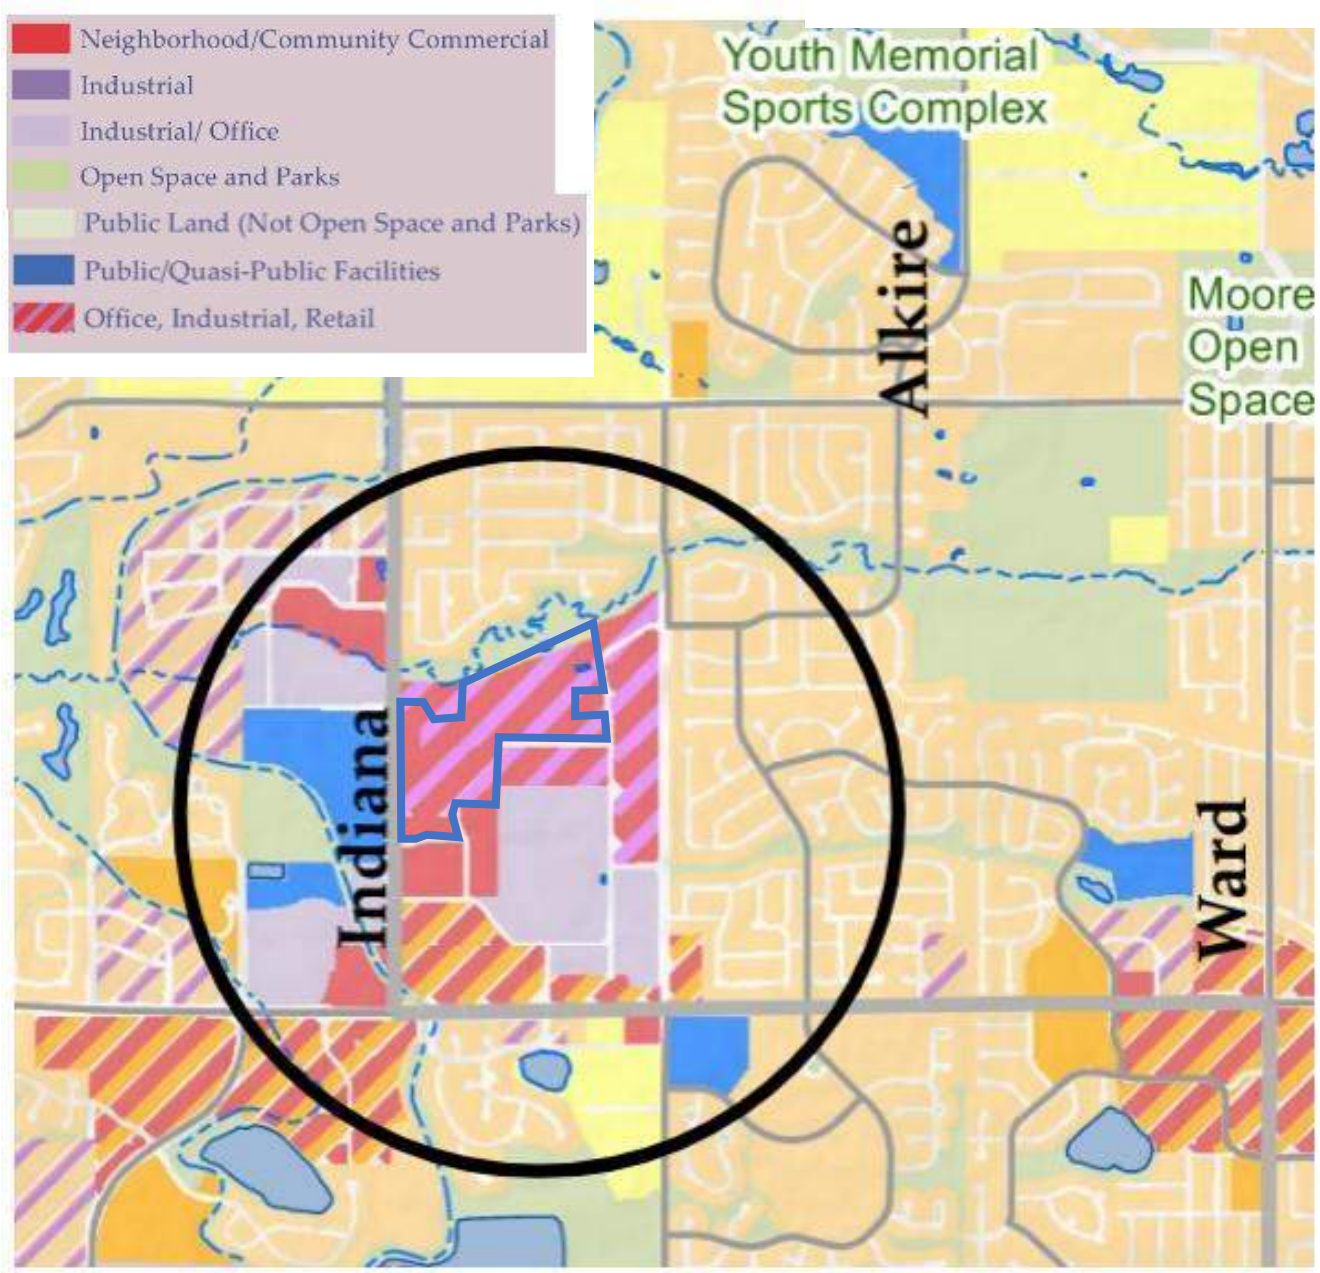


Figure 2-4. Growth and Economic Development Framework

Future Land Use Map

Comprehensive Plan:

Since 1975

Primary Uses

- **Industrial, Commercial and Retail**

Secondary Uses

- Open space and Recreation
- Public facilities and uses

Characteristics and Location

- Encourages development of industrial, commercial and retail uses that will minimally affect surrounding properties.
- Limited outdoor storage
- Generally located along arterial or collector streets

Zoning Districts

- **IL – Standard Industrial, Light***
- NC-I/OF – New Community Industrial and Office Sub-District

*Previously referenced as I-1.

Key Comprehensive Plan Goals

- *GOAL L-2:* Plan for a balanced mix of commercial and residential land uses in Arvada.
- *GOAL ED-1:* Expand and diversify the City's economic base to create primary jobs to increase the City's fiscal capacity to meet the needs of its citizens
- *GOAL ED-2:* Plan for new employment centers that will provide primary jobs in Arvada.
- *GOAL ED-4:* Redevelop and revitalize existing commercial and industrial areas.
- *GOAL ED-5:* Improve the City's economic base and its financial strength.
- *GOAL CC-1:* Plan Arvada as a City of different development character districts
- *GOAL CC-3:* Identify places and assets that are unique and important to the community and work to preserve them.

PROJECT INDIANA
Frequently Asked Questions

www.ProjectIndianaArvada.com

1. What is Project Indiana?

A. Project Indiana is the proposed development of a new Amazon "last-mile" Delivery Station in Arvada. The proposed development will include a 112,485 sq. ft. warehouse facility, 862 van parking spaces, 291 employee parking spaces, and large areas of landscaping and buffering on approximately 33 acres.

2. Where is Project Indiana located?

A. The proposed Amazon Delivery Station is located at approximately 6730 Indiana St. between Indiana Street to the west, Fig Street to the east, 68th Avenue to the north and 66th Place to the south.

The Community Spoke and We Responded:

1. Traffic and Parking
2. Lighting/noise/air quality
3. Land Use Compatibility
4. Reduction of Environmental Impacts on Park

Sustainability

Sustainability is a core Amazon value

In 2019, Amazon co-founded the Climate Pledge, where we made ambitious commitments to achieve net zero carbon by 2040 by doing the following:

- make 50% of all Amazon shipments net zero by 2030, and
- power our operations with 100% renewable energy by 2025.

Specifically, AMZL is committed to reducing its operational and embodied carbon. Reduction in operation carbon focusses on making buildings more energy efficient and utilizing renewable energy sources. We are designing most of our buildings to be Electric Vehicle (EV) ready.

- Amazon has committed over $2M for EV infrastructure at its Arvada Delivery Station to ensure the site will be EV ready.
- Amazon's intent is to have a full EV Delivery Van fleet by 2025 at its Arvada Delivery Station.
- EV Van fleet deployment could start in Arvada as soon as 2023.

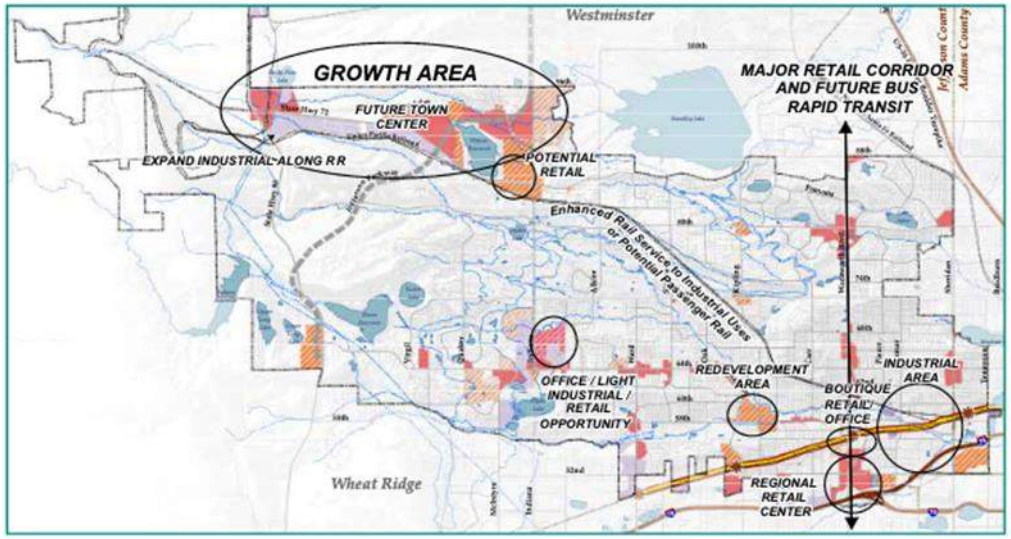
Existing Maple
Valley Park Area
Stormwater
Management
Facility:
1.52-ac
30.0'

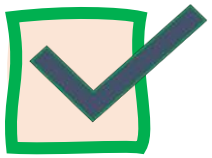
Summary of Criteria

Annexation Criterion are Met:

- Consistent with Comprehensive Plan and best interests of the City
  - The Comprehensive Plan notes this area as “Industrial/Office/Retail” since 1975
  - The Comprehensive Plan notes this as an area for light industrial growth potential
  - Project Indiana site is one of several designated opportunity areas.

- Supports several Comprehensive Plan Goals
  - GOAL ED-1: Expand and diversify the City’s economic base to create primary jobs to increase the City’s fiscal capacity to meet the needs of its citizens
  - GOAL ED-2: Plan for new employment centers that will provide primary jobs in Arvada.
    - POLICY ED-2.1: Future Employment centers include
      - Indiana Street and 66th Avenue (Parkway Business Center and environs)
  - GOAL ED-4: Redevelop and revitalize existing commercial and industrial areas.
  - GOAL ED-5: Improve the City’s economic base and its financial strength.





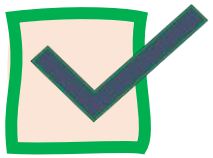


Figure 2-4. Growth and Economic Development Framework

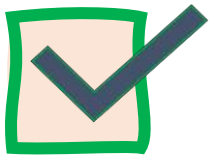
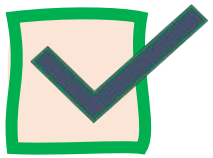
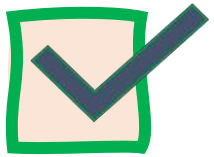


Annexation Criterion is Met: 

- Capable of being integrated into the City and developed in compliance with applicable Code
  - Key question is whether a site plan can be developed in compliance with Code; analysis of actual site plan is a separate process.
  - Applicant has demonstrated that the project can be developed in compliance with Code and is not requesting any variances from Code

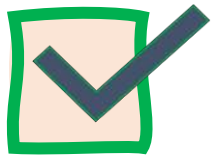


Annexation Criterion is Met:



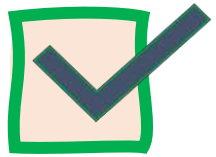
- Capacity to adequately serve residents of such area with utilities, facilities, and public services
  - Annexed area will not include residents, only commercial uses
  - City has confirmed that it has sufficient capacity to serve the area if annexed
  - Traffic study demonstrates that additional traffic will be within capacity of existing road network including improvements to be constructed with Project

Rezoning Criterion is Met: 



- Consistent with Comprehensive Plan
  - Previously addressed
  - Uses consistent with Comprehensive Plan designation
  - Supports numerous Comprehensive Plan goals
  - Designated Opportunity Area

Rezoning Criterion is Met 



- Land use consistent with intent of proposed zoning district (IL);
  - The purpose of the Industrial, Light (IL) zoning district is to provide areas for light manufacturing, assembly and fabrication uses, office, research, food and beverage processing, packaging, or bottling, and compatible recreational activities
  - Implements the Office, Industrial, Retail designation in Future Land Use Map

Rezoning Criterion is Met 

- Adequate facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire protection, and roads and transportation, as applicable) will be available while maintaining adequate levels of service to existing development
  - Traffic study demonstrates that additional traffic is within capacity of existing roadway, including improvements to be constructed with Project
  - Traffic levels will be timed to be off-peak, having minimal impacts on the peak traffic volumes for the adjacent roadway network. Indiana Street will be widened adjacent to the property
  - The facility is a low generator of water and sewage
  - Will Serve Letters have been provided by Arvada Fire
  - New detached sidewalk along Indiana St
  - Adequate/existing levels of service will be maintained

Rezoning Criterion is Met 

- Intended land use will not result in significant adverse impacts upon the natural environment (air, water, noise, stormwater management, wildlife, and vegetation), or such impacts will be substantially mitigated;
  - Noise: A 6’ high screening wall is proposed along the northern boundary to buffer the park
  - Stormwater will be detained and treated on-site, before being released into the public storm sewer system.
  - Project will plant more than 800 trees, dedicate additional 1.1 acres to City to expand park, and construct connecting trail

Rezoning Criterion is Met 

- Consistent with character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts
  - Properties to the west and south of the property generally fit the character of either light industrial or retail.
  - Closest residential lot more than 800 feet away
  - A significant landscape buffer and wall will be added to the northern boundary with Maple Valley Park
  - 1.1-ac of land will be dedicated to enhance Maple Valley Park.
  - Project will plant more than 800 trees
  - Low impact lighting (full cutoff)
  - Facility activity oriented away from residential

Thank you!

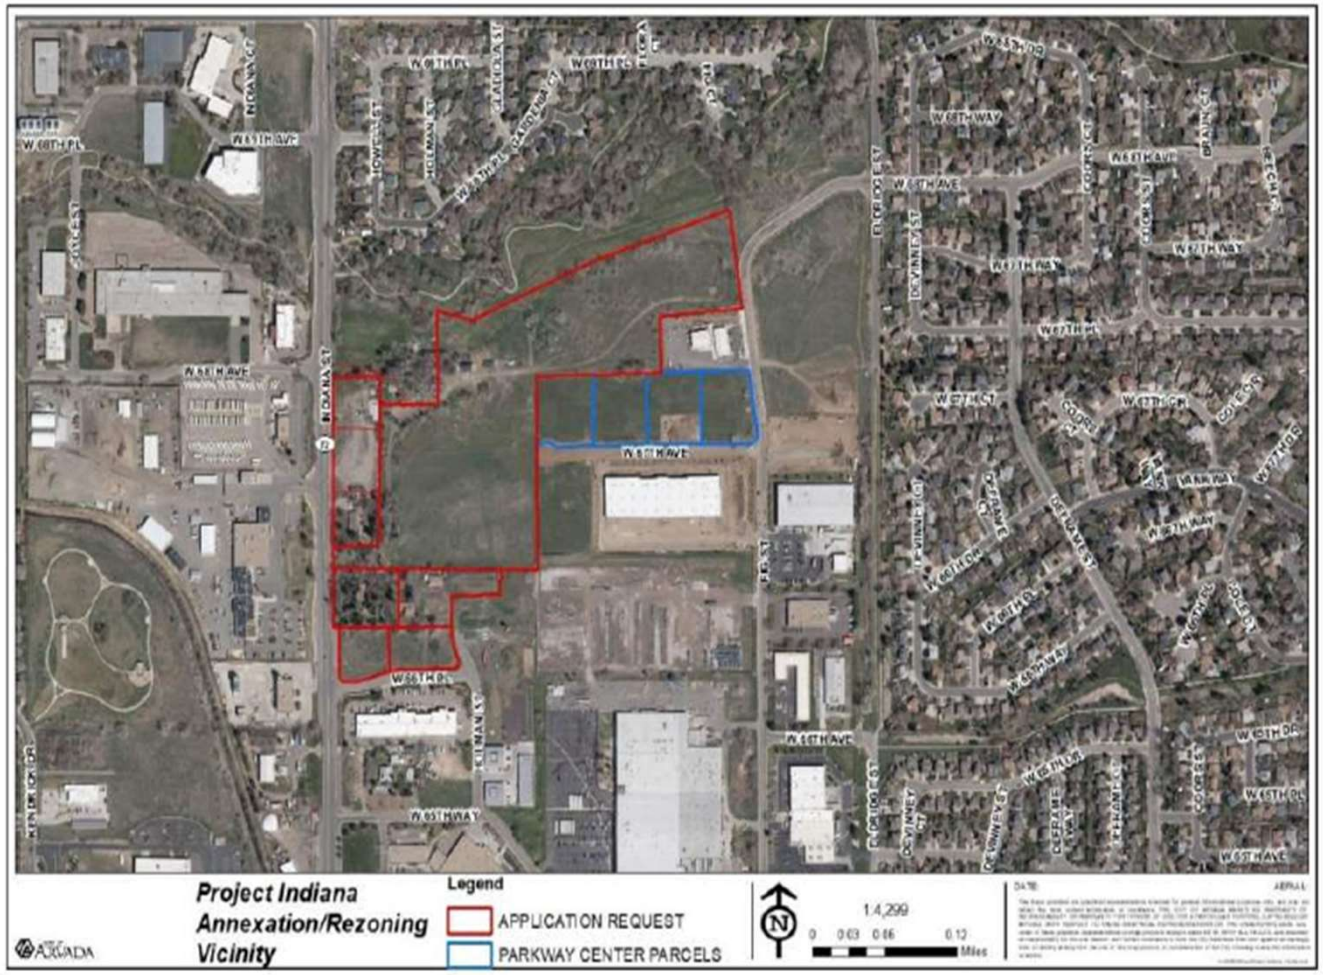
June 14, 2021

Ralston Valley Coalition

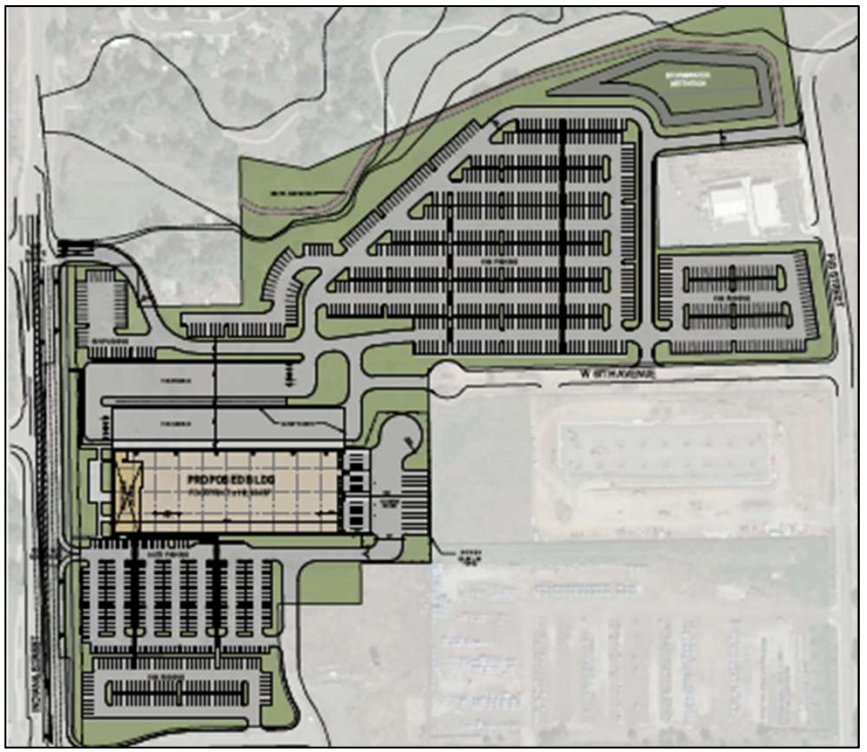


- Formed Out of “Protect Maple Valley Park”
- Supported by All Surrounding HOA’s Representing More Than 1,000 Homes
- More Than 8,800 Petition Signatures

Ralston Valley Coalition

Project Indiana

Ralston Valley Coalition



Project Indiana

- 36-Acre Site
  - 2.5 Acre Industrial Warehouse
  - 23 Acres of New Parking Lots
  - Majority of “Open Space” Is Detention Pond

Project Indiana

Ralston Valley Coalition

Project Indiana

- Adjacent to Maple Valley Park
  - 25+ Acres of Surface Runoff Discharged into Ralston Creek
  - Eliminate Natural Drainage and Existing Buffer
  - Removal of 450 Mature Trees & Wildlife Habitat

Project Indiana

Project Indiana

- 24/7 Operations
  - Light Pollution from 182 Exterior Lights, Including 22-Foot Lamp Posts
  - Industrial Noise – up to 70 Decibels
  - Less Than 400 Feet from Neighboring Residences

Project Indiana

- 23 Acres of New Parking Lots
  - 1,165 Parking Spaces
  - Outdoor Storage of Nearly 600 Delivery Vans and Semi Trailers
  - Potential Vehicle Maintenance, Fueling, Washing

Project Indiana

- Increased Traffic
  - At least 1,300 New Daily Vehicle Trips
  - Traffic Will Nearly Triple During "Holidays" to 3,600 Trips
  - Site Is Nearly 5-Mile Drive from I-70
  - Unknown Retail Traffic

Annexation & Rezoning

- Annexation – L.D.C. Div. 8-3-3-3:
  1) Compliance with Comprehensive Plan
  2) Capable of Integration Into City Consistent with L.D.C.
  3) Sufficient Infrastructure
- Rezoning – L.D.C. Div. 8-3-4-2:
  1) Compliance with Comprehensive Plan
  2) Proposed Use Consistent with Proposed Zone
  3) Sufficient Infrastructure
  4) Adverse Impacts to Environment
  5) Incompatible with Existing Development

Burden of Proof

Ralston Valley Coalition

L.D.C. Div. 8-2-3-2:

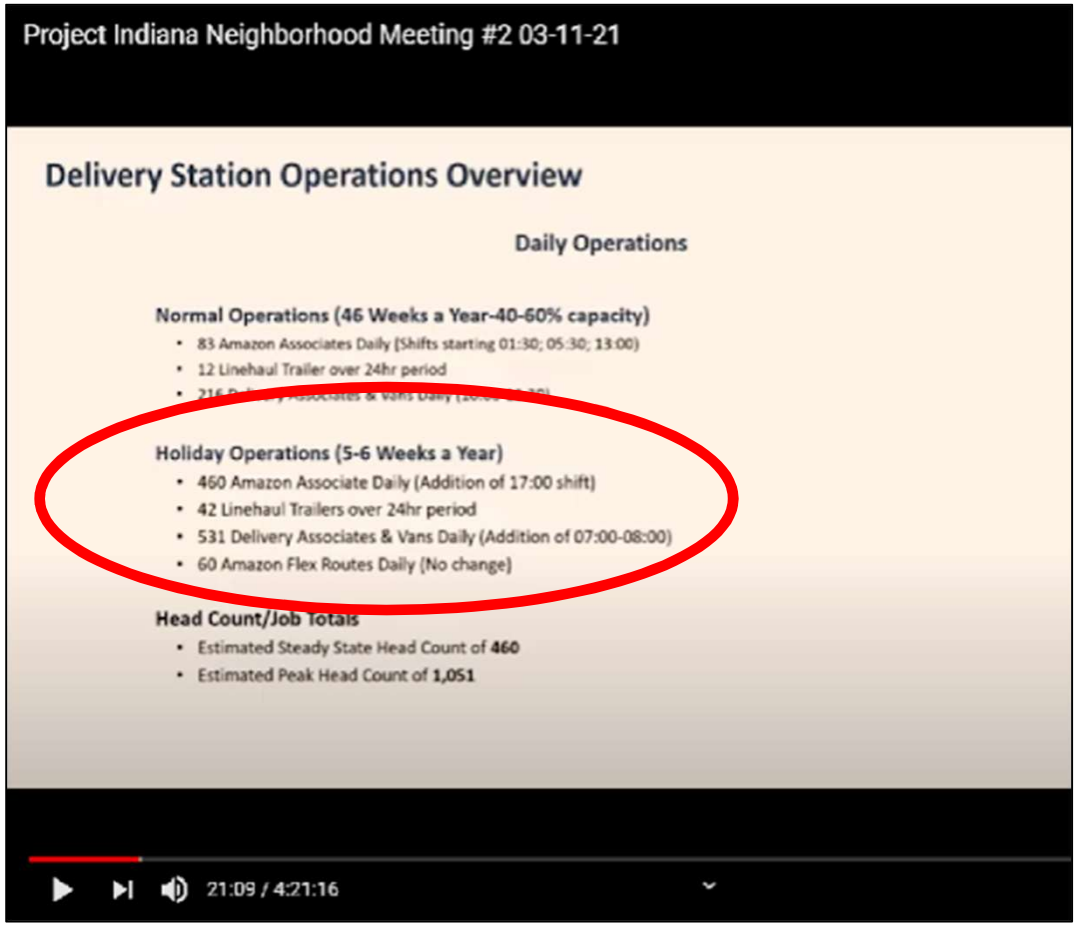
Scannell Has the Burden of Proof to Satisfy All Approval Criteria

Legal Issues

Project Indiana Must Be Denied **as a Matter of Law**:

1) The Proposed Use Will Violate the Proposed IL Zone

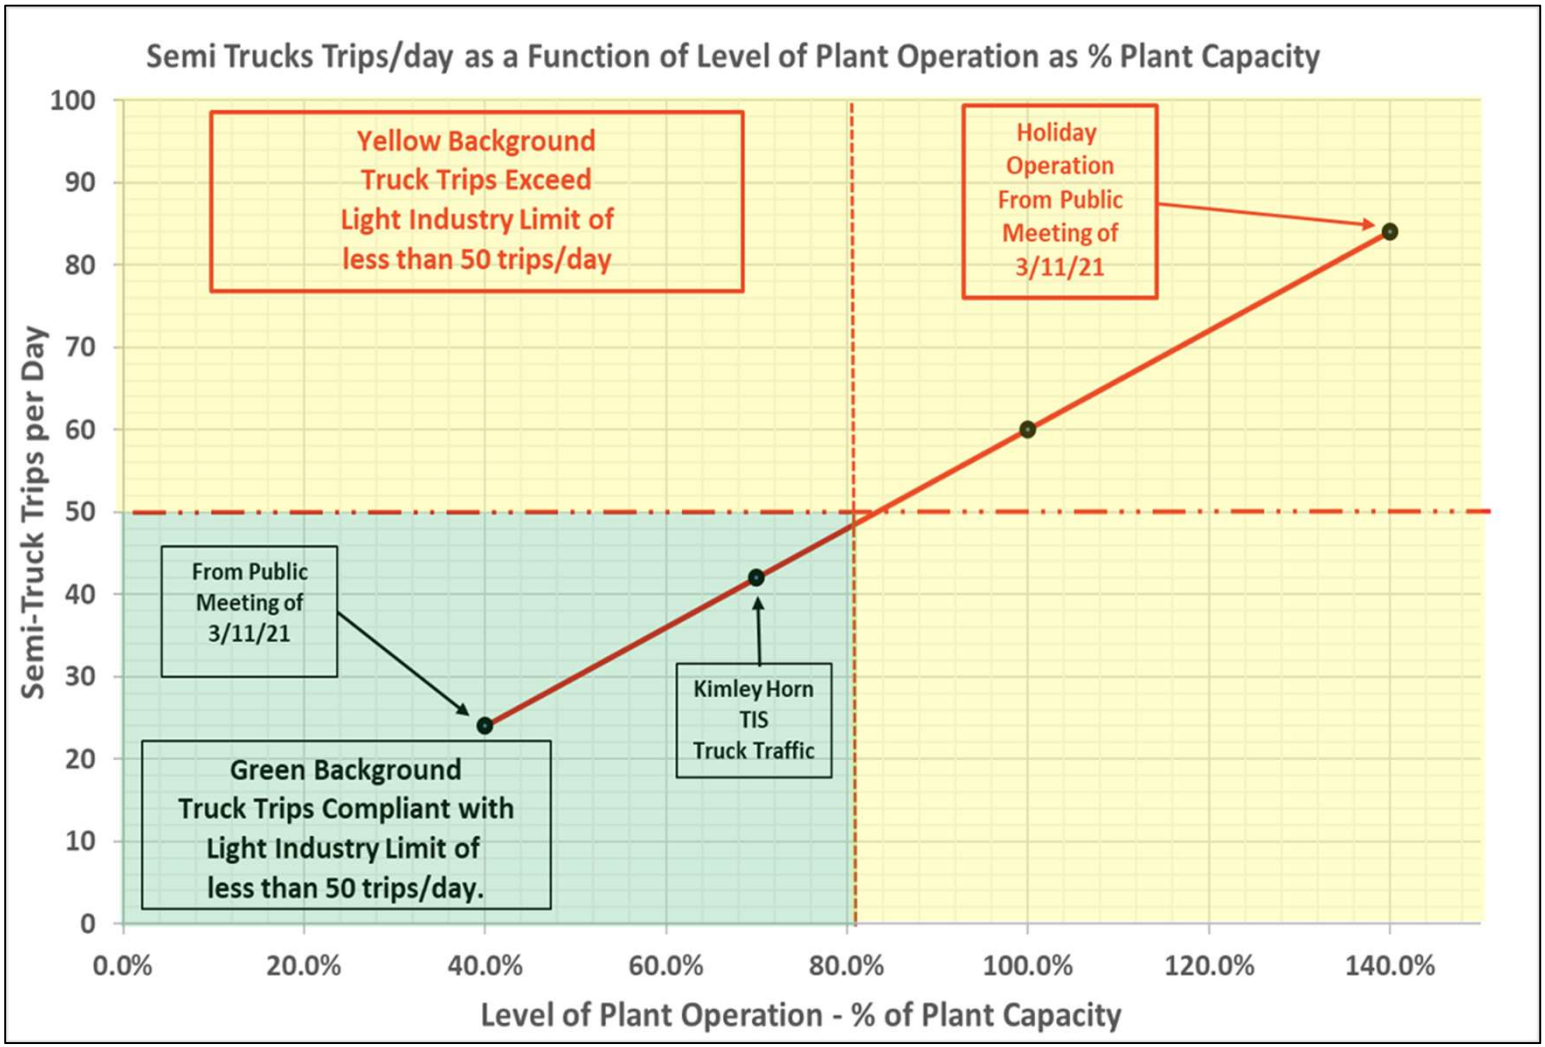
2) The Proposed Use Will Violate the Comprehensive Plan



Zoning Violation

- The Proposed Use Is a "**Heavy Logistics Center**" that Cannot Exist within the IL Zone
- L.D.C. Div. 11-3-3-1: "Heavy logistics centers are expected to generate **at least 50 truck trips per day**. Warehousing and distribution uses that involve fewer than 50 truck trips per day are classified as light industry."
- L.D.C. Div. 2-1-6-3(A): "Heavy Logistics Centers" May Only Be Operated within the IG Zone

Heavy Logistics Center



Ralston Valley Coalition

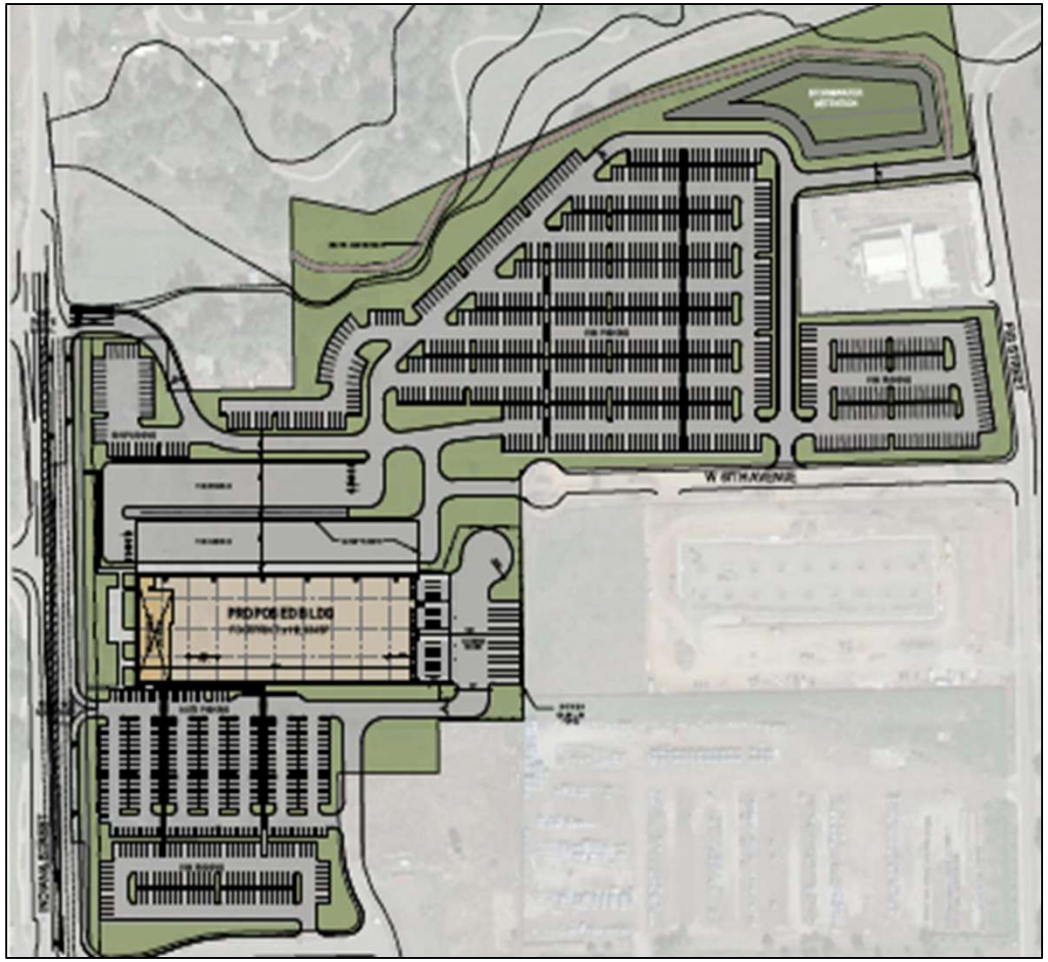
- In Scannell's Own Words:

Heavy Logistics Center

Ralston Valley Coalition

Heavy Logistics Center

- "Regular" Operations Involve 500+ Daily Delivery Vans—Also Classified As a Heavy Logistics Center



- Arvada Classifies Delivery Vans as "Trucks":
  - L.D.C. Refers to "Semi-Trailer Trucks" as a Subset of "Trucks"
  - Arvada Has Adopted C.R.S. § 42-1-102(108), which defines "Truck" as Any Vehicle Designed to Deliver Property
    - *See also* 49 C.F.R. § 571.3

Heavy Logistics Center

"Heavy logistics centers are expected to generate **at least 50 truck trips per day**. Warehousing and distribution uses that involve fewer than 50 truck trips per day are classified as light industry." L.D.C. Div. 11-3-3-1

Heavy Logistics Center

Violation of Comp. Plan

Ralston Valley Coalition

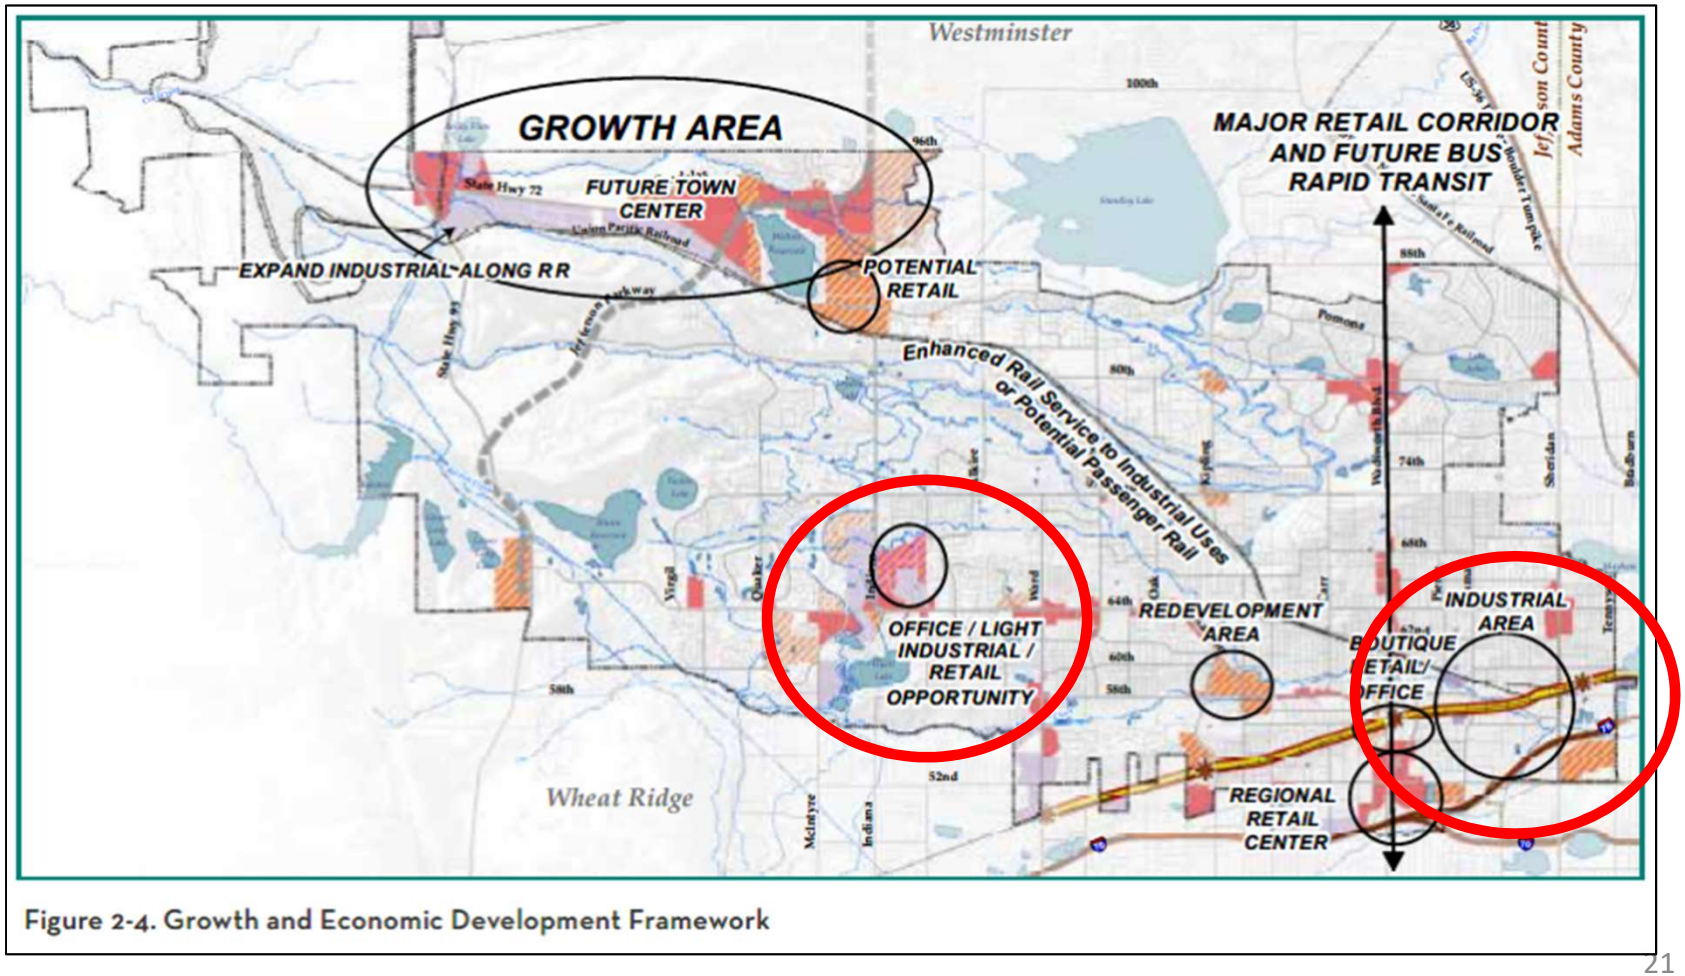


Figure 2-4. Growth and Economic Development Framework

Violation of Comp. Plan

- "Industrial/Office" Classification:
  - "[E]ncourages development of industrial and office uses that will minimally affect surrounding properties" and involves uses where "[o]utdoor storage is limited."
  - *See also* IL Zone – L.D.C. Div. 2-1-6-2(B)
- "Industrial" Classification:
  - "[E]ncompasses Arvada's heavier industrial areas" where "[o]utdoor storage is allowed."
  - *See also* IG Zone – L.D.C. Div. 2-1-6-3(B)

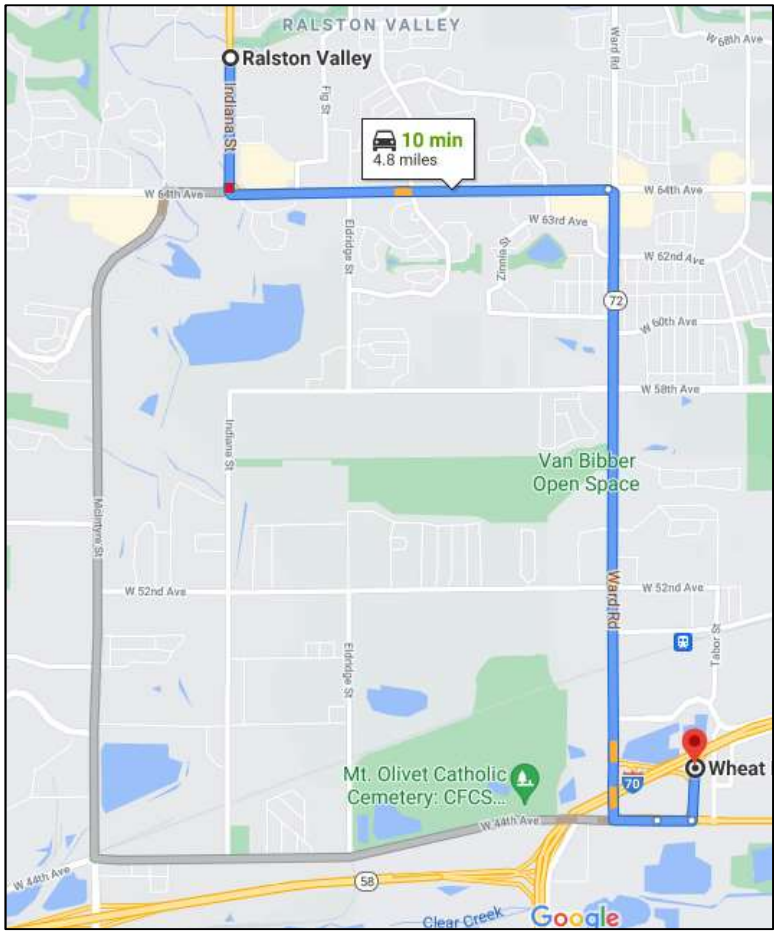
Violation of Comp. Plan

Ralston Valley Coalition

- Comp. Plan Redevelopment & Infill Principals:
  - Infill is "new housing or commercial buildings on vacant sites in a largely built up area"
  - Required to preserve mature trees and significant landscape features and incorporate pedestrian friendly mixed use design principles
  - Focus on "usable parks, trails, and open space"
  - Policy CC-1.3 – Special emphasis on "building scale, placement, size, height, transitions, landscape, streetscape, and other design measures"

Adverse Impacts

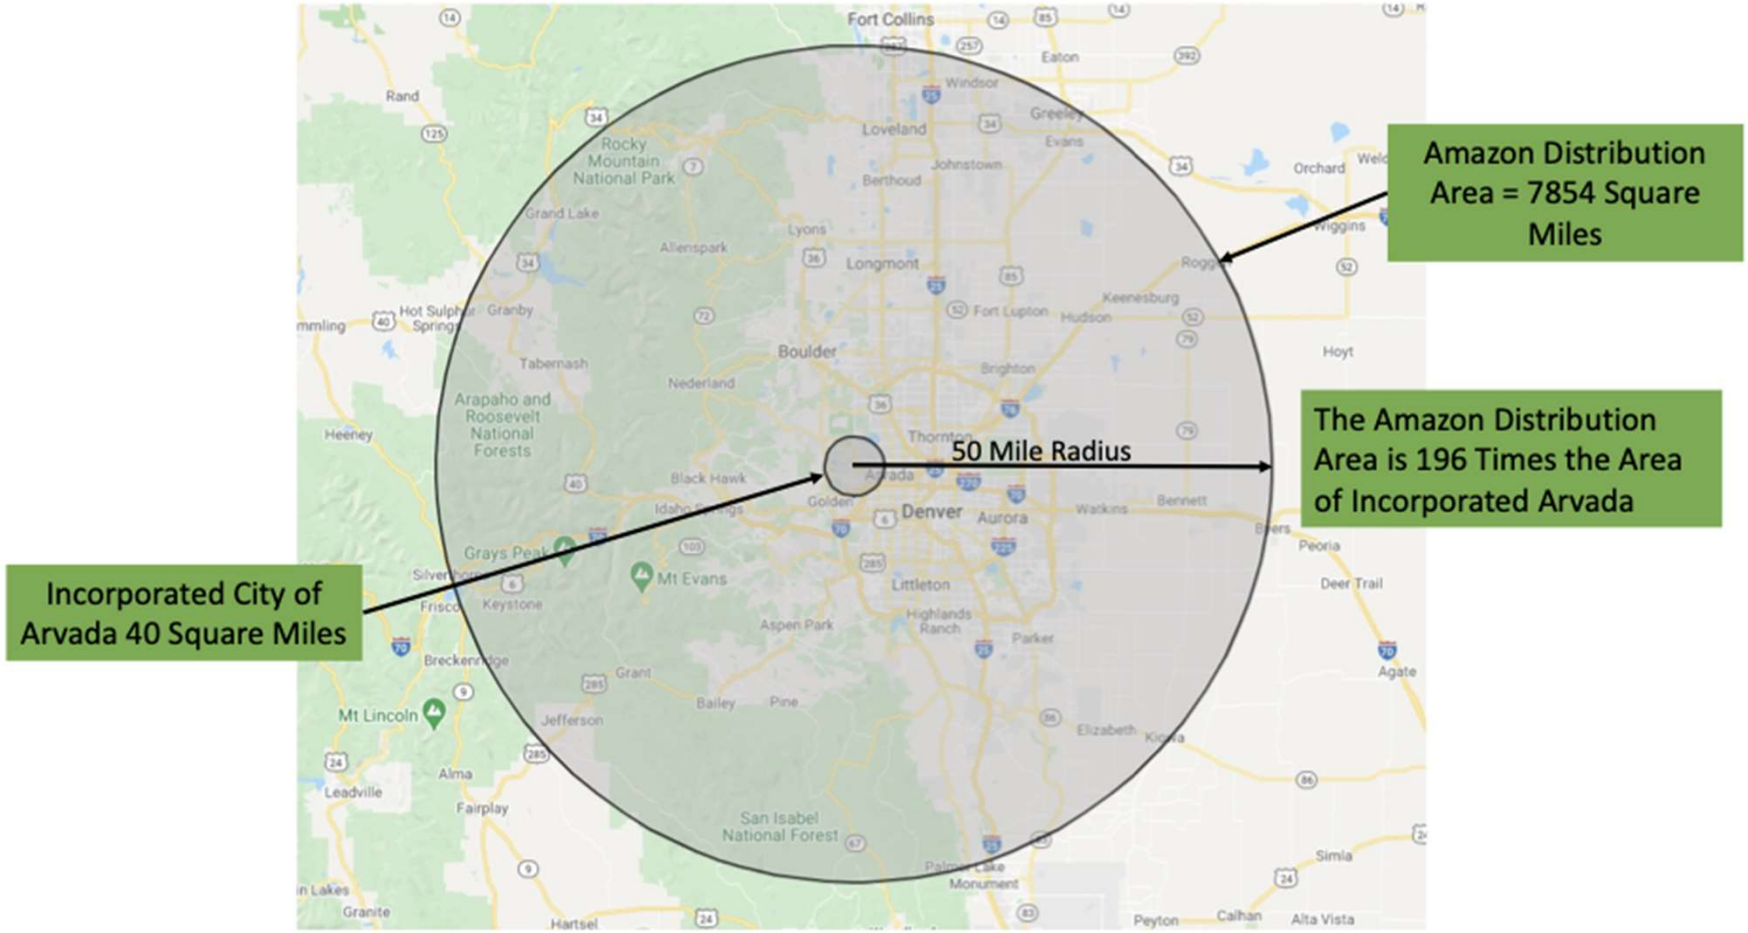
- Traffic—Insufficient Transportation Infrastructure
- 23 Acres of Parking—Stormwater Runoff, Noise & Light Pollution
- Adverse Environmental Impacts
- Incompatibility with Existing Uses



Traffic

Indiana Street Corridor Is Already Over Capacity

Traffic

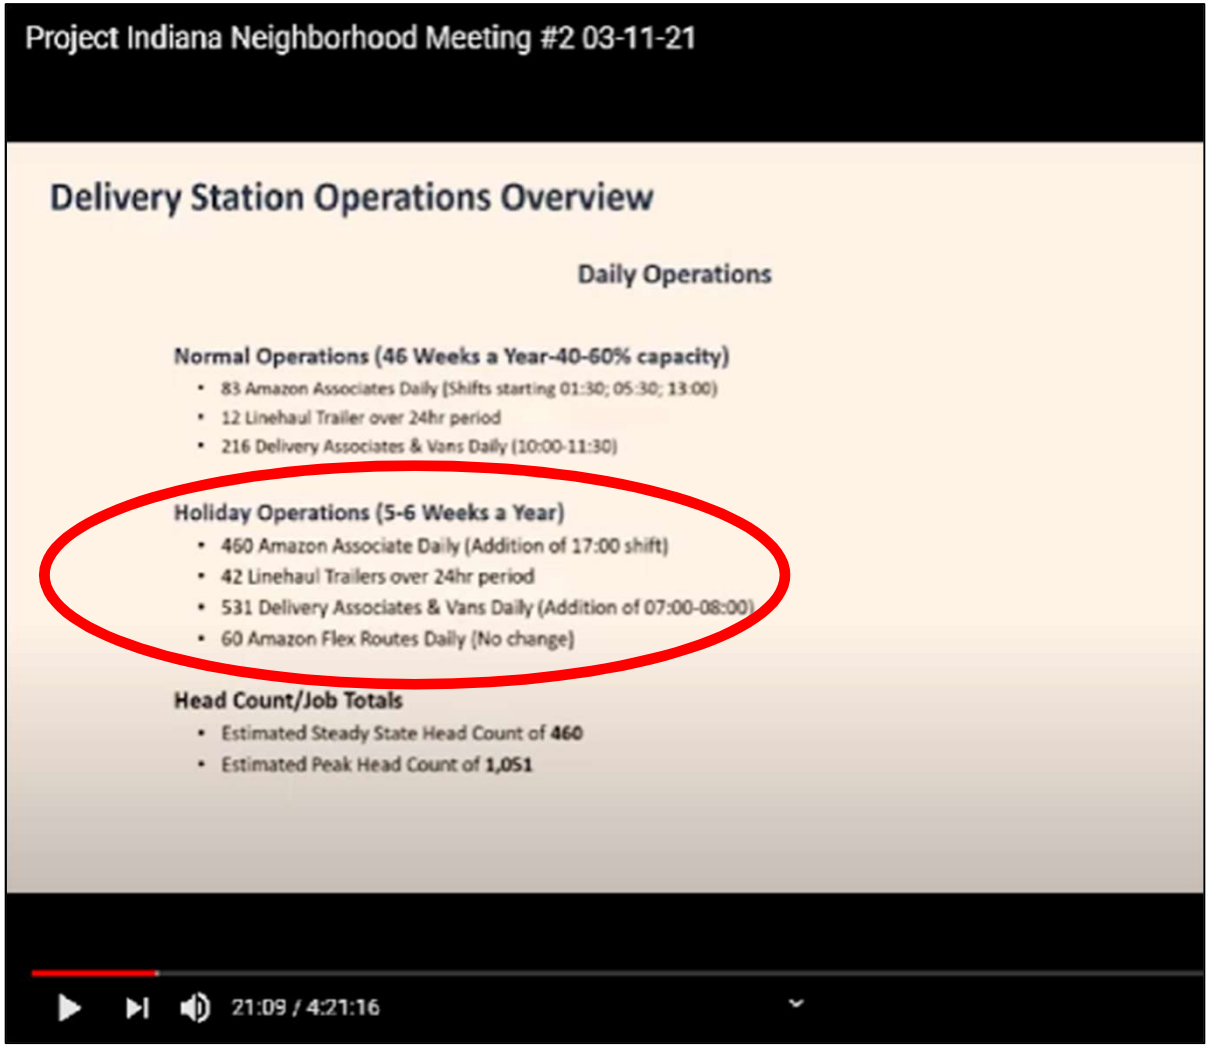


The Site Is Nearly 5 Miles (and Several Turns) from the Interstate

Traffic

Ralston Valley Coalition

Amazon Distribution Area Relative to Area of City of Arvada



Traffic "Study"

- Scannell Traffic "Study" Fails to Account for:
  - Baseline Traffic Counts in 2021 (Non-COVID)
  - Presumptive Traffic Assumptions
  - Annual Holiday Traffic Surge
  - Increased Delivery Traffic
  - Impact to Surrounding Neighborhoods

Traffic Volumes

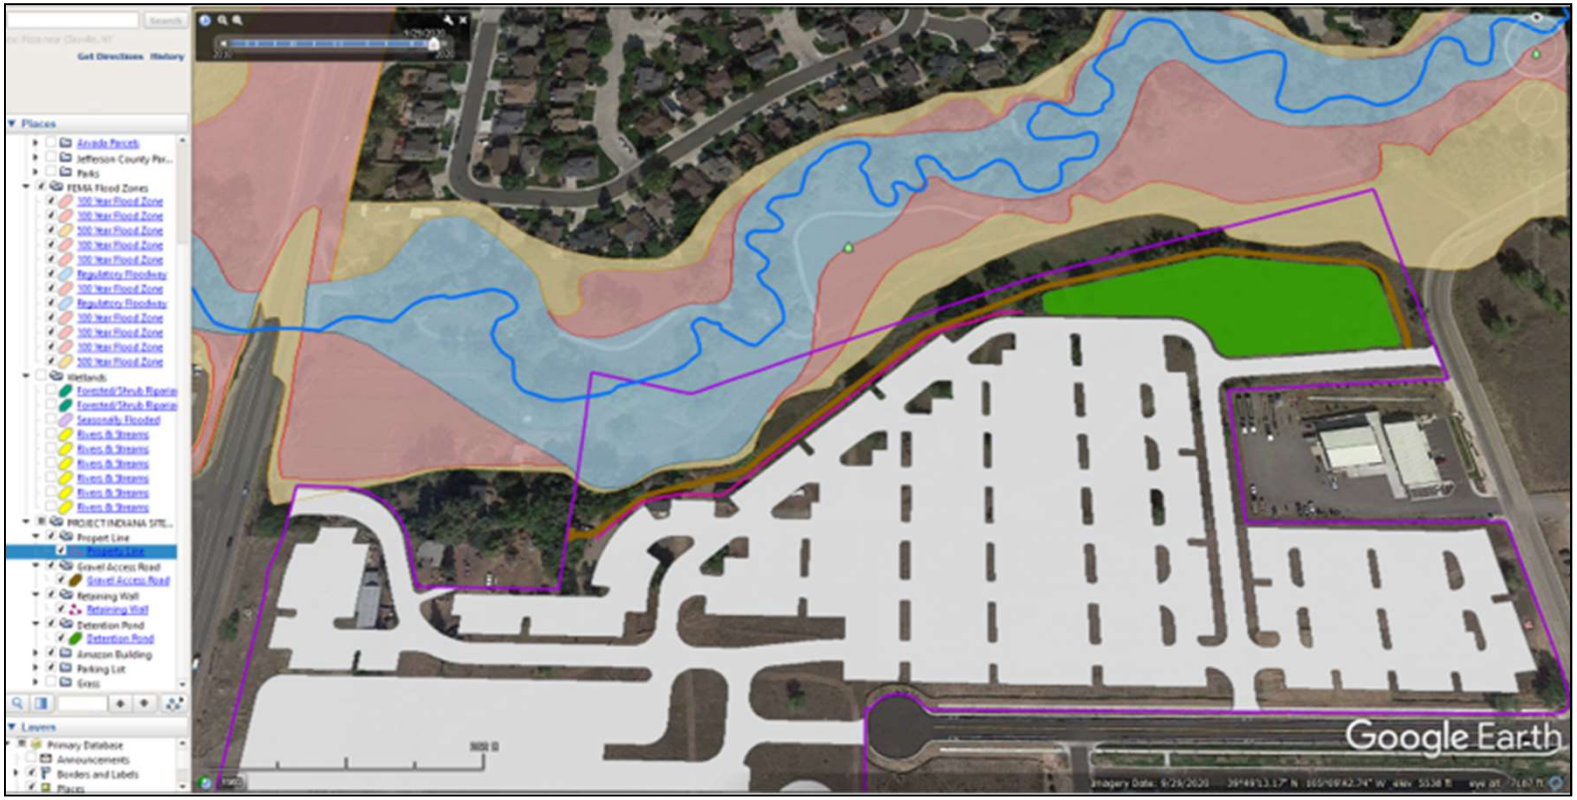
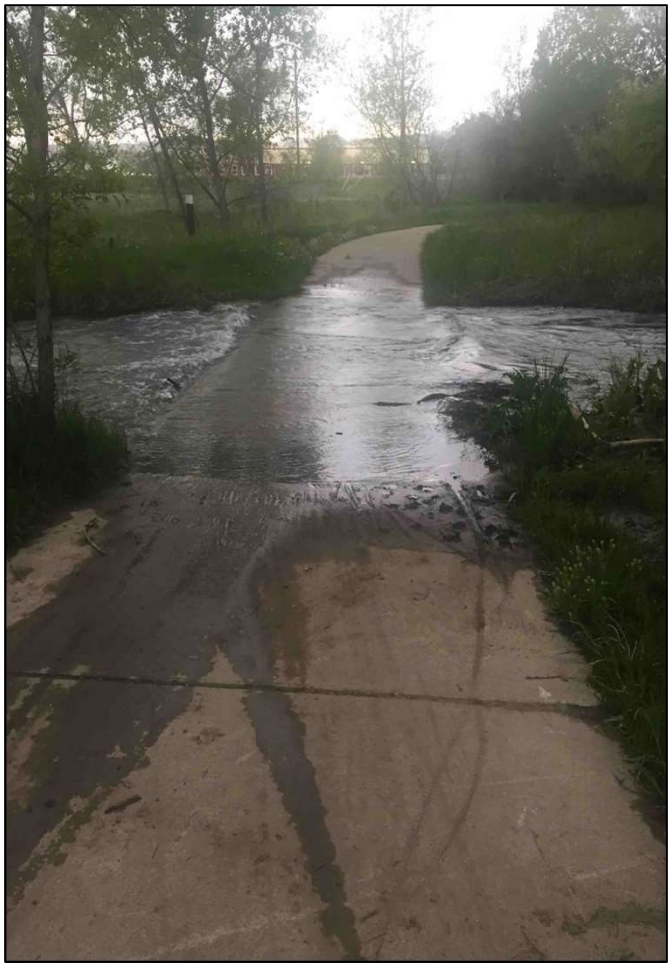
23 Acres of Parking



Ralston Valley Coalition

Stormwater Runoff

- 25.5 Acres of New Impervious Surface
  - No Parking Study – Why So Much Parking?
- Detention Pond
  - Passive Sedimentation
  - No Active Treatment of Suspended Heavy Metals, Gasoline, Oil, Etc.
  - Discharge Into Ralston Creek



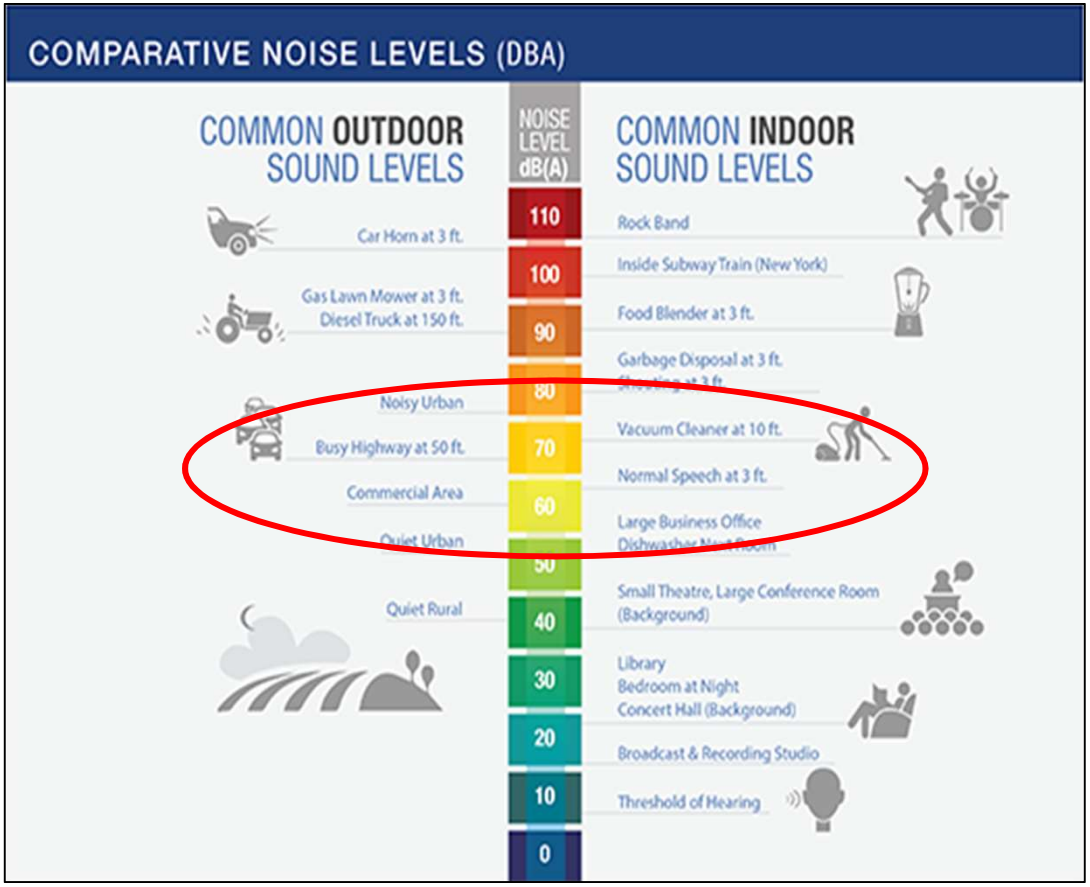
Stormwater Runoff

Stormwater Runoff

Arvada Report on Sept. 2013 Flood:

"Damages reported included water supply monitoring equipment destroyed at both Ralston Reservoir and Arvada/Blunn Reservoir; inflow channels were eroded; city water treatment plants had problems with turbid water; roadways were overtopped and houses were damaged; and stormwater and canal flows were commingled and canal embankments were breached."

Stormwater Runoff



Noise Pollution

Ralston Valley Coalition

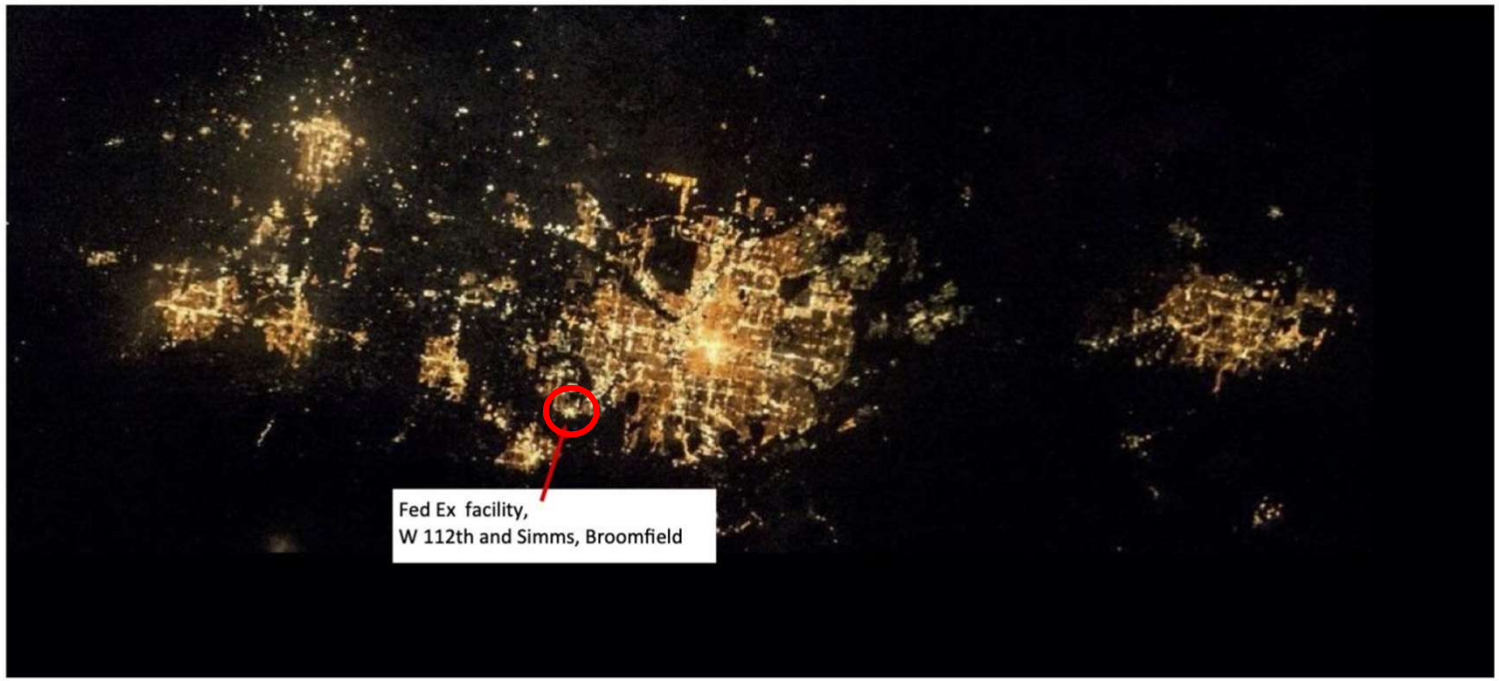
Arvada City Code Div. 38-91:

- Daytime Max. of **70 Decibels**
- Night time Max. of **65 Decibels**

Light Pollution

- Existing Light Pollution from 1,200 Feet Away:

Light Pollution



Ralston Valley Coalition

- Heavy Logistics Center Will Add 182 New Exterior Lights within 400 Feet of Homes
  - Scores of New 22-Foot Tall Street Lamps
  - Hundreds of Delivery Head Lights
- New Wall Will Only Partially Shield the Site

Light Pollution

Ralston Valley Coalition

View from space of a Similar Heavy Logistics Facility:

An image of the Front Range cities taken from the International Space Station - 2019.

Light Pollution

- Scannell's Light "Study" Does Not Consider:
  - Offsite Elevation Changes
  - Light Generated by Headlights from Hundreds of Delivery Vans

Adverse Environmental Impacts

Adverse Environmental Impacts

Adverse Environmental Impacts

- Maple Valley Park Ecological Assessment (Feb. 2021):
  - Important Floodplain and Unique Urban Wetlands
  - Critical Riparian Habitat
  - Highly Valued Natural Resource
- <u>Scannell Refused Recommendation to Conduct Biological Survey at the Site</u>

Adverse Environmental Impacts

Adverse Environmental Impacts

- Environmental Concerns Identified by Phase I Environmental Assessment:
  - Onsite Underground Fuel Storage Tanks
  - Historic Landfill Upgradient
  - Historic Vehicle Repair & Underground Waste Oil Storage Upgradient
  - PFAS from Upgradient
- <u>Scannell Refused Recommendation to Conduct Phase II Environmental Assessments</u>

Incompatibility

- L.D.C. Div. 1-1-1-2:
  - The Purpose of the L.D.C Is to "[p]rotect the quality and character of stable residential neighborhoods."
- A Heavy Logistics Facility Is Incompatible with Maple Valley Park and Existing Homes

Incompatibility

- Most of the Site Is Zoned JeffCo A2
- Comp. Plan Allows Office, Retail, Light Industrial
  - Proposed Use Is Not Light Industrial
- Infill Development Must Step Down Intensity Between 64th Avenue and 68th Avenue

Incompatibility

- Project Indiana Contradicts:
  - 2014 Arvada Comprehensive Plan
  - 2016 Arvada Parks, Trails & Open Space Master Plan
  - 2018 Arvada Arts & Cultural Master Plan
  - Arvada City Council Strategic Plan 2020-2025

Incompatibility

Incompatibility

Annexation & Rezoning

- Annexation – L.D.C. Div. 8-3-3-3:
  1) Compliance with Comprehensive Plan
  2) Capable of Integration Into City
  3) Sufficient Infrastructure
- Rezoning – L.D.C. Div. 8-3-4-2:
  1) Compliance with Comprehensive Plan
  2) Proposed Use Consistent with Proposed Zone
  3) Sufficient Infrastructure
  4) Adverse Impacts to Environment
  5) Incompatible with Existing Development

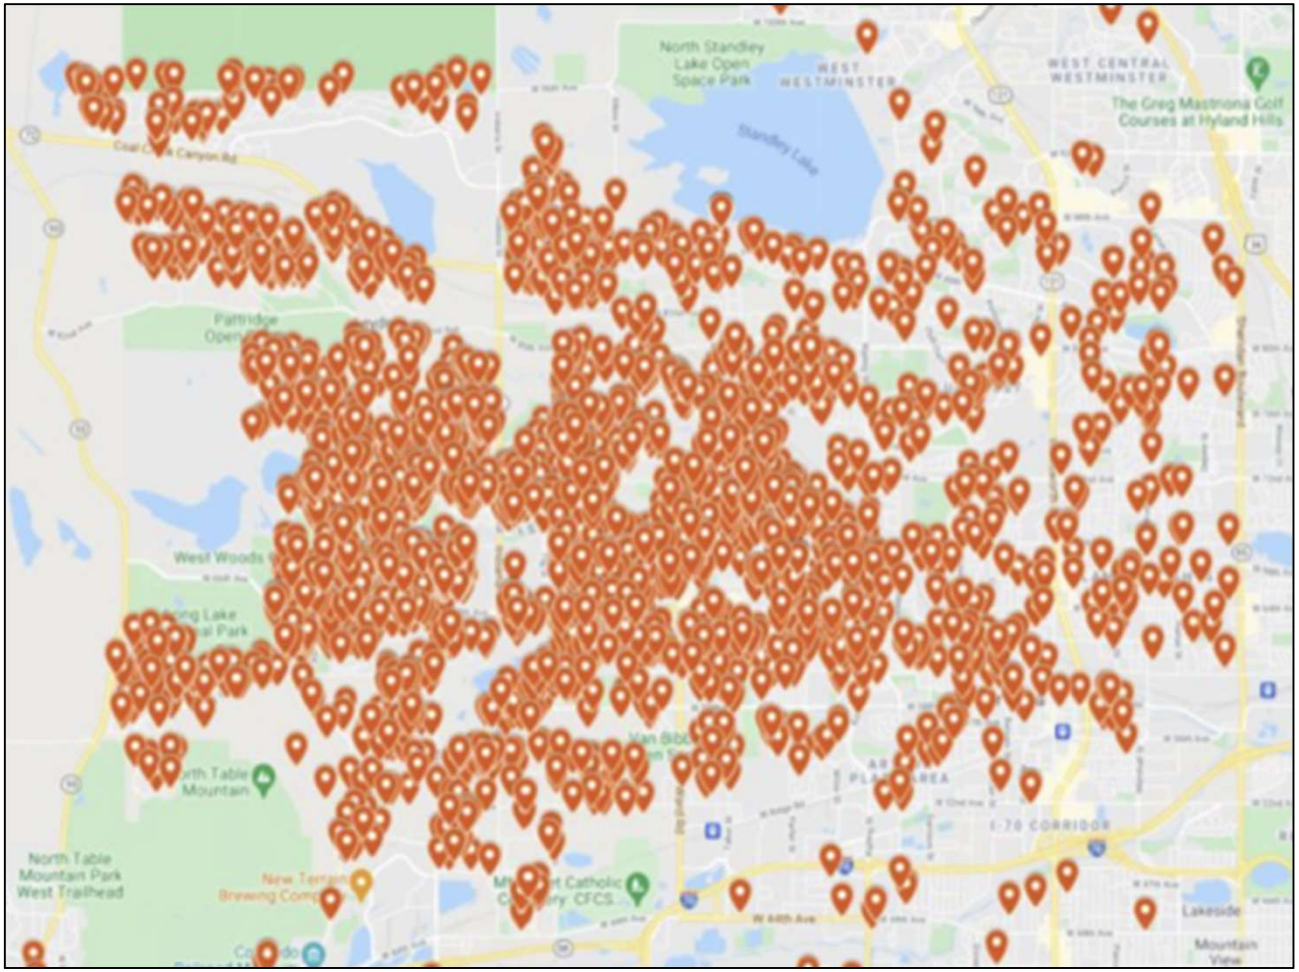
Unanswered Questions

Ralston Valley Coalition

Scannell Has Not Provided:

- Final Site Plan
- Complete Annexation Agreement
- Jefferson County Minor Adjustment Application
- Traffic Study for "Holiday" Volumes
- Parking Study
- Semi-Trailer Truck Routing Plan
- Active Water Treatment Plan
- Noise Study
- Light Study Accounting for Elevation Change & Vehicle Headlights
- Biological Survey
- Phase II Environmental Assessment

Basis for Denial



- Proposed Use Violates IL Zone
- Proposed Use Violates Comp. Plan
- Insufficient Traffic Infrastructure
- Significant Adverse Impact on Environment
- Incompatible with Existing Development

Referendum

- Annexation Is a Legislative Action that Can Be Referred to the Voters
  - Section 5.17 of the Arvada City Charter

Questions?

Ralston Valley Coalition

Stop amazon from increasing traffic related pollution

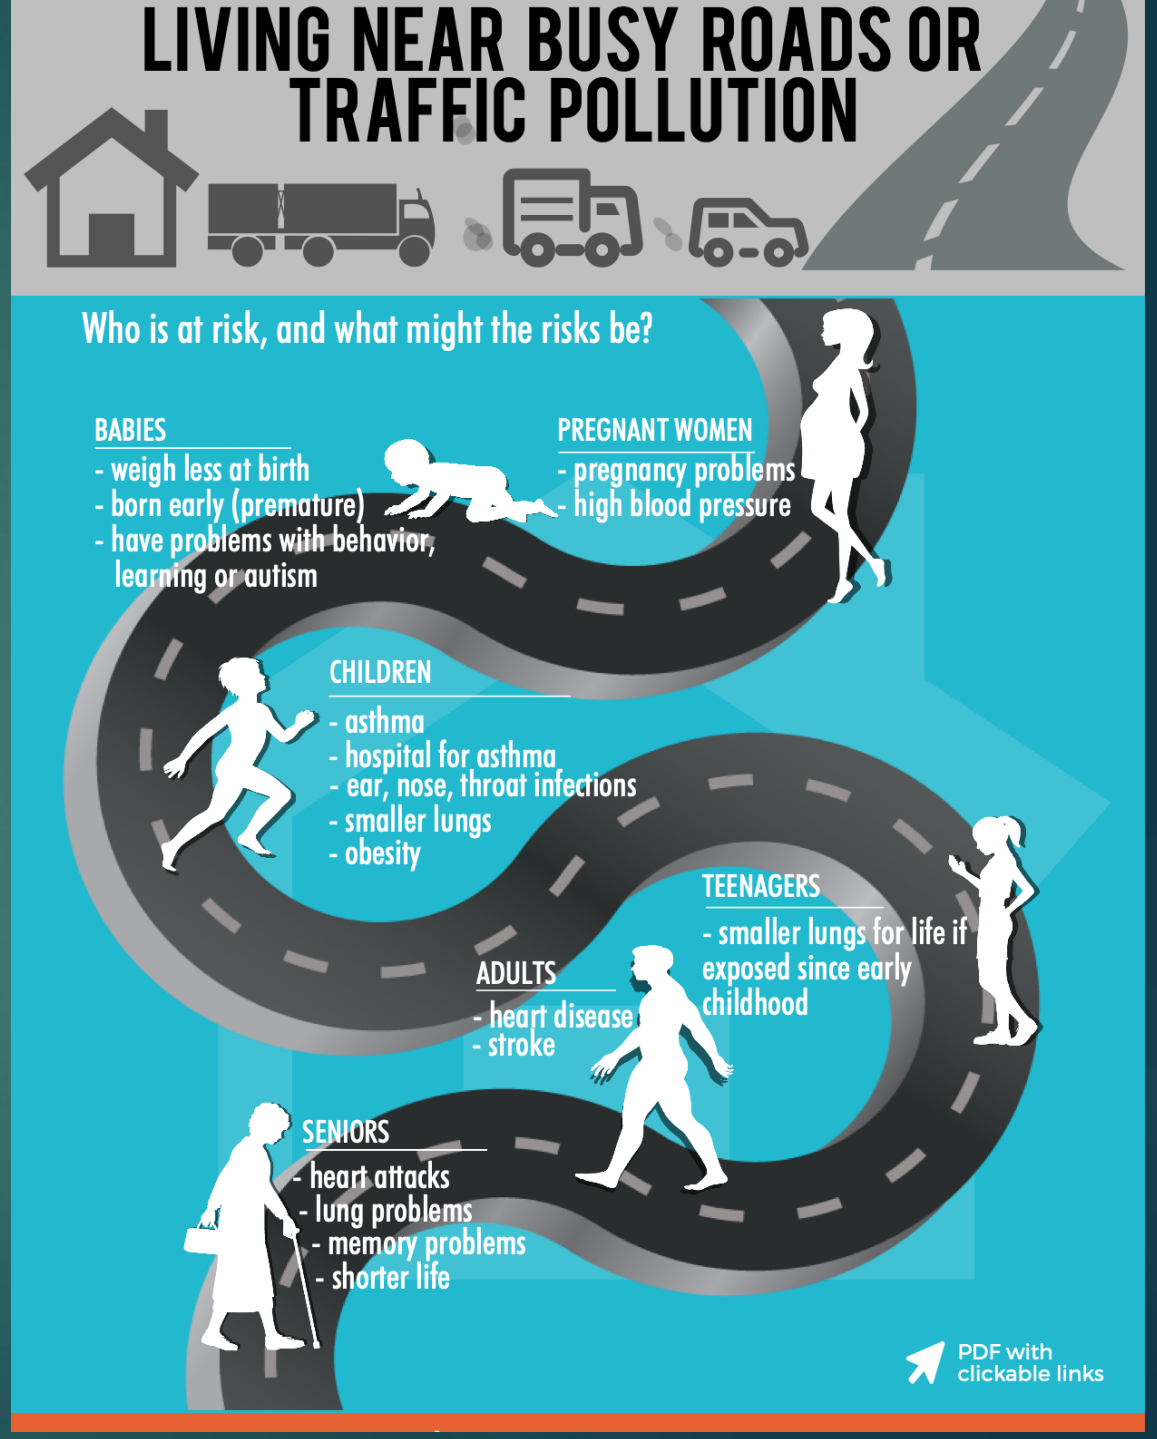
SAVE THE HEALTH OF ARVADA'S CHILDREN

ARVADA CITY COUNCIL
JUNE 14, 2021

SUSAN K. SMITH, MD

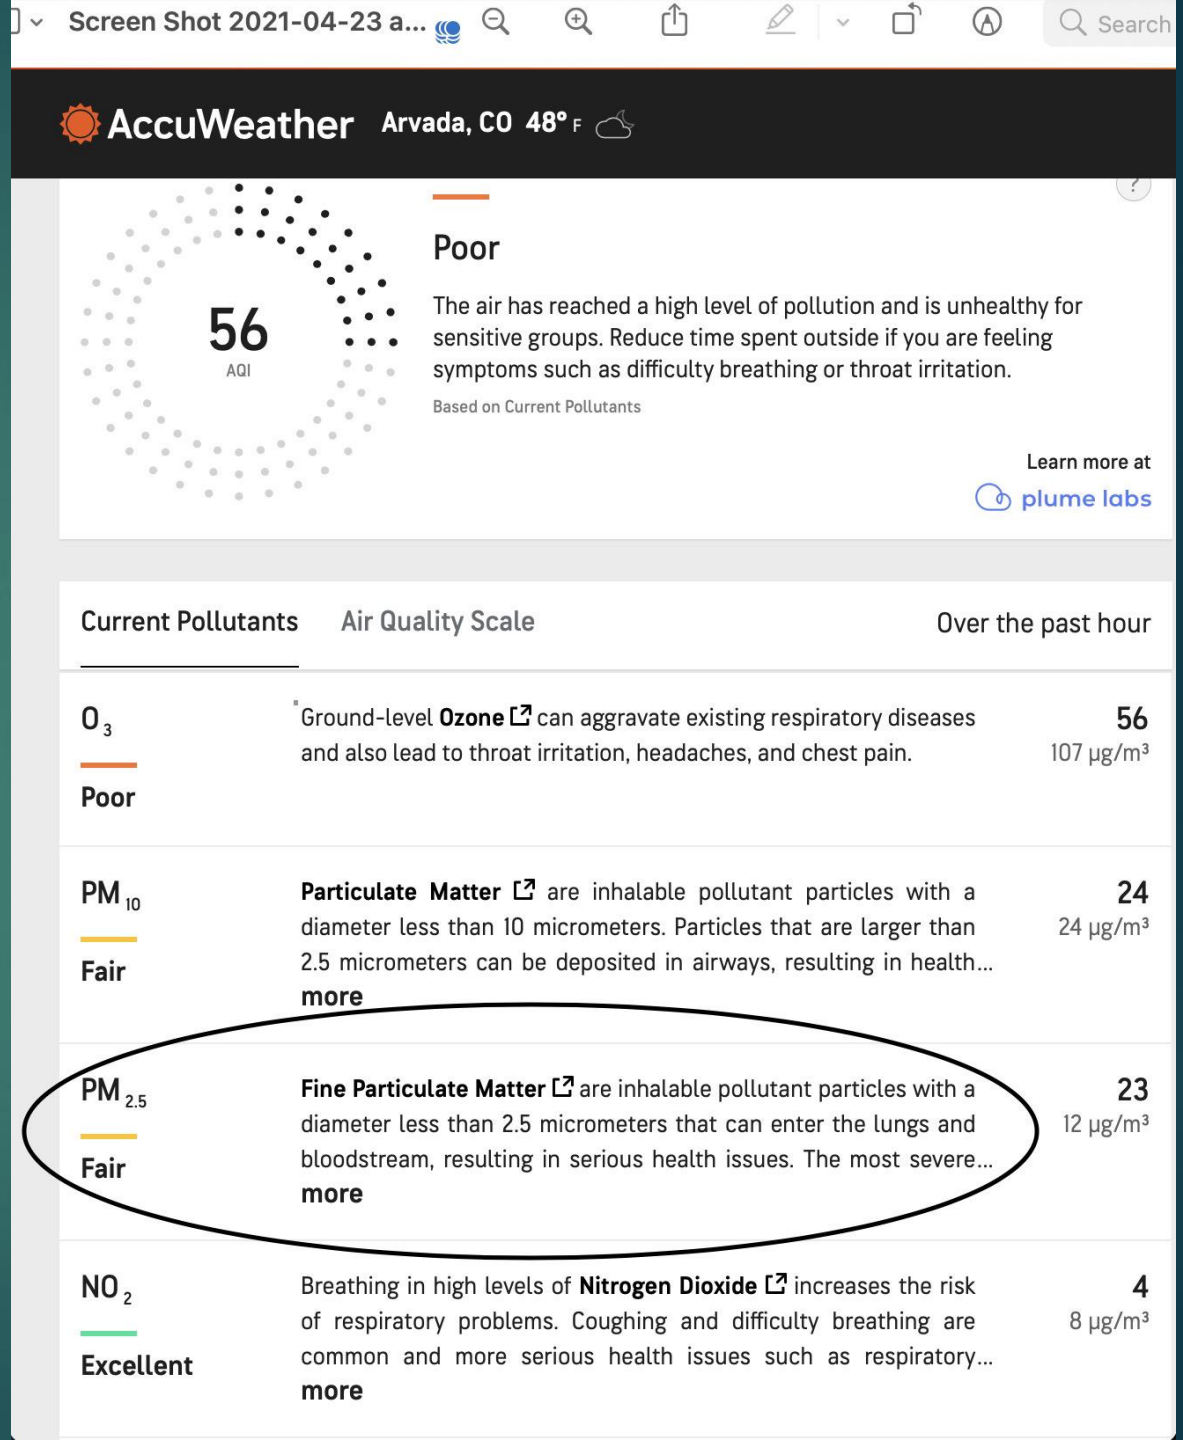
My Qualifications

Caption



- Pediatric ER physician
- Pediatric Hospitalist
- 30 plus years working in Children's Hospital system in Denver area, Las Vegas and Omaha
- 25 year resident of Arvada, live 1 mile from the proposed site
- active user of Arvada parks and trails

well known and extensively documented immediate effects of exposure to automotive traffic related pollutants (TRP)



mounting newer evidence of the harm automotive pollution is doing to all of our brains, but especially to children's neurological development

gestational and early child hood exposure to the tiny ulta fine particles in TRP increase the levels of AUTISM spectrum disorders, ADHD/ADD and behavioral issues as well as learning difficulties

also non neurological damages of low birth weight, permanently lower lung volumes and increased asthma/illnesses

- this ultra fine particulate component of TRP is heavy, unlike gaseous pollutants, so it stays close to ground and doesn't easily dissipate
- the proposed site is so close to foothills which cause weather inversions that will further traps pollutants resulting in even more poor days
- TRP includes exhaust and NON-EXHAUST sources and they contribute almost equally to harmful PM10 and PM2.5 emissions
- non exhaust sources are from brake, tire, clutch and road surface wear, so roads with high density and traffic lights are particularly bad contributors

1000's of daily Amazon vehicles on our major roads, will increase traffic related pollution

majority of Arvada daycares/ preschools (pink) and schools (blue) are along these roads

Fwd: My Comments on Project Indiana for June 14th City Council Meeting

1 message

Kristen Rush <kristen@arvada.org> Mon, Jun 14, 2021 at 1:49 PM
To: Josie Suk <jsuk@arvada.org>

---------- Forwarded message ---------
From: **Andrew Rayburn** <[redacted]>
Date: Mon, Jun 14, 2021 at 1:35 PM
Subject: My Comments on Project Indiana for June 14th City Council Meeting
To: <kristen@arvada.org>

Dear Ms. Rush,

I am writing to express that I am with the nearly 9000 Arvadans who have already signed in **opposition of the proposed annexation and rezoning of land from agricultural to light industrial for the proposed Project Indiana development**. The most obvious and automatic basis for denial is Scannell's own admission that the **proposed use will generate a volume of truck traffic that cannot exist within the requested IL (Industrial, Light) Zone**. The proposed Amazon Delivery Station will operate as a "Heavy Logistics Center", which is a heavy industrial use that **can only lawfully exist within Arvada's IG (Industrial, General) Zone according to the Arvada Land Development Code.** The "Heavy Logistics Center"does not belong in this location, and is suited for an area closer to highways and away from neighborhoods in order to minimize detrimental impacts.

My opposition is not of planned development in general; however the the proposed INCOMPATIBLE USE of this land will alter the character of the community, the relatively peaceful evenings me and my neighbors depend on, and will negatively impact property values of the homes in the immediate area (we live only a few blocks from this area). The Arvada Arts and Culture Master Plan, and the Arvada Parks, Trails and Open Space Plan shows the area as a high priority area to utilize for increasing or improving the park system or as a possible Second Arts and Culture Hub for the City. **I would support an alternative that aligns with the Arvada Arts and Culture Master Plan and the Arvada Parks, Trails and Open Space Plan.** The residents in this area value our adjacent open space and many of us moved to this area to enjoy the walking trails, the pocket parks along the trail network, to enjoy wildlife viewing and appreciate these important habitats.

Project Indiana proposes to rezone 36+ acres of land to Light Industry, remove hundreds of mature trees and add a 25-acre parking lot (the largest in Arvada and within 20 feet of the Ralston Creek Trail). Allowing this industrial use of the land, most of which is currently zoned agricultural, will add **noise, light, and air pollution** that will be **detrimental to nearby residents and the wildlife in the adjacent open space**. The light, noise, and air pollution associated with a 24/7 distribution center will undoubtedly have a significant detrimental impact on not only the citizens of West Arvada, but also on the wildlife along the trail and in the Maple Valley Park. The proposed property currently has many Recognized Environmental Conditions (REC) per the Phase I Environmental Site Assessment (Terracon Project No. 25207246) and these REC should be addressed and mitigated prior to any development or disturbance of the land. The proposed building site would include a 112,000+sf, 4-story warehouse with a 56,000+sf outdoor loading canopy, over 1,000 parking spaces and would produce upwards of 1,000 van, semi-truck, and flex vehicles trips 24 hours a day, 7 days a week. Given the high number of "truck" (van + semi) trips per day expected to be produced by this facility, **traffic congestion** to the surrounding areas from the proposed project will be substantial. The nearest highway is 5 miles away. Ward Road, 64th, Indiana and McIntyre are already traffic clogged, and the numerous housing developments proposed or being built now will increase traffic even more. Our roadways and neighborhoods will suffer from heavy truck traffic day and night.

I encourage the Arvada City Council to consider both the **environmental impacts** mentioned and the **negative impact for nearby residents**. We (the community and residents) are not opposed to a less intrusive use for this property that supports the culture and character of this community.

Exhibit E- Public Comment June 10-14, 2021

As representatives of the citizens of Arvada, I urge Mayor Williams and City Council Members to vote **NO** on this **incompatible project**!

Sincerely,

Andrew Rayburn

Dear City Council Members,

I am writing to voice our neighborhood's opposition to Project Indiana.

We believe this development is in conflict with the goals stated in the Arvada Land Development Code and we expect you to deny the request for rezoning.

We reference the following items from the Code, with reasoning supporting why we feel Project Indiana is in conflict.

"Promote the public health, safety, convenience, comfort, prosperity, and general welfare"

"Protect the quality and character of stable residential neighborhoods"

"Promote the economic development and fiscal sustainability of the City"

"Ensure the provision of adequate public facilities and services for new development and redevelopment"

"Provide protection from nuisances and hazards"

Exhibit F- Public Comment June 10-14, 2021

We highlight the potential increase of diesel emissions in proximity to child care centers, further increases in traffic volume over already overcrowded, under-maintained roadways, impacts to existing residential neighborhoods' comfort and general welfare.

We do not currently have the infrastructure/services needed to support this development. Indiana Street is currently overloaded with traffic volume, and the city and CDOT have stated they do not have the money to improve it as needed. We feel developments of this kind should be pushed back to a time when the city/CDOT has fully prepared for the increased traffic.
Further, the city is unable to enforce its current noise ordinance and we would therefore argue no further aggravation should be introduced.
Greatly increased semi-truck traffic planned for the intersection of 64th Avenue & Gardenia Street would create further noise ordinance violations and further degrade the quality of existing streets.
The argument for single provider trash/recycling was to DECREASE heavy vehicle traffic on our streets.
This is not consistent with the reasoning we're hearing behind Project Indiana.

I have asked city officials how Project Indiana financially benefits the City. I have not received any answer back to date. Sales tax does not increase, as tax is still collected on point of delivery (the end user's address). I have also been told, in the past, that property taxes are not a huge source of revenue for the city, as the majority of taxes goes to the County. We also cannot argue that vehicle registrations will benefit the City, as almost all of those fees also go to the County. What are we missing? Do City Council members or the Mayor get financial incentives personally from Amazon?

We are wondering why this would go forward with the large amount of citizen disapproval.

We expect, as representatives of the citizens of Arvada who have voiced our opposition, that you will not approve this rezoning.

Thank you,

Anne Schweitzer
President

Subject: Reject the Annexation and Rezoning Application tonight
To:

Dear Arvada City Council:

I urge you to reject Scannell's Annexation and Rezoning Application tonight at the hearing on June 14, 2021. I adamantly oppose the annexation and rezoning of land for "Project Indiana" and also oppose other land use approvals sought by Scannell.

Scannell seeks to irrevocably damage the character of this community by destroying open space, mature trees, animal habitats, and by annexing and rezoning land that is not currently designated for heavy logistics—nor should it be. My family has lived in this area for decades, and I am intimately familiar with its character. It is an open space-oriented community that values low impact land use. That is why we choose to live here, as opposed to more developed parts of Colorado.

This area of Arvada is an oasis that has not fallen prey to overdevelopment. There is a humbling stillness, especially at night, when the sky is deep and dark, sprinkled with stars. There is a quiet that is so rare and statue-esque that it's almost impossible to experience it outside of the mountains or mountain homes. Yet we have that in our part of Arvada. The Amazon warehouse as proposed (being dependent on land annexation and rezoning) will destroy that sanctity.

The nighttime light pollution from a 24/7 facility whose land has been annexed and rezoned will have a detrimental effect on wild birds in the area. Artificial lights at night disorient and confuse birds, disrupting their migratory patterns and threatening their survival. Taking care not to have a lit facility every night of the year is especially critical in this area because the West Woods Golf Club is a designated Audubon International Cooperative. Less than 2% of the world's golf courses hold that Audubon designation. If the Annexation and Rezoning Application is approved, the 24/7 imposition of the Amazon warehouse will negate years of effort from the West Woods Golf Club and Audubon Society to preserve wild birds here.

My opposition to Project Indiana isn't rooted in cognitive dissonance that allows me to patronize Amazon while saying "Not In My Backyard." about its proposed warehouse here. I'm an Amazon customer and hardly what anyone would call an ardent critic. What I am exercising now is judgment about the destruction of land and the destructive imposition of light pollution that will occur if a 24/7 industrial usage warehouse is shoehorned into a location that does not currently permit such. As a responsible consumer, I can—and already do—plan my online purchases while taking into account shipping time. As a responsible consumer, I can easily resist the unnecessary allure of same-day delivery. (After all, I like to contribute to the health of the local economy by buying items on the same day from brick-and-mortar stores in my neighborhood.) What I cannot do is rebuild an ecosystem or an animal habitat or an open space if you vote to destroy them.

I'm also not "opposed to Amazon on principle." For example, let's imagine years back to when the former Albertson's/former Walmart sat empty at 64th and Indiana, before the church or Malone's existed there. If Amazon had suggested at that time years ago that it wanted to move into that already-existing empty building and repurpose it into a warehouse, I'd have been unlikely to object. My objection now, and why I urge you to reject the Annexation and Rezoning Application, is because of the irreversible damage that Project Indiana will levy on the character of this community that prioritizes open space and low-impact land use.

Please reject Scannell's Annexation and Rezoning Application.

Sincerely,
Anneliese Rix

Ladies and Gentlemen;

It is only a few hours now until the long-anticipated June 14th Arvada City Council meeting where a very important decision will be made about the proposed Amazon Distribution Center on Indiana and West 66th Avenue. I have continuously followed developments and am absolutely convinced that approval of this facility at this location would be the wrong decision. I ask that you respect the strong opposition to this plan by your constituents and vote to deny fulfillment of the application by Scannell Properties/Amazon. It is simply an inappropriate location for it.

I hope you can instead see the vision of this property being used as originally planned, as a walkable Town Center where small businesses, restaurants and a place to enhance the Arts and Cultural possibilities for Arvada, of which we have few. Remember also that this alternate type of development would generate taxes that would rival the $375,000 Amazon claims they will contribute.

A couple of final thoughts:

Where do the developers propose that the drivers of the delivery vans will live. It is my understanding that the pay would be under $20 hourly. While it is true that housing is springing up like weeds all over town, it is not affordable housing. It is unreasonably optimistic to think one could afford the average price of housing in the Denver area on an income of about $3000 a month. More affordable housing might be more easily found closer to major highways in more remote areas.

Approximately ½ mile east of the proposed facility, the front of my townhouse faces 64th Avenue, which is approximately 70 feet away. I stand at my kitchen sink while prepping food or doing dishes, and I can see the flow of traffic on 64th at all hours of the day and night. Believe me, it is already very heavy at all hours. The noise from the traffic, already including a large volume of commercial vehicles, makes outdoor conversation almost impossible. The developers and most of the Arvada City Council do not live close to the proposed facility and have the advantage of my real-time traffic study. The 'official' traffic studies done can and have been slanted to the advantage of the developers and Amazon and are not to be believed. The people who live in and use the streets around the site know the truth and have spoken out against the volume and effect of increased traffic on our commutes and on the condition of our already maintenance-poor main streets.

Please, make the intelligent choice tonight – the one the people want and need from you.

Vote No to Scannell and Amazon !!!!

STATEMENT IN OPPOSITION TO INDIANA PROJECT

June 14, 2021

WRONG LOCATION

Amazon's Arvada plan differs from all Amazon hubs in metropolitan Denver. It is the only one so close to homes. Amazon centers in Centennial and Denver are in industrial areas. Amazon centers in Aurora and Thornton are in industrial or retail areas near I-70 and I-25. All are far from residential neighborhoods.

So, the City of Arvada is the only municipality in Metro Denver ready to play the chump for Amazon.

Our city director of community and economic development stated, "Our *understanding* … is that it is a much smaller distribution hub." In fact, **this facility is not small enough for the proposed location**. It is like the old wine and sewage adage: *A drop of wine in sewage is sewage – and a drop of sewage in wine is sewage*. No matter how small the hub, the noise, traffic, light, and environmental degradation will disrupt and pollute the neighborhood because such a facility is not compatible with the character of the residential neighborhood.

Who really benefits from this land grab and rezoning? Not the city or residents. Only the property owner. There is no benefit to the Maple Valley neighborhood, to the nearby neighborhoods like our own Spring Mesa, to the wildlife, or to the city tax-base. Even the jobs would not necessarily be Arvada jobs. All Arvada residents get from the deal is noise, traffic, light, and environmental degradation, which will impact the well-being and sanity of those nearby – humans and wildlife. **The project should be re-located to a suitable industrial location and the 200 - 325 new jobs will still obtain.** Take it east of Lamar and north of I-76 where it will fit in.

WIDESPREAD COMMUNITY OPPOSITION

Everyone we speak with here in Spring Mesa and elsewhere in Arvada sees this proposed location as nuts. Semi-truck traffic day and night on Indiana and delivery trucks in and out every day will degrade pavement and jam traffic on this already busy street. You recently spent a fortune on the project at 72nd and Indiana. Do you seek another street widening and intersection do-over – *or what?*

Whose park/open space is next? Residents buy homes in a 'social compact' that assures our parks and open spaces will not be modified or rezoned for industrial/commercial uses. If you approve this project, will the open space behind our Spring Mesa home be re-zoned for a bottling plant?? No homeowner can count on anything if this council approves this proposed Amazon location.

No amount of bogus "buffering" by Amazon can make this proposed location acceptable. The Arvada Arts & Culture Master Plan identifies this site as a potential centerpiece for arts and culture. A noisy, light polluting, traffic jamming Amazon fulfillment hub is not arts and culture. It is a step backward not forward.

REFERENDUM

Overruling community opposition would be a big mistake. If you insist on pursuing this proposed location, the proper path is to present it to voters in a referendum. That way, we can run a public education campaign to inform all Arvada residents that the parks and open spaces adjacent to their homes are subject to rezoning for inappropriate commercial and industrial uses.

Subject: Amazon Dist. Center

Dear City Council,
Please do not approve this center located on Fig and Indiana and close to 64thAve.
1. Our roads are congested and damaged already and Indiana has the two lane bottle neck because of train underpass. At rush hour cars are lined up and slowed to crawl from Hyw.72 to Ralston Road. Semi's may be at night but delivery vans will be constant.
2. The huge asphalt parking lot will drain oil, dirt, salt and other pollutants into Ralston creek.
3. Semi's waiting in line on Fig St. will further pollute our air and water with exhaust, etc.
4. The location is over 5 miles to an interstate hwy. Most other centers are 1 mile or less. It needs to be placed away from residential neighborhoods and closer to an interstate.
I realize the taxes collected would be a lot but road damage, pollution and noise and congestion disturbance have great value also. You must vote no .. at least to this location.

To: <kristen@arvada.org>

Hello Kristen,
I read on the city of arvada website that I am able to email you for the public comment section. Below is what I would like to say:

I am a Colorado and an Arvada native. Arvada has always had a small town, community and business forward outlook. Colorado and Arvada in particular is growing at an exponential rate, people moving here, starting families and wanting to be more involved with their neighbors and community. I am one of these people, I am younger, 30 years old, my husband and I came back to Arvada and just bought our first home in Maple Valley Park this past year, making this new possible development even more disappointing. I truly believe this 24/7 Amazon distribution center strips away what Arvada stands for.

With that said, covid really put a damper on making connections and a full stop on events; brighter days ahead of us. This being the true Arvada move to build an 'old town' Arvada in this location. Supporting small business entrepreneurs, musicians, artists, farmers markets, bar and restaurant owners. Jobs and community would grow!

Not only am I looking out for the small-town business owners, but also our road infrastructure. Indiana is not set up to handle this much traffic, especially semi's! It will cause so many more people on this already terrible pot-holed tiny road, and will make the city need to do repairs and rebuild faster.

Please make your considerations on what is best for the community of Arvada for NOW and the FUTURE, instead of this faceless corporate empire that isn't people or community forward.

Thank you,
Carolyn Copeland

Subject: Public Comments on Project Indiana for the Record

Hello City Council,

I urge City Council members to vote "no" on Project Indiana re-zoning and annexation. Arvada residents will not benefit from the proposed location. For instance:

1. We already get Amazon packages. The "last mile facility" will support locations up to 50 miles away such as Berthoud and Grand Lake. The facility will only benefit Amazon's bottom-line and improve competition. This has nothing to do with Arvadans.

2. Fortune magazine encouraged local officials to close the Amazon spigot. The article pressed officials support and promote local businesses due to Amazon's aggressive tactics.

    a. The article reported Amazon facilities have devastated local economies such as Arlington Heights, Illinois; Fort Bend County, Texas; and Windsor, Connecticut. More locations are in the article.
    b. Amazon stated the annual benefit to Arvada is $375,000 in property taxes; and
    c. wouldn't a walkable village be better to gain higher revenue from sales and property taxes?

3. Amazon is only about Amazon

    a. their financial statements explain Amazon is a global technology organization and committed to long term thinking;
    b. they added on-line grocers and physical stores as their competition. I believe Amazon desires to compete with other physical stores.
    c. there are 10 physical stores within 5 miles of 64th and Indiana. This may answer why Amazon desires a location in our neighborhoods;
    d. the traffic may increase by about 3,500 daily trips if Amazon desires to deliver groceries;
    e. In my opinion, a "yes" vote is high risk. Amazon leases more facilities than it owns. Therefore, Amazon can break a lease. If so, Arvadans could be stuck with an empty facility and parking lot; and

f. the March 11, 2021, meeting. Amazon claimed Arvada small businesses would benefit from the facility. Yet, Amazon did not identify Arvada businesses they intend to work with.

Exhibit F- Public Comment June 10-14, 2021

4. City Council needs to apply strategies that it reports:

   a. remember 66th and Indiana is a possible centerpiece for arts and culture;
   b. address transportation issues. Transportation received Arvada's lowest rating in the 2019 Community Survey. In 2018, forty percent of residents thought street congestion was unfavorable especially on the state highways, Sheridan, Wadsworth, and Indiana;
   c. maintain the commitment to small town tradition, even during growth;
   d. leave Ralston Creek trail alone. It is a premier trail in Arvada; and
   e. honor the residents committed to consolidating trash hauling. They are trying to reduce the number of trucks on streets, wear and tear on the roads, and noise and air pollution.

Please vote "no." Twenty-five acres of light industrial parking is ugly, not consistent with adjacent properties or the neighborhood. It is incompatible with Arvada! Rezoning and annexing land for Amazon is risky, only benefits Amazon, and does not benefit residents. Meanwhile, the city can assess viability of a walkable village.

Hello, Arvada Officials.

Due to the restrictions on in-person attendance at tonight's meeting, I opted to send this email instead. I sincerely hope you take my thoughts to heart as I am not alone in the views expressed in this email. I am happy to discuss my concerns with any of you, if you prefer an in-person conversation. My statement is below.

Thank you for serving our community. I hope you come to tonight's meeting with an open heart and mind to hear the concerns from friends and neighbors about the community we all love.

Chris Carrasco Johnson
[redacted] Place
[redacted]

My statement:

I moved to Arvada because it *was* The Farm in the City. When I first moved to Arvada, one was just as likely to see a horse on a trail as a child on a bike. In recent years, I have seen explosive growth in Arvada. Sadly, growth is a fact of life in the metro area, but our city planners have it within their power to curtail improper growth and preserve the greatest value to our homes, community, and lifestyle: The Farm in the City community. Once we overdevelop, the rare Arvada culture we built will be forever lost.

One step you can take to curtail the wrong kind of growth is to *please* stop rezoning property for commercial use.

We should also control the types of businesses that move to Arvada. Small, Colorado-owned, family businesses should be our focus. Enough already with the high-traffic, big-box, light and noise polluting, larger businesses. i.e. Urgent Care centers, and yes, Amazon.

Some Arvada government officials have said that members of the Arvada government cannot control the types of businesses that move into our area. I find it hard to believe that the Arvada government cannot pass guidelines and laws to protect our community from improper development.

That being said, what we can control is zoning. I implore you to stop rezoning land for commercial use. In addition, open your rosters to consider community proposals for rezoning land back to residential status.

Bottom line: Please join members of our beloved community in a concerted effort to protect our Farm in the City culture and environment before it is too late!

Subject: Amazon warehouse and Ralston Trail/Indiana

I am expressing my opposition to the Amazon facility on Indiana. Indiana is too busy to support this facility. My husband worked close to 62nd and Downing before and after Amazon was built. All of a sudden there were over 200-300 (possibly more) additional cars to contend with when employees came and left before and after work, as well as the delivery cars and trucks. And that was a heavy industrial area well equipped for this type of business. It is already a nightmare getting around on Indiana, we don't that much need more traffic on Indiana.

The Ralston Valley Trail is too precious. I go out of my way to walk or bike on that trail. There are owls, hawks and all kinds of beautiful creatures hidden there. Owls makes nests there! One day I was walking and a hawk was on a tree about 10 feet off the ground, just watching the trail.

There is already a housing compex too close to the trail towards Mcintyre. A huge 24 hour facility? No. Opposition says, it is zoned for this. Does that mean it has to be approved? No. Opposition says it is better than a big box. Does that mean a big box must go in in place of this? No. Arvada has other areas perfect for this facility. Marshall/Lamar and Ralston would be a great fit and still allow Amazon to service the Arvada area. Our beatiful western Arvada area is becoming a traffic nightmare. Let's not make it worse and ruin one of our finest treasures.

Subject: Subject: Amazon is not the answer

Over the years, the Arvada city planners have taken hard looks at the Arvada West area, and have created a vision of a second cultural hub for the City. This cultural hub would integrate key features of the Arvada City Council Strategic Plan (2020-2025), the Arvada Parks, Trails, and Open Space Master Plan (2016), and the 2018 Arvada Arts and Cultural Master Plan. This vision includes a mixed use area of housing, shopping, and recreation, something many towns and cities are seeking whenever and wherever possible.

Arvada West is blessed with something that makes the vision even more spectacular. Water. Moving water. Ralston Creek is a natural magnet, automatically drawing people to the area. Even Olde Town Arvada had to add water to try to increase its appeal. Ralston Creek is a gift that should not be squandered.

The Amazon proposal is not just incompatible. It's a complete loss of a remarkable area, a complete loss of a beautiful vision of what this area should be.

I don't know you. But I would imagine that you do your best to make sound decisions. That you care about the future you are making. I can see a point 10 years from now, when you have friends and family in town and you say, "hey let's go over to Arvada West and spend the afternoon, the kids can play in the green space, check out the shopping, listen to music, hike along the creek, it'll be fun." As opposed to you saying, "hey, let's go see the Amazon warehouse."

Never.

The vision already exists. We've seen it, you've likely seen it and I can't imagine that you don't love it too.

I encourage you to see the better future for this area, to let this vision be part of your legacy, to be able to stand there with friends and family and say, "I had a hand in this"._

-

Trust the vision, it fits. Amazon does not.

We live by Indiana now and it sounds like we are next to a freeway. Not ok. Traffic is already congested and no recent traffic studies have been done to include new buildings going in around where the proposed Amazon building site would be located not to mention new buildings going up in Candela's. Too many vehicles.

I work by two other Amazon facilities and it is bumper to bumper. They do add to the noise and traffic and a lot of the workers are not living in the areas where the Amazon buildings are and brings in more crime and noise.

Very against this and feel City Council would be wrong to approve this. Think of the community!!!!

Sent from my iPhone

Begin forwarded message:

From: Ellen [redacted]
Date: June 11, 2021 at 9:16:37 AM MDT
To: kristen@arvada.org
Subject: Scannell Annexation for Amazon Facility

Council Members:
I'm a homeowner in Cameo Estates and I worked successfully with the planning department to designate our neighborhood rural. There are too few rural areas left in our town boundaries and most are still outside the town boundaries and zoned A-1 or A-2 depending on acreage by Jefferson County.

Jeffco has a reputation of turning down all requests to urbanize this precious land. All nearby Jeffco agriculture land when advertised for sale is described as Arvada annexation eligible. Developers then believe they can get it zoned for any use they want. That is rapidly depleting the area that can be used as horse properties and the use of nearby town supported horse facilities as well as small agricultural uses such as truck farms and small livestock husbandry.

Since Arvada planning documents call for upgrades in horse and walking trails and development of trails, this drive to annex for housing and industry is rapidly changing the character and long term plans for our city. The Amazon proposal is one of the worst offenders despite its proximity to light industrial it is also near parkland, trails, wildlife corridors, wetlands, and other A-1 & 2 as well as neighborhood properties.

It makes sense to re-evaluate this trend by initiating a moratorium on all annexation of Jeffco agriculture properties until the new zoning documents are evaluated for areas that make sense to annex for various types of development. There need to be areas that are only annexed into the rural zones with parkland and walking trails required in all new planned developments without exception.

Currently the mixed use concept has been popular with the planning department for certain areas of the city. Industrial areas are planned across from the Candelas development. These are far more thought out than the current Amazon request for annexation. A moratorium on re-zoning A-1 and A-2 properties is required at this point to formally designate future annexation zoning based on all current city planning documents.

Sincerely,
Ellen Dibble

Subject: Project Indiana public commets

Hi Kristin
I would like to add my support to the Amazon project being proposed tonight. I feel that this development is in accordance with the city comprehensive plan and fitting to the location it is being proposed. The objections to this proposal are nothing more than a "NIMBY" (Not in my backyard) action and many false statements are being published daily regarding how that property can and will be used, including that the private property in question is open space being sold to Amazon to increase revenue for the city. I would like for there to be clear and concise comments regarding how and why this proposal should and will be approved.

Furthermore, I have concerns regarding the petition that has been circulated in that the name and addresses have not been properly vetted for citizens with a current right to vote within the city as well as the possibility that individuals have added their names to the petition multiple times.

Thank you
Emily Smith

Subject: My Comments on Project Indiana for June 14th City Council Meeting
To: <kristen@arvada.org>

Dear Ms. Rush -

I am writing to express that I am with the nearly 9000 Arvadans who have already signed in **opposition of the proposed annexation and rezoning of land from agricultural to light industrial for the proposed Project Indiana development**. The most obvious and automatic basis for denial is Scannell's own admission that the **proposed use will generate a volume of truck traffic that cannot exist within the requested IL (Industrial, Light) Zone**. The proposed Amazon Delivery Station will operate as a "Heavy Logistics Center", which is a heavy industrial use that **can only lawfully exist within Arvada's IG (Industrial, General) Zone according to the Arvada Land Development Code.** The "Heavy Logistics Center"does not belong in this location, and is suited for an area closer to highways and away from neighborhoods in order to minimize detrimental impacts.

My opposition is not of planned development in general; however the the proposed INCOMPATIBLE USE of this land will alter the character of the community, the relatively peaceful evenings me and my neighbors depend on, and will negatively impact property values of the homes in the immediate area (we live only a few blocks from this area). The Arvada Arts and Culture Master Plan, and the Arvada Parks, Trails and Open Space Plan shows the area as a high priority area to utilize for increasing or improving the park system or as a possible Second Arts and Culture Hub for the City. **I would support an alternative that aligns with the Arvada Arts and Culture Master Plan and the Arvada Parks, Trails and Open Space Plan.** The residents in this area value our adjacent open space and many of us moved to this area to enjoy the walking trails, the pocket parks along the trail network, to enjoy wildlife viewing and appreciate these important habitats.

Project Indiana proposes to rezone 36+ acres of land to Light Industry, remove hundreds of mature trees and add a 25-acre parking lot (the largest in Arvada and within 20 feet of the Ralston Creek Trail). Allowing this industrial use of the land, most of which is currently zoned agricultural, will add **noise, light, and air pollution** that will be **detrimental to nearby residents and the wildlife in the adjacent open space**. The light, noise, and air pollution associated with a 24/7 distribution center will undoubtedly have a significant detrimental impact on not only the citizens of West Arvada, but also on the wildlife along the trail and in the Maple Valley Park. The proposed property currently has many Recognized Environmental Conditions (REC) per the Phase I Environmental Site Assessment (Terracon Project No. 25207246) and these REC should be addressed and mitigated prior to any development or disturbance of the land. The proposed building site would include a 112,000+sf, 4-story warehouse with a 56,000+sf outdoor loading canopy, over 1,000 parking spaces and would produce upwards of 1,000 van, semi-truck, and flex vehicles trips 24 hours a day, 7 days a week. Given the high number of "truck" (van + semi) trips per day expected to be produced by this facility, **Traffic**

congestion to the surrounding areas from the proposed project will be substantial. The nearest highway is 5 miles away. Ward Road, 64th, Indiana and McIntyre are already traffic clogged, and the numerous housing developments proposed or being built now will increase traffic even more. Our roadways and neighborhoods will suffer from heavy truck traffic day and night.

Exhibit F- Public Comment June 10-14, 2021

I encourage the Arvada City Council to consider both the **environmental impacts** mentioned and the **negative impact for nearby residents**. We (the community and residents) are not opposed to a less intrusive use for this property that supports the culture and character of this community.

As representatives of the citizens of Arvada, I urge Mayor Williams and City Council Members to vote **NO** on this **incompatible project**!

Sincerely,
Hillary White

MEMORANDUM

Infrastructure Impact Project Indiana
June 10, 2021

This Memorandum is written in response to a Memorandum dated May 20, 2021, submitted by Scannell Properties with the title "Project Indiana Economic Impacts." In this Scannell's Memorandum there is no mention of **economic infrastructure impacts**. While there are numerous subsets contained in City Infrastructure such as water, sewer, electrical etc., this Memorandum focuses on the street and road impact "Project Indiana" will have primarily on Indiana, 64th Avenue, Ward Road, and McIntyre Road.

The following analysis is submitted using data provided by Scannell Properties to The Maple Valley Homeowners Association regarding initial personnel requirements for the proposed Amazon "last mile" distribution facility. It should be noted immediately that the term "last mile is a misnomer since the proposed facility will have a 50 square mile radius distribution area which is nearly 200 times the present size of the City of Arvada.

The term "trip traffic" used in this analysis is a term derived from personnel data provided by Scannell Properties for the initial startup of "Project Indiana" and projected forward at a (CAGR) Compounded Annual Growth Rate of 13.3%. This is the CAGR used by prominent Wall Street financial experts such as JPMorgan, Bank of America, FORBS and others in determining future growth in sales and net income for Amazon based on past and present performance. In essence, "trip traffic" is the number of times a street or road is used each day by an Amazon employee or subcontractor going to or going from the proposed Amazon

Distribution Center. Using data supplied by Scannell Properties for Amazon for initial personnel requirements of both employees and subcontractors, those working both inside the distribution center and outside the center, the “trip traffic generated by this personnel becomes overwhelming. This estimated “trip traffic” projected forward over 10 years using a (CAGR) of 13.3% is a valid procedure to determine street and road usage by a proposed project such as “Project Indiana”.

The following graphs are a valid depiction of “Project Indiana’s traffic impact on Arvada’s streets and roads over a ten year period with particular emphasis on Indiana, 64th Avenue, Ward Road, and McIntyre road. The graphs are separated into two data references: semi truck and trailer “trip traffic” and van and subcontractor “trip traffic”. Van and subcontractor “trip traffic” also includes “trip traffic” generated by two shifts of employees working inside the proposed distribution center.

Please note on the “Semi Truck Trailer” graph, the **initial** number of Amazon semi truck and trailer daily trips (84) exceeds the parameters for “light Industrial” land usage as depicted in Arvada’s 2018 land development code adopted May 18, 2020. This daily trip count puts “Project Indiana” in the “Heavy Industrial” land use category.

In conclusion, the “trip traffic” generated by “Project Indiana” is much more impacting on both traffic and road deterioration over a ten year projection than has been presented by Scannell Properties (see Scannell charts and graphs). In short, the devastating effect of “Project Indiana” on Arvada’s existing street and road infrastructure far outweighs any initial or long term revenue advantage. For example, the benefits of the $6,000,000+ reconstruction of the intersection at 72nd Avenue and Indiana in improving traffic flow will be almost completely wasted by

“Project Indiana”. Within the first year of operation by Amazon, the daily trip traffic of 3,488 trips generated by Amazon drivers added to existing heavy traffic on Indiana will once again back traffic up from 72 Avenue to 64th Avenue during the rush hours of 7:00 AM to 10:00 AM and 4:00 PM to 7:00 PM. This will again make access to and from Indiana from neighborhoods such as Maple Valley, West Woods Mesa, and Ralston Ridge almost impossible during these hours . Also, this potential excess traffic caused by Amazon vehicles also poses a threat to citizens living in these neighborhoods and surrounding areas in receiving proper response times for police, fire rescue, and ambulance services; poor response times potentially resulting in unnecessary injury and possible death.

I ask the Arvada City Council members and other responsible parties to consider the tangible negative impact “Project Indiana” will have on not just this one area of Arvada’s Infrastructure, but also the negative effect it will have on environmental factors, and quality of life issues for each Arvada citizen resident and business owner.

Please add our opposition to the proposed Amazon facility. The city going to the insane one-hauler trash system by arguing to reduce heavy traffic on local streets would certainly be hypocritical to turn around and approve this kind of traffic. Developer traffic studies may meet the city's requirements but they are ludicrous not taking into consideration other projects and larger overall impact. The city has done a miserable job maintaining our streets and roadways and this approval will exacerbate the problems. It is time for council to remember they were elected to represent the citizens of Arvada, not the developers. Approval would certainly stimulate another recall effort where hopefully votes would be legally counted accurately this time.

We don't need anything that fast. I do use Amazon but only when I can't find it locally.
Arvada City Council should care more about small business in town than the large franchises.
With all the new building in our city you are receiving a lot of new revenue we don't need Amazon in town.
Thank you for listening.

To: kristen@arvada.org <kristen@arvada.org>

Hello Kristen,

Thank you for sending the link.

I want to provide our opinion that my wife and I are opposed to the Amazon warehouse development on Indiana Street. The reasons are as follows.

1) I am not against job/business growth for Arvada. However, this type of facility should be located near an interstate highway, not in an area surrounded by residential neighborhoods. It is not appropriate for this part of Arvada. The proposed retail/restaurant option would be more appropriate for this part of town, and would also create new jobs.

2) I am concerned about the environmental damage that could be done to the Maple Valley Park (including wildlife) and Ralston Creek for various reasons including water runoff from the huge parking lot and 24 hour traffic and lighting.

3) We don't want to see 24 hour lights and traffic in this part of Arvada.

Thank you for your consideration.

Subject: Project Indiana - Amazon Distribution Center
To: kristen@arvada.org <kristen@arvada.org>

I am opposed to the Amazon Distribution Center as it is currently located an advertised for these reason:

- Indiana Street cannot handle its current traffic load. An increase of trunks will require the entire road to be re-build.
- The facility will have adverse impacts on the nearby Ralston creek and riparian vegetation. The creek and riparian vegetation—old growth cottonwood trees—are unique and need to be preserved and enhanced. Wildlife will avoid the riparian area because of the noise and light pollutions generated from operation of the facility.
- Greatly increased traffic to and from the facility will generated considerable air pollution.
- Designating the land as Arvada open space would be in-line with the City's parks and open space five-year plan.
- The facility will not be keeping with the philosophy of Arvada being a family oriented community.

Please do not approve a land use change that will allow the construction and operation of the Amazon facility on Indiana Street

Not really a question, but rather my position on this proposal. I am NOT in favor. As a resident in close proximity to this proposed warehouse (Wyndham Park, 64th and Eldridge), here are the reasons why:

- Neither 64th Ave or Indiana Street are prepared to handle the additional traffic volume, either from the standpoint of traffic flow or road surface conditions. Your engineering consultant's assessment is not accurate.
- Most of these routes don't even have the proper gutter and sewer inlets or sidewalks. These are asphalt surfaces largely comprised of patchwork repair. Now the City is going to put more traffic on these roads? The road surfaces will deteriorate more often, turning 64th Ave and Indiana Street into a perpetual state of repair. Is Bezos going to pay for that?
- My wife and I chose to live in West Arvada because it retains its identity as a quiet, 'country' part of Denver. The light and sound pollution does not support the culture of Arvada.
- I don't want my property value impacted by a warehouse; Bezos can build out in the sticks near Rocky Flats.

This space is FAR better suited for features that bring together the community (e.g. mixed-use shopping/living units, parks, small amphitheatre, a fountain, common areas, outdoor shopping, farmers markets, boutique fitness (spin, circuit, barre, pilates). A place that invites residents to get out and mingle, buy local, and cultivate and enhance Arvada's social experience.

Please vote this measure down. Protect Arvada and listen to the people.

Regarding the Amazon warehouse proposal, I have reviewed the packet proposal and the website posted by the developer. While I am excited to see more good jobs coming to Arvada, it is obvious in the large amount of signatures on the petition against this project and the questions during the public meetings that Arvada citizens are concerned about the traffic impact of this project. I would hope all city council members recognize the reality of the traffic problems on Indiana and before approving any projects that will impact that traffic, work to solve the problem that already exists before piling more stress on the system. Based on the presentation, the current solution on the table do not improve the traffic flow on Indiana, see below.

Adding an another light on Indiana with only one north bound lane will back up to 64th during rush hour. This will also happen in the south bound lane, backing up to 72nd, which the City of Arvada just spend millions to fix. The intersection at 72nd and Indiana now works since the improvements. Do not add another intersection that will make things worse. The city is responsible for managing our infrastructure as a top priority. Do the right thing by asking the city staff and the developer to properly resolve the traffic issues before approving this project. The developer compares this project other possible developments for this area. All of them make things worse. Work to make it better. The people are speaking out on the problems in the city in response to this project. Set the process for approval of development to actually improve the city not make it harder to live here.

The current development in the area has had very little impact on traffic and when the retail areas were developed in the early 2000's, Indiana and 64th was transformed into a T-intersection that supported the additional traffic volume going west and into the stores. This is what it looks like when you do things right. Approving a very active warehouse without addressing the infrastructure is wrong. Do it right.

To: <kristen@arvada.org>

Hello,

My name is Jonathan Speek, I'm a resident of Arvada and a Software Engineer by trade. I'm writing to urge the council to consider dropping this project.

Amazon has a history of opening massive distribution centers, promising jobs for the community, only to provide horrendous working conditions and (in some cases) closing the center altogether - leaving a huge building and footprint with it (this has been well-documented).

Often when deals are struck between mega corporations (like WalMart and Amazon) and local governments, they will go years without tax obligations - letting the city foot the bill in hopes that it provides a net economic benefit.

Rather than allowing our money to float straight to a corporation notorious for not paying taxes (along with its now former CEO), we should be investing in and helping support our local businesses who are being destroyed by Amazon.

Amazon will make huge promises, but this is a massive bet. Look here for the list of locations Amazon has closed: https://en.wikipedia.org/wiki/List_of_Amazon_locations#United_States Amazon broke their promises to those communities for their own gains.

Arvada is merely a pawn to Amazon.

Best,
Jonathan Speek

Dear Arvada City Council,

Bill and I live near 75th and Indiana St. We are opposed to the rezoning in order to build a Amazon distribution center near 66th and Indiana. This business should be located elsewhere. The increase in noise, light, and air pollution that will occur with this operation is not compatible with our community. The traffic congestion along with road repairs will increase on Indiana Street where it is already a problem. Please reject this proposal.

Thank you for your time and service to the communities of Arvada.

Sincerely,

Judy and Bill Anders

To the Arvada City Council and Planning Commission via email submission to Kristin@Arvada.org

Resident Opposition to "Project Indiana"/ Scannell Properties development

I am writing to oppose the development of the distribution center warehouse proposed for an Amazon DSP in west Arvada. I agree with several city leaders and most homeowner associations already on the record that the proposed use is not compatible with the land use code or the comprehensive plan. The primary reasons are density and traffic.

The commuter traffic of hundreds of third-party van drivers (with no Commercial licenses) into west Arvada does not make sense. The traffic from the workers arriving at the site in addition to the hundreds of vans and heavy delivery truck traffic would interfere with resident commuter traffic and numerous schools in addition to the congestion and safety risk to the Jefferson County school bus routes. *There are many other uses for that parcel of land that would serve the community better and provide higher income opportunities for employees.*

Amazon with a different (local) development partner will open an Amazon "DSP" in Broomfield this summer. I question the need for another one so close. The one in Broomfield has close access to I-25 and other high-traffic arteries, so is a better example of what is acceptable and efficient for a delivery station. The site of Project Indiana does NOT provide direct access to roads that are needed to carry the hundreds of Prime vans or the truck delivery traffic to a DSP. *A location closer to I-70, I-76 and/or closer to Wadsworth makes much more sense.*

Existing "light" and heavy industrial uses near the proposed Project Indiana are also no longer ideal for this area of Arvada and *should not be used to justify more development that is not compatible*. However, those facilities were built years or decades before there was a clear development pattern with single-family neighborhoods and neighborhood retail/services that have since made large investments in our city.

The $575,000 annual tax benefit that is quoted and unsubstantiated from Project Indiana is about equal to what 110 west Arvada homeowners pay to the city annually. Maple Valley and numerous other neighborhoods oppose the project and their voices should have more weight than one tenant. As all the home values have risen, so too have the taxes. Putting the desirability of single-family ownership in our city at risk due to inappropriate uses such as Project Indiana does not make economic sense.

My family chose Arvada when we moved to Colorado 12 years ago for its strong neighborhoods, schools, recreation and convenient businesses that make this a desirable city. While I do not agree with all the decisions for land use in the past few years, only one other proposed use has caused me to voice opposition to the Planning Commission (the density of multi-housing at McIntyre at W. 64th). The proposed Project Indiana is just as troubling and **I hope that the opposition and input from informed city residents will convince the city council to vote against this project.**

Signed: Mrs Michael E. (Julie) Hogan

To the Arvada City Council members,

As a citizen of Arvada for 55 years I've seen a lot of change. Some good, some bad! Those years make it easy for me to recognize a disaster in the making. Therefore I am writing to ask you to vote against the Indiana/Amazon project. I feel we elected each of you to care about and protect our quality of life in Arvada. It is your responsibility to care about the citizens not some corporation.

The Amazon warehouse will mean 24/7 traffic on roads surrounding neighborhoods where hard working citizens are just trying to sleep so they can get up and go make a living. There are no positives to this project, just a lot of negatives.

Your consciences should direct you to vote NO. If this goes through you won't be able to undo the damage you caused.

M. Karen Alderman

Subject: Input on Amazon facility for Arvada

Hi Kristen,

1) Sympathies for being the focal point for these replies.
2) I live west of Ward Rd, off 64th, and am vehemently opposed to an Amazon facility in west Arvada. The truck traffic, the lights, the noise, and the impact on our already bad traffic, our neighborhoods, and our open space are all unacceptable. I seriously doubt that any Town Council members in favor of this facility live anywhere near its proposed location. Such a facility belongs in an industrial area.
3) If the Town Council, which already gave us a WalMart, continue along this path, Arvada will cease to be a desirable area to live, and our property values will decline.

I am opposed to this plan for an Amazon facility.

To: <kristen@arvada.org>

I am writing in opposition to the proposed rezoning of the land that is being considered for the Amazon distribution center. Having lived in this area most of my life I can say that the traffic in the west side of Arvada has increased exponentially. Not sure when Arvada's moto became; build, build, build and figure out the infrastructure later. Our streets are in rough shape with potholes and degrading asphalt. Now we are discussing adding a significant amount of vans, trucks, and Amazon employee traffic to this situation. I find their argument that they will have less traffic than a big box store to be absurd and irrelevant since I don't currently see it as an either-or choice of Amazon or a big box store.

I bought my house in the Shadow Mountain neighborhood 11 years ago. We used to have very little traffic flow in front of our house, but with the increase in traffic on Indiana people that live in Maple Valley drive on W. 70th Drive because it is too difficult to make a left onto Indiana from W. 69th Avenue. It is my understanding that if this development goes through that their option to make a left out of their neighborhood will no longer be available and it will be a forced right-hand turn only. This will put a considerable amount of traffic into the Shadow Mountain neighborhood. Also, it is not right to force people that have lived in this neighborhood for decades to have to take a long way around so that Amazon can be crammed into an area that makes no logical sense. Amazon's main access point will be a congested two-lane road or residential roads on the east side.

The 24/7 noise and light pollution is going to be a huge disturbance to surrounding homes and the wildlife.

When we bought our house, the area to the south of us was all zoned A2. Then, some of the land was rezoned to light industrial and now you are looking to rezone the remaining land. This is incredibly frustrating because we bought our house in this area because we loved the quiet area and open space. We did our research so that we wouldn't be in a situation like the one we are currently facing with this distribution center. What is the point of even having zoning laws if they are allowed to be changed by whoever pays the most money? I thought the purpose of zoning laws was to protect **existing** residents or businesses from new developments that might be incompatible and to preserve the character of a community. Allowing this development will neither protect nor preserve our neighborhood. You will be saddling us with the burden of heavy traffic, noise and light pollution, and possibly other environmental contaminants from this facility, and the loss of our beautiful area.

Please vote against this re-zoning and against the Amazon distribution center, it is not in the best interest of West Arvada.

Thank you,

Kasey Vair

Subject: Comments re proposed Amazon development for City Council
To: <kristen@arvada.org>

Hello Kristen,

I would like to submit comments for today's City Council meeting regarding the proposed annexation and zoning decision happening this evening.

I am an Arvada resident (I live at 67th and Newman) and live near the Ralston Creek trail. My family and I often ride our bikes along the trail in the area where Amazon is trying to build their 24/7 distribution center. I was appalled to learn about this proposed development. I am concerned about the additional traffic and pollution that will be caused by an Amazon distro center and the negative impact that this will have on the neighbors, the wildlife, and the environment. One of the things I really love about living in my neighborhood is the ample open space and close proximity to the Ralston Creek Trail and all of the parks along it. Residents of the community should have a say as to what happens in their community, and my neighbors and I have been very vocal in saying that we DO NOT want Amazon along Ralston Creek.

In addition to the quality of life and environmental concerns, I am also opposed to this project because Amazon is notorious for its anti-worker behavior, for having the high rates of workplace injury, abusive working conditions, and collecting public funds to maximize private profit.

Last week I received a pro-Amazon postcard in the mail, encouraging me to visit the site: https://projectindianaarvada.com/public-meetings/. I assume this mailer and the website are created and paid for by Amazon, but there is no mention anywhere about who is funding this material. This is another example of an underhanded attempt by a corporation to sideline the grassroots organizing efforts of residents who will be impacted by this development.

The attached pdf details the public health impact of Amazon warehouses, including warehouse workplace injuries that are twice the national average, chronic stress from the untenable workload and quotas, and risks of contracting chronic and infectious diseases.

Additionally, this article from The Daily Poster details the ways Amazon attempts to maximize public subsidies (they've received over $4 billion from state and local governments so far), while driving out small, local businesses: https://www.dailyposter.com/the-great-amazon-hq2-scam/. And, the efforts Amazon took in its Bessemer, AL warehouse to bust a union drive are infamous. From bombarding employees with texts and mailers disparaging unions, to intimidating workers during in-person anti-union "classes," to offering bonuses to employees who quit before the union election, Amazon repeatedly demonstrates the lengths they'll go to limit the rights of their workers.

Amazon is bad for the environment, bad for workers, bad for Ralston Creek, and bad for our Arvada community. I urge the city council to deny the annexation and zoning that would allow an Amazon facility in this location.

Thank you,

Kelly Dougherty

Hi Kristen,

Mu name is Ken Salvucci. I live in Wyndham Park near the proposed Amazon distribution Hearing. Our area is a nice neighborhood with a good mix of single family residences along with retail near our neighborhood. I understand Amazon wants a distribution center in our area, but why so close to residential neighborhoods? I am sure they can find a piece of land somewhere relatively close without the close proximity to residential area.

I don't think this is a good thing for Arvada Citizens living on that side of town. I hope that The City of Arvada takes into consideration the well being of its citizens and does not allow Amazon to locate in the proposed area.

Thanks

Ken Salvucci

Hello Ms. Rush,
I would like to submit a comment for the record for the Indiana Project. I am opposed to this project primarily because the heavy industrial use that Amazon is proposing is not compatible with the surrounding community. As someone who lives and works in the area, the amount of traffic in and around Indiana is already as heavy as the area can sustain. There are other options for that area that would increase tax revenue but not negatively impact the community. I implore the mayor and the city council to listen to the community in this matter and vote "no" on the Indiana Project.

Thank you,

To all City Council Members and Mayor Williams:

My name is Dr. Liz O'Rourke and I have been a long-time resident of the region (Coal Creek Canyon and Arvada) and was a long-term business owner of Animal Urgent Care.

I want to go on record in OPPOSITION to the proposed Amazon project. This project will fundamentally change Arvada in a negative way. It certainly does not meet a "light industrial" zoning criteria. It will adversely affect the currently terrible congestion issues in Arvada. The additional traffic will make our street conditions even worse than they currently are. Overall it would affect all of our quality of lives and will reap destructive consequences for all Arvadans. This is not why I moved to Arvada.

Sincerely,
Dr. Liz O'Rourke

Subject: Project Indiana

I am against letting Project Indiana pass because:

1) I am being charged $5.13 a month because I chose to use a trash service that better suits my needs. I understand the monthly fee is because my chosen trash company will damage Arvada's streets by picking up trash and recyclables 6 times a month. However, you think its just fine to have a delivery station with multiple trucks (many heavier than a trash truck) travel Arvada's streets hundreds of times a day?

2) Amazon is promising to build a park and pedestrian pathway. First of all, a 1 acre park is very small and won't be a buffer between a commercial site and a residential area. Secondly, I live by a pedestrian parkway and had to contact the Arvada City Manager through the Arvada City Council to cut the weeds (they were between 34" and 45" tall). This isn't the first year I have had to call about overgrown weeds. I just think the Arvada parks system is overwhelmed and can't handle more areas.

Thank you for your time,

Lynn Chrissinger

Subject: Proposed Amazon facility in North West Arvada

To the current city council,

My wife and I, Colorado natives, are opposed to this heavy commercial development 2 miles south of our home. My wife, Karen grew up near 64th and Ward Road and is a graduate of Arvada West. I grew up in the Montclair neighborhood in East Denver.

We chose to locate here in Northwest Arvada in 1999 and to raise our family here. The city of Arvada does not need the estimated additional $375,000 in annual tax revenue projected from the new Amazon Distribution Center.

Truly, other light commercial developments, can be placed in this area, that would bring in retail tax revenue and offset this projected need. What is your master plan for Northwest Arvada for the next 20 – 30 years. From what I can find, you do not have long term development plans for Arvada. You should propose one and put it up for vote by the residents that you represent.

How do you see the amazon project fitting in with the current nature of the neighborhood area around 64th and Indiana? We who live in the area say -- It does not!!! We do not want an Amazon distribution center in North West Arvada.

Your decision on the rezoning to fit the amazon square peg into a round hole will determine our votes to keep you in office.

You can be sure of this.

Regards,

To: kristen@arvada.org <kristen@arvada.org>

Kristen Rush, City Clerk -

As a long-time resident of Arvada, more than 47 years, I am writing to vehemently oppose the Amazon distribution facility and to request that the City Council reject this facility at the proposed site. I have signed the petition against this facility, as thousands of other residents have also done.

The proposed usage will generate truck traffic that cannot legally exist within the requested "Industrial Light" Zone. In addition, the proposed annexation will result in a heavy industrial use that is not consistent with the City of Arvada's comprehensive plan and violates the Land Development Code.

The proposed rezoning will negatively impact the natural environment and habitats of the animals living in this area along the Ralston Creek Trail that is currently enjoyed by so many people.

This controversial proposal must be decided by a referendum vote by the citizens of Arvada not by the City Council.

Thank you for considering my concerns.

Subject: Comments on Project Indiana for June 14th City Council Meeting
To: <kristen@arvada.org>

Dear Ms. Rush -

I am writing to express that I am with the nearly 9000 Arvadans who have already signed in **opposition of the proposed annexation and rezoning of land from agricultural to light industrial for the proposed Project Indiana development**.

My opposition isn't against Amazon or planned development in general; however, I am opposed to a completely INCOMPATIBLE USE of this land that will forever change the character of the community, the quality of life we all enjoy, and negatively impact property values of the homes in West Arvada.

Project Indiana proposes to rezone 36+ acres of land to Light Industry, remove hundreds of mature trees and add a 25-acre parking lot (the largest in Arvada and within 20 feet of the Ralston Creek Trail). Allowing this industrial use of the land, most of which is currently zoned agricultural, will add **noise, light, and air pollution** that will be **detrimental to nearby residents and the wildlife habitat in the adjacent open space**. One of my favorite things about West Arvada (and one of the reasons my family decided to move here) is access to green space and trails. The trail is home to a wide array of wildlife, such as bobcats, mountain lions, wood ducks, great horned owls, and other nesting birds. The light, noise, and air pollution associated with a 24/7 distribution center will undoubtedly have a detrimental impact on not only the citizens of West Arvada, but also on the wildlife along the trail and in the Maple Valley Park, especially given its proposed proximity to the trail and the park. The runoff from the large paved, impermeable surface proposed for the project will have negative effects on the local watershed and Ralston Creek. Furthermore, the proposed property currently has many Recognized Environmental Conditions (REC) per the Phase I Environmental Site Assessment (Terracon Project No. 25207246) and these REC should be addressed and mitigated prior to any development or disturbance of the land.

The proposed building site would include a 112,000+sf, 4-story warehouse with a 56,000+sf outdoor loading canopy, over 1,000 parking spaces and would produce upwards of 1,000 van, semi-truck, and flex vehicles trips 24 hours a day, 7 days a week. Given the high number of "truck" (van + semi) trips per day expected to be produced by this facility, I disagree that the proposed project even meets the requirements for Light Industrial zoning, and instead is more accurately characterized as **General (Heavy) Industrial according to the Arvada Land Development Code.** The heavy logistics center proposed by Amazon does not belong in this location, and is suited for an area zoned for General Industry, closer to highways and away from neighborhoods in order to minimize detrimental impacts.

Traffic congestion to the surrounding areas from the proposed project will be substantial. The nearest highway is 5 miles away. Ward Road, 64th, Indiana and McIntyre are already traffic clogged, and the numerous housing developments proposed or being built now will increase traffic even more. Our roadways and neighborhoods will suffer from heavy truck traffic day and night.

I encourage the Arvada City Council to consider both the **environmental impacts** mentioned and the **negative impact for nearby residents**. We (the community and residents) are not opposed to a less intrusive use for this property that supports the culture and character of this community.

The Arvada Arts and Culture Master Plan, and the Arvada Parks, Trails and Open Space Plan shows the area as a high priority area to utilize for increasing or improving the park system or as a possible Second Arts and Culture Hub for the City. I understand the City's need for a tax base, but as a resident who lives here I also have needs and am experiencing firsthand the unintended negative effect of poorly planned industrial encroaching on the surrounding residents in this community.

As representatives of the citizens of Arvada, I urge Mayor Williams and City Council Members to vote **NO** on this **incompatible project**!

Exhibit F- Public Comment June 10-14, 2021

Sincerely,
Matthew Loiacono

Subject: Amazon Distribution Center

My husband and I live in the Leyden Ranch neighborhood and are opposed to the proposed Amazon Distribution Center. We drive Indiana/64th/McIntyre several times a week or more and thus, we are well aware of the fact that the infrastructure cannot tolerate the kind of traffic such a facility would generate.

Anyone who has ever driven Indiana, just once, is well aware of this fact. Any council member who votes in favor of this facility has either never driven Indiana or never intends to in the future.

Additionally, we suspect that not one council member or Scannell developer lives in an adjacent community and thus, are not qualified to make this decision alone and should, therefore, listen very carefully to those of us who are qualified.

Many of us chose this area for its quieter, more rural feel. Our expectation is that the City Council will respect that and work diligently to come up with a better solution for the area than the ridiculous one being proposed by an international real estate development company with no interest in our community other than financial gain.

Sincerely,
Melissa Melton

Dear Ms. Rush,

As a resident of Arvada for the last 36 years, I am writing in support of the proposed Amazon Distribution Center and urge the City Council to approve the annexation and rezoning of land on the west side of the city for this purpose.

Development of the distribution center complies with Arvada's overall comprehensive economic development plan and is being proposed in an area of the city that is already designated for industrial and commercial uses. Arvada's residents will benefit from the job opportunities that the distribution center will offer and the City, overall, will benefit economically by having a corporation like Amazon based here.

Thank you,
Melody Roe

I am writing to express my concern and opposition to Project Indiana. I have lived in the Shadow Mountain neighborhood at 70th and Eldrige for over 10 years. A lot of what drew us to this area was the quiet neighborhood settled next to the park and the agricultural areas. As information on the impacts of Project Indian continue to be released, my concern is increasing as well.
A traffic light at 68th and Indian will prevent a light being installed at 69th and Indiana, and additionally will prohibit traffic existing from the Maple Valley/Shadow Mountain neighborhoods to the South on Indiana. This will increase the traffic by my house, as the combined Shadow Mountain and Maple Valley neighborhoods have only 3 exits. Restricting the traffic flow from one of the existing will increase the traffic to the other 2. This seems to be something that was not addressed in the Applicant's Traffic Study.

The Northwest portion of Arvada has already seen a major expansion in traffic in the last 4 years. How can a traffic study be based on 2017 numbers?

Thank you for your time.

Regards,

To: <kristen@arvada.org>

Dear Ms. Rush,

Please see my comments, below, regarding this evening's City Council meeting during which the packaged proposal to annex and rezone the land near 69th and Indiana will be discussed.

Many thanks,

Michelle Szobody
12462 West 65th Avenue
Arvaca, CO 80004

The recommendation of the Planning Commission, via these ordinances, is to accommodate a 24/7 retail distribution center, more than 5 miles from the nearest major interstate highway, with 460 employees, minimum, and with 42 round-trip tractor-trailer deliveries each day into and out of that area. I oppose this package of ordinances for several reasons. In the interest of conciseness, I will cover one of them.

I clearly recall that one of the primary talking points for the single-hauler trash issue last year was to reduce truck traffic on city streets. If the noise and air pollution and added wear-and-tear to our city streets was not okay for waste disposal efforts, which help keep our city clean, then why is it okay for Amazon? The proposed facility will add hours of large diesel truck traffic per day to those same streets, not including the impact of the personal vehicles of between 460 and 1,000 employees, plus numerous delivery vans.

In tonight's packet, we see evidence of strong opposition to this proposal from residents in surrounding neighborhoods, many of whom would have supported the single-hauler question for some of the same reasons they now oppose annexing and rezoning this land for the Amazon facility. The City of Arvada government has the responsibility to be at least as consistent.

Amazon, which has no loyalty to any local community, can easily afford to operate and distribute from anywhere in the world, including buying and developing land in areas that minimize large truck traffic on surface streets. Any potential commercial revenue from this development would surely be swallowed up by road maintenance, declining property values, and general community dissatisfaction manifested in resident complaints, which must be addressed by City staff.

Annexing and rezoning land for a purpose that will bring about the same list of liabilities raised scarcely a year ago with respect to another industry, suggests differential treatment that is inconsistent leadership at best, and dubious leadership at worst.

Vote "No" on the annexation and rezoning questions tonight.

To: Jeremiah Bebo <jbebo@arvada.org>

Dear Mr Bebo,

Please oppose Project Indiana. Build the Amazon Distribution Center elsewhere. Heavy industry, 24/7, traffic. UGH!

The postcard I received from ProjectIndianaArvada is deeply upsetting. “Less traffic than a box store”. At least I would have a store where I could shop close by! Amazon gives me nothing but a gigantic parking lot and a huge warehouse. And what big box store would be interested! As for Maple Valley Park, the closest existing residences will still be close to the northern most point. And I question the pedestrian pathway. Who needs it? All of the residences in that area already have access to the creek trail. It is strictly an Amazon benefit. If this project aligns with Arvada’s vision, we are dismayed. Industry is more important than residents. As for economic impact, it is a drop in the bucket - construction and taxes from a mere 120 homes. Build a senior citizen development. You get the taxes without needing more school funding. It will be quiet with little pollution increase.

A 24/7 Amazon Distribution Center adjacent to the Ralston Creek Trail and nearby residential is incompatible. Arvada is developing infill properties without considering the current infrastructure or the existing community character.

Exhibit F- Public Comment June 10-14, 2021

The Project Indiana proposal to rezone 36+ acres of land to Light Industry, remove hundreds of mature trees and add a 25-acre parking lot (the **largest parking area in Arvada** and within 20 feet of the Ralston Creek Trail) is beyond comprehension for those of us who live in this area. Also beyond comprehension is the size of the building and that Amazon would operate several thousand vans, semi-trucks and flex vehicles going in and out **24 hours a day, 7 days a week!**

Allowing this industrial use of the land, most of which is currently zoned agricultural, will add **noise and light and air pollution** that will be detrimental to the wildlife habitat in the adjacent open space and the nearby residents.

Traffic congestion to the surrounding areas will be substantial. The nearest highway is nearly 5 miles away. Ward Road and McIntyre are already maxed out - not to mention the numerous housing developments proposed or being built now along both that will increase traffic even more! Our roadways will suffer from heavy truck traffic such as this.

We are not against Amazon or planned development in general, we are in opposition of a completely INCOMPATIBLE USE of this land that will forever change the character of the community, the quality of life we all enjoy and will decrease property values the homes in West Arvada.

Please encourage a NO vote.

Pamela and James O'Donnell
7079 Devinney Ct.

In regards to the proposed Amazon Distribution Center, I am firmly opposed to such a huge warehouse being put in such a residential area. The infra structure of the roads in this entire area is not sufficient for the large amount of truck traffic this warehouse will generate. As it now stands, the main arteries of Ward Road, 64th , Kipling, McIntire, 72nd and hwy 93 and Indiana itself, do not now easily handle the traffic. Once all the new housing is completed off Ward and 57 and Ward and 51st/ Ridge Ward road is going to be a giant traffic mess, not to mention all the delays caused by the 2 trains that cross Ward. There are too many accidents that happen right at Ward and 64th for that cross section to have more trucks coming off I-70 to get to Indiana and the Warehouse. If Amazon needs a warehouse on this West side, they need an area that can quickly be accessed from I-70. I encourage the Mayor, and all the City Council to strongly oppose this measure.The Arvada Citizens are your voters, NOT AMAZON!

Dear Kristen,

I'm an Arvada resident who lives near the intersection of Deframe St. and 68th Ave. I'm a professional who is working in the nascent field of quantum science technologies. I strongly oppose an Amazon distribution center in Arvada. It would make Arvada a much less desirable location to live and negatively impact the Arvada community.

Kind regards,

Philip Makotyn

Subject: Project Indiana

Upon learning more about Project Indiana I have become highly concerned. It is obvious that the truck and vehicle traffic this Amazon project will create will be a mess for Indiana, 64th Ave and McIntyre The infrastructure isn't there to support it. Since access to the freeways is an important component in moving goods, it makes more sense to move the project to the highway 93 corridor. Also, the zoning along 93 is compatible for this project where the zoning on Indiana (heavy vs light industry) is not when you consider the impacts to the area and traffic that others have pointed out.

In addition, the Ralston Creek trail for hundreds of years has served as a corridor for wildlife and mankind to move through. And, as man has developed this area, less wildlife use it, which is to be expected. In the 25 plus years that I have hiked and biked this trail I still encounter an occasional mountain lion, bobcat and deer as well as smaller critters. I also believe this linear corridor is deeply appreciated by the hundreds of people that use it daily. We all would be unhappy to lose it. This project just doesn't fit in with why we all live here as our 9,000 signatures on the petition indicate.

Therefore, I highly recommend this project be moved to a heavy industrial zoned area.

I learned long ago that a project with public support will win, whereas, without public support, a project will never make it.

Regards,
=/s/=

Subject: opposition to Amazon facility on Indiana St.

Dear Ms. Rush,

I am writing to express my strong opposition to the proposed Amazon facility on Indiana Street. There are numerous reasons to oppose the proposed facility, and only one in favor- namely that some tax revenue would be generated for the city. But I doubt that that added revenue is worth the cost in terms of the quality of life for all residents of west Arvada.

I'm sure you are hearing all the arguments about the traffic, 24/7 lights and noise, etc. They are, of course, valid concerns, but there is one factor I would like to highlight. That is, the fact that the Ralston Creek valley would no doubt experience severe air-quality degradation, especially in the winter months when inversions are common in the valley, and cold air (and the pollution from all the trucks, vans, and cars serving the facility) is trapped close to the ground in the valley. We would have our own brown cloud, and that would be nothing to be proud of.

Instead of an industrial use for the land, I believe the city should zone for an old-town kind of development, with a central pedestrian mall, restaurants, perhaps with housing above the street-level businesses. A good model would be the central Five Parks area, where businesses and housing comingle in a pleasant setting.

I appreciate the opportunity to comment on this upcoming vote by the City Council, and I sincerely hope they do not make a huge mistake in approving this project.

Thanks,
Rich Wanty

Subject: Comments on Project Indiana for June 14th City Council Meeting

Dear Ms. Rush -

I am writing to express that I am with the nearly 9000 Arvadans who have already signed in **opposition of the proposed annexation and rezoning of land from agricultural to light industrial for the proposed Project Indiana development**.

My opposition isn't against Amazon or planned development in general; however, I am opposed to a completely INCOMPATIBLE USE of this land that will forever change the character of the community, the quality of life we all enjoy, and negatively impact property values of the homes in West Arvada.

Project Indiana proposes to rezone 36+ acres of land to Light Industry, remove hundreds of mature trees and add a 25-acre parking lot (the largest in Arvada and within 20 feet of the Ralston Creek Trail). Allowing this industrial use of the land, most of which is currently zoned agricultural, will add **noise, light, and air pollution** that will be **detrimental to nearby residents and the wildlife habitat in the adjacent open space**. One of my favorite things about West Arvada (and one of the reasons my family decided to move here) is access to green space and trails. The trail is home to a wide array of wildlife, such as bobcats, mountain lions, wood ducks, great horned owls, and other nesting birds. The light, noise, and air pollution associated with a 24/7 distribution center will undoubtedly have a detrimental impact on not only the citizens of West Arvada, but also on the wildlife along the trail and in the Maple Valley Park, especially given its proposed proximity to the trail and the park. The runoff from the large paved, impermeable surface proposed for the project will have negative effects on the local watershed and Ralston Creek. Furthermore, the proposed property currently has many Recognized Environmental Conditions (REC) per the Phase I Environmental Site Assessment (Terracon Project No. 25207246) and these REC should be addressed and mitigated prior to any development or disturbance of the land.

The proposed building site would include a 112,000+sf, 4-story warehouse with a 56,000+sf outdoor loading canopy, over 1,000 parking spaces and would produce upwards of 1,000 van, semi-truck, and flex vehicles trips 24 hours a day, 7 days a week. Given the high number of "truck" (van + semi) trips per day expected to be produced by this facility, I disagree that the proposed project even meets the requirements for Light Industrial zoning, and instead is more accurately characterized as **General (Heavy) Industrial according to the Arvada Land Development Code.** The heavy logistics center proposed by Amazon does not belong in this location, and is suited for an area zoned for General Industry, closer to highways and away from neighborhoods in order to minimize detrimental impacts.

Traffic congestion to the surrounding areas from the proposed project will be substantial. The nearest highway is 5 miles away. Ward Road, 64th, Indiana and McIntyre are already traffic clogged, and the numerous housing developments proposed or being built now will increase traffic even more. Our roadways and neighborhoods will suffer from heavy truck traffic day and night.

I encourage the Arvada City Council to consider both the **environmental impacts** mentioned and the **negative impact for nearby residents**. We (the community and residents) are not opposed to a less intrusive use for this property that supports the culture and character of this community.

Exhibit F - Public Comment June 14, 2021

The Arvada Arts and Culture Master Plan, and the Arvada Parks, Trails and Open Space Plan shows the area as a high priority area to utilize for increasing or improving the park system or as a possible Second Arts and Culture Hub for the City. I understand the City's need for a tax base, but as a resident who lives here I also have needs and am experiencing firsthand the unintended negative effect of poorly planned industrial encroaching on the surrounding residents in this community.

As representatives of the citizens of Arvada, I urge Mayor Williams and City Council Members to vote **NO** on this **incompatible project**!

Sincerely,
Sara Loiacono
6689 Deframe Court, Arvada, CO 80004

Arvada, CO 80002

RE: Project Indiana Supplemental Information

Dear Mayor and Members of City Council:

We represent Scannell Properties, LLC (the "**Developer**") with respect to its proposed development of a new Amazon last mile delivery station ("**Project Indiana**") to be constructed on approximately 36 acres of land located at 6700 Indiana Street (the "**6700 Property**"), 6702 Indiana Street (the "**6702 Property**"), 6710 Indiana Street (the "**6710 Property**"), a portion of 6720 Indiana Street ("the **6720 Property**"), 6730 Indiana Street (the "**6730 Property**"), 14725 West 66th Place (the "**14725 Property**"), and 14785 West 66th Place (the "**14785 Property**"). The 6700 Property, the 6702 Property, the 6710 Property, and the 6720 Property are located in unincorporated Jefferson County, Colorado (collectively, the "**County Property**"), and the 6730 Property, 14725 Property, and 14785 Property are located in the City of Arvada (the "**City**") (collectively, the "**City Property**," and together with the County Property, the "**Property**"). The Developer owns the 6700 Property and is the contract purchaser of the other properties. As demonstrated by the Developer's applications, the Developer desires to annex the County Property into the City, to zone the County Property as Industrial, Light ("**IL**") and to rezone the City Property from Commercial, General ("**GC**") to IL. At the City's request, the Developer also is seeking to annex Maple Valley Park (the "**Park**") into the City, and zone the Park as Open Space.

This letter is delivered in connection with the Developer's applications for annexation, initial zoning, and rezoning of the Property (collectively, the "**Applications**"), to respond to inaccurate information included in James R. Silvestro's letter titled "Ralston Valley Coalition – Opposition to Project Indiana," dated June 7, 2021 (the "**Silvestro Letter**") and submitted on behalf of the Ralston Valley Coalition ("**RVC**"), and to provide additional information about how all components of Project Indiana meet the applicable criteria for annexation, zoning, and rezoning in the City Land Development Code (the "**LDC**").

I. PROJECT INDIANA BACKGROUND

The Property is located at approximately 6730 Indiana Street, nestled between Indiana Street to the west, Fig Street to the east, the Park to the north, and W. 66th Place to the south. The Property is adjacent to a number of other commercial and industrial uses, and is of comparable massing and intensity. Once complete, the warehouse building will be within the LDC's maximum height of 40 feet. Nearly eight acres of on-site buffering will be provided between the Park and Project Indiana. Additionally, the Park (enlarged by the Developer's land dedication) and Ralston Creek will act as a natural transition area between the Property and existing residences to the north.

The Developer intends to construct Project Indiana on the Property. Amazon and the Developer selected the Property after an intensive search process throughout the Denver metro area. Amazon and the Developer did not request financial incentives from the City or any other party for Project Indiana. Project Indiana will include a 112,485 square foot warehouse facility with incorporated office space, 672 van parking spaces (a reduction of 190 spaces since Project Indiana was first proposed), 291 employee parking spaces, and a

considerable amount of land reserved for landscaping and buffering. In fact, the Developer has increased the Property's buffer to the Park from 4.92 acres to 7.82 acres, an increase of nearly 60%, in direct response to public feedback. The closest residence in the Maple Valley subdivision will be more than 800 feet away from the warehouse building. At the City's and the public's request, the Developer will construct a six-foot-tall masonry screen wall on top of a four-foot tall berm along a portion of the northern Property border to shield the Park from the building. Additionally, the Developer will dedicate approximately 1.1 acres of land to the City to enlarge the Park and further separate the development from the residences.

The Developer will not remove any trees from the Park. Moreover, the Developer has commissioned a professional assessment of the existing trees to determine which trees can and should be preserved on the Property, with an emphasis placed on retaining old-growth trees. The Developer will plant approximately 874 trees on the Property to offset the loss of any trees removed during construction, which will result in a net increase in the number of trees on the Property.

No buildings or parking will be constructed in the floodplain located on the Property. Additionally, the Developer has designed Project Indiana, including parking and the detention pond, with no negative impacts on the health of Ralston Creek. The site design, which is currently under separate review by City Staff, will comply with all the requirements of the State of Colorado, the City, and the Mile High Flood District, and will ensure that stormwater on the Property is properly addressed. The Developer will install stormwater quality and quantity control measures, including the construction of a pond on the northeast corner of the Property to detain any runoff. The detention pond will meet the 100-year flood design standard.

In addition to stormwater improvements, the Developer is constructing public improvements to benefit pedestrians and bicyclists. Along Indiana Street, the Developer will construct a detached sidewalk and plant trees to enhance the area for pedestrians and bicyclists and to shield the building from off-site view. Additionally, the Developer will construct a pathway along Fig Street at the northeast corner of the Property to the boundary with the Park.

Project Indiana will operate 24/7 to meet customer demand, but the Developer has thoughtfully designed the development to protect the adjacent residential properties and the Park from any impacts caused by Project Indiana. Specifically, the Developer will locate the dock for unloading and trailer parking spaces on the southeastern corner of the Property, far away from the Park and residential neighborhoods. The site also will feature low impact lighting (through the use of full "cut-off" fixtures) to prevent light spillover and reduce glare that could disturb residents and wildlife. Night-time activities will be limited to loading and unloading linehaul trailers.

During normal operations, 21 linehaul trailers will deliver packages to the site once per day. The linehaul trailers will enter the Property from Indiana Street at 66th Place and leave via Holman Street, and use Gardenia Street to access 64th Place. The delivery vans will enter and exit the site from the proposed signalized intersection at 68th Avenue. Project Indiana will generate less traffic than other comparable uses and developments that could be constructed at the site within the same land use category, and the roads surrounding the Property are equipped to handle the traffic caused by Project Indiana. According to a traffic study performed by Kimley-Horn (which, as noted elsewhere, is based on conservative estimates of higher traffic than measured at comparable sites), Project Indiana will generate approximately 1,352 trips per day. The traffic engineering analysis of trips uses one-way trips. So the 1,352 trips are one way trips, and, as explained in more detail below, are comprised of 21 linehaul truck trips, 202 van trips, and 453 automobile trips.

Amazon intentionally directs traffic outside of rush hours. During normal operations, 202 vans will be loaded and leave the site for daily deliveries between the hours of 10:00 a.m. and noon, and will return to the site between the hours of 6:00 p.m. and 8:00 p.m. These schedules are designed to avoid the morning and evening peak hours, when most area residents are driving to work or returning home. During normal operations, approximately 21 linehaul trailers will deliver to the building, and 80% of these trips will be between the hours of 6:00 p.m. and 6:00 a.m., again, during off-peak hours. Project Indiana is expected to create minimal increases in traffic: +3% along Indiana Street, +5% along Fig Street, and +6% along 66th

Place. Moreover, to reduce traffic impacts, the Developer will widen Indiana Street along the Property, creating a dedicated right turn lane into the Property and a northbound acceleration lane.

Customers have increasingly turned to online shopping in recent years. This trend has been accelerated by COVID-19 as people have begun to rely more on online retailers, including Amazon, for many household items. In turn, the dramatic increase in online shopping has led to a growing demand for increasingly fast delivery for online orders. Project Indiana will play an important role in meeting this demand because it will enable Amazon to provide expedited delivery to local customers located in the City and the nearby metro area communities. Project Indiana also will create a number of jobs for construction workers, drivers, and office workers. Amazon expects to start the hiring process for Project Indiana roughly three months before the last mile delivery station opens. After the delivery station is open, the station will employ approximately 325 employees. During the holidays, Amazon expects this number to increase to more than 750 employees. These employees will enjoy competitive wages and benefits, as well as robust career growth opportunities.

In addition to creating new jobs for City residents, Project Indiana will invest more than $40 million into the City in combined construction and equipment costs. Project Indiana also will generate local property, use, and a number of other taxes, plus registration fees for van purchases.

II. BACKGROUND OF APPLICATIONS

As discussed above, many of the parcels that will comprise Project Indiana are already incorporated in the City; however, the County Property must be annexed into the City. The County Property is located within the City's Three Mile Plan, which includes unincorporated properties anticipated for annexation into City limits. Once the County Property has been annexed into the City, it will receive an initial zoning designation. Based on the uses needed for Project Indiana and the uses allowed in different City zoning districts, the Developer has requested that the County Property be zoned as IL. Similarly, the Developer has requested that the City Property be rezoned from GC to IL to create a single consistent zone district for the entire Property, rather than split zoning, which City Staff has indicated is in the best interest of the City.

At the City's request, the Developer also will be annexing the Park in a separate request. Once annexed, the Park will be zoned Open Space, and its annexation will have no effect on the public's use of the Park.

Throughout the review process, the Developer has submitted the following letters to the City.

- Cover Letter to Application for Annexation; Initial Zoning, dated December 11, 2020 (the "**Initial Letter**");

- Supplemental Cover Letter to Application for Rezoning, dated December 11, 2020 (the "**Supplemental Letter**");

- Response to Mr. Patrick J. Tobin's Letter dated March 30, 2021 concerning Project #DA2020-0117 – Development Application (Annexation and Zoning) and Related Applications: Project #DA2020-0132 – Site plan, Project #PA2020-0067 – Project Pre-Application (the "**Petition Group Letter**"), dated April 19, 2021 (the "**First Response Letter**"); and

- Response to Mr. Patrick J. Tobin's Letter dated April 12, 2021 concerning Project #DA2020-0117 – Development Application (Annexation and Zoning). Related Applications: Project #DA2020-0132 – Site plan, Project #PA2020-0067 – Project Pre-Application (the "**Second Petition Group Letter**"), dated April 19, 2021 (the "**Second Response Letter**," and together with the Initial Letter, the Supplemental Letter, and the First Response Letter, the "**Developer Letters**").

On April 20, 2021, after a public hearing, the City Planning Commission voted to recommend approval of the Applications to City Council.

III. **RESPONSE TO THE SILVESTRO LETTER**

The Silvestro Letter addresses the Applications and attempts to argue that the Developer cannot meet its burden of proof with respect to the approval criteria for those Applications. However, the Silvestro Letter is incorrect. As described in detail below and in the Developer Letters, the Applications fulfill all approval criteria in the LDC relevant to the Applications. Moreover, the Silvestro Letter contains many inaccuracies that will be addressed herein.

First, nearly all of the arguments in the Silvestro Letter turn on the question of whether Project Indiana is a heavy logistics center or a light industrial use. A heavy logistics center likely does not meet the criteria for approval in the LDC, but a light industrial use clearly does. Project Indiana is a light industrial use and therefore meets the criteria for approval in the LDC.

The Silvestro Letter's position that Project Indiana is a heavy logistics center is based on the flawed interpretation of the LDC's use of the term "truck trips." The argument goes that "truck trips" means one-way trips by a truck of any size and weight including vans and pickup trucks. But that interpretation flatly contradicts the City's long-standing interpretation, in effect for at least the last 10 years, that the term "truck trip," as used to differentiate between light industry and heavy logistics, means a round trip by semi-trailer sized trucks. The definition of both "truck" and "trip" is important because, as the LDC states and the Silvestro Letter quotes, "Heavy logistics centers are expected to generate at least 50 truck trips per day. Warehousing and distribution uses that involve fewer than 50 truck trips per day are classified as light industry." *LDC § 11-3-3.* Project Indiana will generate a maximum of 42 truck trips per day. That is, at peak operations, which happen only five to six weeks per year, Project Indiana will generate a maximum of 42 semi-trailer truck round trips per day.

The Silvestro Letter appears to consider "cargo vans" as "trucks" for the purpose of a "truck trip." Therefore, it is critical to determine whether a "cargo van" is considered to be a "truck" under the LDC. If a cargo van is a truck, then Project Indiana would exceed the 50 daily truck trips permitted for light industry and would be classified as a heavy logistics center, but if a cargo van is not a truck—the position held by the City—then Project Indiana is within the limit of 50 daily truck trips for light industry. The Silvestro Letter relies on the statutory definition of "truck" in C.R.S. § 41-1-102(108) and the Model Traffic Code to argue that a cargo van should properly be considered a truck. There is no indication that the City intended to incorporate either of these authorities into the LDC's use of the term "truck trip." On the contrary, the City has, on a number of occasions over the past 10 years, applied the term to mean round trips by tractor-trailers or semi-trucks. Indeed, while a cargo van may qualify as a "truck" under those authorities, the City has adopted those authorities for limited purposes in the municipal Code of the City (the "**Municipal Code**"), not for land use decisions such as the decisions at issue in the Applications, which are governed by the LDC. The Municipal Code, which is entirely separate from the LDC, governs areas of municipal concern such as traffic and sales tax, whereas the LDC governs land use and land development applications. As the two codes are separate, they do not share definitions, absent an express intent to do so.

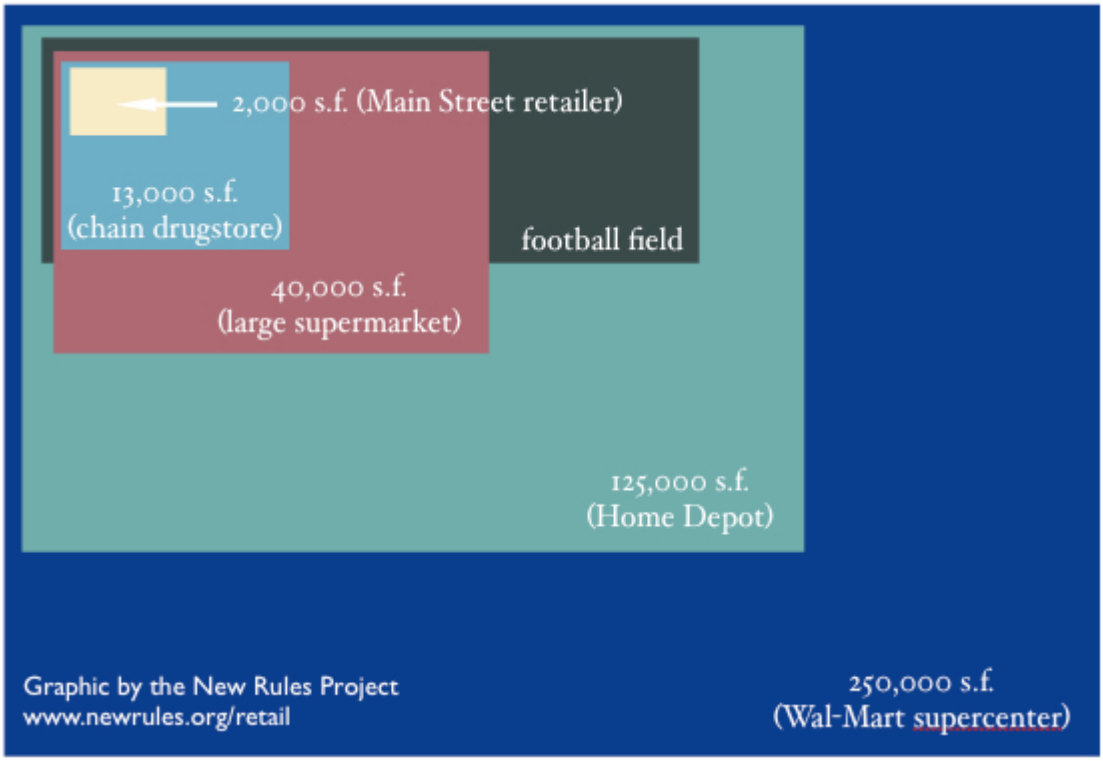
For purposes of defining the term "truck" in the LDC, the City relies on the traffic engineering-specific definitions and methodologies promulgated by the Institute of Transportation Engineers (ITE), including the ITE Trip Generation Manual, which does not include cargo vans within the definition of a "truck" for purposes of analyzing traffic generation associated with various use types. Using the definition of what constitutes a "truck" for land use decisions such as those at issue in the Applications, the number of projected daily truck trips for Project Indiana will not exceed the 50 daily truck trip limit for light industry, and Project Indiana is properly categorized as a light industrial use, which, as discussed throughout the Developer Letters, meets the criteria for approval of the Applications in the LDC.

Additionally, the City's historical interpretation of the meaning of a "truck trip"—round trips by semi-trailers—is reasonable, particularly in the context of distinguishing between light industry and heavy logistics. The City's interpretation also fits within the commonsense interpretation of a "trip"; when a person goes to a store and then returns, or a truck makes a delivery and then returns, that person or truck has made only one "trip." Therefore, according to City Staff's interpretation of its own LDC, Project Indiana does not exceed the limit

of 50 daily truck trips, even on an infrequent basis during the holiday season. Project Indiana thus is properly categorized as a light industrial use.

As described below, as a light industrial use, Project Indiana meets the criteria for approval of the Applications in the LDC.

A. **The City Should Grant the Annexation Request Because the Developer's Proposed Light Industrial Use Is Suitable for the Property, the Existing Surrounding Uses, and the Transportation Infrastructure.**



1. The Proposed Annexation Will Result in a Light Industrial Use on the Property that Is Consistent with the City's Comp Plan.

As the Silvestro Letter notes, the Comp Plan provides that the Property should be developed as an "Office/Light Industrial/Retail Opportunity." However, the Silvestro Letter's argument is based entirely on the erroneous assumption that Project Indiana is a heavy industrial facility, rather than a light industrial use. If Project Indiana is a light industrial use—which, as discussed in the Applications, the Developer Letters, and the Public Hearing Staff Report for June 14, 2021, it clearly is—it is permitted in the IL zone district and is therefore a perfect fit for the Property. The Silvestro Letter confirms this point by stating, "the Comprehensive Plan confirms that the Site should only be used for *'Industrial/Office' uses that fit within the IL Zone*." *(emphasis added)*. Therefore, Project Indiana fits squarely within the type of use envisioned in the Comp Plan.

In addition to designating the Property as ideal for an office/light industrial/retail opportunity, the Comp Plan endorses and recommends the development of industrial uses on the Property, stating "[b]etween Indiana Street and Fig Street, north of several existing industrial buildings, there are several vacant parcels of land zoned industrial. These parcels . . . provide potentially successful industrial development sites . . . [and] this particular plot of land has the *transportation connectivity* and necessary future demand prospects that position it as *prime* industrial development location." *Comp Plan, p. C-8 (emphasis added)*. Therefore, although the Silvestro Letter attempts to distinguish the Clear Creek sub-area from the Indiana Street corridor, this is a distinction without difference. The Comp Plan specifically identifies the Property as a "prime" location for industrial development. In fact, prior comprehensive plans for approximately 45 years have imagined the Property as a future site for light industrial uses. The Silvestro Letter asserts that Project Indiana "seeks to fundamentally reimagine" the Property, but no "reimagining" has occurred at all. Rather, Project Indiana is a fulfillment of the vision in the Comp Plan.

Additionally, the Silvestro Letter focuses on outdoor storage as evidence that Project Indiana is a heavy industrial use, which is somewhat perplexing because the proposed uses do not include outdoor storage for delivery vans or for any other product; rather, the proposed uses include surface parking lots for the parking of delivery vans. Similarly, as noted above, the Silvestro Letter assumes that Project Indiana is a heavy logistics center. As discussed throughout the Developer Letters, Project Indiana is a light industrial use. Therefore, Project Indiana is consistent with the Comp Plan and the Developer's request for annexation should be approved based on this criterion.

The Silvestro Letter references the Comp Plan policy of encouraging compatible infill development and other redevelopment and infill principles. Project Indiana is sensitive to the character of existing neighborhoods, as reflected in the Developer's consideration of building scale, placement, size, height transitions, landscape, streetscape, and other design measures, as required by the Comp Plan. As the Silvestro Letter admits, the Property is bordered by other light industrial uses to the south and west, and in fact, 5.91 acres of the proposed development itself are *already* zoned IL. The Developer has positioned the building on the southeast portion of the Property, closer to the existing industrial uses than to the residential uses to the north. Although the Silvestro Letter makes much of the fact that the Amazon warehouse will be 112,000 square feet, it fails to draw a meaningful comparison to existing development. As shown in the graphic below, Project Indiana is only about the same size as a Home Depot, such as the existing Home Depot on Wadsworth Boulevard, which is also a size that is comparable to the footprint and massing of the other industrial buildings adjacent to and in the vicinity of the Property.

Therefore, Project Indiana is exactly the type of development that should be constructed on the Property.

Moreover, Project Indiana adheres to a number of the Comp Plan's other design principles related to infill development and redevelopment. For example, the overall scale and setbacks for Project Indiana are similar to or compatible with those for the adjacent industrial uses, and the Developer is preserving as many existing mature trees and significant landscape features to the extent possible. Finally, it is worth noting that, because the Comp Plan is an advisory document, the use of "will require" in the Comp Plan with respect to buffers and setbacks cannot properly be read to remove City Council's discretion with respect to buffers and setbacks. Regardless, Project Indiana does provide a buffer between the development and the Park. Because the Property includes multiple parcels, it can incorporate much larger buffers and setbacks between the development and the Park than would be possible if the individual parcels comprising the Property were to be developed independently. In fact, based on public input, the Developer increased the size of the buffer nearly 60%, resulting in almost eight acres of buffer between the Park and the developed portion of Project Indiana.

Project Indiana does not, as the Silvestro Letter states, "insert the heaviest possible industrial use into an existing neighborhood which has built up over the course of decades." Other uses allowed by right in the IL zone district include breweries, distilleries, and data centers. Uses allowed in this zone district with limitations (such as performance standards) include recycling drop off, motor vehicle repair and storage, and vehicle equipment sales and rental. Perhaps one of the most intensive uses one could imagine, mineral extraction, is even permitted as a conditional use on the Property. Also, Project Indiana is being developed within a mostly industrial and commercial neighborhood. The Property is adjacent to no residential homes or neighborhoods, other than the home of the seller of the 6720 Property, Mr. Hathaway, whose approval of Project Indiana is demonstrated by his submission of his owner authorization letter permitting the Developer to submit the Applications. Instead, approval of the Applications will facilitate a light industrial use in an area directly adjacent to other light industrial uses and will create a nearly eight-acre buffer between the light industrial uses on the Property, and the Park, Ralston Creek, and the residential subdivisions north of those uses, more than 800 feet away. This integrated, cohesive development, with major roadway improvements and on-site buffering simply could not and would not happen if the Property were to develop as individual parcels.

The Developer's land dedication to the City, enlarged buffer, and positioning of the building has done exactly what the Silvestro Letter requests—maintain a very large buffer between the light industrial use on the Property and the Park, Ralston Creek, and residential subdivisions north of the Park. Although the Silvestro Letter theatrically states that Project Indiana "will put a heavy industrial use immediately adjacent to the Ralston Creek floodplain while destroying approximately 374 trees and wildlife and ensuring that negative impacts (including 24/7 noise and traffic as well as surface water runoff and light pollution from 23 acres of new parking lots) will be felt in the park and in the surrounding residential areas," this is simply not true.

Project Indiana will not put a heavy industrial use immediately adjacent to the Ralston Creek floodplain—it will place a light industrial use on the Property, separated from the Park and the Ralston Creek floodplain by stormwater management systems and nearly eight acres of buffer. No evidence has been submitted that Project Indiana will "destroy wildlife." And, although it is true that existing trees on the property will be removed, more than 870 new trees will be planted. No trees will be removed from the Park.

The Developer will plant more than 870 trees on the Property, resulting in a net increase in trees on the Property. Project Indiana will increase the size of the Park by 1.1 acres, will enhance the Park's infrastructure, and will provide a buffer contiguous with the Park. Finally, as discussed below in Section III.B.4, the level of noise will be well below what is permitted for light industrial uses, and as discussed in the Developer Letters, the Developer's lighting is specifically designed to prevent light pollution in the Park, providing light poles 13 feet shorter than what is permitted in the IL zone district, and the detention pond has been designed to capture surface water runoff. In other words, Project Indiana is making significant efforts to minimize impacts stemming from noise, lighting, and stormwater drainage, that will be felt in the Park and surrounding areas, and the Developer's thoughtful and thorough design will ensure that any potentially negative impacts are substantially mitigated.

Therefore, the proposed light industrial use is consistent with the Comp Plan, and the annexation should be approved.

2. The Light Industrial Use Can Be Integrated into the City on the Property and Meets the Criteria in the LDC.

The Developer has met its burden and demonstrated that the proposed light industrial use is capable of being integrated into the City and developed in compliance with the applicable LDC provisions. The Silvestro Letter's arguments against Project Indiana are based on the erroneous assertion that Project Indiana is a heavy industrial use, which as discussed above (and below) is incorrect. The Developer has not "by [its] own admission" said that the Property cannot be annexed in compliance with all LDC provisions because the Developer has neither stated nor provided information to support an assertion that Project Indiana is a heavy industrial use rather than a light industrial use. Therefore, as discussed in the Applications and the Developer Letters, the Property is capable of being developed in compliance with the applicable LDC provisions, and the proposed annexation should be approved.

3. Indiana Street is not over Capacity, and There Is Sufficient Transportation Infrastructure to Support a Light Industrial Use.

The Silvestro Letter asserts that Indiana Street is already over capacity and that transportation infrastructure around the Property cannot accommodate the traffic to be generated by Project Indiana. The Silvestro Letter argues that therefore Project Indiana fails to meet the criterion in the LDC requiring that there be capacity to adequately serve residents of the area with all necessary utilities, facilities, and public services. *See LDC § 8-3-3-3*. However, the Silvestro Letter is incorrect, and the Applications very clearly meet this criterion. The Developer has submitted a traffic study clearly demonstrating that Project Indiana will generate an amount of traffic that can be successfully incorporated into the existing and future roadway network, including Indiana Street.

The Silvestro Letter does not provide relevant evidence to counter the findings of the traffic study. To support its assertion that Indiana Street is already over capacity, the Silvestro Letter attaches as exhibits letters from Arvada's Chief of Police and the Executive Director of Arvada's Economic Development Association

expressing concern about traffic volume on Indiana Street, and points to a page on the City's website discussing potential road improvements to Indiana Street. However, the Silvestro Letter ignores that those materials express support for a grant application that would widen Indiana Street and an associated railroad bridge between 82nd Avenue and 86th Parkway, *about two miles north of the Property*, and address traffic concerns related to the railroad bridge constricting the road in that area. While those traffic concerns are legitimate, they are not related to or caused by Project Indiana. It is also not possible for a single project to solve every issue that may affect a community, particularly an issue located more than two miles away from such project.

Additionally, it should be noted that, as Project Indiana's traffic engineer will explain in more detail at the hearing, the traffic volumes used in the traffic study are actually quite conservative compared to the actual traffic Project Indiana is anticipated to generate.

The Developer acknowledges that the community has concerns about traffic in the area and that the Comp Plan has also indicated that Indiana Street was at its "traffic carrying capacity" in 2014. It is in response to these very concerns that the Developer has performed a thorough traffic study, as directed by City Staff. To continue to respond and ensure that Project Indiana has minimal adverse effects on traffic patterns now and in the future, the Developer will incorporate a number of improvements to Indiana Street, including adding turn lanes, through lanes, and detached sidewalks with a landscaped tree lawn between the sidewalk and the street. This will approximately double the improved portion of Indiana Street.

The Silvestro Letter states that the neighbors believe the traffic study (performed by Kimley-Horn according to City-approved standards and methodology) is "fatally flawed." We respond to each of their arguments in turn:

a. *First, the traffic counts that make up the background conditions and assumptions within the report were conducted during the height of the COVID-19 pandemic and the resulting reduction in all types of vehicle traffic, including most notably a large percentage of daily commuters. Scannell's traffic engineer claimed to adjust for this by looking to historic traffic counts from 2017, but there has been significant development and additional traffic in this area in the last four years.*

The City provided the traffic engineer (Kimley-Horn) with the historical count data from 2017 for comparison purposes. To account for subsequent growth and to make a more reliable comparison, the 2017 counts were adjusted upwards annually based on the Colorado Department of Transportation ("**CDOT**") and Denver Regional Council of Governments ("**DRCOG**") traffic growth models for three years. To provide an even more conservatively high analysis, traffic volumes in the traffic study exceed the traffic model projections conducted by both CDOT and DRCOG. Therefore, the traffic impact study takes several steps to ensure that the traffic counts are accurate and not underestimated. Even with such steps, all key study area intersections are projected to operate acceptably with the improvements recommended by the traffic study.

b. *Second, although the traffic study claims to be based upon "user specific data," the study does not actually do anything to substantiate the accuracy of this information. For example, the study does not attempt to measure actual traffic counts generated by other similar Amazon facilities. As explained by the traffic engineer that RVC retained to review Scannell's report, "[d]ata should be generated using similar facilities within Colorado, where existing use can be used to establish trip generation factors for this study." (May 24, 2021 Memo from R. Kenny to RVC (attached hereto as Exhibit 7).) Scannell has not provided any transparency into the "user specific data" that serves as the foundation of its traffic impact study. As such, it is impossible to rely upon this "study."*

The traffic study does in fact utilize site-specific user information because the traffic study utilized trip generation values that exceed the trip generation values for the most applicable use that would be utilized in the governing ITE Trip Generation Manual. It is also untrue that Project Indiana has not taken into account traffic counts generated by other similar delivery station facilities. Traffic data has also been collected at 11 delivery stations with 24-hour operations (like the proposed facility) since the traffic study was completed. This information is contained in the Trip Generation Memorandum and Delivery Station National Trip Generation Study White Paper attached hereto as Exhibit A. The actual delivery station counts reflect that

the user-specific trip data evaluated in the Project Indiana traffic study exceed the counts collected at these locations. This is true even though the counts collected at these stations are believed to be conservatively high due to a temporary increase in online shopping due to COVID-19. Therefore, the traffic study provides a conservative analysis, and the actual facility trip generation is anticipated to be less than what was analyzed in the study.

c. *Third, the traffic impact study only claims to measure the purported traffic impact of Amazon's proposed Heavy Logistics Center during non-holiday periods when Scannell itself has claimed that the facility will generate approximately one-third of the traffic that will be generated during peak times. As explained by RVC's traffic engineer, "'[p]eak traffic' is not defined as the absolute highest day of the year, but with a known higher seasonable use, the holiday operations should be used for identifying the impact to the area roadways." (Id.) Amazon operates these facilities throughout the country, and there is no reason that this study cannot be based upon actual observed traffic counts during these peak times.*

A sensitivity analysis was performed evaluating the peak season operations of Project Indiana. This analysis resulted in no changes to the recommendations or conclusions that were identified for the facility's normal operations that are expected to occur for more than 90 percent of the year.

d. *Fourth, as explained by RVC's traffic engineer, Scannell's study ignores standard assumptions regarding peak traffic flows. (Id.) Scannell's study claims that this extraordinary assumption is based upon Amazon's use of non-standard delivery shifts, but nothing in any of Scannell's land use proposals would obligate Amazon to actually operate in this atypical manner. If Amazon does utilize normal shift schedules once operational, then Scannell's study is worthless. Again, this issue could potentially be resolved if the study were based upon real-world observations from other similar facilities and not unexplained assumptions.*

As noted previously, traffic data was collected at 11 delivery stations with 24-hour operations (like Project Indiana) since the traffic study was completed. The user specific trip data evaluated in the traffic study exceeds the counts collected at these locations. Analysis of these 11 locations demonstrates low traffic volumes during the morning peak hour. It should be noted that the high volume controlling peak hour which demonstrates capacity-related roadway improvements is the afternoon peak hour of the adjacent street, which has been evaluated in the traffic study. Therefore, even if Amazon somehow had a shift in employee staffing arrivals during the morning peak hour of the adjacent street, the traffic study would still accurately analyze traffic for this project.

e. *Finally, RVC's traffic engineer strongly believes that the amount of proposed parking and the number of estimated van trips suggest that Scannell is significantly underestimating the number of semi-trailer trucks that will be needed to resupply the proposed Heavy Logistics Center on a daily basis. (Id.) The amount of parking that Scannell is proposing strongly implies that the Heavy Logistics Center may generate more than 50 semi-trailer truck trips at all times of the year and not just 10 percent of the year during the holidays as Scannell claims.*

There is no need for the neighbors' traffic engineer or for counsel to speculate as to the amount of van or truck trips that will be generated by Project Indiana. As noted above, actual traffic data was collected at 11 delivery stations similar to Project Indiana, during high-volume COVID-19 periods, and such data included data for line-haul trucks. The truck volumes counted were less than half of what was evaluated in the traffic study. On average, only 20 truck trips were observed daily at the delivery station sites. Therefore, the traffic study provides a conservatively high estimate of the number of truck trips that will be made at Project Indiana.

In addition to the above assertions, the Silvestro Letter speculates that Indiana Street cannot support Project Indiana-generated traffic tripling during the holiday season. However, there is also no need for anyone to speculate as to the amount of traffic that will be generated during the high volume delivery periods because a sensitivity analysis was performed evaluating the peak season operations. The surrounding street network will continue to operate acceptably during the holiday season, as the traffic study recommendations and conclusions for the normal operations of the facility (which will occur for more than 90 percent of the year) are not changed by traffic during peak season operations. Therefore, the traffic study accurately and

conclusively demonstrates that Project Indiana will not have an adverse impact on traffic, even during high-volume periods.

We would also note that the Silvestro Letter cites the fact that the Property is located five miles from the nearest interstate as evidence that the Property is not properly located for traffic purposes, but this assertion misunderstands the purpose and function of Project Indiana. The Amazon facility that is proposed will be a last mile delivery station. The facility is not necessarily intended to be located near the highway; it is intended to be located as close as possible to end consumers in order to provide the lightning-fast delivery for which Amazon is known.

Ultimately, the traffic impact analysis submitted to the City meets the established engineering standards for such reports, including the use of the ITE Trip Generation Manual for the estimation of traffic volume. Prior to conducting the traffic impact analysis, the traffic engineers met with City Staff to determine the appropriate scope for the study. The traffic impact analysis includes all of the required intersections and movements as identified by the City. City Staff has not identified any deficiency in Developer's traffic impact analysis. Rather, City Staff has determined that the Applications with the existing traffic impact analysis are complete for purposes of review and approval by City Council.

4. The Proposed Annexation Agreement Satisfies the Legal Requirements for Annexation.

The Silvestro Letter takes the stance that the proposed annexation agreement (the "**Annexation Agreement**") is insufficient to satisfy the legal requirements for annexation. However, this assertion is inaccurate in several key respects. We address each in turn.

First, the Silvestro Letter claims that the Annexation Agreement is legally deficient because it was signed by Scannell Properties #456, LLC—the contract purchaser of the Property—and not by the current owners of the 6702 Property, the 6710 Property, and the 6720 Property. This argument fails to mention that it is a customary practice for annexation agreements to be signed by the contract purchaser of property when the contract purchaser is the party seeking annexation of such property. The Annexation Agreement *is* signed by the party who will own the 6702 Property, the 6710 Property, and the 6720 Property when the annexation becomes effective. If the Applications are not approved, the Annexation Agreement will not be valid and will not be recorded.

Second, the Silvestro Letter states that the Developer must dedicate the portions of the Property in the floodplain to the City, but that the Developer has taken no steps to dedicate the area. The Silvestro Letter seems to assume that, because the land dedication is not included within the body of the Annexation Agreement, the Developer has taken no steps to dedicate the area and that the Annexation Agreement is deficient. This is false for two reasons. First, the Developer has taken all of the steps required by the LDC to dedicate the 1.1 acres of the Property located in the floodplain to the City, and the dedication will take place via the final plat. Second, the final plat is in fact a part of the Annexation Agreement because the "Final Plans [which include the final plat] are hereby incorporated into this [Annexation] Agreement for all purposes." *Annexation Agreement § 35*. In other words, because the dedication is part of the final plat and the final plat is incorporated into the Annexation Agreement by reference, the Annexation Agreement does include the dedication. If Mr. Silvestro is concerned that the dedication will not occur, the Developer would be happy for City Council to require such dedication as a condition of approval of the Applications in order to remedy this concern.

Finally, the Silvestro Letter states that the Annexation Agreement includes additional requirements related to the construction of public and private improvements, which are based on final plans related to a site plan which has not yet been finalized. The Silvestro Letter argues that, because the plans are not final, the requirements in the Annexation Agreement may not be enforceable. However, this is untrue. Municipalities frequently attach conditions, such as those in the Annexation Agreement, to site plans which have not yet been finalized. This is a common practice. Although members of the public who oppose Project Indiana may be distrustful of the administrative site plan process, the LDC contains a robust set of criteria related to final

site plan approval, and City Staff has shown itself to be perfectly capable of evaluating the Developer's site plan to ensure that the site plan meets the relevant LDC criteria and conditions in the Annexation Agreement.

Therefore, the Annexation Agreement is not legally deficient—and it is certainly not grounds for denial of the Applications. Nor does the Silvestro Letter provide any valid legal grounds for the annexation to be denied. Rather, as discussed below in this letter and in the Developer Letters, the Developer has fully complied with all LDC requirements related to annexation.

5. Project Indiana Is Not an Issue that Need Be Decided by the People of the City Through a Referendum.

The Silvestro Letter proposes that the annexation of the County Property be decided by a vote of the people of the City through a referendum. While the Developer recognizes that the referendum process is a legitimate process that enables elected officials to defer certain types of decision-making to the voters, it is not necessary to put this issue to a vote through a referendum for multiple reasons.

First, the referendum is not necessary to ensure that the voices of the public are heard because the elected City Council is capable of representing and furthering the public's interests. The Silvestro Letter states that the "referendum process exists to ensure that Arvadans have a say in how their City grows and changes," but in fact the institution of City Council and the process for election of its members are what ensure that the public has a say in the City's growth. Because City Council's purpose is to represent the constituents who elect it, City Council is a proper and capable decisionmaker on behalf of the voters of the City.

Second, this issue has not generated the level of controversy and "significant interest" that the Silvestro Letter asserts that it has. As discussed above and throughout the Developer Letters, Project Indiana is the fruition of the City's long-standing vision for the Property, dating back more than 45 years. Although the Silvestro Letter attempts to frame Project Indiana as a "significant and intensely controversial issue" that should be decided by referendum, this is untrue. The fact that a neighborhood group has generated "thousands upon thousands of pages discussing the development" is not the same as a matter of City-wide concern. And the neighborhood representatives certainly cannot argue that they have not had the opportunity to participate in the process. The Developer has exceeded the amount of community outreach required by the LDC by hosting two virtual neighborhood meetings, including a five-hour meeting during which the Developer answered questions posed by more than 500 attendees. Members of the public also had the opportunity to present their perspective to Planning Commission at a public hearing, and will have the opportunity present their perspective tonight to City Council. Moreover, the Developer has offered several times to meet with representatives from Protect Maple Valley Park and the residents of the subdivision to the north of the Property, but those offers have been declined.

Nor will Project Indiana, as the Silvestro Letter dramatically asserts, "fundamentally transform west Arvada for at least a generation." Project Indiana is perfectly in line with and compatible with the existing industrial uses to its south and west and is compatible with the Park to the north. Additionally, once constructed, the building will be significantly smaller than many existing big-box stores located in the City, including the Walmart Supercenter and Costco Wholesale. Therefore, despite the Silvestro Letter's attempts to characterize Project Indiana as a development that would transform the very fabric of the City, Project Indiana is in fact the fruition of the City's vision for the Property, and the suggestion that Project Indiana be submitted to referendum is unnecessary.

B. **The Use Will Not Violate the Proposed Zoning and Result in a Fundamentally Compatible Land Use**.

1. The Proposed Rezoning Is Consistent with the Comp Plan.

For the same reasons as discussed above in Section III.A.1, the rezoning is consistent with the Comp Plan. Therefore, the rezoning satisfies the criteria in LDC Section 8-3-4-2(A)(1), and City Council should approve the rezoning.

The Silvestro Letter notes that the County Property is currently within Jefferson County's agricultural zone, but this consideration is not relevant to the Applications; the relevant consideration is the designation of the Property in the Comp Plan. As discussed above, Project Indiana is compatible with the Comp Plan designation.

2. Project Indiana Will Be a Light Industrial Use

As described in detail above, Project Indiana will be a light industrial use through application of the City's interpretation of the terms "truck" and "trips." At no time in the year, even during peak delivery times, will Project Indiana exceed the maximum number of truck trips permitted for the light industrial use.

The Silvestro Letter also argues that other features of Project Indiana will require that it be designated a heavy logistics center because, "Frankly, it is difficult to imagine a bigger and more intensive logistics facility than what Scannell is proposing." As with many of the ideas expressed in the Silvestro Letter, there is no need to imagine. There are two other types of Amazon logistics centers which are more intensive than the proposed use. One such type is a first mile delivery station such as the 855,000 square foot Amazon facility in Thornton (approximately 7.5 times larger than Project Indiana). Another type is a receiving center, which is typically about 600,000 square feet in size and is designed to take in large orders and portion them out to fulfillment centers throughout Amazon's network. Neither of those alternatives is proposed here. This delivery station—a last mile delivery station—is the smallest and least impactful and is designed for local distribution close to customers to facilitate the quick delivery that is Amazon's signature. Therefore, Project Indiana is properly classified as a light industrial use rather than a heavy logistics center.

3. The Proposed Rezoning Will Not Overtax Indiana Street.

For the reasons discussed above in Section III.A.3, the proposed rezoning will not overtax Indiana Street. The arguments made by the Silvestro Letter assume incorrectly that Project Indiana will be a heavy logistics center. Because Project Indiana is a light industrial use and because a traffic study has demonstrated that Project Indiana will not have an adverse effect on Indiana Street, Project Indiana satisfies the criteria for approval of the rezoning.

4. The Proposed Rezoning Will Not Have Significant Adverse Impacts on the Natural Environment.

The Silvestro Letter attempts to argue that the Developer has not met its burden to show that Project Indiana will not result in significant adverse impacts on the natural environment (and also fails to mention that the standard is "no impact or impacts substantially mitigated"). We must first note that the Silvestro Letter's environmental arguments rely on the false assumption that Project Indiana is a heavy logistics center, when, in fact, Project Indiana fits squarely within the definition of a light industrial use. When Project Indiana is properly considered as a light industrial use, many of the Silvestro Letter's arguments are rendered moot. Nevertheless, we will respond to the Silvestro Letter's mischaracterizations of Project Indiana and its impact on the natural environment in turn.

With respect to the Silvestro Letter's assertion that "Scannell elected to do the absolute bare minimum" when studying the environmental impact of Project Indiana, that is patently untrue. As the Silvestro Letter notes, the Developer commissioned a Phase I Environmental Site Assessment (the "**Phase I ESA**"). However, the Developer did not refuse to follow the Phase I ESA's recommendation. Rather, the Phase I ESA only identified two recognized environmental conditions ("**RECs**"), neither of which was located on the Property. In fact, the Phase I ESA states that "[o]bvious indications of RECs were not observed during site reconnaissance." *Phase I ESA, p. iv*. To further evaluate whether the off-site RECs identified in the Phase I ESA impacted the Property, the Developer authorized the environmental consultant to perform soil boring advancement, construction of temporary monitoring wells, preparation of soil borings, installation of gas points, and collection of groundwater and soil gas samples, for laboratory analysis. The consultant's conclusion from the battery of tests was that further investigation of potential impact from the offsite RECs was not warranted. Therefore, because the Developer commissioned a Phase I ESA and further environmental tests, it is not in fact "presently unknown what environmental contaminants might be

unearthed." Rather, the Developer has exceeded the required environmental analysis for development in the City to ensure that environmental contaminants will not be unearthed during development.

The Silvestro Letter also improperly characterizes the Property as a longstanding wildlife habitat and buffer to Ralston Creek. The Property is not a longstanding wildlife habitat and buffer; it is privately owned vacant land specifically identified by the City as a development opportunity, to be developed in accordance with the LDC, which incidentally includes uses as intensive as resource extraction (minerals) on the Property, without rezoning. The Property is no more an appropriate buffer to the Park than is the Park to the neighborhood.

Moreover, the Developer did have the Property evaluated for the most likely potential threatened and endangered species, birds of prey, and the evaluation found that no such species inhabited the Property, nor did the Property contain habitat desirable for such species. A copy of this evaluation is attached to this letter as Exhibit B. Therefore, the Silvestro Letter's assumptions about the Developer's thorough investigation of the Property are inaccurate.

Additionally, the Silvestro Letter references without evidence a belief that Project Indiana will generate noise up to 70 decibels during the day and 65 decibels at night—as though such amounts would require denial of the Applications. Even if such noise levels were created by Project Indiana, that would still fall within the applicable LDC criteria, which were adopted after a lengthy and thoughtful process involving considerable public input. In direct response to public concern, the Developer commissioned an acoustical analysis to evaluate how the sound levels will be generated by Project Indiana during day and night hours. The results of the study, received May 21, 2021, found that the noise generated by Project Indiana will not exceed 50 decibels during the day and night, which is the same amount of noise the LDC permits for residential and mixed-use districts. Furthermore, the Developer has implemented numerous measures to protect the Park, Ralston Creek, and residential neighborhoods from noise, including the construction of a six-foot masonry wall on top of a four-foot tall berm and an enhanced buffer on the Property. Therefore, despite the Silvestro Letter's assertions, noise on the Property will not create negative or unmitigated impacts on wildlife habitat and recreational amenities in the Park.

Finally, although the Silvestro Letter states that only stepped down development would be appropriate on the Property, this reads a requirement that does not exist into the LDC and Comp Plan. As discussed above and throughout the Developer Letters, Project Indiana is exactly the type of development that the City has long envisioned for the Property, and it complies with all relevant LDC criteria related to rezoning, including the requirement that the intended land use for which rezoning is sought will not result in significant adverse impacts upon the natural environment.

5. The Proposed Rezoning Is Compatible with Existing Surrounding Uses.

For the reasons discussed above, the proposed rezoning is compatible with the existing surrounding uses, including the industrial uses to the south and west. It is adequately buffered from the residential uses to the north by the Park and is buffered from the Park by nearly eight acres of landscaped buffering provided on the Property.

The Developer is in agreement with RVC that the Park is an important environmental resource that must be preserved, protected, and improved. For this reason, and in accordance with the findings in the Maple Valley Park Ecological Assessment, the Developer also is committed to minimizing impact of Project Indiana on the Park and Ralston Creek. To ensure proper stormwater management, the Developer will construct a large detention pond that will minimize any impact on Ralston Creek. To minimize the impact of lighting on the Park, the Developer will construct a screening wall and plant a significant portion of trees identified in the landscape plan specifically along the northern border in order to screen the Property. The Developer also will utilize full "cut-off" fixtures and light poles 13 feet shorter than the maximum height allowed by the LDC. To minimize any other impacts on the Park, the Developer is committed to cooperating with the City throughout the process for site plan approval to incorporate appropriate measures to mitigate any adverse impacts created by the construction of Project Indiana.

Finally, it should be noted, and must be emphasized, that in planning, "compatible" and "complementary" do not mean "the same as." Rather, these terms refer to how land uses of different intensities can be located in proximity yet remain in harmony, due to the use of site design, buffering, landscaping, and other techniques. As will be further addressed in the site plan application, Project Indiana can and will satisfy these design principles.

C. **Other Inaccuracies in the Silvestro Letter**

There are several other inaccuracies in the Silvestro Letter that are relevant to the consideration of the Applications and that are addressed below.

- City Council Discretion. The Silvestro Letter erroneously asserts that the City has no discretion with respect to the Applications in light of the Silvestro Letter's interpretation that Project Indiana is a heavy industrial use and that the Applications must be denied as a matter of law. This is untrue. City Council is empowered to use its discretion to interpret the LDC, and City Council is not required to agree with the Silvestro Letter's interpretation of the LDC as applied to Project Indiana.

- Parking Plan. The Silvestro Letter states that the Developer has refused to comply with the City's request to provide a parking study or parking plan. However, the City has not required a parking plan because a parking plan is not a requirement for the Applications. As part of the site plan application for Project Indiana, which is not a part of the Applications at issue, the Developer submitted a Parking Memo on April 19, 2021, which the Silvestro Letter acknowledges.

- No Retail or Customer Service Hub. The Silvestro Letter asserts that the Amazon facility will be used as a retail and customer service hub for pickups and drop-offs of packages by the public, but this is not a part of Project Indiana, and Amazon has discontinued this concept from its programs. Therefore, it is unnecessary to consider this potential use when estimating traffic volumes in connection with Project Indiana.

- Open Space. The Silvestro Letter states than less than 30% of Project Indiana will be open space and that a majority of the space will be a detention pond. Even if 30% open space were provided, that would not be a basis for denial—actually, 30% open space is quite significant and exceeds the minimum required by the LDC. However, on the contrary, Project Indiana will provide more than 35% open space, most of which is to be landscaped. The proposed detention pond will account for less than 5% of the development, far less than half of the provided open space.

- No Fueling or Maintenance. The Silvestro Letter falsely states that fueling and maintenance of vehicles will occur on-site. Such activities will not occur on the Property. However, even if the Developer were to propose such uses, they are allowed in the IL zone district, with certain performance standard limitations.

- Applications Not Combined. The Silvestro Letter states that the City has permitted the Developer to combine the annexation and rezoning Applications. It is not clear why this is relevant to the City's determination regarding the applicable criteria, but it is also not correct. The Applications remain separate individual actions and decisions by City Council, although we understand that the hearings will be combined in the interest of efficiency and time.

D. **The Silvestro Letter Does Not Demonstrate that the Developer Has Failed to Meet Its Burden of Proof to Demonstrate that the Applications Comply with the Relevant Criteria in the LDC.**

Overall, the Silvestro Letter fails to demonstrate that the criteria in the LDC for approval of the Applications are not met. As described above, Project Indiana is a light industrial use and as such meets all of the relevant criteria in the LDC.

IV. DEVELOPER LETTERS

The remainder of this letter will summarize the locations in the Developer Letters where we have explained how Project Indiana complies with the applicable LDC criteria related to the Applications, as well as why the First Petition Group Letter and Second Petition Group Letter do not raise valid arguments against the Applications.

A. Annexation

The Developer's proposed annexation of the County Property and Park complies with the LDC.

Applications for annexation must be made in accordance with the Colorado Constitution, the Colorado Municipal Annexation Act of 1965 (the "**Act**"), and Division 8-3-3 of the LDC. *LDC § 8-3-3-2.A.1*. State law requires that:

1. *Annexations be approved through a public election or the submittal of an annexation petition signed by more than 50% of landowners owning more than the 50% of the area to be annexed;*

2. *"Not less than one-sixth of the perimeter" of the area to be annexed is contiguous with the annexing municipality; and*

3. *"A community of interest exists between the area proposed to be annexed and the annexing municipality; that said area is urban or will be urbanized in the near future; and that said area is integrated with or is capable of being integrated with the annexing municipality."*

Colo *Const. Art. II, Section 30; C.R.S. §§ 31-12-104(1), 31-12-104(1)(a),* § 31-12-104(1)(b).

As discussed on Pages 2–3 of the Initial Letter, the Developer's annexation fits squarely within the State requirements related to annexations because (1) the submitted annexation petitions have been signed by more than 50% of the landowners owning more than 50% of the County Property and the Park; (2) more than one-sixth of the perimeter of the County Property and the Park is contiguous with the City; and (3) a community of interest exists between the County Property, the Park, and the City; the County Property and Park are urban or will be urbanized in the near future; and both properties are capable of being integrated with the City.

In addition to a finding of compliance with the Act's requirements, the City reviews applications for annexation for their compliance with the criteria in Section 8-3-3-3 of the LDC. As discussed on Pages 4–5 of the Initial Letter, the Developer's annexation satisfies the criteria in Section 8-3-3-3 of the LDC because: (1) the annexation is in accord with the Comp Plan, and the best interests of the City would be served by annexation of the County Property and the Park; (2) the County Property and Park are capable of being integrated into the City and developed in compliance with the applicable provisions of the LDC, the Municipal Code, and the terms of the Annexation Agreement that will be simultaneously approved with the Applications; and (3) there will be capacity to adequately serve residents of the County Property and Park with all necessary utilities, facilities, and public services.

Therefore, as discussed in the Initial Letter, the annexation of the County Property and the Park complies with all relevant criteria in the Colorado Constitution, the Act, and the LDC.

B. Initial Zoning

1. The Initial Zoning Application Meets the Applicable LDC Criteria.

Once the County Property and Park have been annexed into the City, the Developer has requested that the properties be zoned IL and OS, respectively. The City reviews applications for initial zoning for their

compliance with criteria in LDC Section 8-3-4-2.A for approval. As discussed on Pages 6–8 of the Initial Letter, the initial zoning application meets the criteria because: (1) it is consistent with the Comp Plan; (2) it is consistent with the stated intent of the IL and OS zone districts; (3) facilities and services will, prior to development, be available to serve the County Property and Park while maintaining adequate levels of service to existing development; (4) the intended land use will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation and any unintended adverse impacts will be substantially mitigated; and (5) the IL and OS zoning is consistent with the character of existing and planned development on adjacent properties and in the surrounding area, and the Developer is committed to taking additional measures to substantially mitigate any negative effects.

Therefore, as discussed in the Initial Letter, the initial zoning of the County Property and the Park as IL and OS, respectively, complies with all relevant criteria in the LDC.

C. **Rezoning**

Because the GC zone district is not suitable for Project Indiana, the Developer has requested that the City rezone the City Property to IL. The City reviews applications for rezoning for their compliance with the criteria for approval in LDC Section 8-3-4-2.A. As discussed on Pages 1–3 of the Supplemental Letter: (1) the rezoning is consistent with the Comp Plan; (2) the rezoning is consistent with the stated intent of the IL zone district; (3) facilities and services will, prior to development, be available to serve the City Property while maintaining adequate levels of service to existing development; (4) the intended land use will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, and any unintended adverse impacts will be substantially mitigated; and (5) the IL zoning is consistent with the character of existing and planned development on adjacent properties and in the surrounding area, and the Developer is committed to taking additional measures to substantially mitigate any negative effects.

Therefore, as discussed in the Supplemental Letter, the rezoning of the City Property complies with all relevant criteria in the LDC.

D. **The First Petition Group Letter and Second Petition Group Letter Do Not Present Valid Arguments Against Approval of the Applications**.

The First Petition Group Letter and the Second Petition Group Letter contain a number of items that RVC believes should be grounds for delay or denial of the Applications. However, as discussed at length in the First Response Letter and Second Response Letter, none of the items are valid grounds for delay or denial of the Applications.

a. *First Petition Group Letter*

The First Petition Group Letter groups its arguments against Project Indiana into four categories: (1) Pre-Development Items; (2) Missing Study; (3) Unanswered Questions from Public Meetings; and (4) Communication Problems, Confusing Information.

(i) Pre-Development Items

The First Petition Group Letter includes nine pre-development items that it erroneously asserts should be grounds for delay or denial of the Applications. These items are related to the number of daily truck trips, the Comp Plan Neighborhood/Community Commercial designation, the location of the detention pond, the CDOT access permit, the intersection of Eldridge Street and W. 68th Avenue, truck traffic on Fig Street, trees in the Park, a fence along the northern border of the Property, and the number of parking spaces. As discussed on Pages 2–7 of the First Response Letter, none of the items identified in the First Petition Group Letter present a valid reason for City Council to delay or deny the Applications.

(ii) Heavy Truck Routing Plan

The First Petition Group Letter states that a heavy truck routing plan is required to use semi-trailers, dump trucks, trash hauling trucks, and other comparable heavy vehicles at a frequency of more than 25 heavy truck trips per week and such plan has not been provided by the Developer. However, as discussed on Pages 7–8 of the First Response Letter, a heavy truck routing plan is outside of the scope of review for the Applications and will be addressed during the site review process. Moreover, the Developer has provided all information for the heavy truck routing plan as part of the traffic study and other components of the Applications. Therefore, the lack of a specific heavy truck routing plan is not a valid reason for City Council to delay or deny the Applications.

(i) Unanswered Questions from Public Meetings

The First Petition Group Letter requests that the City suspend the processing of the Applications because some of the more than 500 questions presented during an optional five-hour long neighborhood meeting may not have been answered during the meeting due to time constraints. However, as discussed on Pages 8–14 of the First Response Letter, the Developer exceeded the LDC requirements with respect to community engagement and provided answers to the written questions enclosed with the First Petition Group Letter. In sum, the Developer complied with all necessary LDC criteria, and a small number of questions from a neighborhood meeting that were not answered during the meeting but were subsequently answered is not relevant to City Council's review of the Applications.

(ii) Communication Problems, Confusing Information

The First Petition Group Letter alleges that the public was prevented from participating in the review process because of communication problems and confusing information provided by the Developer. However, as discussed on Page 8 of the First Response Letter, the Developer has gone above and beyond what is required by the LDC to facilitate the public's participation in the review process. As evidenced by the number of public comments and participants in the optional second neighborhood meeting, any communication problems and potentially confusing information did not prevent the public from participating in the review process. The Developer complied with (and exceeded) all necessary LDC criteria, and some minor confusion related to an optional neighborhood meeting is not a proper reason for City Council to delay or deny the Applications.

b. *Second Petition Group Letter*

The Second Petition Group Letter groups its arguments against Project Indiana into three categories: (1) Incorrect Information on a Material Issue; (2) Material Omission of Information; and (3) Items of Concern Presented in a Summary Report.

(i) Incorrect Information on a Material Issue

The Second Petition Group Letter states that the staff report to the Planning Commission incorrectly refers to "semi-truck trips" instead of "truck trips." However, as discussed on Pages 1–2 of the Second Response Letter, this is a minor typographical error, and Project Indiana's use of cargo vans complies with the 50-truck limitation set forth in Section 11-3-3 of the LDC. Therefore, this typographical error is not a valid reason for City Council to delay or deny the Applications.

(ii) Material Omission of Information

The Second Petition Group Letter states that the staff report to the Planning Commission improperly failed to disclose the fact that CDOT has not yet granted an access permit for the proposed access point at the intersection of 68th Avenue and Indiana Street, and that a preliminary review by CDOT rejected signalization of the intersection. However, as discussed on Page 2 of the Second Response Letter, this information was properly omitted from the staff report to the Planning Commission because it is not relevant to the

Applications and does not relate to the review criteria. Therefore, this omission is not a valid reason for City Council to delay or deny the Applications. Furthermore, to the extent this is relevant, it is anticipated that the CDOT permits will be signed by CDOT this week.

(iii) Items of Concern in the Summary Report

The Second Petition Group Letter includes certain citizen concerns related to the Applications, which it alleges demonstrate that the Developer has not met the burden of proof for the initial zoning and rezoning related to Comp Plan requirements, LDC requirements, truck traffic, operations as light industry, minimal impact on surrounding properties, water quality of Ralston Creek or integrity of the Park as a natural area, and work with stakeholders. However, as discussed on Pages 2–18 of the Second Response Letter, this assertion is inaccurate. The Developer has amply demonstrated in the Applications and the Developer Letters that it has met the burden of proof for the initial zoning and rezoning. Therefore, the items raised in the Second Petition Group Letter are not valid reasons for City Council to delay or deny the Applications.

V. **CONCLUSION**

As summarized in this letter and the Developer Letters, Project Indiana satisfies the applicable criteria for approval in the LDC, and neither the Silvestro Letter, nor the First Petition Group Letter, nor the Second Petition Group Letter present any valid arguments as to why the Applications should be denied. Therefore, the Developer respectfully requests approval of its annexation, zoning, and rezoning applications, and looks forward to developing this successful and beneficial project in the City.

Sincerely,

Carolynne C. White

Trip Generation Memorandum and Delivery Station National Trip Generation Study White Paper

[*see attached*]

TRIP GENERATION MEMORANDUM

Exhibit F- Public Comment June 10-14, 2021

TO:	JENNY WOLFSCHLAG, CITY OF ARVADA DEVELOPMENT MANAGER (JWOLFSCHLAG@ARVADA.ORG)	DDV1 PROJECT TYPE: DELIVERY STATION 6750 INDIANA STREET ARVADA, CO, 80007
FROM:	C ASSOCIATES, INC. [redacted])	
CC:	[redacted]	
DATE:	JUNE 11, 2021	

Project Indiana is a proposed Amazon package delivery station to be located on the east side of Indiana Street (SH-72) between 64th Avenue and 72nd Avenue in Arvada, Colorado. Specifically, the project will be located at 6750 Indiana Street. The proposed Project Indiana development is anticipated to include a 112,485 square foot warehouse and distribution building. The purpose of this memorandum is to compare trip generation utilized in the Project Indiana Traffic Impact Study prepared by Kimley-Horn and Associates in January 2021 to actual trip generation count data collected at various other Amazon delivery stations.

NV5 prepared a Delivery Station Trip Generation Study White Paper in February 2021 that presents trip generation data from 11 Amazon delivery stations located across North America. The White Paper was prepared due to the ITE Trip Generation Manual not providing an applicable land use that correctly represents traffic generation of delivery stations with 24-hour schedules. From the White Paper study, trip rates were determined based on 7-day averages for daily, AM, and PM peak hours of the adjacent street, as well as AM and PM peak hours of the generator. These trip rates were calculated per 1,000 square feet of operational building area. The Delivery Station Trip Generation Study White Paper prepared by NV5 is attached.

Project trip estimates have been calculated based on the trip rates developed in the Delivery Station Trip Generation Study White Paper and the 112,485 square foot building area of the proposed Project Indiana delivery station in Arvada. The following table compares the trip generation utilized in the Project Indiana Traffic Impact Study to the trips calculated for the proposed site based on the average trip rates derived from actual traffic counts provided in the Delivery Station Trip Generation Study White Paper. Client data previously utilized in the Project Indiana traffic study, as well as trip generation calculations with data from the Delivery Station Trip Generation Study are attached.

Trip Generation Comparison: Project Indiana Traffic Study vs. Delivery Station Count Data

Vehicle Class	Daily Trips	Weekday Vehicle Trips					
		AM Peak Hour of Generator			PM Peak Hour of Adjacent Street		
		In	Out	Total	In	Out	Total
Project Indiana Traffic Study Trips							
Automobile	906	102	0	102	60	30	90
Vans	404	0	180	180	0	0	0
Line-Haul Trucks	42	0	1	1	1	0	1
Total Trips	**1,352**	**102**	**181**	**283**	**61**	**30**	**91**
Amazon Delivery Station Count Data Trips							
Automobile	664	33	34	67	20	21	41
Vans	306	26	27	53	9	10	19
Line-Haul Trucks	20	0	1	1	0	0	0
Total Trips	**990**	**59**	**62**	**121**	**29**	**31**	**60**
Net Difference	**-362**	**-43**	**-119**	**-162**	**-32**	**+1**	**-31**

Exhibit B Public Comment June 10-14, 2021

As summarized in the trip generation comparison table, the Project Indiana traffic study evaluated the site assuming that the project would generate 1,352 daily weekday trips, with 283 trips occurring during morning peak hour of the generator and 91 trips occurring during the afternoon peak hour of the adjacent street. Based on actual Amazon Delivery Station count data provided in the February 2021 White Paper, the project would actually be expected to generate 990 daily weekday trips, with 121 of these trips occurring during morning peak hour of the generator and 60 of these trips occurring during the afternoon peak hour of the adjacent street. Therefore, with updated delivery station count data, this project site is anticipated to generate 362 fewer daily trips, 162 fewer trips during the morning peak hour of the generator, and 31 fewer trips during the afternoon peak hour of the adjacent street than previously studied. This identifies that Project Indiana will likely generate less traffic than evaluated in the traffic impact study, and therefore the traffic study provides a conservative analysis. It should also be noted that count data indicates that line-haul truck traffic will likely be lower than originally studied as 42 truck trips were utilized in the Project Indiana traffic study while only 20 line-haul truck trips are expected based on current delivery station count data information.

Given the specific nature of this site, The Project Indiana Traffic Impact Study utilized a methodology separate from the typical ITE Trip Generation Manual and Handbook to estimate project traffic. Project trip rates from the Project Indiana study were developed based on anticipated hourly employee staffing and package vehicle information directly provided by Amazon, the user of the facility. Comparison of trips rates derived from actual count data identifies that the actual facility will likely generate less traffic than what was evaluated in the Project Indiana Traffic Study. Therefore, the development traffic study provides a conservative analysis.

NATIONAL: DELIVERY STATION TRIP GENERATION STUDY WHITE PAPER

CONTACT: JOHN KARNOWSKI, P.E., PTOE, AICP

Executive Summary

There is a national trend toward on-line shopping and delivery of goods in North America. None of the current ITE Trip Generation land uses represent the trips of delivery stations with a 24-hour schedule. This study presents data from eleven delivery stations located across North America. Rates were based on 7-day averages for daily, AM/PM of the commuter peak hour, and AM/PM of the generator peak hour trip ends. Trip generation rates were calculated per 1,000 square foot of operational area.

The data confirms that 24-hour Delivery Stations exhibit trip generation characteristics that are significantly different from other potentially comparable land uses included in ITE's Trip Generation Manual, specifically land use codes (LU) 150, 154, 155, and 156. The results of the study support the need for a delivery station land use category.

The evaluation of eleven sites across North America yielded operational area (excluding all interior loading, queuing, and parking areas) as a functional metric. Total daily, AM and PM peaks of the adjacent street (typical commuting hours) and AM and PM peak of the generator average trip rates were developed and are documented within the report. Graphs similar to those included in ITE's Trip Generation Manual are included in the Appendix. The recommended weighted average trip rates are shown below.

Land Use	Independent Variable	Daily	Peak Hour of the Adjacent Street		Peak Hour of the Generator	
			AM	PM	AM	PM
Delivery Station	1,000 sf of Operational Area	8.79	0.25	0.53	1.08	1.03

Since delivery stations often designate driveways for specific purposes, such as delivery vehicle exits, the typical mix of vehicle types throughout the day and during peak periods are also provided.

Vehicle	Independent Variable	Daily	Peak Hour of the Adjacent Street		Peak Hour of the Generator	
			AM	PM	AM	PM
Passenger Vehicles	1,000 sf of Operational Area	5.89	0.23	0.36	0.60	0.56
Delivery Vans		2.72	0.01	0.17	0.47	0.46
Line-Haul Trucks		0.18	0.01	-	0.01	0.01

Key Conclusions

- 24-Hour Delivery Stations exhibit trip generation characteristics that are significantly different from other potentially comparable land uses included in ITE's Trip Generation Manual.
- Operational Area, the minimal building size requirement to process packages and support onsite workers, provides potential trip generation rates.

Exhibit F- Public Comment June 10-14, 2021

NATIONAL: DELIVERY STATION TRIP GENERATION STUDY WHITE PAPER

CONTACT: JOHN KARNOWSKI, P.E., PTOE, AICP

There is a national trend toward on-line shopping and delivery of goods in North America. The current ITE Trip Generation Land Use Codes do not represent the trips of delivery stations operating with 24-hour schedules. This study summarizes trip characteristics of eleven delivery stations across North America, develops trip generation rates for an independent variable, and compares the results to the existing trip rates for specific ITE Land Use Codes.

INTRODUCTION AND BACKGROUND

ITE does not have a standard for e-commerce delivery station operations. Traffic studies for these facilities frequently use warehousing, high-cube transload warehousing, fulfillment center, high-cube parcel hub warehousing (land use codes 154-156), or possibly another land use category to estimate trips for the stations. Consultants and local traffic agencies do not universally apply the land use codes for delivery stations. The inconsistent use of trip rates can result in confusion on the part of reviewing agencies, a distrust of the numbers provided by developers, delays in preparing traffic studies, and possibly unnecessary mitigation measures.

The purpose of this paper is to present delivery station trip characteristics, evaluate trip generation rates using independent variables, and develop a standard metric for delivery stations.

STUDY DESIGN

This trip generation study was designed to establish a method to generate delivery station trip ends based on actual trip counts from multiple delivery stations of various sizes across North America.

- Sites were selected where trips into and out of a facility could be isolated from other trip generators, provided all necessary parking onsite (no off-site parking), were located where there were minimal or no multi-modal transportation options, and had been in operation long enough to establish routine schedules (30 days minimum).
- Traffic counts were collected for 24-hour periods for seven consecutive days.
- Site operators provided employee numbers (onsite workers, not including delivery drivers)
- Site operators provided site plans, including the interior building layouts.

Data Collection Methodology

Traffic volume data was collected by National Data & Surveying Services (NDS) for all sites to ensure consistency. Data for ten sites was collected Thursday, November 5 through Wednesday, November 11, 2020. Data for the eleventh site was collected Thursday January 14 through Wednesday January 20, 2021. Data was recorded by video and tabulated as entering or exiting trips for each discrete driveway by vehicle type: automobiles (cars and pickup trucks), vans (26' cargo vans), box trucks, tractor-trailers, and others (motorcycles, garbage pickup vehicles, etc.). A 24-hour bi-directional tube count was also taken at each site on an adjacent roadway with the highest daily traffic volume to establish the adjacent street AM and PM peak hours. Raw data is provided in a separate technical appendix, available upon request.

Exhibit F- Public Comment June 10-14, 2021

The data was collected during the COVID-19 pandemic and may be conservatively high due to an increase in on-line shopping due to stay-at-home orders issued to reduce the spread of the virus.

Raw data was summarized combining counts from all driveways to obtain total trip volumes and total trip volumes by vehicle type for each site. The peak hours of the adjacent street were determined by the highest volumes between 7:00 – 9:00 am and 4:00 – 6:00 pm from the 24-hour tube counts. The peak hours of the generator (the delivery station's highest volume in the morning and afternoon or evening) were determined by the highest volume between midnight and noon and between noon and midnight from the total trip counts at each site.

Trip data was summarized into vehicle types for passenger vehicle, delivery van and trucks (line-haul) for this study. Other unidentified vehicle types were added to the passenger vehicle type since they would be using the same driveways and there was insufficient data to categorize them otherwise. Box trucks were manually assigned as either delivery vans or line-haul trucks depending on their individual trip characters (e.g., Entering and exiting at the same times as vans vs. arriving and departing like line-haul trucks). Depending on the site, some packages are delivered to the station with box trucks when a line-haul truck is not necessary. At other locations, box trucks are used for some special delivery routes. A separate rate for heavy vehicles was not calculated since the presence of box trucks are atypical and the raw data did not specify if any of the other vehicle types were heavy vehicles.

Site	Address	Average Daily Trips	Average Employees	Building Size (SF)	Operational Area (S.F.)
A	1757 Tapo Canyon, Simi Valley, CA	385	25	204,680	96,200
B	400 Littlefield Ave S. San Francisco, CA	850	124	166,640	56,970
C	600 W Technology Dr, Palmdale, CA	1,545	134	128,192	128,192
D	4306 120th Ave, Kenosha, WI	895	96	748,300	187,000

Independent Variables

A comparison of site plans for delivery stations (not just these 11 sites) exposes a wide variety of layouts, including site sizes, building sizes, and numbers of parking spaces. A preliminary assessment of daily trips to employees and total building size revealed very poor correlation of data among the sites. While the poor correlation between number of employees and total trip ends could not be explained, the differences between the sites in terms of total building size and how the buildings were being used was apparent. Delivery stations frequently occupy existing buildings that

Exhibit F- Public Comment June 10-14, 2021

are larger than necessary for sorting packages for delivery routes. At many sites, vans are loaded inside the building. Others also have enough interior space for the next wave of delivery vehicles to queue before moving into the loading area. Still others have enough excess interior space to park delivery vehicles overnight, and in rare cases employees and delivery drivers also park inside buildings. Other sites do not have sufficient space to accommodate all parking needs.

Each delivery station has a minimal building size requirement to process packages and support onsite workers. This is termed "operational area" and is the initial requirement for site selection for new delivery stations. Existing and proposed buildings available for lease are often larger than this operational area but are still leased for the delivery stations and excess internal space is used for other functions as mentioned above. Operational area was measured from site plans and then compared to the total daily trip ends. An explanation of how to determine operational area and the operational areas of the sites included in this study are included in the Appendix

STUDY RESULTS

Weighted average trip rates, Standard Deviations (SD), percentages of entering and exiting trips, and vehicle mixes were calculated for the sites for the following time periods to mirror the types of rates documented in the ITE Trip Generation Manual. Trip ends per 1,000 square feet of operational area are presented below with graphed data summary sheets in the Appendix. Best-fit curve equations with equation coefficients of determination (R^2) were also evaluated but none were suitable for inclusion in the results.

1. Total Daily Trips (7-Day Average)
2. AM Peak Hour of Adjacent Street Traffic (the delivery station's volume during rush hour)
3. PM Peak Hour of Adjacent Street Traffic (the delivery station's volume during rush hour)
4. AM Peak Hour of Generator (the delivery station's highest volume in the morning)
5. PM Peak Hour of Generator (the delivery station's highest volume in the afternoon or evening)

Total Daily Trips

Total daily trips for each site were summarized for all vehicle types at all driveways and averaged for the seven-day collection period. The data reflects the range of trip generation characteristics for the selected delivery stations.

As expected, daily trips are evenly split between entering and exiting. Passenger vehicles make up an average of 67% of the daily trip ends, delivery vans account for 31%, trucks comprise 2% of the daily trip ends. Trip rates by vehicle type are summarized on page 6.

Daily Trip Rate
(7-Day Weighted Average)

Site	Trips	Operational Area (SF)	Rate/ 1,000 SF

Exhibit F- Public Comment June 10-14, 2021

AM Peak Hour of Adjacent Street Traffic

The AM Peak hour of the adjacent street was determined for each site based on the 24-hour tube counts for the hours between 7:00 am and 9:00 am. The majority of morning peak trips are entering (78%) versus exiting (22%). Passenger vehicles make up the bulk (93%) of AM peak hour of the adjacent street trip ends. Delivery vans and trucks account for the remaining trip ends (4% and 3% respectively).

The data shows that nine of the eleven delivery stations generate 35 or fewer trips during the typical AM commuting peak hour. The two exceptions generate 86 and 117 trips.

Adjacent Street AM Peak Hour Trip Rate

J	65	246,600	0.26
K	63	201,473	0.31
Average Rate:		0.53	
SD:		0.45	
R^2:		<0.50	

PM Peak Hour of Adjacent Street Traffic

The PM peak hour of the adjacent street was determined for each site based on the 24-hour tube counts for the hours between 4:00 pm and 6:00 pm. Evening peak hour traffic is almost evenly split between entering (48%) and exiting (52%). The vehicle breakdown during this period is very similar to the daily mix with 68% passenger vehicles, 32% delivery vans and on average no tractor-trailer trip ends.

The data shows that all the delivery stations generate fewer than 185 peak hour trips with eight of the sites generating fewer than 70 trips during the typical PM commuting peak hour.

AM Peak Hour of Generator

The AM peak hour of the generator was determined for each site based on the highest hourly total driveway volumes between midnight and noon as delivery stations operate 24-hours a day and schedule employees as well as deliveries off peak to the extent feasible in any given market. For most sites, the morning peak hour of the generator occurred between 10:00 am and 11:00 am, but two sites generated the most traffic between 9:00 am and 10:00 am. Trips are nearly split between entering (49%) and exiting (51%). Passenger vehicles account for 56% of the trip ends, delivery vans 43% and tractor trailer trucks the remaining 1%.

Delivery Station AM Peak Hour Trip Rate
(7-Day Weighted Average)

Site	Trips	Operational Area (SF)	Rate/ 1,000 SF

Average Rate:		1.03	
SD:		0.60	
R^2:		<0.50	

PM Peak Hour of Generator

The PM Peak hour of the generator was determined for each site based on the highest hourly total driveway volumes between the hours of noon and midnight similar to the morning peak hour of the generator. The evening peak hour of the generator generally occurred after 6:00 pm and typically occurred between 8:00 and 9:00 pm, but three sites experienced the highest traffic volumes in the afternoon sometime between 2:00 pm and 4:00 pm. During this hour traffic is almost evenly split between entering (52%) and exiting (48%). The mix of vehicles during this peak PM hour of the generator are 54% passenger vehicles, 45% delivery vans, 1% trucks.

The data confirms delivery stations generate more trips during a different evening hour than the typical peak hour of the adjacent street.

Trip Rates by Vehicle Type

Trip Rates by Vehicle Type (7-Day Weighted Average)			
Time of Day	Passenger Vehicles	Delivery Vans	Line-Haul Trucks
Daily	5.89	2.72	0.18
AM Peak Hour of the Adjacent Street	0.23	0.01	0.01
AM Peak Hour of the Generator	0.36	0.17	-
PM Peak Hour of the Adjacent Street	0.60	0.47	0.01
PM Peak Hour of the Generator	0.56	0.46	0.01

Comparison to ITE Rates

The ITE Trip Generation land use descriptions for Warehousing (LU 150), High-Cube Transload and Short-Term Storage Warehouse (LU 154), High-Cube Fulfillment Center Warehouse (LU 155 non-sort), High-Cube Fulfillment Center Warehouse (LU 155 sort) and High-Cube Parcel Hub Warehouse (LU 156) are the most comparable to the description of a delivery station. The sort version of the High-Cube Fulfillment Center Warehouse (LU 155) is not comparable but is included in these comparisons to so demonstrate.

Comparison 1: Published Trip Rates vs. This Study

The table below summarizes trip rates for square-footage-based size for these land uses and this study. Since the studies use different size types, this comparison is of little use, other than possibly to note that the standard deviation in the rates from this study are generally within the range of the standard deviations from the studies used in the Trip Generation Manual.

Exhibit F- Public Comment June 10-14, 2021

Trip Generation Rate Comparison[1]

[3]Based on two studies
[4]Based on three studies
[5]Based on eight studies
[6]Based on four studies
[7]Per 1,000 SF of operational area. Based on eleven studies

Comparison 2: Studies Used in Published ITE Rates vs. This Study

A comparison using the average sizes of the buildings included in the trip generation studies for the ITE published land uses demonstrates the variability of results using these rates. The average size of the buildings included in the ITE land uses are much larger than the average operational size of the delivery stations yet depending on the type of activity the buildings house, the typical delivery station may produce much less or much more traffic than a particular comparable land use.

Trips Generated using Average Size of Sites Included in Various Studies[1]

[1]Gross floor area/1,000 used for published ITE Land Uses. This study uses operational area/1,000

Comparison 3: Published ITE Rates Applied to This Study's Average Building Size vs. This Study

An additional comparison was developed based on the average building size (363,267 SF) and the average operational area (151,546 SF) from this study. ITE land uses were applied to generate the trip ends and compared to trip ends from this study. The results using the trip rates developed in this study are quite different from the results using the ITE rates.

Exhibit F- Public Comment June 10-14, 2021

[1]Gross floor area/1,000 of this study used for published ITE land uses. This study uses operational area/1,000

These comparisons confirm that delivery station trip characteristics are different from other industrial land uses currently included in the ITE Trip Generation Manual.

Special Circumstances

All eleven sites in this study had on-site parking only. In situations where off-site parking is required, it is typically limited to delivery vans and employee parking remains on-site. When van parking is off-site, drivers park at the off-site location and drive the vans to the site. There is no reduction in trips to the site as it is a one-for-one swap of trips.

Trips are reduced when employees or delivery drivers use transit, ride sharing, or other non-single occupant vehicle transportation options are available. Employee and delivery driver trips can be reduced, but delivery vehicle trips cannot.

Conclusions and Recommendations

The data confirms that 24-hour Delivery Station trip generation characteristics are significantly different from those documented in the ITE Trip Generation for comparable land uses (land use codes 150, 154, 155 non-sort, 155 sort, and 156).

Key Conclusions:

- 24-Hour Delivery Stations exhibit trip generation characteristics that are significantly different from other potentially comparable land uses included in ITE's Trip Generation Manual.
- Operational Area, as defined by that interior area necessary to the parcel sorting and delivery preparation activities (excluding all interior loading, queuing, and parking areas), provides potential trip generation rates. While operational area is not a conventional trip rate metric, ITE does include trip rates based on atypical metrics, such as fueling spots for gasoline stations and full-time doctors for medical clinics, when such metrics provide the best relationships among trip data.

The authors note that the goal of this study is to improve the traffic engineer's ability to select the proper land use trip generation rates specific to a project when working with delivery stations that operate off-peak hour employee and delivery schedules. The results are not intended to replace current trip generation rates or their application where operational characteristics are unknown.

APPENDIX

AVERAGE VEHICLE TRIP ENDS VS:

OPERATIONAL AREA

Exhibit F- Public Comment June 10-14, 2021

LAST MILE DELIVERY STATION

Description

Delivery Stations are package handling facilities that support the “last mile” of a fulfillment logistics network operating 24-hours a day, 7 days a week, with employee shift and delivery schedules that generally avoid the typical commuter peak periods.

Additional Data

Truck trips account for 2% of the typical daily traffic of the sites surveyed. No vehicle occupancy data were available specifically for delivery station, but the average is assumed to be 1.0 person per automobile as the data was collectged during the COVID-19 pandemic.

The peak hour of the generator does not coincide with the peak hour of the adjacent street traffic.

Facilities operate 24-hours/day with employees in shifts.

Eleven sites were surveyed in the United States for 7-consecutive days.

A 24-hour bi-directional tube count was taken at each site on an adjacent roadway with the highest daily traffic volume to establish the adjacent street AM and PM peak hours.

Vehicle Mix

Time Period	Passenger Vehicles	Delivery Vans	Line-Haul Trucks
Daily	67%	31%	2%
AM Peak of the Adjacent Street	93%	4%	3%
PM Peak of the Adjacent Street	68%	32%	0%
AM Peak of the Generator	56%	43%	1%
PM Peak of the Generator	54%	45%	1%

APPENDIX B

SITE OPERATIONAL AREAS

Exhibit F- Public Comment June 10-14, 2021

OPERATIONAL AREA DETERMINATION

Operational area is defined as that interior area necessary to the parcel sorting and delivery preparation activities and excludes all interior loading, queuing, and parking areas. The following pages illustrate the operational areas for those sites included in this study.

Site A

The total building size is known, and the site plan is scalable. The interior layout of the building shows van queueing areas, van loading areas, van travel paths, and a delineation between van activities and the operational area. The operational area can be scaled from the plan and is highlighted in turquoise. 96,200 SF.

Site B

The total building size is known, and the site plan is scalable. The interior layout of the building shows a van queueing area, a van loading area, and parking areas. The operational area can be scaled from the plan and is highlighted in turquoise. 56.970 SF.

Site C

The total building size is known. The interior layout of the building does not include any parking, van queuing or loading areas. The entire building is devoted to operational activities. The operational area is highlighted in turquoise. 128,192 SF.

Site D

The total building size is known, and the site plan is scalable. The interior layout of the building shows van loading and parking areas. The operational area can be scaled from the plan and is highlighted in turquoise. 187,000 SF.

Site E

The total building size is known, and the site plan is scalable. The interior layout of the building shows van loading and parking areas. The operational area can be scaled from the plan and is highlighted in turquoise. 152,224 SF.

Site F

The total building size is known. The interior layout of the building is not provided, but the site plan shows the necessary parking, van queuing area, and van loading area as external. The entire building can be assumed to be devoted to operational activities. The operational area is highlighted in turquoise. 112,138 SF.

Site G

The site plan has a table indicating the area of the building that is “occupied” for the purpose of site plan trip generation and notes this does not include parking or van activity areas. Interior parking is indicated by striping while van staging areas are indicated via purple rectangles and van loading areas are indicted by green rectangles. The operational area is highlighted in turquoise. The site plan is also scalable, and the operational area size was verified. 173,170 SF.

Site H

The total building size is known. The interior layout of the building is not provided, but the site plan shows the necessary parking, van queuing areas, and van loading areas as external. The entire building is devoted to operational activities. The operational area is highlighted in turquoise. 144,043 SF.

Site I

The total building size is known, and the site plan is scalable. The interior layout of the building also shows van loading areas. The arrows on this plan indicate the movement of packages, not vans. The operational area can be scaled from the plan and is highlighted in turquoise. 169,000 SF.

Site J

The total building size is known, and the site plan is scalable. The interior layout of the building uses color coding to show van queueing, van loading, and parking areas. Although no other interior layout information is provided one can assume the remainder is operational area. The operational area can be scaled from the plan and is highlighted in turquoise. 246,600 SF.

Site K

The total size of the building is shown on the plan and while the interior layout of the building is not provided, van staging and loading are shown as exterior activities. Considering the number of loading spots and their position next to the building it is reasonable to assume the entire building is devoted to operational activities. The operational area is highlighted in turquoise. 201,473 SF.

General Note: In some cases, scales for the site plans are not available, but it is possible to determine the percentage of the building that is dedicated to operations by measuring both the size of the building and the size of the operational area. The percentage of the building devoted to operations can then be applied to a known building size.

Limited Threatened and Endangered Species Habitat Review

[*see attached*]

22481830.5

June 15, 2020
Revised July 8, 2020
Revised September 2, 2020

SPA Properties LLC
8801 River Crossing Boulevard, Suite 300
Indianapolis, IN 46420

Attn: Mr. Matt Boone
[redacted]

Re: Limited Threatened and Endangered Species Habitat Review
Proposed DDV1
Northeast of Indiana Street and West 66th Place
Arvada, Colorado 80007
Terracon Project No. 26207085

Dear Mr. Boone:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Limited Threatened and Endangered Species Habitat Review report for the above-referenced site. This work was performed in accordance with Terracon Proposal No. PCP207166 dated June 4, 2020.

1.0 INTRODUCTION

Terracon performed a Limited Threatened and Endangered Species Habitat Review for 12 parcels of approximately 36.14 acres of undeveloped and residential land at the northeast corner (NEC) of Indiana Street and West 66th Place in Arvada, Jefferson County, Colorado, hereafter referred to as the site (Appendix A, Exhibit 1). Terracon understands the Client is proposing to acquire the site for commercial development.

At the time of the field assessment, the site was observed to consist primarily of undeveloped land with residential and farm developments. The northwest and southwest portions of the site are developed with residential and farm structures. The central and northern portions of the site remain largely undeveloped with the exception of several apparent two-track roads. The southwest portion of the site has been used as a haying operation at some point with a construction lay-down yard along the southern margins. The site is adjoined to the north by Ralston Creek and Maple Valley Park; to the east by commercial development as well as Fig Street followed by undeveloped land; to the south by West 66th Place followed by commercial development; and to the west by Indiana Street followed by commercial development.

Exhibit E Public Comment June 10-14, 2021

The observations and opinions contained in this report are based on guidance, regulations, and data available at the time of preparation as well as site conditions encountered at the time of the site reconnaissance. Guidance, regulations, data furnished by others, and site conditions are dynamic and subject to changes beyond the control of Terracon. A future evaluation may yield differing results.

This Limited Threatened and Endangered Species Habitat Review is prepared for the exclusive use and reliance of SPA Properties LLC. Use or reliance by any other party except a governmental entity having jurisdiction over the site is prohibited without the written authorization of SPA Properties LLC and Terracon. Reliance on the report by the client and authorized parties will be subject to the terms, conditions and limitations stated in our Vendor Services Agreement.

2.0 METHODOLOGY

Terracon reviewed readily available resources to assist with identifying suspect threatened and endangered (T&E) species habitat for Jefferson County, Colorado. The United States Fish and Wildlife Service (USFWS) Information, Planning, and Conservation (IPaC) system was utilized to generate a list of potential federally endangered species that may be located in the vicinity of the site. Terracon also reviewed a list of Federal and State protected species generated through the Colorado Parks and Wildlife Department (CPW) threatened and endangered list.

3.0 LIMITED THREATENED AND ENDANGERED SPECIES REVIEW

The USFWS IPaC system was utilized to generate a list of potential federally endangered species that may be located in the vicinity of the site (Appendix A, Exhibit 2). Based on a review of the IPaC information, eight threatened, endangered, or candidate species and five migratory birds on the migratory birds of concern list were identified as potentially occurring in the vicinity of the site in Jefferson County as shown in the table below. No critical habitat was identified in the IPaC system as being mapped in the vicinity of the site (Appendix B).

IPaC Listed Species

Species Name	Species Habitat	Determination
Canada Lynx (*Lynx canadensis*)	Moist, cool, boreal spruce-fir forests that receive deep snow.	No effect - The site consists of deciduous riparian habitat and disturbed rangeland habitat.
Least Tern (*Sterna antillarum*)	Sea beaches, bays, large rivers, salt flats. Inland, found along rivers with broad exposed sandbars, lakes with salt flats nearby.	No effect - The site consists of deciduous riparian habitat and disturbed rangeland habitat.
Mexican Spotted Owl (*Strix occidentalis lucida*)	Mature mixed-conifer, pine-oak, and riparian forests.	No effect - The site consists of deciduous riparian habitat and disturbed rangeland habitat.

Extended Public Comment June 10-14, 2021

Piping Plover (*Charadrius melodus*)	Sandy beaches, tidal flats. Nests in open sandy situations near water. Sandbars along major rivers on northern Great Plains. Gravel or sand flats next to alkali lakes.	No effect - The site consists of deciduous riparian habitat and disturbed rangeland habitat.
Whooping Crane (*Grus americana*)	Muskeg, prairie pools, and marshes. Breeding habitat is in remote northern forests in areas of muskeg. Winters in coastal marsh.	No effect - The site consists of deciduous riparian habitat and disturbed rangeland habitat.
Pallid Sturgeon (*Scaphirhynchus albus*)	Main channels of large rivers. They prefer deep, turbid river channels with strong demersal currents.	No effect - The site consists of deciduous riparian habitat and disturbed rangeland habitat.
Ute Ladies'-tresses (*Spiranthes diluvialis*)	Occurs along riparian edges, gravel bars, old oxbows, high flow channels, and moist to wet meadows along perennial streams. It typically occurs in stable wetland and seepy areas associated with old landscape features within historical floodplains of major rivers. It also is found in wetland and seepy areas near freshwater lakes or springs.	No effect – Riparian habitat is significantly disturbed and dominated by invasive species and noxious weeds.
Western Prairie Fringed Orchid (*Platanthera praeclara*)	Moist tallgrass prairies and sedge meadows.	No effect – site is primarily xeric and dominated by invasive species.

Based on listed species documented in the site area and habitats of the listed species not being observed, it is Terracon's opinion that the project site does not provide suitable habitat for the federal or state listed protected species above.

The Migratory Bird Treaty Act of 1918 (MBTA) decrees that migratory birds and their parts (including eggs, nests, and feathers) are federally protected. The MBTA is the domestic law that affirms, or implements, the United States commitment to four international conventions (with Canada, Japan, Mexico, and Russia) for the protection of a shared migratory bird resource. Each of the conventions protect selected species of birds that are common to these countries (i.e., they occur in these countries at some point during their annual life cycle).

The following migratory birds of concern were identified within the vicinity of the project site on the IPaC:

Species Name	Bird of Conservation Concern (BCC)	Seasonal Occurrence in Project Area
Bald Eagle (*Haliaeetus leucocephalus*)	No	Breeding
Golden Eagle (*Aquila chrysaetos*)	Yes	Breeding

Exhibit E Public Comment June 10-14, 2021

Species Name	Bird of Conservation Concern (BCC)	Seasonal Occurrence in Project Area
Lark Bunting (*Calamospiza melanocorys*)	Yes	Breeding
Lesser Yellowlegs (*Tringa flavipes*)	Yes	Migration
Willow Flycatcher (*Empidonax traillii*)	Yes	Breeding

Field Observations

A Terracon field scientist visited the site on June 10, 2020 to conduct field observations of the habitat and opportunistically observed species, if present. the site was observed to consist primarily of undeveloped land with residential and farm developments. The northwest and southwest portions of the site are developed with residential and farm structures. The central and northern portions of the site remain largely undeveloped with the exception of several apparent two-track roads. The southwest portion of the site has been used as a haying operation at some point with a construction lay-down yard along the southern margins.

The residential portions of the site were dominated by turf grasses, ragweed (*Ambrosia sp.*), Canada thistle (*Cirsium* arvense) as well as Plains cottonwood (*Populus* sargentii) and narrowleaf cottonwood (*Populus* angustifolia). The majority of the undeveloped portions of the site are dominated by smooth brome (*Bromus inermis*) and Virginia pepperweed (*Lepidium virginicum*). The northern margins of the site were dominated by American elm (*Ulmus americana*), bull thistle (*Cirsium vulgare*), common teasel (*Dipsacus fullonum*), smooth brome, and plains cottonwood.

Black-billed magpies (*pica hudsonia*), American robins (*Turdus migratorius*), western wood-pewees (*Contopus sordidulus*) and European starlings (*Sturnus vulgaris*) were commonly observed throughout the site. A red-tailed hawk (*Buteo jamaicensis*) was perched with a nest on a plains cottonwood on the eastern portion of the site.

Multiple Eastern cottontail (*Sylvilagus floridanus*) were observed as well as a red fox (*Vulpes vulpes*). No amphibian species were observed or detected during the field survey.

At the time of the field assessment, Federal and State listed protected species were not observed on the site or the adjoining properties.

4.0 SUMMARY AND RECOMMENDATIONS

The intent of this report was to identify potential threatened and endangered species habitat within the project area based on obvious field observations and available species research for the area.

Based on a lack of suitable habitat and no observation of listed species, it is Terracon's opinion that the project site does not provide suitable habitat for federal or state listed threatened and

Exhibit E: Public Comment June 10-14, 2021

endangered species; therefore, at this time, Terracon does not recommend further consultation with the USFWS.

The existing red-tailed hawk nest should be monitored and CPW "Recommend Buffer Zones and Seasonal Restrictions for Colorado Raptors" (Appendix C) seasonal restriction of no human encroachment buffers adhered to.

5.0 GENERAL COMMENTS

The Limited Threatened and Endangered Species Habitat Review was performed in accordance with generally accepted practices of this profession undertaken in the similar geographical area. No other warranty is expressed nor implied. Readily available resources do not typically include comprehensive records of documented sightings of listed species as such information is generally not made available to the public. No determination can wholly eliminate uncertainty regarding project effects on listed species. The determinations, findings and conclusions provided in this scope of services should not be considered authoritative. The limited scope of services described herein may not allow a conclusive determination to be made. In such cases, additional assessment may be recommended.

We appreciate the opportunity to provide this Limited Threatened and Endangered Species Habitat Review for you. If you have any questions about this report or require additional services, please contact Cameron Sapp at (406) 656-3072.

Sincerely,
TERRACON CONSULTANTS, INC.

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered

Exhibit F- Public Comment June 10-14, 2021

species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the wind energy guidelines (http://www.fws.gov/windenergy/) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm; http://www.towerkill.com; and http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Exhibit F- Public Comment June 10-14, 2021

Endangered Species Act Species

There is a total of 8 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Note that 5 of these species should be considered only under certain conditions.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

2. The Bald and Golden Eagle Protection Act of 1940.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

MIGRATORY BIRD INFORMATION WAS NOT AVAILABLE WHEN THIS SPECIES LIST WAS GENERATED. PLEASE CONTACT THE FIELD OFFICE FOR FURTHER INFORMATION.

Migratory Birds FAQ

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.
Nationwide Conservation Measures describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. Additional measures and/or permits may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?
The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Exhibit F- Public Comment June 10-14, 2021

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the AKN Phenology Tool.

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?
The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets .

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?
To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: The Cornell Lab of Ornithology All About Birds Bird Guide, or (if you are unsuccessful in locating the bird of interest there), the Cornell Lab of Ornithology Neotropical Birds guide. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?
Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Eagle Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

Exhibit F- Public Comment June 10-14, 2021

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the Diving Bird Study and the nanotag studies or contact Caleb Spiegel or Pam Loring.

What if I have eagles on my list?
If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report
The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ “What does IPaC use to generate the migratory birds potentially occurring in my specified location”. Please be aware this report provides the “probability of presence” of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the “no data” indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ “Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds” at the bottom of your migratory bird trust resources page.

Wetlands

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

APPENDIX C
RECOMMENDED BUFFER ZONES & SEASONAL RESTRICTIONS FOR COLORADO RAPTORS

Exhibit F- Public Comment June 10-14, 2021

RECOMMENDED BUFFER ZONES AND SEASONAL RESTRICTIONS FOR COLORADO RAPTORS

Tolerance limits to disturbance vary among as well as within raptor species. As a general rule, Ferruginous Hawks and Golden Eagles respond to human activities at greater distances than do Ospreys and America Kestrels. Some individuals within a species also habituate and tolerate human activity at a proximity that would cause the majority of the group to abandon their nests. Other individuals become sensitized to repeated encroachment and react at greater distances. The tolerance of a particular pair may change when a mate is replaced with a less tolerant individual and this may cause the pair to react to activities that were previously ignored. Responses will also vary depending upon the reproductive stage. Although the level of stress is the same, the pair may be more secretive during egg laying and incubation and more demonstrative when the chicks hatch.

The term "disturbance" is ambiguous and experts disagree on what actually constitutes a disturbance. Reactions may be as subtle as elevated pulse rate or as obvious as vigorous defense or abandonment. Impacts of disturbance may not be immediately evident. A pair of raptors may respond to human intrusion by defending the nest, but well after the disturbance has passed, the male may remain in the vicinity for protection rather than forage to feed the nestlings. Golden eagles rarely defend their nests, but merely fly a half mile or more away and perch and watch. Chilling and over heating of eggs or chicks and starvation of nestlings can result from human activities that appeared not to have caused an immediate response.

A ‘holistic’ approach is recommended when protecting raptor habitats. While it is important for land managers to focus on protecting nest sites, equal attention should focus on defining important foraging areas that support the pair's nesting effort. Hunting habitats of many raptor species are extensive and may necessitate interagency cooperation to assure the continued nest occupancy. Unfortunately, basic knowledge of habitat use is lacking and may require documentation through telemetry investigations or intensive observation. Telemetry is expensive and may be disruptive so a more practical approach is to assume that current open space is important and should be protected.

Although there are exceptions, the buffer areas and seasonal restrictions suggested here reflect an informed opinion that if implemented, should assure that the majority of individuals within a species will continue to occupy the area. Additional factors, such as intervening terrain, vegetation screens, and the cumulative impacts of activities should be considered.

These guidelines were originally developed by CDOW raptor biologist Gerald R. Craig (retired) in December 2002. To provide additional clarity in guidance, incorporate new information, and update the conservation status of some species, the guidelines were revised in January 2008. Further revisions of this document may become necessary as additional information becomes available.

Exhibit F- Public Comment June 10-14, 2021

RECOMMENDED BUFFER ZONES AND SEASONAL RESTRICTIONS

BALD EAGLE

Nest Site:

No surface occupancy (beyond that which historically occurred in the area; see 'Definitions' below) within ¼ mile radius of active nests (see 'Definitions' below). Seasonal restriction to human encroachment (see 'Definitions' below) within ½ mile radius of active nests from October 15 through July 31. This closure is more extensive than the National Bald Eagle Management Guidelines (USFWS 2007) due to the generally open habitat used by Colorado's nesting bald eagles.

Winter Night Roost:

No human encroachment from November 15 through March 15 within ¼ mile radius of an active winter night roost (see 'Definitions' below) if there is no direct line of sight between the roost and the encroachment activities. No human encroachment from November 15 through March 15 within ½ mile radius of an active winter night roost if there is a direct line of sight between the roost and the encroachment activities. If periodic visits (such as oil well maintenance work) are required within the buffer zone after development, activity should be restricted to the period between 1000 and 1400 hours from November 15 to March 15.

Hunting Perch:

Diurnal hunting perches (see 'Definitions' below) associated with important foraging areas should also be protected from human encroachment. Preferred perches may be at varying distances from human encroachment and buffer areas will vary. Consult the Colorado Division of Wildlife for recommendations for specific hunting perches.

GOLDEN EAGLE

Nest Site:

No surface occupancy (beyond that which historically occurred in the area) within ¼ mile radius of active nests. Seasonal restriction to human encroachment within ½ mile radius of active nests from December 15 through July 15.

OSPREY

Nest Site:

No surface occupancy (beyond that which historically occurred in the area) within ¼ mile radius of active nests. Seasonal restriction to human encroachment within ¼ mile radius of active nests from April 1 through August 31. Some osprey populations have habituated and are tolerant to human activity in the immediate vicinity of their nests.

FERRUGINOUS HAWK

Nest Site:

No surface occupancy (beyond that which historically occurred in the area) within ½ mile radius of active nests. Seasonal restriction to human encroachment within ½ mile radius of active nests from February 1 through July 15. This species is especially prone to nest abandonment during incubation if disturbed.

RED-TAILED HAWK

Nest Site:

No surface occupancy (beyond that which historically occurred in the area) within 1/3 mile radius of active nests. Seasonal restriction to human encroachment within 1/3 mile radius of active nests from February 15 through July 15. Some members of this species have adapted to urbanization and may

tolerate human habitation to within 200 yards of their nest. Development that encroaches on rural sites is likely to cause abandonment.

SWAINSON'S HAWK

Nest Site:

No surface occupancy (beyond that which historically occurred in the area) within ¼ mile radius of active nests. Seasonal restriction to human encroachment within ¼ mile radius of active nests from April 1 through July 15. Some members of this species have adapted to urbanization and may tolerate human habitation to within 100 yards of their nest.

PEREGRINE FALCON

Nest Site:

No surface occupancy (beyond that which historically occurred in the area) within ½ mile radius of active nests. Seasonal restriction to human encroachment within ½ mile of the nest cliff(s) from March 15 to July 31. Due to propensity to relocate nest sites, sometimes up to ½ mile along cliff faces, it is more appropriate to designate 'Nesting Areas' that encompass the cliff system and a ½ mile buffer around the cliff complex.

PRAIRIE FALCON

Nest Site:

No surface occupancy (beyond that which historically occurred in the area) within ½ mile radius of active nests. Seasonal restriction to human encroachment within ½ mile radius of active nests from March 15 through July 15.

NORTHERN GOSHAWK

No surface occupancy (beyond that which historically occurred in the area) within ½ mile radius of active nests. Seasonal restriction to human encroachment within ½ mile radius of active nests from March 1 through September 15.

BURROWING OWL

Nest Site:

No human encroachment within 150 feet of the nest site from March 15 through October 31. Although Burrowing Owls may not be actively nesting during this entire period, they may be present at burrows up to a month before egg laying and several months after young have fledged. Therefore it is recommended that efforts to eradicate prairie dogs or destroy abandoned towns not occur between March 15 and October 31 when owls may be present. Because nesting Burrowing Owls may not be easily visible, it is recommended that targeted surveys be implemented to determine if burrows are occupied. More detailed recommendations are available in a document entitled “Recommended Survey Protocol and Actions to Protect Nesting Burrowing Owls” which is available from the Colorado Division of Wildlife

Exhibit F- Public Comment June 10-14, 2021

DEFINITIONS

Active nest – Any nest that is frequented or occupied by a raptor during the breeding season, or which has been active in any of the five previous breeding seasons. Many raptors use alternate nests in various years. Thus, a nest may be active even if it is not occupied in a given year.

Active winter night roost – Areas where Bald Eagles gather and perch overnight, and sometimes during the day in the event of inclement weather. Communal roost sites are usually in large trees (live or dead) that are relatively sheltered from wind and are generally in close proximity to foraging areas. These roosts may also serve a social purpose for pair bond formation and communication among eagles. Many roost sites are used year after year.

Human encroachment – Any activity that brings humans in the area. Examples include driving, facilities maintenance, boating, trail access (e.g., hiking, biking), etc.

Hunting perch – Any structure on which a raptor perches for the purpose of hunting for prey. Hunting perches provide a view of suitable foraging habitat. Trees are often used as hunting perches, but other structures may also be used (utility poles, buildings, etc.).

Surface occupancy – Any physical object that is intended to remain on the landscape permanently or for a significant amount of time. Examples include houses, oil and gas wells, tanks, wind turbines, roads, tracks, etc.

Subject: Project Indiana Comments

Hello Ms Rush,
Please find the following comments for the 6/14/21 Arvada City Council Meeting, regarding RS-086, RS-087, and CB21-016-019. I am requesting they be included in the permanent record.

Members of Council -

Thank you for the opportunity to share my view as you consider this important issue for the residents of Arvada.

This project garnered significant public feedback, within our community and constituents speaking out against a 24x7 distribution operation over six months. The community is here tonight to urge council consider this overwhelming feedback.

The planning commission meeting heard comments from over 50 people. For over 5 hours. None in support of the project.

And concurrently nearly 10k people have added their names to the petition questioning the suitability and compatibility of this project with community interests.

You've heard numerous experts and citizens raise question after question -

- Engineers have concerns on stormwater and water quality in the Ralston Creek watershed
- Engineers have questions on a traffic study whose boundaries barely consider the movements of semi trucks and delivery vans beyond the border of the project's parking lot
- Organizations such as Denver Audubon and The Denver Field Ornithologists have provided project comments identifying impacts to wildlife from noise, light, and traffic.
- **The community, the city, and the applicant don't agree on what constitutes light industrial or heavy industrial land use. And what that means to area residents.**

The redeeming benefits to the community from this distribution center haven't surfaced. Claims of economic benefit from property taxes generating a positive revenue flow are questionable. How will this offset the costs to maintain our roads? How does this negate impacts to surrounding property valuations? And this is before considering the overall quality of life of residents. The math just isn't there.

Tonight's challenge is about creating a shared vision of what qualifies as "good". The Comprehensive Plan is intended to be reflective of the interests of the citizenry, and developed using public input. I challenge you to conclude these are aligned when 10k citizens have taken the time to tell you it is not.

Exhibit E- Public Comment June 10-14-2021

Council members, we appreciate your service, and there will be a time when you consider the next office. Whether in Arvada, at the county, state, or other roles - what will your legacy be? Will you stand faithful to your office, giving voice to the view and opinion of the community? Or will there be a doubt as to whose interests you serve. Should this project pass, I expect the voters memory to be long, as we live with its impacts every day.

Peter Drucker famously said "*Management is doing things right. Leadership is doing the right things*."

Tonight we look to Arvada's council members to be leaders. Not guided by what is perceived as permitted or allowed, but by principles of community service, by what is right, and in the interests of Arvada's residents.
Please do not approve this project.

Thank you.

>>>>

Dear Arvada City Council,

I would like to express my conflicted opinions about the proposed Project Indiana Amazon "last-mile" Delivery Station in Arvada.

First, as an environmentalist, I approve of centralized delivery systems; particularly if they use zero-emission vehicles in the delivery process (which is a requirement I urge the City of Arvada to include as a condition if this project is approved). The greenhouse gas emissions and road wear of 100 households spread across the geography of the City of Arvada individually making 100 separate trips to a big box store to acquire 100 sets of items is much greater than if 10 Amazon delivery trucks spread out over the geography of the City of Arvada to deliver the same 100 sets of items to the same 100 households. I believe the truck traffic and environmental impact of the delivery of those items to either the big box store or the Amazon delivery center to be equivalent . . .

However, I have doubts about the proposed location for this Amazon "last-mile" Delivery Station in Arvada. Isn't there another location, closer to major highways and in less residential neighborhoods where such a facility could be located? Ideally, such a location would not only reduce the distance the large trucks bearing items to be distributed from the delivery station would need to travel but would also concentrate that travel along pre-existing trucking routes.

Finally, if the City Council decides to approve this project; I request that in addition to the use of zero-emission delivery vehicles at the earliest possible moment, the following additional requirement be placed upon Amazon: That Amazon set up Park and Ride lots in locations near/at the G Line parking at Arvada Ridge and the Wheat Ridge & Ward Road stations that will reduce the traffic of individual workers' vehicles going to and from the facility.

Exhibit F, Public Comment June 10-14, 2021

Thank you.

Taylor Jarnagin

RE: Comment Letter, "Project Indiana" Annexation and Rezoning

This letter is submitted to provide comment in opposition to the proposed annexation and rezoning, of approximately 36 acres for purpose of development of a heavy logistics center, an "Amazon Delivery Station," ("the Project") by Scannell Properties, LLC ("the Applicant"). The Project as currently proposed--and the application as currently structured--are substantively and legally deficient in a variety of ways.

I. Deferring Substantive Approvals Until Site Plan Review is Improper

Scannell rejected concerns expressed by residents and the City by pointing to the sequence of approvals, stating that several issues were not currently or properly before the Council. (See letter from Scannell's counsel Brownstein Hyatt Farber Schreck, dated April 19, 2021 ("April BHFS Letter")). It is a peculiar argument for the Applicant to make at this stage, that *impact* issues, because they are related to the final site plan, cannot be considered at this stage; in fact, the *inverse* is true, and this is because the burden of proof in discretionary land use entitlements rests always with the applicant. *See* Arvada Land Development Code ("ALDC") Sec. 8-2-3-2. It is the actual uses and related impacts of a proposed development that comprise the substantive evidence a local agency, in this case the City, must consider in determining whether to approve or deny an entitlement. To the extent any impacts (or indeed even use-types) cannot be determined because they will be "unknown" until a site plan is proposed, then a site plan, or range of possible alternative site plans, should be prepared and submitted to the City, or incorporated into the terms of the annexation agreement which must be approved simultaneously with approval of the annexation. *See* ALDC Sec. 8-3-3-3.

Section 8-3-3-3 of the ALDC prescribes the approval criteria for annexations. There are three criteria for annexation of unincorporated land into the city, and at least two of the three approval criteria contemplate that impacts of the completed development be considered and form the basis for approval of an annexation. *See* ALDC Sec. 8-3-3-3(a)(2), (3). Subsection (3) states with particularity that among the relevant criteria for annexation are whether "at the time any development of the subject property *is completed*, there will be capacity to adequately service residents of such area with all necessary utilities, facilities, and public services."

Exhibit F- Public Comment June 10-14, 2021

The purpose of the annexation ordinance is to ensure not only a generalized harmony with surrounding land uses in terms of the zoning designation, but to ensure that City has knowledge of the actual use and operation of the property according to the plan for development. The April BHFS Letter repeats the contention that zoning approvals are not contingent on specifics of site layouts, which is strictly speaking true. This mistakes the objections the residents raise and elides one issue behind another. A lack of a site plan cannot be grounds to obscure the intensity of the proposed use or details of the operation of a site; in other words, potential site orientations that can increase the intensity of a use--or indeed, alter the essential character of a use--*are* proper factors for consideration. It undermines the language and purpose of the land development code, and in particular the annexation section of the code, to allow applicants to.

II. Annexation is Improper Absent Conformity with the Comprehensive Plan

The proposed project is not consistent with the city's properly adopted Comprehensive Plan, which designates the subject property for office, light industrial or retail opportunity uses, or some blend thereof and designates the stretch of Indiana Street as the "*commercial* focal point" of the City's west side. In Colorado, comprehensive plans are not binding in the same manner as zoning designations, i.e., where a zoning designation legally prohibits approval of uses that are permitted within that zoning district, a comprehensive plan provides guidance. However, cities can incorporate the standards and guidance of comprehensive plans into the zoning codes in such a way as to make them binding. *See e.g.,* Friends of the Black Forest Pres. Plan, Inc. v. Bd. of County Commissioners, 2016 COA 54, ¶ 21-24.

Here, the ALDC expressly *prohibits* approval of an annexation unless it is "in accord with the comprehensive plan." In general, the ALDC imports definitions and designations from the comprehensive plan wherever possible; in fact, the ALDC definitions of different zoning districts rely in turn on the comprehensive plan's standards. *See e.g.,* ALDC Secs. 2-1-3-2; 2-1-6-1; 2-1-6-1; 2-1-6-2; 2-1-6-3; 8-3-4-1; 2-1-3-4. Whatever ambiguity the phrase "in accord" might admit, it cannot be so ambiguous that approving a heavy logistical and industrial use is "in accord" with the comprehensive plan's "light industrial" or office or retail use, and the vision of the area as being part of the City's "commercial focal point" on the west side of the city. The light industrial designation in the comprehensive plan, imported into the ALDC, contemplates minimally intrusive industrial uses without significant outdoor storage, capable of blending with office uses. Perhaps most importantly, the light industrial designation contrasts with the *heavy* industrial designation, which does contemplate heavy traffic, impacts on surrounding properties and outdoor storage. Even absent the appropriately complete impact studies that would City of Arvada

Exhibit F- Public Comment June 10-14, 2021

accompany site plan approval when the site design and layout has been fully determined, it is evident from the evidence in the record and before the City that the Project could only lawfully operate in the heavy industrial classification, which in turn means that the annexation would not be in accord with the comprehensive plan, leaving any approval legally and substantively inappropriate.

III. Per Se Violation of Arvada Land Development Code ("ALDC")

Perhaps to avoid the problem presented by the requirement that annexations conform to designations of the comprehensive plan, the Applicant is seeking a rezoning to the Industrial, Light designation, despite the substantive planned uses of the site clearly being more appropriately fitting the *heavy* industrial zoning designation, or general industrial designation, IG. *See* ALDC Sec. 2-1-6-3. It is in this zone that "heavy logistics" centers are permitted.

The Applicant has plainly requested the incorrect zoning given the current use, and the correct zoning district--IG--would not be in accord with the comprehensive plan, which would make the annexation improper. It is these cascading errors that make any approval of the annexation and rezoning. It is to avoid this cascade of errors that the Applicant has elided or shrugged off obvious and inherent impacts of developing an immense Amazon Delivery Station at this site.

The ALDC contemplates a heavy logistics use is one that generates 50 truck trips or more per day; the Applicant has admitted that for some portion of the year *at least*, this site would generate this volume of trips. *See e.g.,* Applicant's Traffic Impact Study, dated September 2020.

It is worth noting that the Applicant's traffic impact study relies on proprietary data and use characteristics apparently unique to Amazon Delivery Stations, but the study does not bear independent analysis because of its obscured data. It should be noted that Amazon Delivery Stations, beyond the heavy truck, i.e., semi-trailer truck, deliveries, have a particularly frequent rate of truck trips because of the nature of their delivery system. For a similar project proposed in Sonoma in California, it was evident that beyond the standard Amazon employee trucks—the familiar "Prime" branded trucks--there are contracted drivers, "FLEX" program drivers, and potentially other delivery drivers that all participate in Amazon's "last mile" delivery logistics system. How these types of trucks trips would be counted or monitored--and whether they were counted towards the 50-truck threshold that tips it into a generalized "heavy logistics" use, is unclear.

Even despite that, however, the Applicant has admitted that for at least five weeks out of the year, there would be fifty or more truck trips a day, presumably around the holidays and "Prime Days" promotions. The Applicant argues, without any legal authority we could locate, that despite this not only being a predictable result of the proposed use, but an *inherent* result of the proposed use, that because the 50-trip threshold will not be daily or year-round, it is not a proper basis for requiring a higher zoning designation, i.e., from IL to IG. The Applicant seems to be confusing the general land use principle that *incidental* results of a particular use are not germane to a zoning designation with a predictable (and necessary) result of a proposed use.

By way of illustration, approving an industrial park that would or could host a county fair or concert a couple times a year, requiring a significant number of car trips and pedestrian access does not require scrutiny of those impacts in determining whether the zoning designation is appropriate. This would be an incidental or ancillary use.

This is distinguishable from the facts at hand before the Council for the Project. Here, the Applicant acknowledges that for a period of the year, the core function of the Project--the Delivery Station--requires a significant increase in intensity. The spike in package delivery around holidays and at different points in the year is not an unpredictable, incidental, or even optional element of the proposed use. It is *inherent* to the proposed use; it is a part of the business model in fact, as on-line retail, like brick-and-mortar retail, rests in no small part on the significantly larger volume of sales that occur around the end-of-year holidays as well as other key periods throughout the year.

The scale of the Project--with two acres of parking, and with as-yet unclear truck delivery orientation on the site--itself should compel significantly more transparency as to the calculation of truck traffic to and from the site, and the capacity of the site to increase these numbers. Once approved, and once the impervious surface has been laid and capacity created, there will be no going back, so to speak. Therefore, the City has to be adequately notified of not only the precise breakdown of the data used to arrive at the truck traffic analysis, but also the type of enforceable monitoring and limitations the City can place on the Applicant once the Project has been developed.

Given the Applicant's treatment of the periodic cresting of the truck traffic threshold into the IG zoning designation, the Annexation Agreement could (or really, should) include provisions that allow the City to both monitor and limit the use of the site to limit this increase.

Presumably, if the increased intensity of the uses are only incidental and not inherent to the proposed use, the Annexation Agreement could include a provision that allowed the City to prohibit access to the site once a truck traffic threshold had been met--or otherwise take significant remedial measures, such as fines. The Annexation Agreement as currently written includes no such provision, and it is not a stretch to imagine that the Applicant would not agree to a provision that in effect prohibits one of the core uses of the site. Nor would an Annexation Agreement which simply anticipates legal violations and imposes a punishment for them be appropriate, as it would constitute a form of contract zoning unlawful in Colorado. *See e.g.,* Ford Leasing Dev. Co. v. Bd. of Cty. Comm'rs, 186 Colo. 418 (1974).

The Applicant has submitted to an application for a zoning designation that does not fit the *proposed* use of the site, i.e., the substantive use. This mis-classification rests on an improper legal interpretation of how incidental versus inherent impacts should be considered. We therefore respectfully request that the City reject this rezoning request.

Conclusion

For the reasons stated above, as well as the myriad comments, review, and study submitted by other groups, including Protect Maple Valley Park and Ralston Valley Coalition and their members, we respectfully request that the City reject the proposed annexation and rezoning.

Sincerely,

Steven P. Vairma

To: kristen@arvada.org <kristen@arvada.org>

Dear Arvada City Council,

I urge you to vote “no” on the Amazon Fulfillment Center Warehouse Indiana Project.

I have lived at 6226, Devinney Circle in Wyndam Park in Arvada since July 2013. I chose Arvada and this NW area of the city in large part for the quality of life this residential area of town offers with easy access to parks and natural open space and strong neighborhood community feeling. I strongly believe that a project of this magnitude is not compatible with this for these reasons:

1. The proposed Amazon facility will operate on a 24 hour, 7 day a week basis with inadequate mitigation for the added noise, light, and air pollution that will be detrimental to nearby residents, neighborhoods, and the wildlife habitat adjacent to this facility.
2. The additional road traffic will substantially and negatively impact traffic congestion that is already a increasing problem for major roads such Indiana, Highway 72, McIntyre Street, and Ward Road.
3. For the above reasons, this development will have a negative impact on home values and the quality of life in this area.

Please hear my voice and the overwhelming voices of others who reside in this area and stop this project by voting “no.”

Sincerely,

[redacted]

Dear Arvada Mayor and City Council Members,

June 14th, 2021

Please do not let your fellow Arvada citizens and constituents down this Tuesday. The future path of Arvada rests in your hands at this upcoming hearing on the fate of vacant land at Indiana & West 67th Street currently owned by Scannell Properties. First off, I and everyone I've spoken to about the proposed Amazon distribution center cannot believe that the City of Arvada is even considering placing a distribution center in the heart of residential communities. Add to that, it will multiply the frustrations already felt on a vital street like Indiana and the under engineered complex intersections of MacIntyre, West 64th & Indiana and you have the recipe for it to become the biggest joke in urban planning that the metro area has ever seen. There is much talk against the planned Amazon project from nearly all the homeowners in my area. I live in Maple Valley. Most of the talk focuses on disturbing the greenbelt wildlife. I agree with that position but the larger abomination is in what it will do to traffic flow in the area and to Arvada's image as a place to live in general. Back in the 90's when I first moved to this area, Indiana Street used to continue on into West 64th Avenue with a stop sign for 64th Avenue west of Indiana. The current T- intersection was designed back then when that could have been the optimum time to join Indiana and MacIntyre St. as one continuous Street. I do not know why that was not done, but now we are paying the price. Since then, Jefferson County and Arvada have allowed developers (from Leydon Rock, Candellas, 5 Parks, & Whisper Creek for examples) to pour thousands of cars onto an

Exhibit F- Public Comment June 10-14 2021

already overused 2 lane Indiana Street. Have any of these developers, who made millions off their new home sales, paid any money into a fund to widen Indiana Street to 4+ lanes and replace the railroad underpass north of 80th? This is sorely needed but who pays that price ? Now Arvada by way of our volunteer planning committee and our City planner, is potentially green lighting Amazon to pave 36 acres of prime real estate for an easy sleazy way to get cheap tax revenue off of currently unused land. Despite what Scannell Properties is trying to pitch, this development is NOT in the best interest of Arvada! It is in the best interest of Scannell Properties, Amazon, their lawyers, and anyone else benefiting openly or covertly from the money Scannell and Amazon are throwing at this project. The best interest of Arvada would be to turn this property into a mixed use development and take advantage of its close proximity to Ralston Creek trail by adding single and multiplex housing along with brew pubs, eateries, coffee shops, mixed retail, etc. If a short spur off of the main trail were sent to this area for pedestrian walking and biking, the possibilities for such mixed use are exciting but first, Scannell properties needs to sell to a pro Arvada developer.

I just received a mailer this week, likely sent out by Scannell, highlighting proposed "benefits" of a 'Last Mile' delivery station serving our area. What a farce. They claim the development will "generate LESS TRAFFIC than comparable uses or developments such as a big box store". First off, what big box stores would want to locate in an area off of a major street. When compared to more likely mixed use, consistent traffic flow would be far less. It appears however that Scannell is being a bit greedy by perhaps placing the price point for their land at a level only deep pockets like Amazon and other large Corps can afford. Are we going to allow Scannell Properties to bully us into accepting their vision of Arvada's future by continuing to turn this area into an industrial complex? That is NOT why most of us moved to west Arvada. Amazon further says it "intentionally distributes traffic outside of rush hours". There is no promise that they will do this and probably no fines if they don't. We all know that Amazon is a growing giant and that soon if not already, they will be a 24/7 delivery operation. With 1500 parking spaces and nearly 1000 of them for delivery vans, can you imagine the traffic impact on Indiana and the intersections at MacIntyre and West 64th?

In their mailer they also claim to "invest more than $40 million in combined construction and equipment costs". So what?... How much of that money spent helps out Arvada? Their claim to generate over $375k annually in property taxes pales in comparison to how much could be generated by a mixed use development. They go on to claim that "There are NO PLANS to disturb any part of Maple Valley Park as part of the project." As far as I know, Maple Valley Park is a nature and wildlife area. Just placing a 24/7 operation like Amazon's distribution center with 24/7 light, noise and traffic pollution next to this area disturbs it!

The only true statement on this flyer is that this 'Delivery Station" aligns with a vision for the area in the Comprehensive Plan. But, whose comprehensive plan is this?! How much citizen input was sought in this plan? Is it Scannell Properties' plan to make as much money as they can off of this property by steering it towards industrial instead of selling it to a developer who actually cares about the future of Arvada? Are we going to let Scannell dictate Arvada's future? Many Arvadans are not against Amazon building a distribution center in the Arvada area, but believe it should be somewhere with far less impact on the community and nature. There are large tracts of land on Hwy 72 West of Indiana where there is better access for delivery vehicles and the impact to our city will be far less. Have areas like this been looked at?

Perhaps if this is such a touchy subject and too important for a city council vote, at a minimum, it should go to a vote of the citizens of Arvada. If this initiative does pass city council however, I just want to say that you will be failing to serve nearly all your constituents in the surrounding neighborhoods. I believe in you and don't think it will come to that.

Thank you for taking your time to read this. Please, do not allow this proposed distribution center to be built in the heart of one of the nicest residential and commercial areas Arvada has to boast.

Respectfully Yours,

Toby Derloshon

Subject: Vote NO on Project Indiana, 6/14/21

Dear City Clerk Rush (Cc: Councilmember Jones)

On 6/14/21, I urge Arvada's City Council to **vote NO** for Project Indiana

Why?

- Changes the character of Arvada. Amazon doesn't belong so close to residential areas.
- Decreases residential property values, since natural areas will be destroyed. (research shows that homes adjacent to naturalistic parks and open spaces are valued at 8-20% higher than comparable properties)

Thank you,

Wynne, resident, District #4

Subject: Opposition to Maple Valley Park re-zoning

Hi Kristen,

I am writing to confirm and reaffirm my opposition to the rezoning of Maple Valley Park The following are my comments:

Dear representatives (Jefferson County Commissioners and Arvada Council Members),

Your vote matters now more than ever in the potential re-zoning/annexation of the area known as Maptek Valley Park to allow the construction of a facility that will result in the destruction of animal habitat and further damage our suburban lifestyle. Arvada is the farm within the city and our residents (myself included) appreciate this fact. With the annexation/rezoning we are losing not only what Arvada represents to its residents but you are also sending a message that you don't represent the people. I am reminded that a bit ago you single handedly passed a trash service modification that was done to reduce traffic and by consequence, wear and tear on the roads in our neighborhoods - voting yes to this annexation/rezoning would be contrary to that view as you are not reducing traffic/noise pollution/wear and tear - you are just going to make it worse! I have to wonder who will end up paying for repairs to these highly traffic areas?

I hope your vote represents my input and you vote NO to such annexation/rezoning to ensure that we keep our city as we have all grown to love it. I would like my statement read into record at tonight's meeting.

Thank you for your time and deep consideration.

Cesar

CITY OF ARVADA

REPORT TO CITY COUNCIL PUBLIC HEARING

AGENDA ITEM 10.F.

TO: THE HONORABLE CITY COUNCIL DATE: June 14, 2021

SUBJECT: CB21-019 An Ordinance Rezoning Certain Land Within the City of Arvada, Project Indiana, from Jefferson County A-2 (Agricultural) to City of Arvada IL (Industrial, Light) and Five Parcels from City of Arvada CG (Commercial, General) to City of Arvada IL (Industrial, Light) and Amending the Official Zoning Maps of the City of Arvada, Colorado, Generally Located at 6730 Indiana Street, 14725 W. 66th Place, 14785 W. 66th Place, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street (Ordinance No. 4766)

Report in Brief

Scannell Properties, LLC., is requesting approval of an annexation and rezoning application of approximately 24.93 acres of land and a rezoning of approximately 5.36 acres of land already within the limits of the City in order to develop an approximately 112,000 square-foot warehouse fulfillment and distribution center to be leased and operated by Amazon, Inc. The overall project involves the assembly of twelve parcels of land and a portion of land from the property located at 6720 Indiana. Four lots (Lot 1A-4A of the Parkway Center Filing No.6 subdivision) are located along W. 67th Avenue west of Fig Street, are zoned IL (Industrial, Light) and are not part of the annexation and rezoning request.

All of the land proposed to be annexed is currently zoned Jefferson County A-2 (Agricultural), is proposed to be rezoned to City of Arvada IL (Industrial, Light) and has a Comprehensive Plan Future Land Use map designation of Industrial/Office/Retail. Five parcels within the City are proposed to be rezoned from CG (Commercial, General) to IL, and have a Comprehensive Plan Future Land Use map designation of Neighborhood/Community Commercial.

The applicant proposes to construct the building and lease it as a warehouse fulfillment and distribution center for packages and deliveries ordered by customers and delivered via a van-fleet. The center would operate 24 hours per day, seven days per week, and would employ up to 460 workers annually and up to 1,000 seasonally. The operation of the site would include up to 42 semi-truck deliveries per day. A portion of the western footprint of the building would be used for office uses and for customer package drop offs and pick-ups and customer service. The rest of the building would be used by workers who would facilitate the organization and packaging of products. On the north side of the building where a canopy and drive is located, packages would then be loaded into various delivery vans and the vans would egress from the site delivering packages to the customers.

The report to the Planning Commission and other documentation is attached to item 10.E.

The Arvada team recommends that the City Council approve CB21-019, An Ordinance Rezoning Certain Land Within the City of Arvada, Project Indiana, from Jefferson County A-2 (Agricultural) to City of Arvada IL (Industrial, Light) and Five Parcels from City of Arvada CG (Commercial, General) to City of Arvada IL (Industrial, Light) and Amending the Official Zoning Maps of the City of Arvada, Colorado, Generally Located at 6730 Indiana Street, 14725 W. 66th Place, 14785 W. 66th Place, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street.

Financial Impact

There will be no financial impact.

Background

The property proposed to be annexed into the City is comprised of three parcels located at 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a portion of 6720 Indiana Street. Each of these properties currently contain a single-family home and associated accessory buildings, outbuildings, barns, and other structures generally used for agricultural purposes.

Two properties located at 14785 W. 66th Place and 14725 W. 66th Place are within the jurisdictional boundary of the City of Arvada and are currently zoned CG (Commercial, General). These properties (Lots 9 and 10 of the Indiana Business Center subdivision) were annexed into the city in 1980 with the Roske Rose Alderfer Annexation and platted in 1983. These two lots are currently undeveloped. One property containing three parcels located at 6730 Indiana Street was annexed into the City in 1979 with the Binder Annexation and has not been platted. This property is also zoned CG. Currently this property contains one single-family home and associated accessory buildings.

Discussion

Scannell Properties for the City of Arvada is requesting approval of an annexation and rezoning application for Project Indiana. The annexation consists of approximately 24.93 acres. The property is zoned Jefferson County A-2 (Agricultural) and the requested rezoning is IL (Industrial, Light). The following information summarizes the Community and Economic Development team's analysis of the approval criteria:

Div. 8-3-3 Annexation and Disconnection Approval Criteria	**Finding**	**Rationale**
1. The annexation is in accord with the Comprehensive Plan and the best interests of the City would be served by annexation of such property.	Complies	The annexation is in accord with the Comprehensive Plan. The Comprehensive Plan Future Land Use map designation for the area proposed to be annexed is Industrial/Office/Retail. The proposal aligns with that designation.
2. The property is capable of being integrated into the City and developed in compliance with all applicable provisions of this Code and the Arvada City Code.	Complies	The property is an enclave surrounded by the City and can be integrated into the City and developed in compliance with all provisions of the LDC and other City codes.
3. At the time any development of the area proposed to be annexed is completed, there will be capacity to adequately serve residents of such area with all necessary utilities, facilities and public services.	Complies	Existing utilities are available in and around the site and the City has capacity to service it.

Div. 8-3-4 Zoning and Rezoning Approval Criteria	**Finding**	**Rationale**
1. The rezoning is consistent with the Arvada Comprehensive Plan, or an adopted sub-area plan, corridor plan, or urban renewal plan, or reflects conditions that have changed since the adoption of the Comprehensive Plan.	Complies	The Comprehensive Plan Future Land Use map designation for the area proposed to be annexed is Industrial/Office/Retail. The proposed rezoning to IL (Industrial, Light) aligns with that designation and is intended to implement this designation in the Comprehensive Plan. The five parcels proposed to be

		rezoned from CG (Commercial General) to IL is also consistent.
2. The intended land use is consistent with the stated intent of the proposed zoning district.	Complies	The proposed warehouse and distribution center, use which is defined in the LDC as Light Industry, is consistent with the intent of the IL zone district.
3. Facilities and services (including sewage and waste disposal, water, gas, electricity, police and fire protection, and roads and transportation, as applicable) will, prior to development, be available to serve the subject property while maintaining adequate levels of service to existing development.	Complies	Facilities and services are available to service the development and will be built out with the construction of the site.
4. The intended land use for which the rezoning is sought will not result in significant adverse impacts upon the natural environment, including air, water, noise, stormwater management, wildlife, and vegetation, or such impacts will be substantially mitigated.	Complies	The intended land use will not result in significant adverse impacts. Efforts to mitigate negative traffic, lighting, noise, and visual impacts will be reviewed with the Site Plan application. A buffer will be required along the northern boundary which will add a wall and large trees to reduce noise and lighting impacts. Additional mitigation efforts will be dealt with in the Site Plan application.
5. The rezoning is consistent with the character of existing or planned development on adjacent properties and in the surrounding area or neighborhood, or measures will be taken to substantially buffer or otherwise substantially mitigate any negative impacts.	Complies	The rezoning is consistent with the character of the existing neighborhood to the west, east, and south which are zoned as either IL or IG (Industrial, General) and contain industrial uses. The northern boundary will be buffered in order mitigate negative impacts to the park.

Public Contact

The required neighborhood meeting for this project took place on November 18, 2020 and in conjunction with the Maple Valley Park annexation case. Due to the COVID-19 pandemic, a virtual neighborhood meeting was held. The applicant and Arvada team members were in attendance as well as 35 neighbors.

A second virtual neighborhood meeting was held on March 11, 2021 also in conjunction with Maple Valley Park annexation. Approximately 300 residents were in attendance at the meeting.

Written notice was sent 15 days prior to the meeting, a published notice was posted in the newspaper 15 days prior to the meeting, and a public hearing sign was posted 15 days prior to the meeting

Commission Recommendation

The Planning Commission voted 4 to 2 (1 absent) to recommend approval to the City Council.

Strategic Alignment

This project aligns with the Community and Economic Development Priority Area of the City Council Strategic Plan. Specifically, the recommended action supports the following Principle:

Uses the Comprehensive Plan to guide planning, land use code decisions, development management, and informational and resource services that are delivered to residents, businesses, the development community, decision-making bodies, and neighborhood partners to achieve a well planned, aligned, sustainable, and livable community for current and future generations.

Alternative Courses of Action

NA

Recommendation for Action

The Arvada team recommends that the City Council approve CB21-019, An Ordinance Rezoning Certain Land Within the City of Arvada, Project Indiana, from Jefferson County A-2 (Agricultural) to City of Arvada IL (Industrial, Light) and Five Parcels from City of Arvada CG (Commercial, General) to City of Arvada IL (Industrial, Light) and Amending the Official Zoning Maps of the City of Arvada, Colorado, Generally Located at 6730 Indiana Street, 14725 W. 66th Place, 14785 W. 66th Place, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street.

Suggested Motion:

I move that CB21-019, An Ordinance Rezoning Certain Land Within the City of Arvada, Project Indiana, from Jefferson County A-2 (Agricultural) to City of Arvada IL (Industrial, Light) and Five Parcels from City of Arvada CG (Commercial, General) to City of Arvada IL (Industrial, Light) and Amending the Official Zoning Maps of the City of Arvada, Colorado, Generally Located at 6730 Indiana Street, 14725 W. 66th Place, 14785 W. 66th Place, 6700 Indiana Street, 6702 Indiana Street, 6710 Indiana Street, and a Portion of 6720 Indiana Street, be (approved on final reading, numbered 4766 and ordered published by title only) (rejected).

CITY OF ARVADA

REPORT TO CITY COUNCIL

AGENDA ITEM 13.A.

TO: THE HONORABLE CITY COUNCIL DATE: June 14, 2021

SUBJECT: Review of Future Workshops and Presentations

Report in Brief

The City Manager's Office maintains a list of upcoming workshops and presentations to be scheduled for City Council meetings. During City Manager Reports, at the end of City Council business meetings, City Manager, Mark Deven, will review with City Council the tentative schedule and make any adjustments necessary.

Financial Scenarios for Street Maintenance Deficit/Options for Increasing Maintenance Funds Engage City Council in a discussion around the current street maintenance needs and how the City might fund them. This will include revenue enhancements, future allocations and expenditure realignments.	TBD	PW/Fin/ CMO
Fiber Master Plan The Fiber Master Plan which is also called Arvada Fiber Optic Network (AFON), was first presented to City Council 4/10/2017. City Councils had set a strategic goal to build a fiber network to enable high speed/real-time connectivity to city facilities and assets in order to enhance city operations. This workshop is intended to brief City Council as to the progress of the AFON build out. Updates are intended to cover conduit installation progress, fiber installation progress, current collocate opportunities, IGA member updates, and connections to current assets (city buildings, traffic, signals, utilities, radio, etc.).	TBD	PW
Community Survey Update The purpose of this item is to continue a discussion with Council about the Community Survey results and what the City team is doing to apply what is learned. Discussion will include an update on action plans targeting key drivers of the City's 5-star rating as well as how Worksystems are targeting specific measures.	TBD	CMO
